

# How to create animations with 3D effects on Windows 10

Windows 10 Photos app can create amazing animated 3D effects.

Previously, Network Administrator showed you a lot of ways to create animations such as using online gif services, or using gif image creation software. And if you want to create more unique 3D effects for your animations, you can immediately use the Photos app on Windows 10.

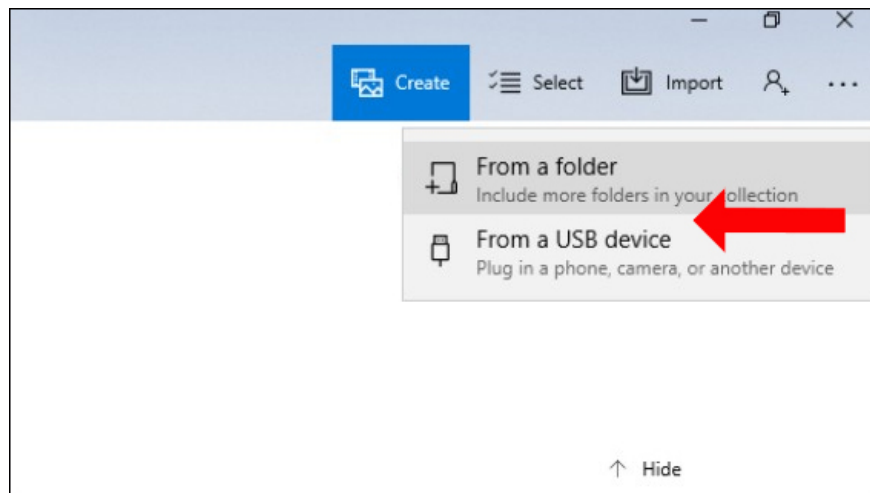

The Windows 10 Photos app has a lot of useful features, especially video editing like cropping videos, creating slow motion videos. Recently the manufacturer has updated the feature to add 3D effects to the animation on the application. Accordingly users can create animations from still images and add unique 3D effects to the image. The following article will guide you how to create gif images on Windows 10.

1. Instructions for creating animated GIF images in Adobe Photoshop
2. Instructions for creating GIF images on Youtube do not need software
3. How to create animations from videos using Imgur.com

## Instructions for creating GIF animation 3D Windows 10

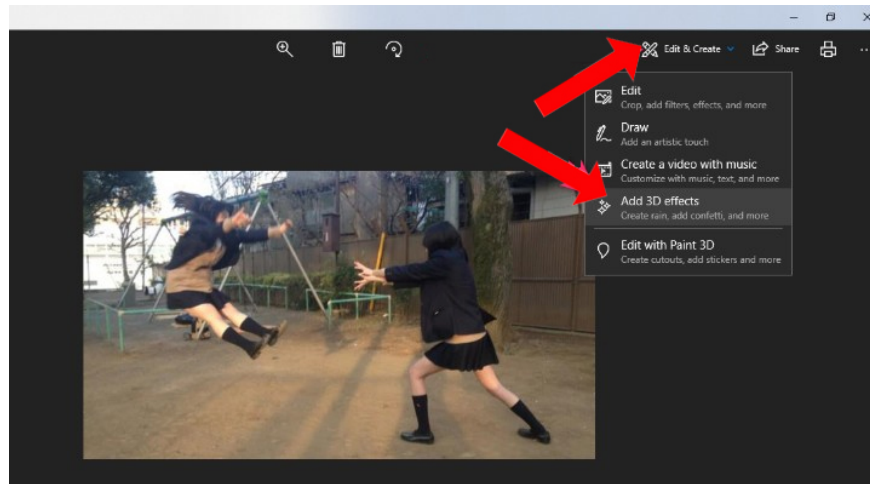

### Step 1:

You open the Photos app on Windows 10 and then click **the Import button** in the right corner, then select the photo you want to add a 3D effect. Select From a folder or From a USB device to get the image.

## Step 2:

In the user editing tools interface, click the **Edit & Create** button at the top, select **Add 3D effects** in the list that appears.

## Step 3:

The photo editing interface will then appear with 3D effects that the Photos app supports users. You can select animated effects, with sound.

Click on the 3D effect on the screen to the right of the screen. Users can also enter keywords in the Search effects frame.

The effect when selected will automatically be applied to the image when the user clicks select. **Note that** the effects in 3D Library will need to be downloaded for use because it is not available to apply to images.

#### Step 4:

After adding effects to the user image can be customized by moving, resizing, changing the direction of the effect, . Use the adjustment buttons that appear in the effect.

The horizontal bar below is used to change the time the effect appears, by clicking on the blue slider.

#### Step 5:

When you have finished editing the 3D effect for the image press **the Done button** to save it.

To save the image press **the dot icon** on the right corner and select **Save as** . The image will be saved in MP4 format and saved with the original photo folder. Thus users will have 2 photos, 1 original image and 1 3D effect animation.

### Step 6:

To share photos with friends, click **the Share button** on the toolbar and select the application you want to share.

So there is no need to install the support tool, we can create extremely vivid 3D effect animations, with Photos app on Windows 10. In case the Add 3D effects button is blurry, you can log out and login back to the Microsoft account is okay.
