UltraIOS is one of the best virtual drive operating software available today. This software allows you to create ISO files from a normal drive to store game installation files, operating systems. It has built-in tools for editing ISO data, converting disc formats or extracting files.

Today, TipsMake.com will show you how to create a virtual drive with UltraISO quickly.

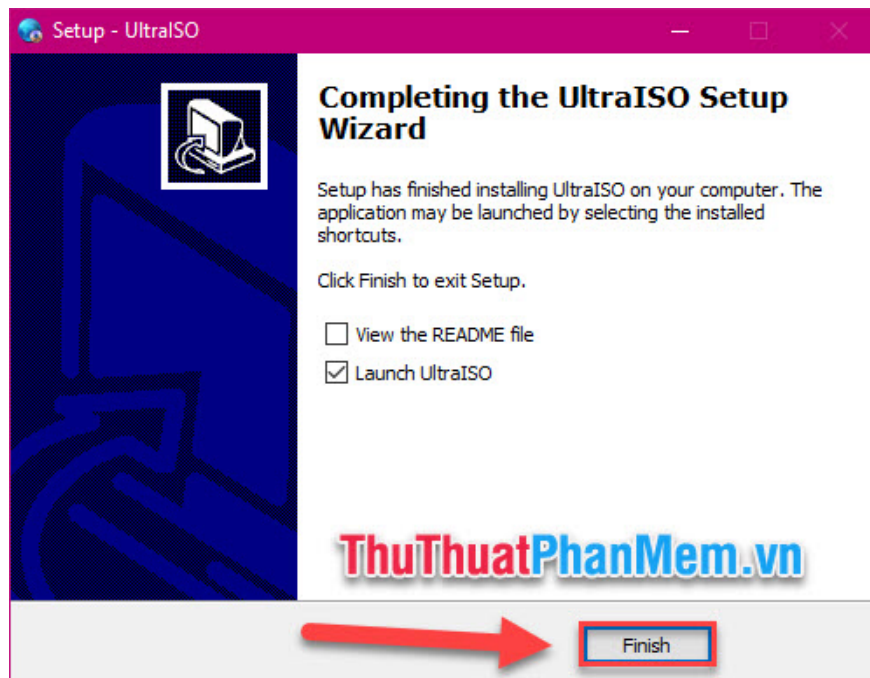

## Create virtual drives with UltraISO software

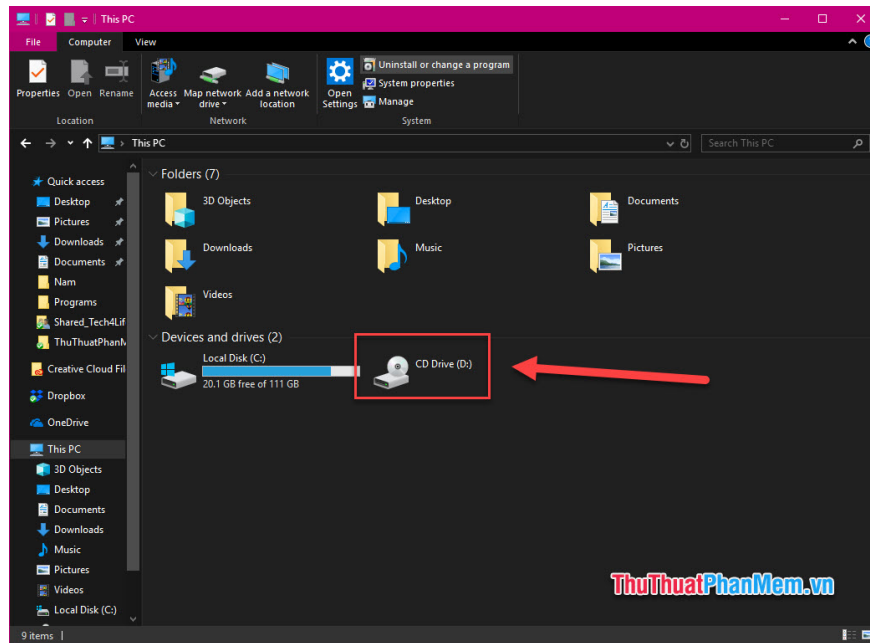

Step 1: Download and install the software at <https://ultraiso.vi.softonic.com/>. The installation process is very simple, you just need to click Next in the windows to do it.

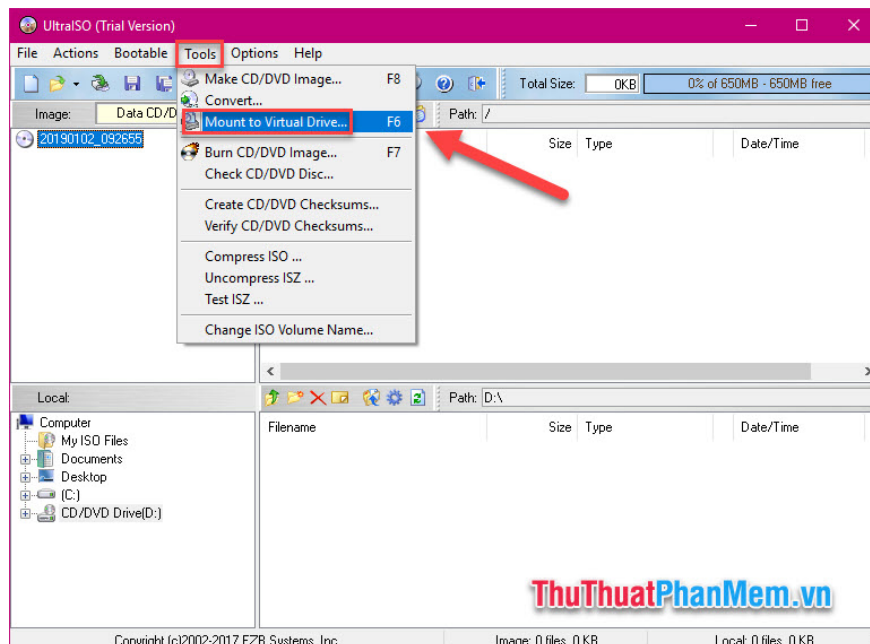

Notice of successful installation:

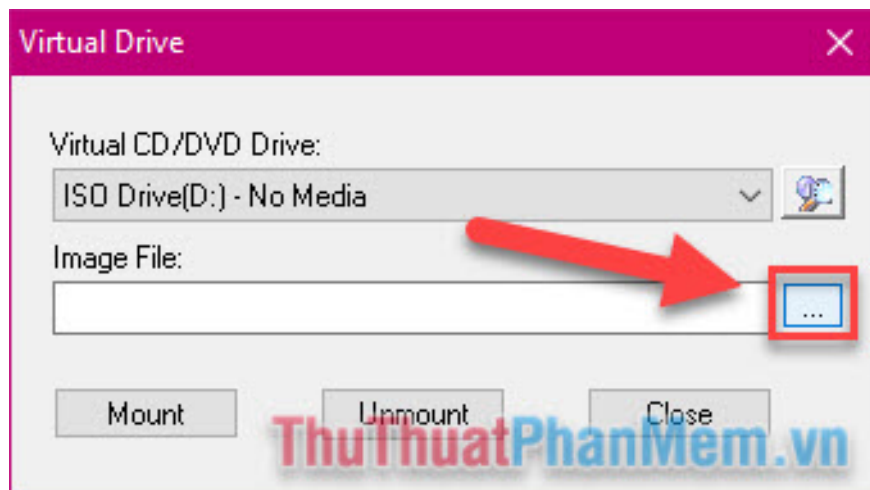

Step 2: After installing successfully, you will see a new virtual drive appear.

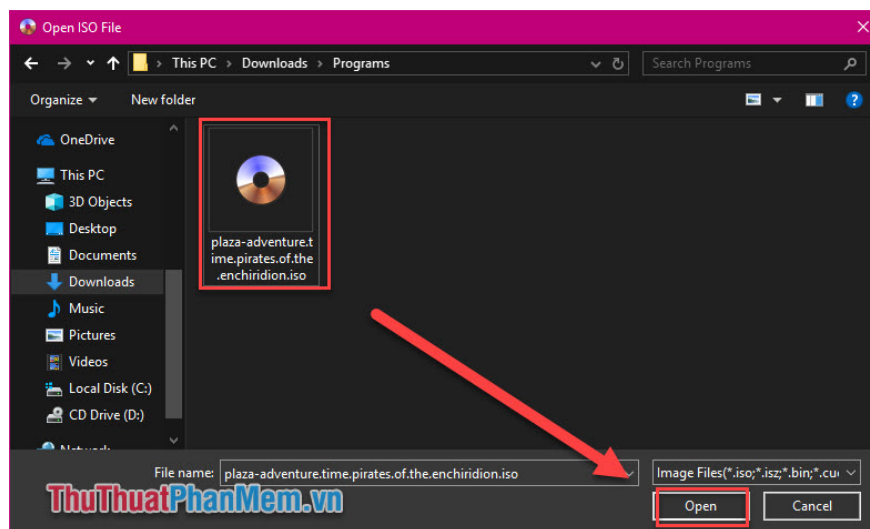

Step 3: To use a virtual drive, open UltraISO software, in the main interface, select Tools >> Mount to Virtual Drive .

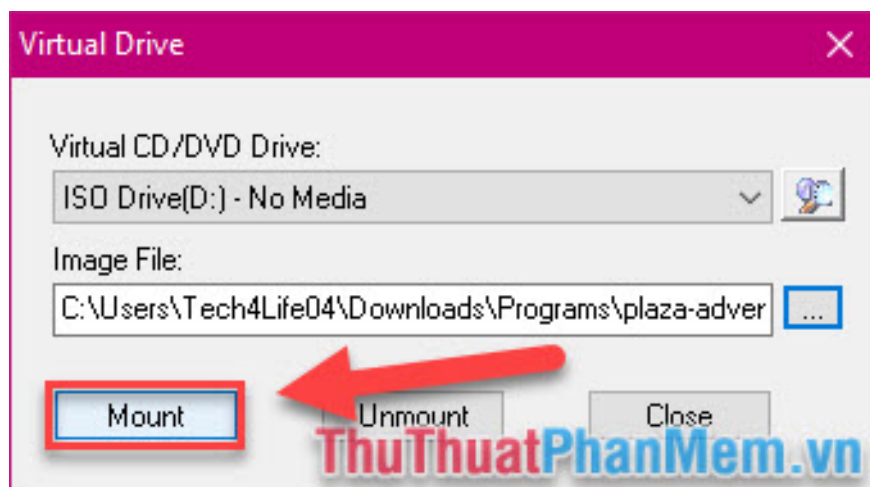

Select the browse icon:

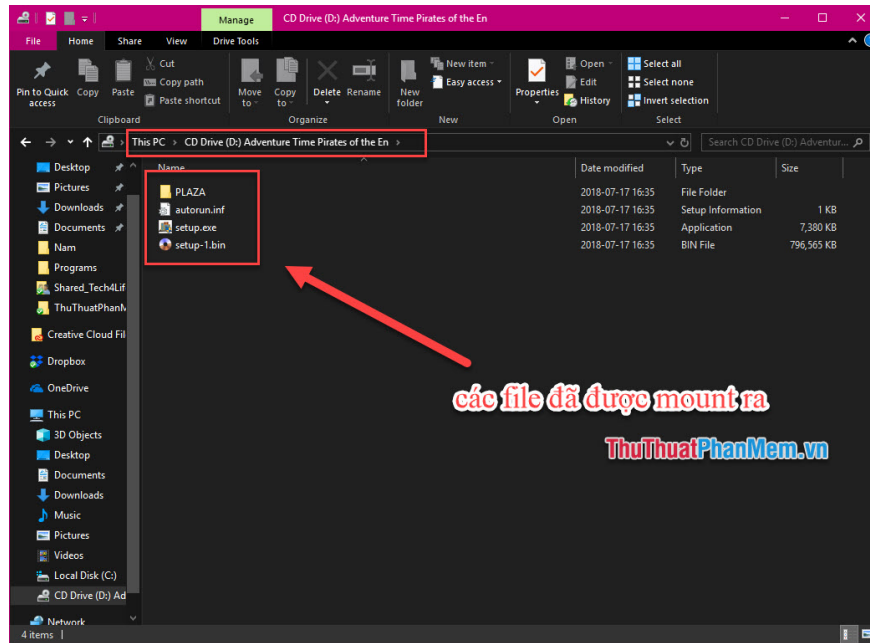

Step 4: Select the ISO file you downloaded from the web, this file can be game, operating system or anything else, then Open.

Step 5: Once the file has been added, click Mount.

After the Mount process is finished (about 2-3 seconds), open the virtual drive and verify the results.

From there you can use a virtual drive like the drive on your computer, select, open, change internal files at will.

So after completing this article, you know how to create virtual drives, mount ISO files using UltraISO. Good luck!
