

# How to create a transparent logo on Canva

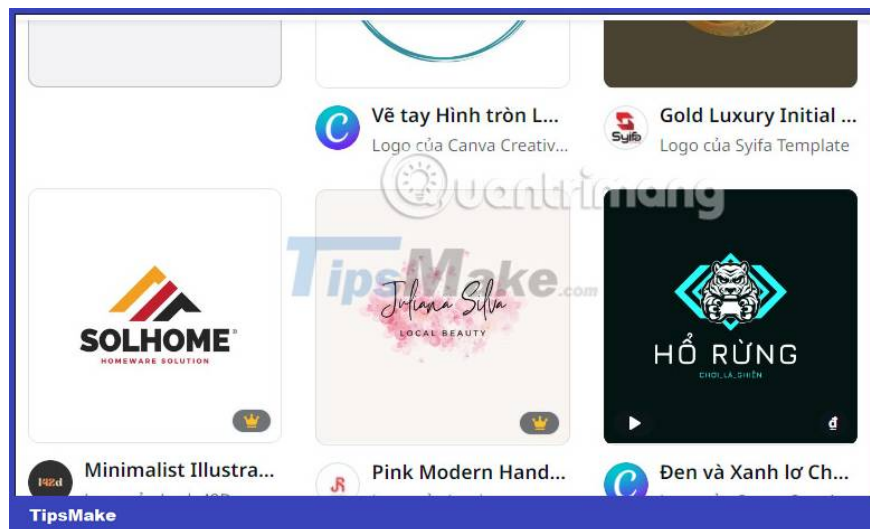

To create a transparent logo on Canva you will use the image background eraser to get a transparent background. The following article will guide you to create a transparent logo on Canva.

Canva has the option for you to design a logo on Canva based on existing templates or create your own with the logo creation options available on the site. And the logo after creating on Canva can be changed to a transparent style so that we can easily combine the logo with other images without revealing the background of the logo. To create a transparent logo on Canva you will use the image background eraser to get a transparent background. The following article will guide you to create a transparent logo on Canva.

## Instructions for creating a transparent logo on Canva

### Step 1:

First, you create a logo on Canva as usual, or immediately choose an available logo on Canva to use.

If you use the logo template included in Canva, click Customize this template to use it.

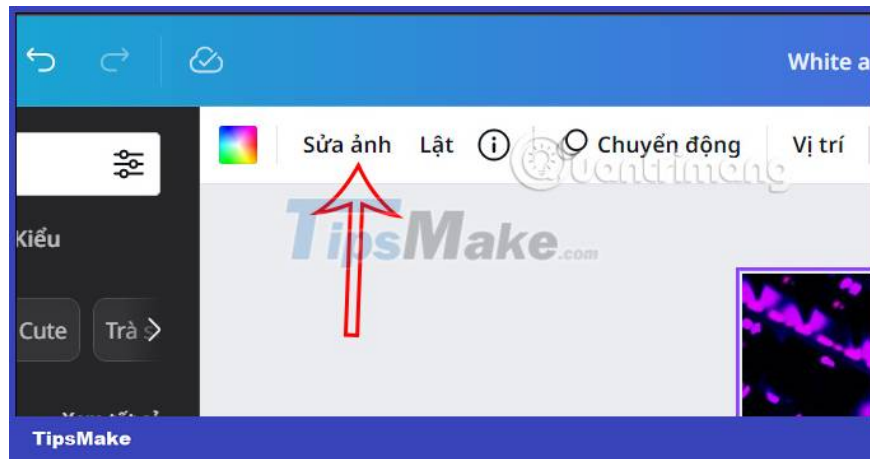

### Step 2:

In the interface to customize the logo according to your logo design ideas, we change the details and colors with the tools that Canva supports.

### Step 3:

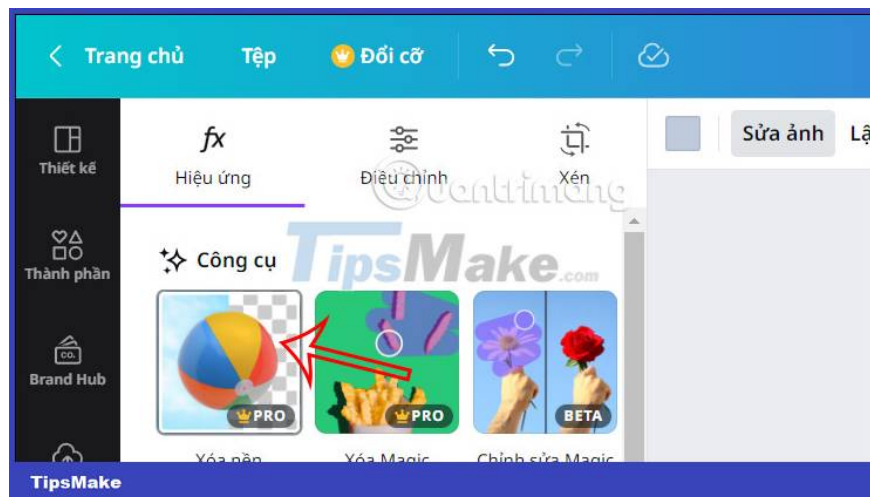

Next we **click on the background of the logo image** to edit and then click on **Edit image** in the upper bar to adjust.

#### Step 4:

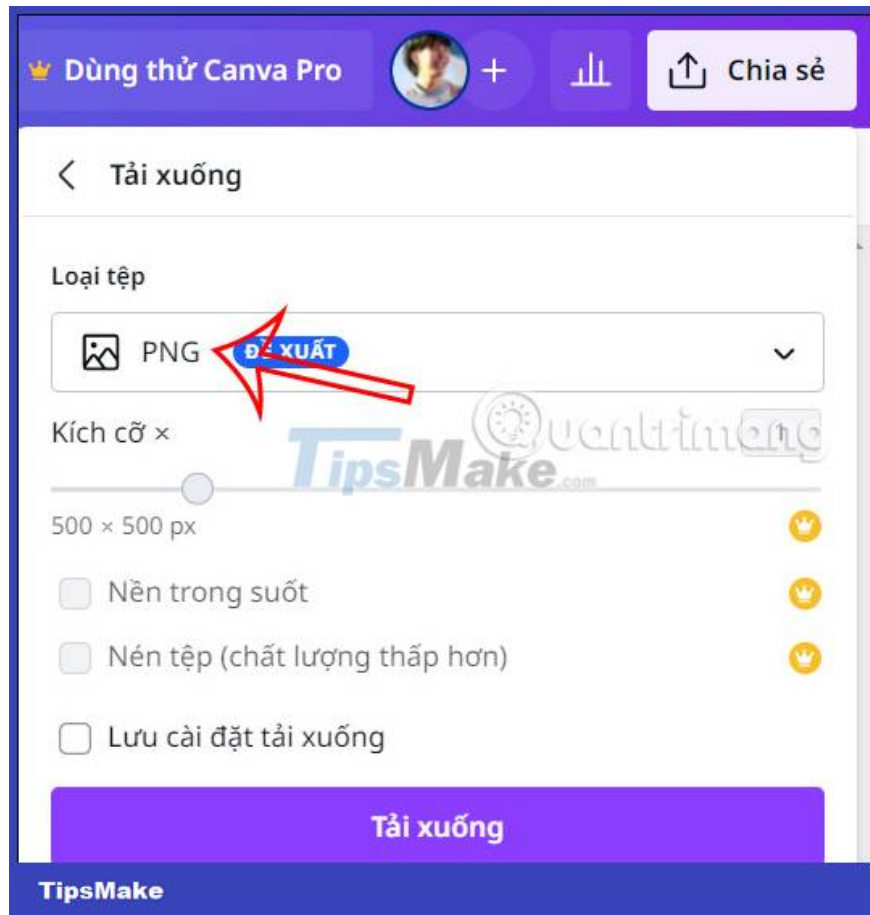

Now we will see a **background eraser** to remove the background of the logo image you are designing. Currently, this feature only applies to the Pro version, so you need to pay attention.

After applying this tool, the logo will be removed from the original background.

#### Step 5:

Users will save the transparent background logo in PNG format to get a transparent logo image. You click on the Share item and then click Download and then choose the PNG format to save the image to get a transparent background logo image.
