

How to create a transparent wallpaper on your phone is very simple

-- Wallpaper on the phone is no stranger to the smartphone. However, when you open the app, you will not be able to see the wallpaper you have installed. To help you see the background image when opening any application, here Techz will guide you how to do it.

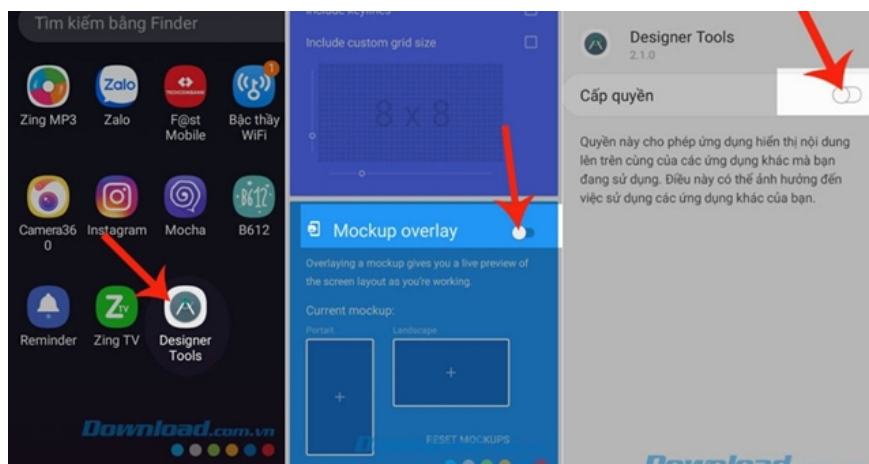

Currently there are many software to help you do this and Designer Tools is an application that can help us check or reinstall the wallpaper on your phone. One feature that will keep you interested is creating transparent wallpapers. Here we invite everyone to follow the tutorial on making transparent wallpapers on Android phones with Designer Tools.

How to create a transparent wallpaper on your phone

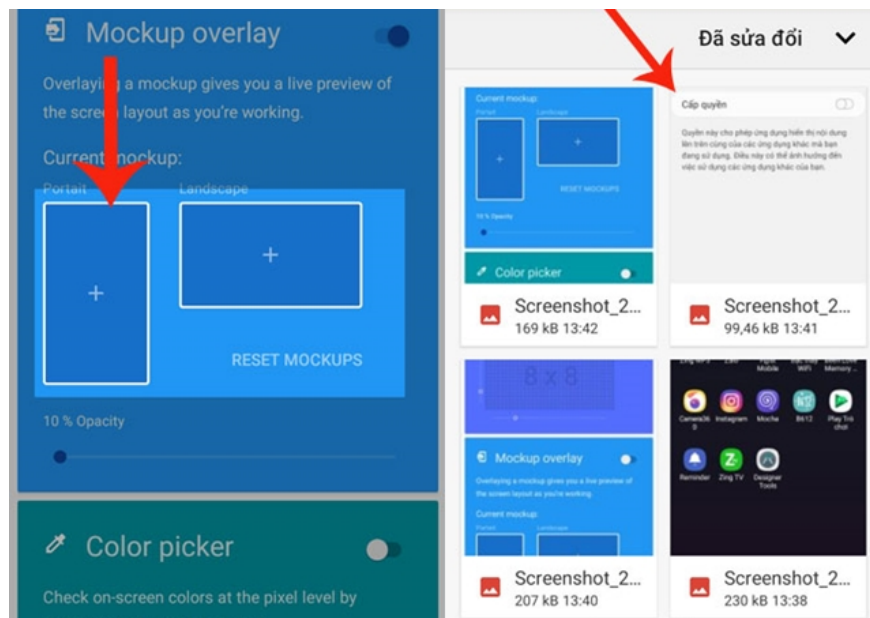

Step 1: Download the **Designer Tools** application on CH Play

Step 2: After the download is complete, open the Designer Tools application on your phone

Step 3: Turn on the switch to Authorize the application.

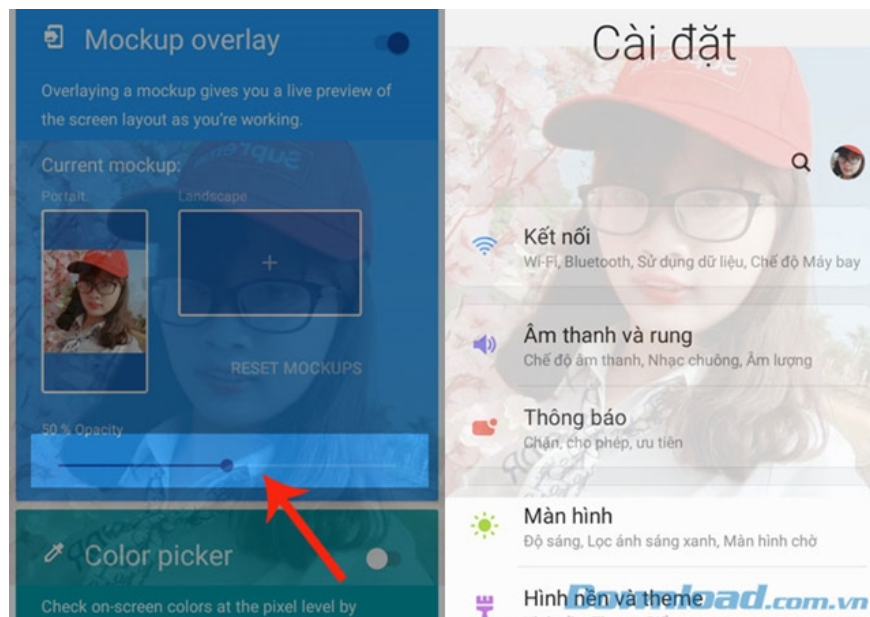

Step 4: Click the box and select the image you want to be the wallpaper.

Step 5: Move the Opacity bar to adjust the opacity of the image.

Step 6: Go out and enter any application of your phone, you will immediately see the results.

The above is a guide to making a transparent wallpaper on Android phones, hopefully through this everyone will be able to give their mobile phone an impressive background image. Hope you are successful.
