

How to create animated effects on iPhone

To create an impressive video, you can add animated effects using the Werble application.

Video editing applications on the phone, or mobile photo editing application always make a difference, stand out from the original image. Creating animations for images or videos also makes the picture interesting.

Werble is an animation application for images. The number of effects that Werble offers is rich, from the movement of fire, rain to falling, fireworks, etc. Users can choose the type of dynamic effect to apply to their photos. The image will be saved as GIF or video. So we can use videos as avatars on Facebook. The following article will guide how to use Werble on iPhone.

1. The best free photo editing software on your computer
2. The best photo compositing software on computers, iPhone, Android
3. How to make clouds effect for still images

Instructions for using Werble to create animated images

Step 1:

The current application is only available for iOS versions. Please read the link below.

1. Download the Werble iOS app

Step 2:

Once downloaded, you will see the application interface of the application, users swipe right to start and click **I'm Ready** to use.

Step 5:

Switch to the interface to add effects to images. Because of the free version of Werble, there will be a logo at the bottom of the image. You will have the effect pack available with the Starter Pack. If you want to add an effect pack, click **More Art** .

Display effects package interface with many different topic groups. Click the **Free text** effects to download the application.

Step 6:

Select the effect you want to apply to the image. When clicking on any effect will apply to try on the image for users to preview. In addition, we can **adjust the size** and **position of the effect** by moving the image to match the main image. The white frame will be used to adjust the effect
