

# How to create animations with Beneton Movie GIF

Beneton Movie GIF is a software for creating animated images, professional GIF images, helping users to create quality animations.

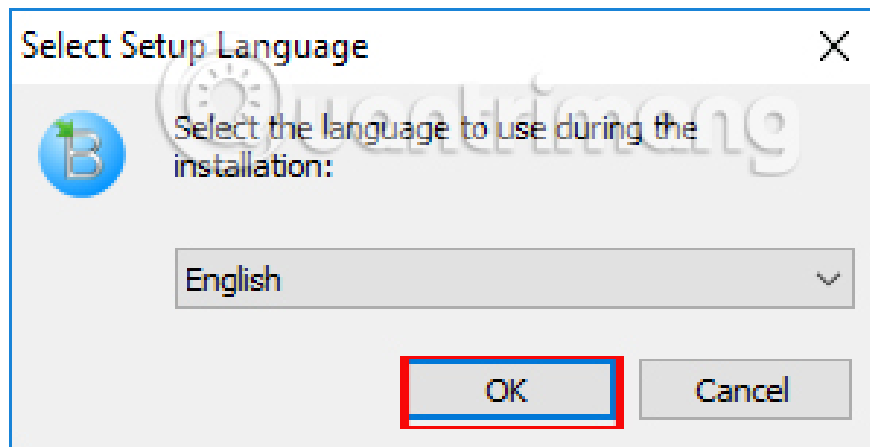

Animations often bring interesting content and convey clear messages when we post on articles. Currently, there are many software or online services that support users to create animations such as Giphy, Gickr, or create animations from Youtube videos using Gifs service. In this article, Network Administrator will introduce you to Beneton Movie GIF software, with the feature to support users to create animated images, GIF images from static images available on the computer.

## 1. Install Beneton Movie GIF software:

1. Download Beneton Movie GIF software

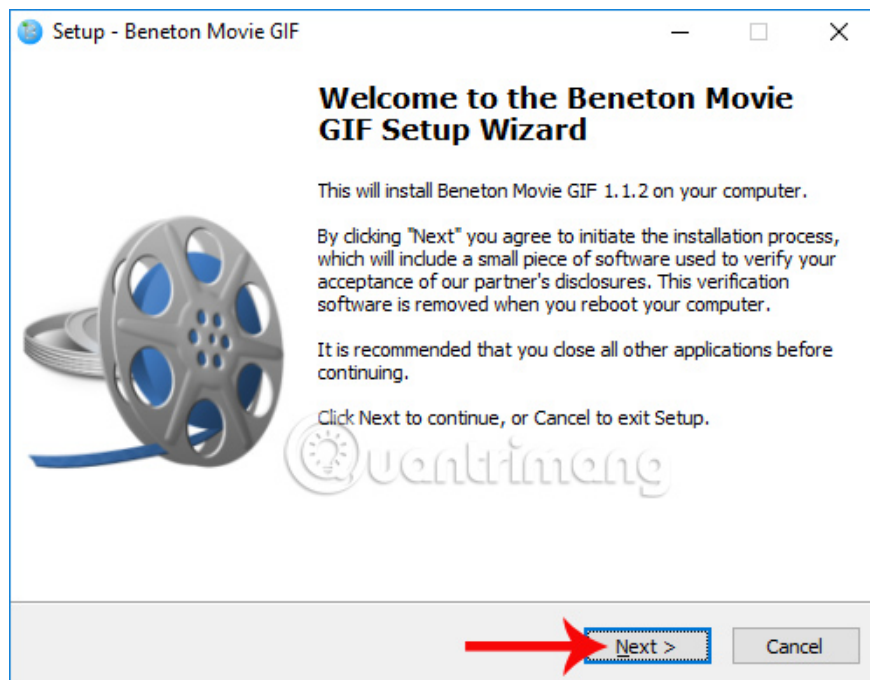

### Step 1:

First, download Beneton Movie GIF software according to the above link and install it on your computer. In the start window, select **English - English** and click **OK** to continue.

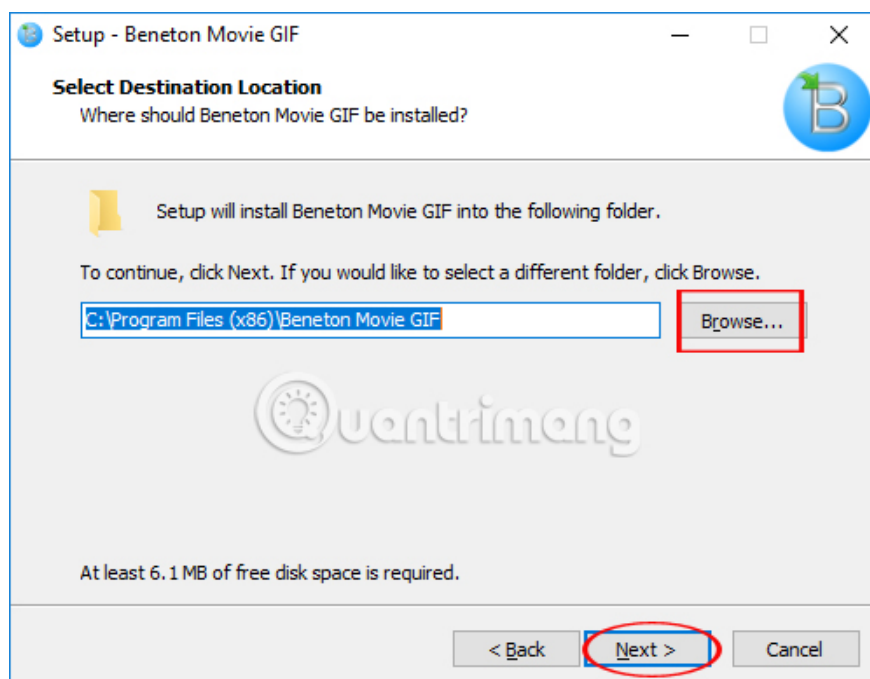

### Step 2:

Next, we click **Next** to go to the next step.

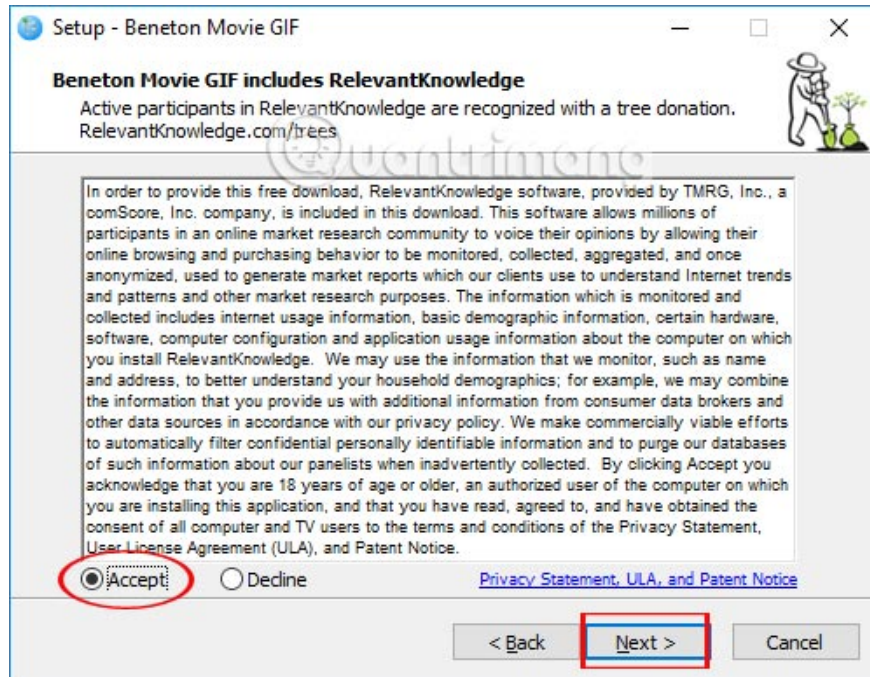

### Step 3:

In the following interface, if the user wants to change the Beneton Movie GIF storage folder, click on Beneton Movie GIF. Continue clicking **Next** .

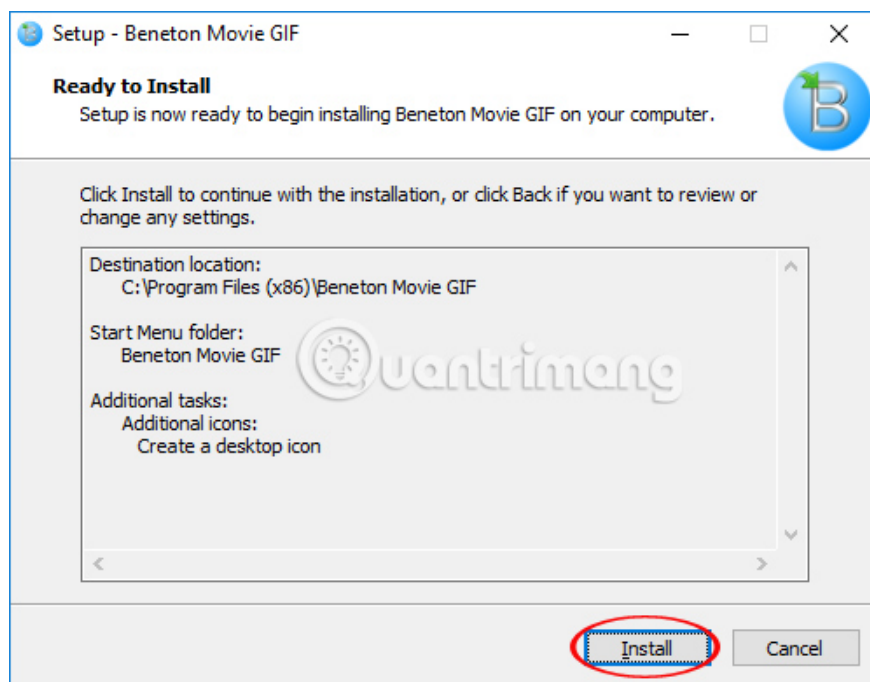

### Step 4:

Continue, click **Next** . **Next** . Go to this interface, please select **Accept** to agree to the conditions of using Beneton Movie GIF program and click **Next** .

## Step 5:

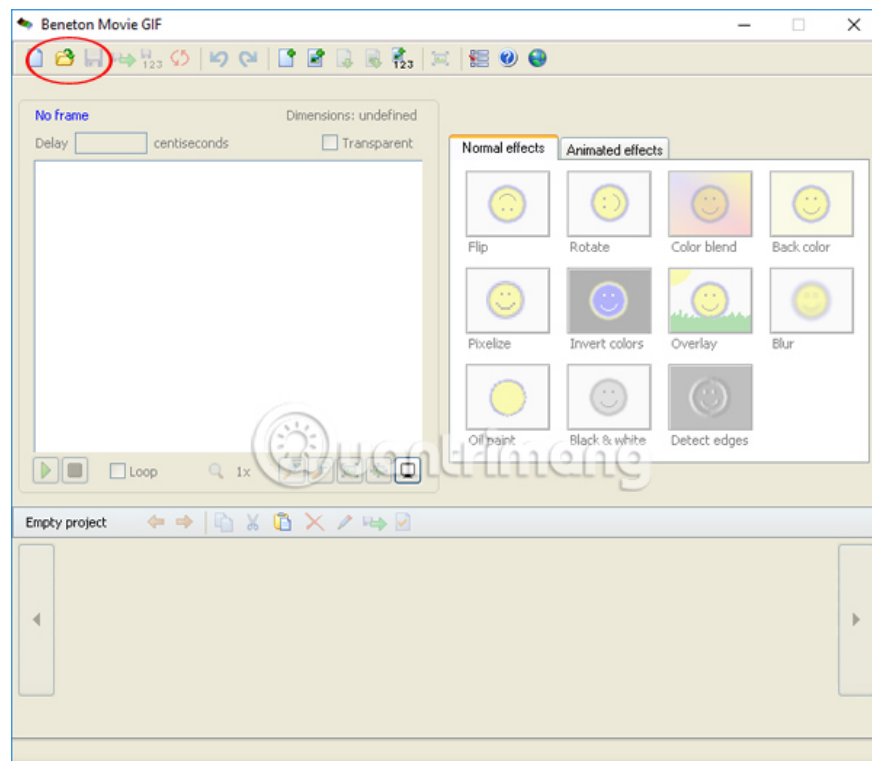

Finally, click **Install** to proceed with Beneton Movie GIF installation.

## 2. How to create GIF images using Beneton Movie GIF:

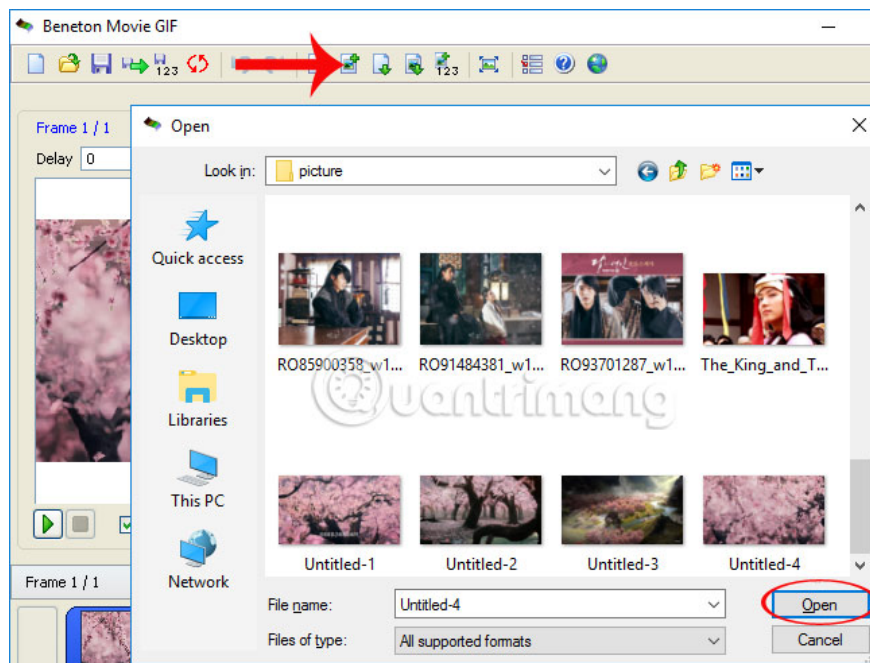

### Step 1:

At the interface of the program, we click on **the yellow folder icon** to open the image you want to create an animation. Or you can press Ctrl + O. The image is smaller than 720x500.

## Step 2:

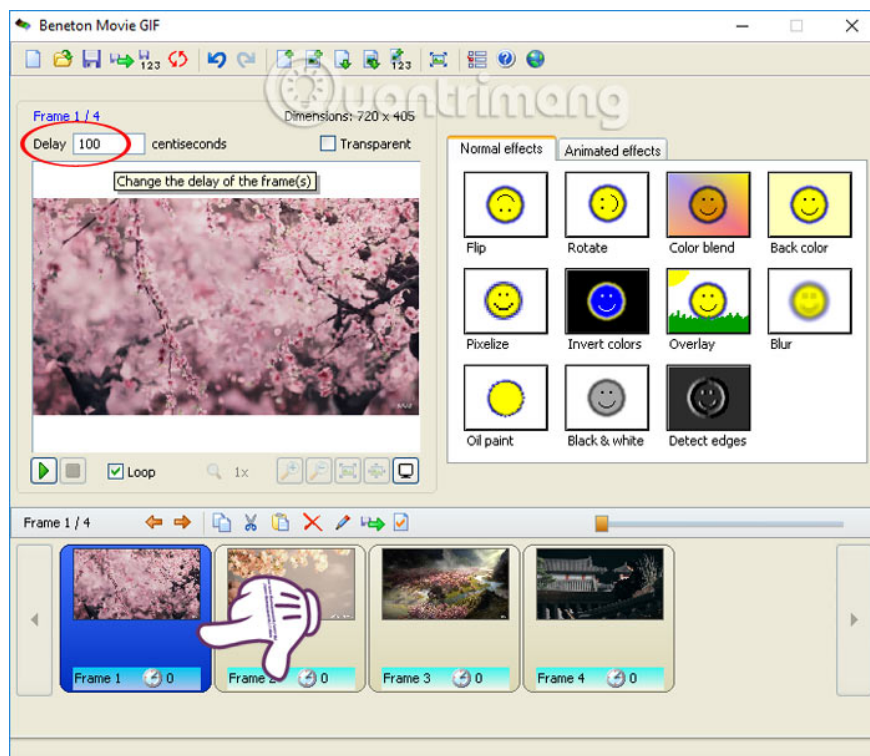

We click on the image on the folder. At the interface of the program, to **add another image** you click on **the Add Frame icon** on the toolbar. Users can add arbitrary number of images.

### Step 3:

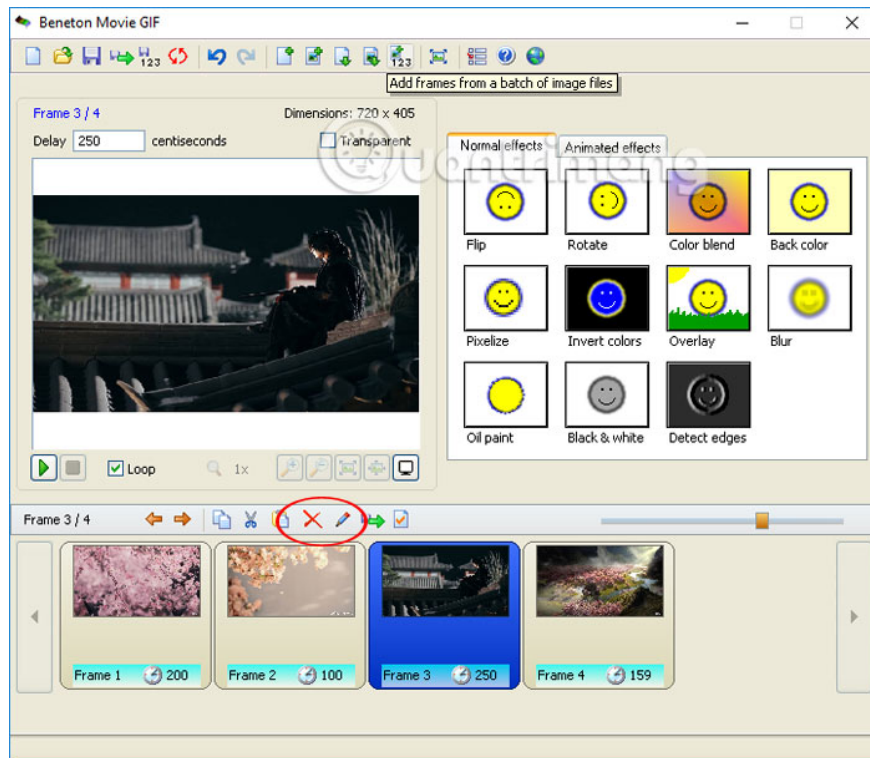

Once you have selected enough images to create an animation, users will proceed to change the display speed in the animation. We will **click on each picture** in the Frame section below, then **enter the time** to run that GIF image into **the Delay box** .

Depending on the selected image as well as the preferences of each person, we choose the transition speed between images in the animation. You continue to enter the time for the remaining images.

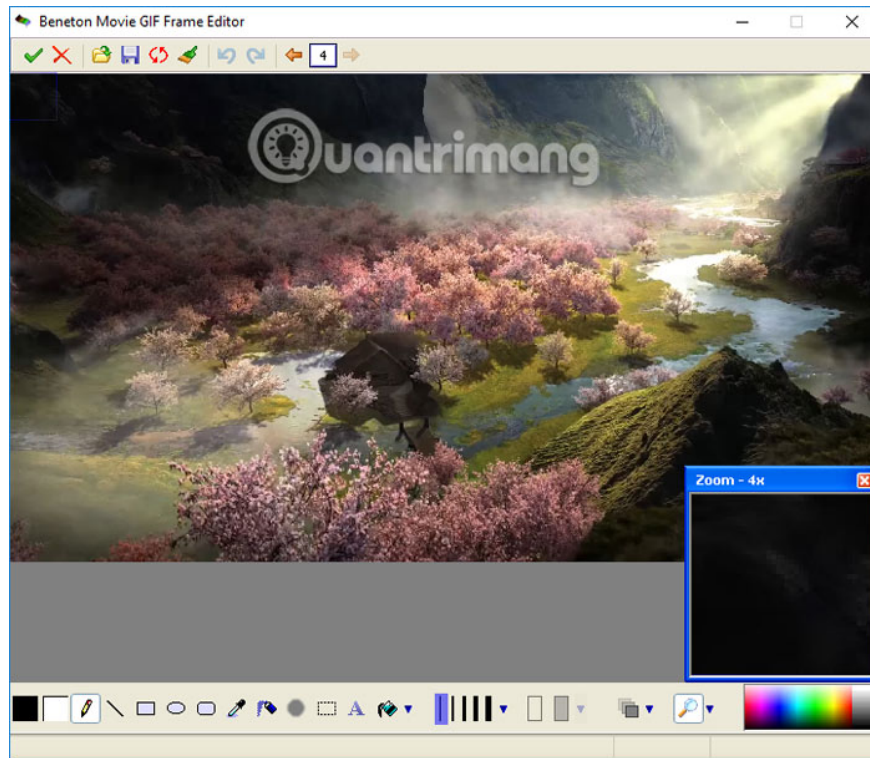

## Step 4:

In case the user wants to change the order of appearance of images, just move the images together. If you want to delete the image, press **the red check mark icon** . To edit the image, click **the pen icon** .

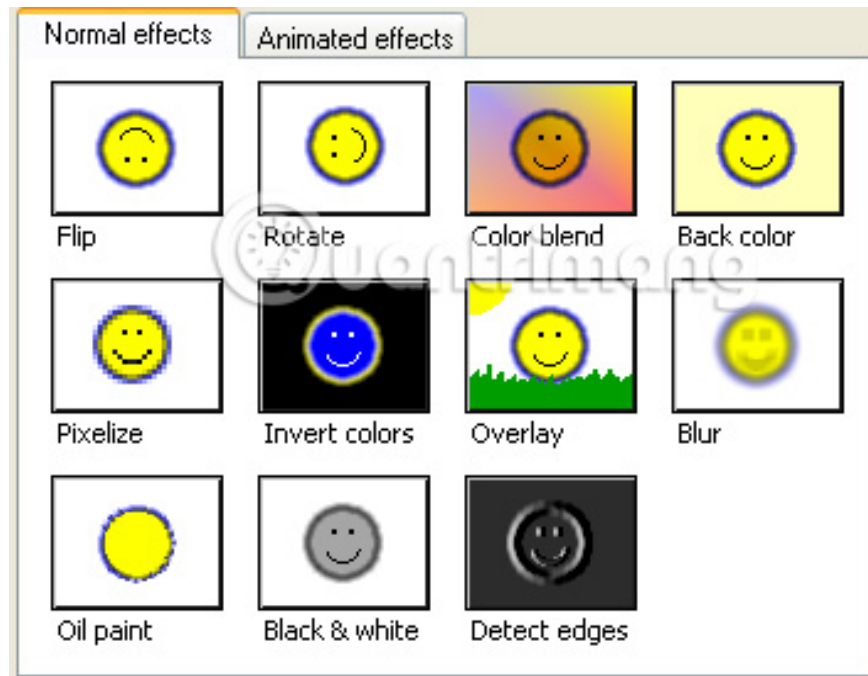

In the image editing interface, users can change any of the favorite details of the image. Finally press the blue tick to return to the main interface.

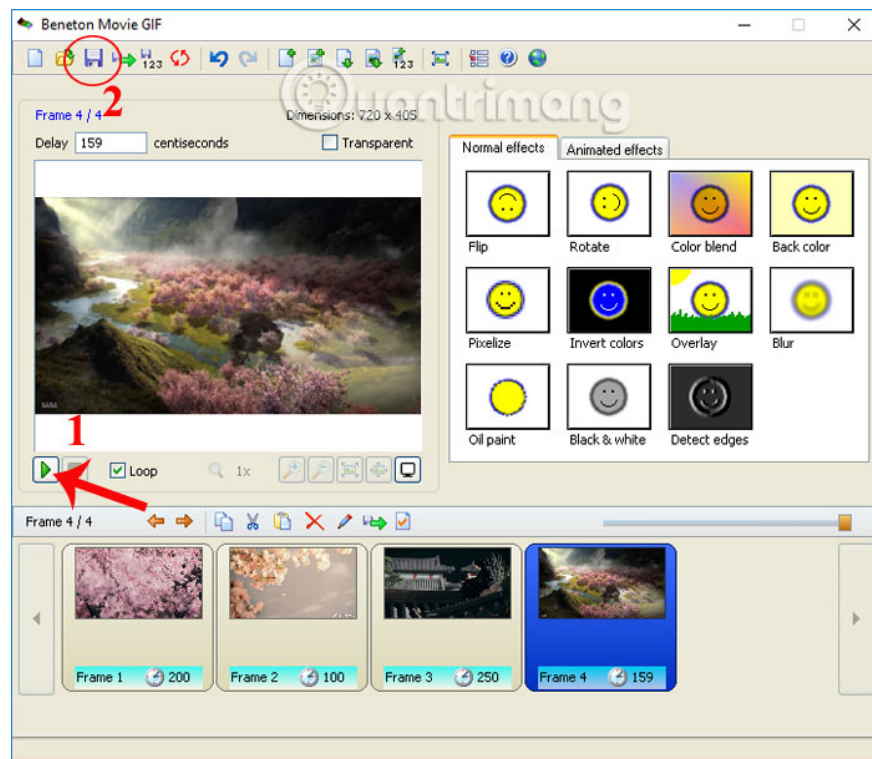

### Step 5:

At the main interface, we can add effects to animations at 2 items **Normal effects** or **Animated effects** .

### Step 6:

To preview the animation after editing it, click on **the Play icon** as shown below. Finally, click **the Save icon** to save the animation.

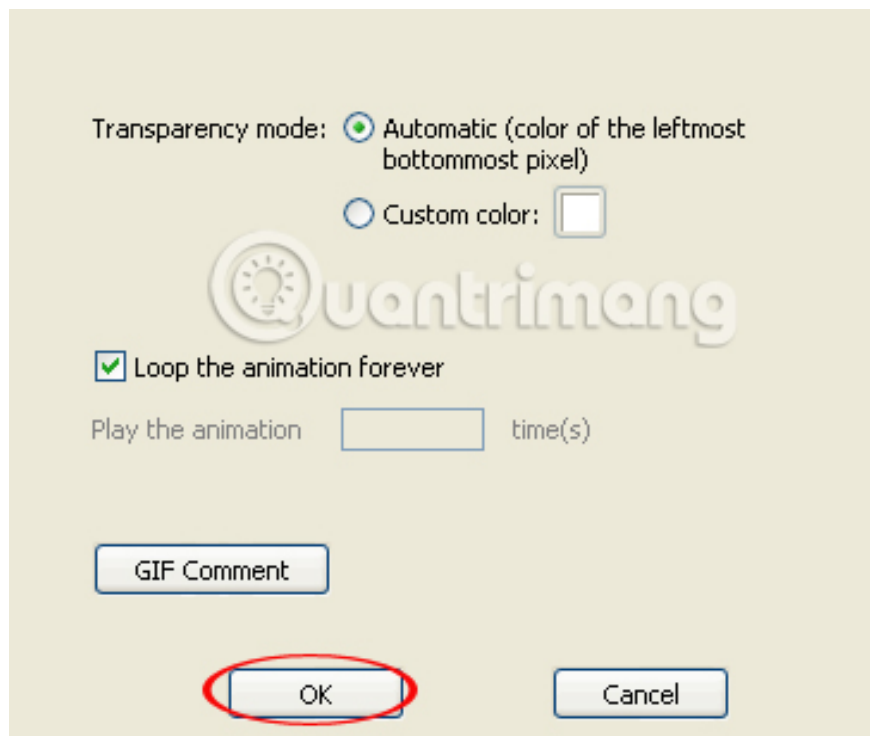

## Step 7:

Appearance of editing mode for transparent images appears:

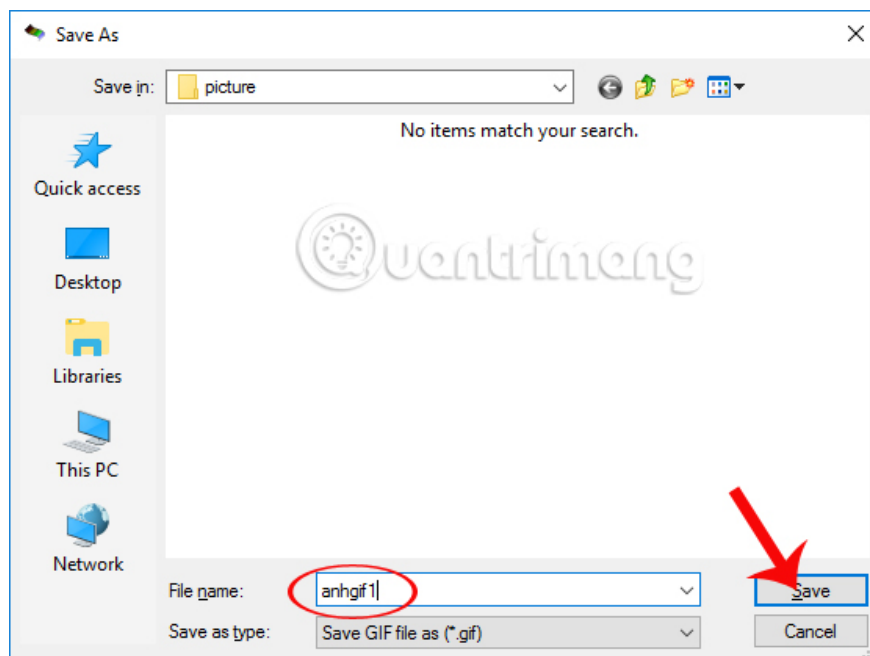

1. **Automatic (color of the leftmost bottommost pixel)** : Automatic mode.
2. **Custom color** : Custom mode.

In case you want to repeat that effect for animation, click **Loop the animation forever** . Finally click **OK** to save.

### Step 8:

Finally, **enter the name for the animation** and **select the folder to store** on your computer.

Not only does it support users to create animations from ordinary pictures, Beneton Movie GIF also provides a lot of effects to enhance the art of GIF images. Create lots of animations with Beneton Movie GIF software for free.
