

How to create background music for all slides in powerpoint

To make our slide show as well as more vivid, we can use more effects to insert music throughout the slide.

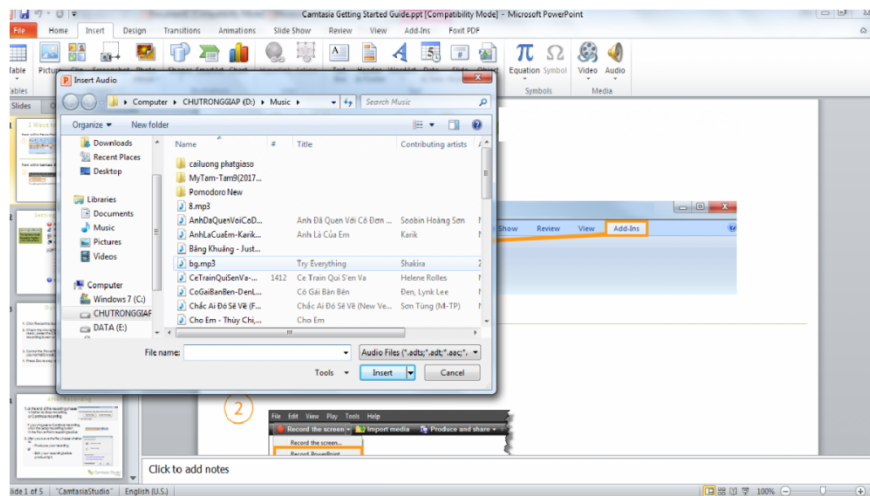

Do you know how to add music to slides in powerpoint? If not, then immediately read the article below

To create background music for all slides in powerpoint we need to perform through 4 steps:

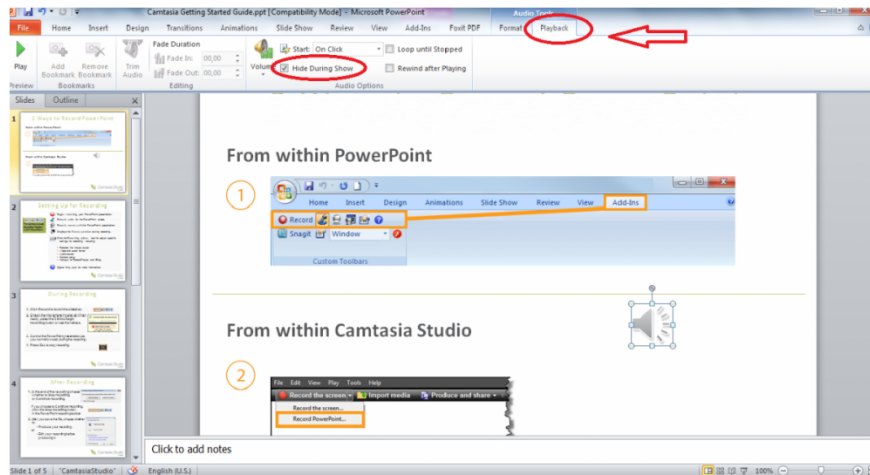

Step 1: At the first slide position in the Powerpoint presentation, go to the **INSERT** tab -> in the **Media** group / select **Audio** -> **Audio from file** .

Step 2: You find the music file to be inserted as the melody during the slideshow -> **INSERT**

Step 3: After the music file is inserted into the slide, select **PLAYBACK** -> and check the **HIDE DURING SHOW** line to hide the music file on the slide show.

Step 4: Next, go to settings in **START -> PLAY ACROSS SLIDES** : To activate the play function for all slides in the article.

The music has been inserted in the presentation.
