Step 6 : So, complete the process of creating a Vietnamese virtual phone number. If using for a long time, please download **TextNow** to your phone!

- On the phone

First you need to download the application to your phone.

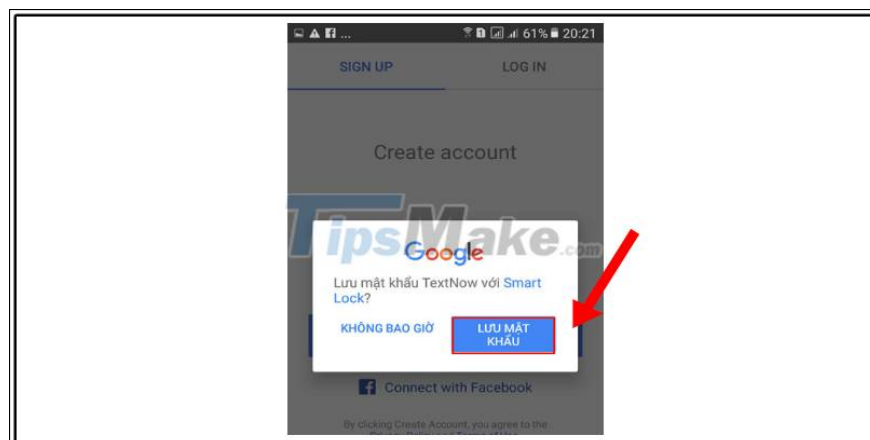

1. + Download TextNow Android [HERE](#) .
2. + Download TextNow iOS [HERE](#) .

Step 1 : On the **Welcome to TextNow** dialog , click **Get a free phone number** to set up an account for the virtual phone number you want to create.

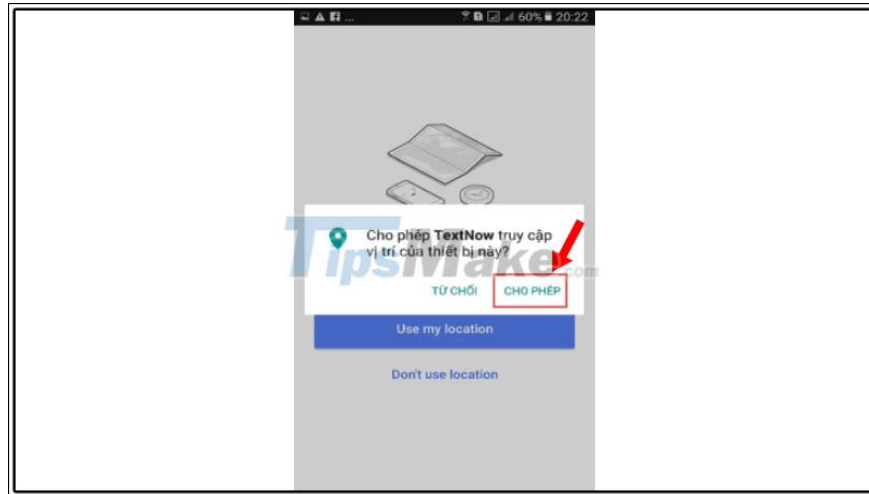

To register an account, enter your **Email and password** and click the **Create Account** button . Here you do not need to enter a real Email, just have **@ .com** .

Step 2 : Then press the **Continue** button to continue. Then select **Save password with Smart Lock** so you can save your account info to your phone.

Step 3 : Click on **Use my location** . Then shows **Allow Textnow** interface **to access this device's location?** and click **ALLOW** .

Step 4 : Dialog box **Choose a phone number** appears, at this time enter the country code of Vietnam is **84** in the box **Use my location** .

Step 5 : A list of reference phone numbers is displayed, you can click your favorite phone number then click **Continue** .

Step 6 : Now the **Textnow** application asks you to share the virtual phone number that you just created on Facebook, you can press **No** to decline.

After completing the steps, you have a new phone number to serve your purpose.

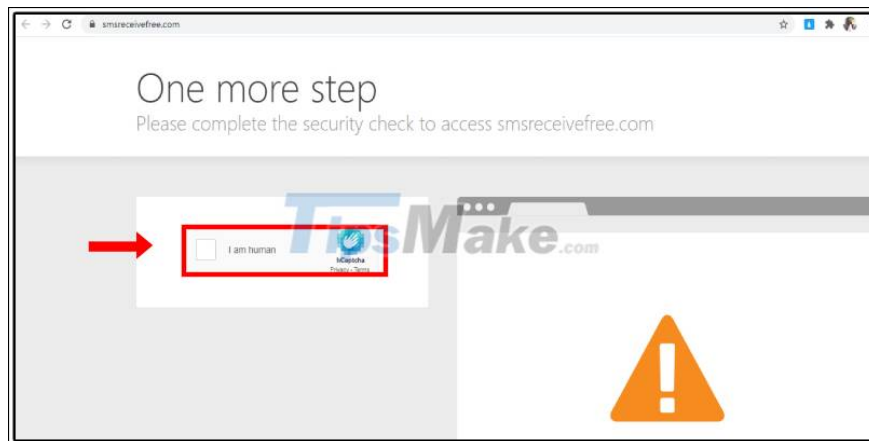

2. Instructions on how to create virtual phone numbers in other countries

- On the computer

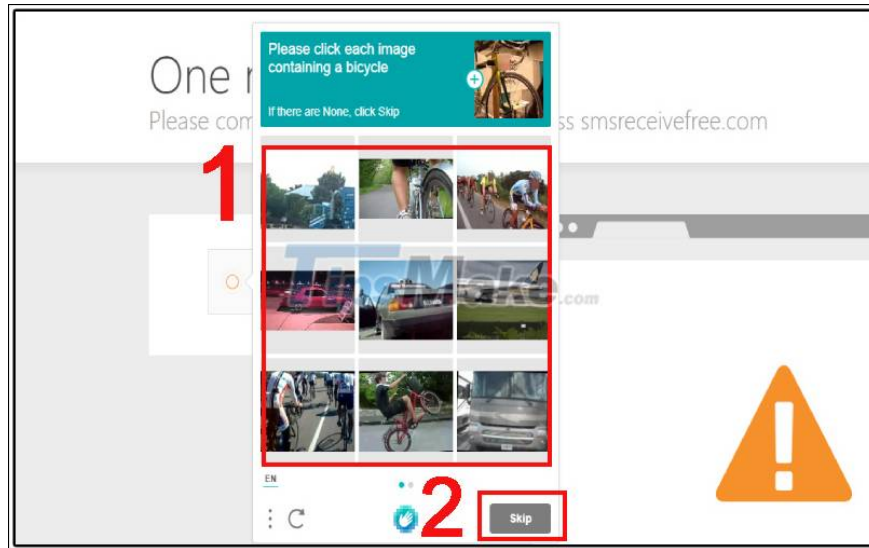

Defect

1. - You can use US and Canadian phone numbers to register for services.
2. - Phone number can change within 24 hours.
3. - The registration process is not complicated, there is no advertising.
4. - Only 15 phone numbers are provided per day.

Step 1 : Access [HERE](#) to create a virtual phone number on the computer and click **I am human** and select the required photo.

Choose the appropriate picture and press **Skip** .

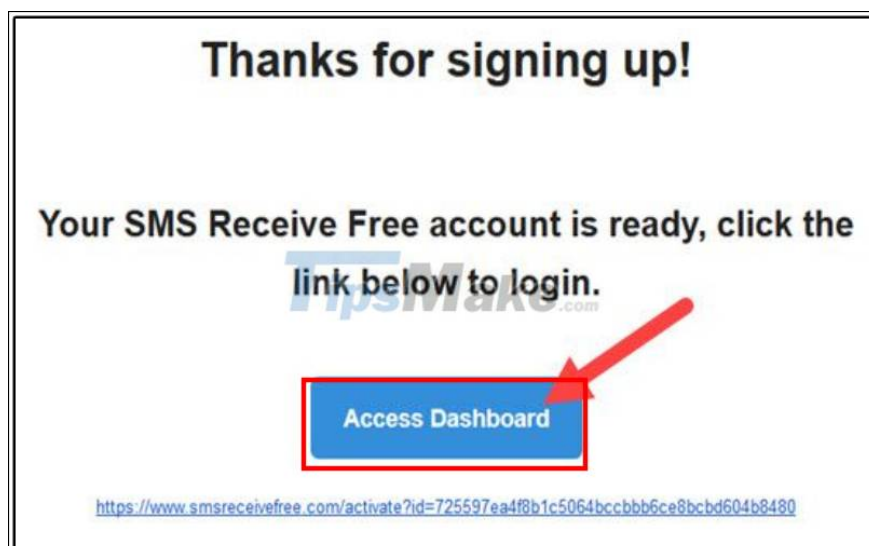

Step 2 : Enter your email address and press **SIGN UP** to register yourself an account.

Note : after registration is complete you must go to this Email to activate your account and use.

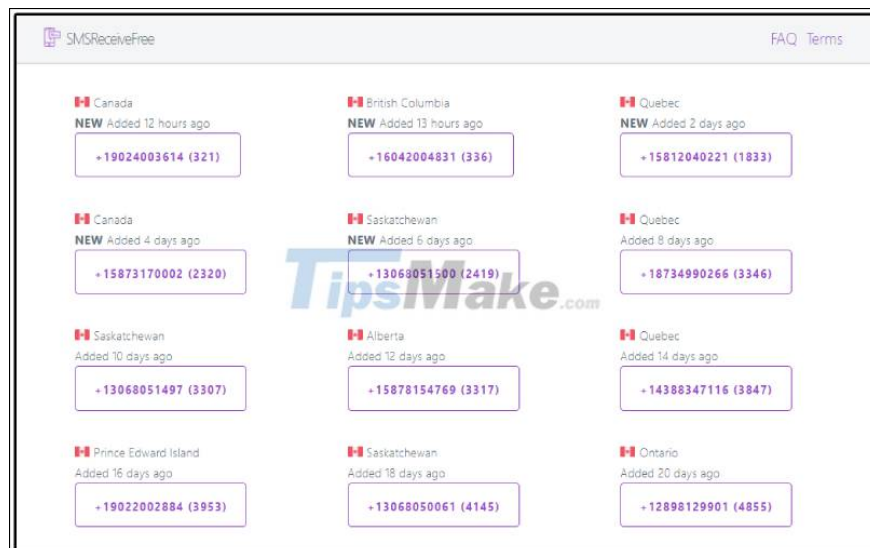

Step 3 : Open your mailbox and you will see a mail coming from this service, where you click on **Access Dashboard** to activate your account.

Step 4 : At that time, you can return to the place where you can create a virtual phone number, then choose 1 of the 2 countries where you plan to create a virtual phone number, the US and Canada.

Step 5 : Then choose any number for you, note that these numbers will be changed after 24 hours.

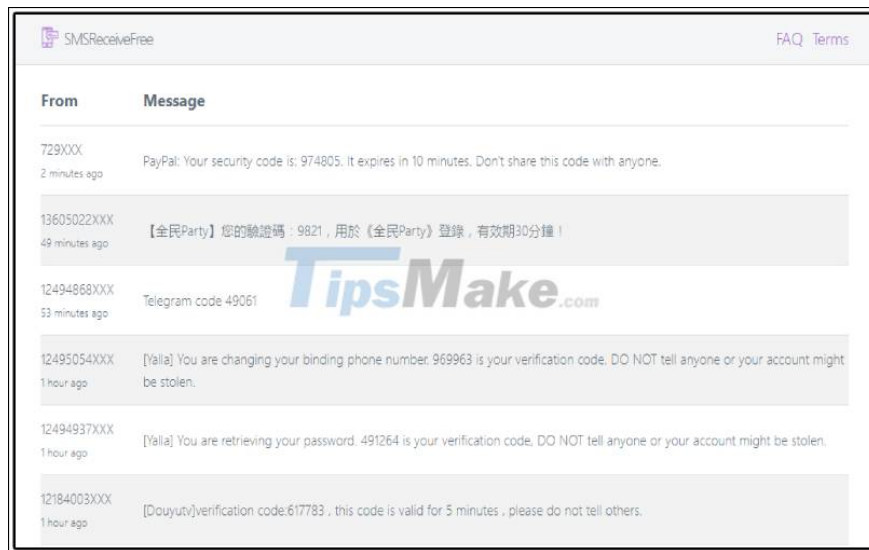

Step 6 : This is your number, you have successfully created a virtual phone number and can now use it to register your phone number.

Note : The Canadian prefix is ??+1, so as in the picture below it is +13068050061. When registering for the service, just fill in 3068050061.

Below will display the entire history if you use that phone number or someone uses the service.

- On the phone

To create a virtual phone number on mobile devices, you need to install **TextPlus** application for your device. You can download apps here:

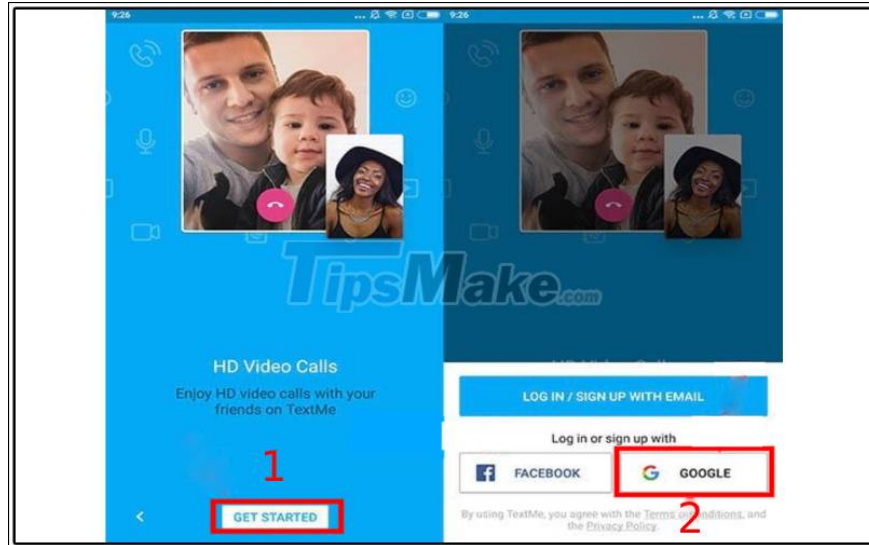

1. + Download TextPlus for Android [here](#).
2. + Download TextPlus for iPhone [here](#) .

Defect

1. - TextPlus is easy to use, has many countries to choose from.
2. - Free to use.
3. - The phone number is quite small, mostly US.
4. - Free to use for 15 minutes.

Your phone device already has **TextPlus** , please follow the instructions below!

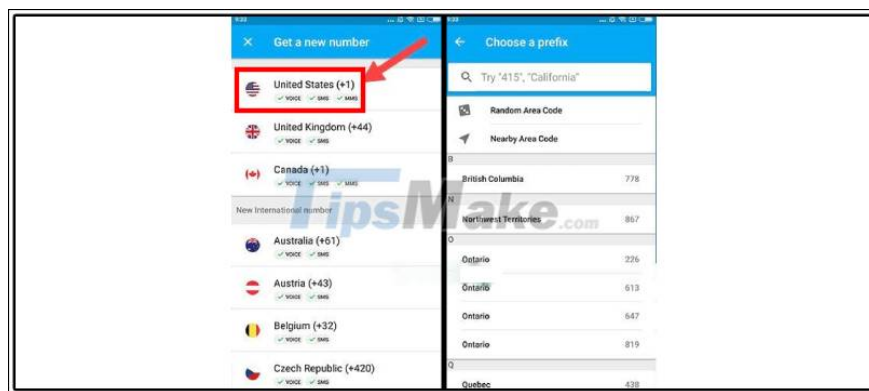

Step 1 : Sign in **TextPlus**, select **GET STARTED** > Select **FACEBOOK** or **GOOGLE** .

Step 2 : Here you click the section **Number** > Options marked with a " + " to create a virtual phone number.

Step 3 : Next, you select the corresponding country and region, here I choose the US.

?

Step 4 : Select any number, you will find yourself having 15 minutes to use before you change another number.

The above article has instructions on how to create virtual phone numbers with area codes for Vietnam and other countries. Good luck!
