

# How to create battery saving shortcuts on iPhone

Shortcuts for Intelligent Power on Siri Shortcuts turn off connections when the iPhone / iPad battery is below 5%.

On iPhone / iPad, there is a battery-saving Low Power Mode, prompting users to turn on low power mode when the battery is below 20%. With iOS 12 you can use Siri Shortcuts to install Intelligent Power, a battery-saving shortcut.

This shortcut will play a role in checking battery capacity on iPhone / iPad. If the device has less than 25% battery life, the shortcut will turn on Low Power Mode. If the device is below 5% will enable the Ultra Low Power Mode option to reduce the maximum screen light, turn off Bluetooth and WiFi, or mobile data. This means Intelligent Power will turn off all connections and modes to save battery power. Note to users, Intelligent Power does not run automatically but users still need to run it manually.

## Instructions for creating iOS 12 battery saving shortcuts

### Step 1:

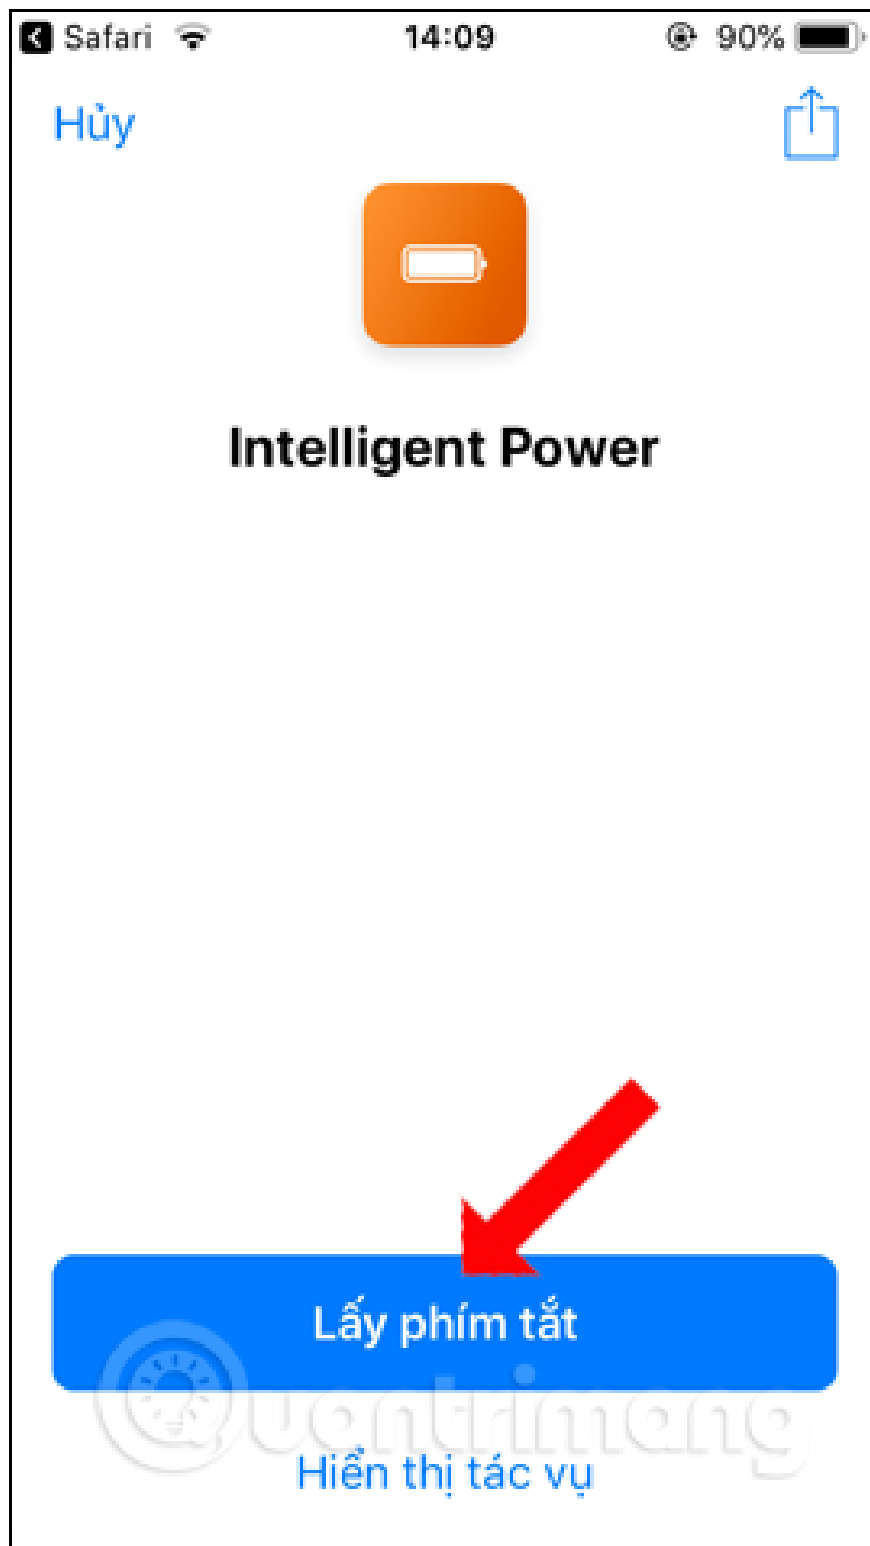

You download Siri Shortcuts application under the link below if not installed.

1. Download Siri Shortcuts application

### Step 2:

The user then access the link below to download the Intelligent Power shortcut to the iPhone. Press **Get shortcut**

<https://www.icloud.com/shortcuts/e5245ab1b6bc4a9e87142b6b76a3d535>

### Step 2:

Next to Intelligent Power will ask the user when **the battery capacity** is up to **activate the Power Saver mode** on the device, the default will be 25%. You can click on the Number to change the other% value if you want. Click **Continue** below.

## Định cấu hình phím tắt này

Below what percentage would you like Low Power mode to activate?

(If you want it to activate at any time, answer 101)

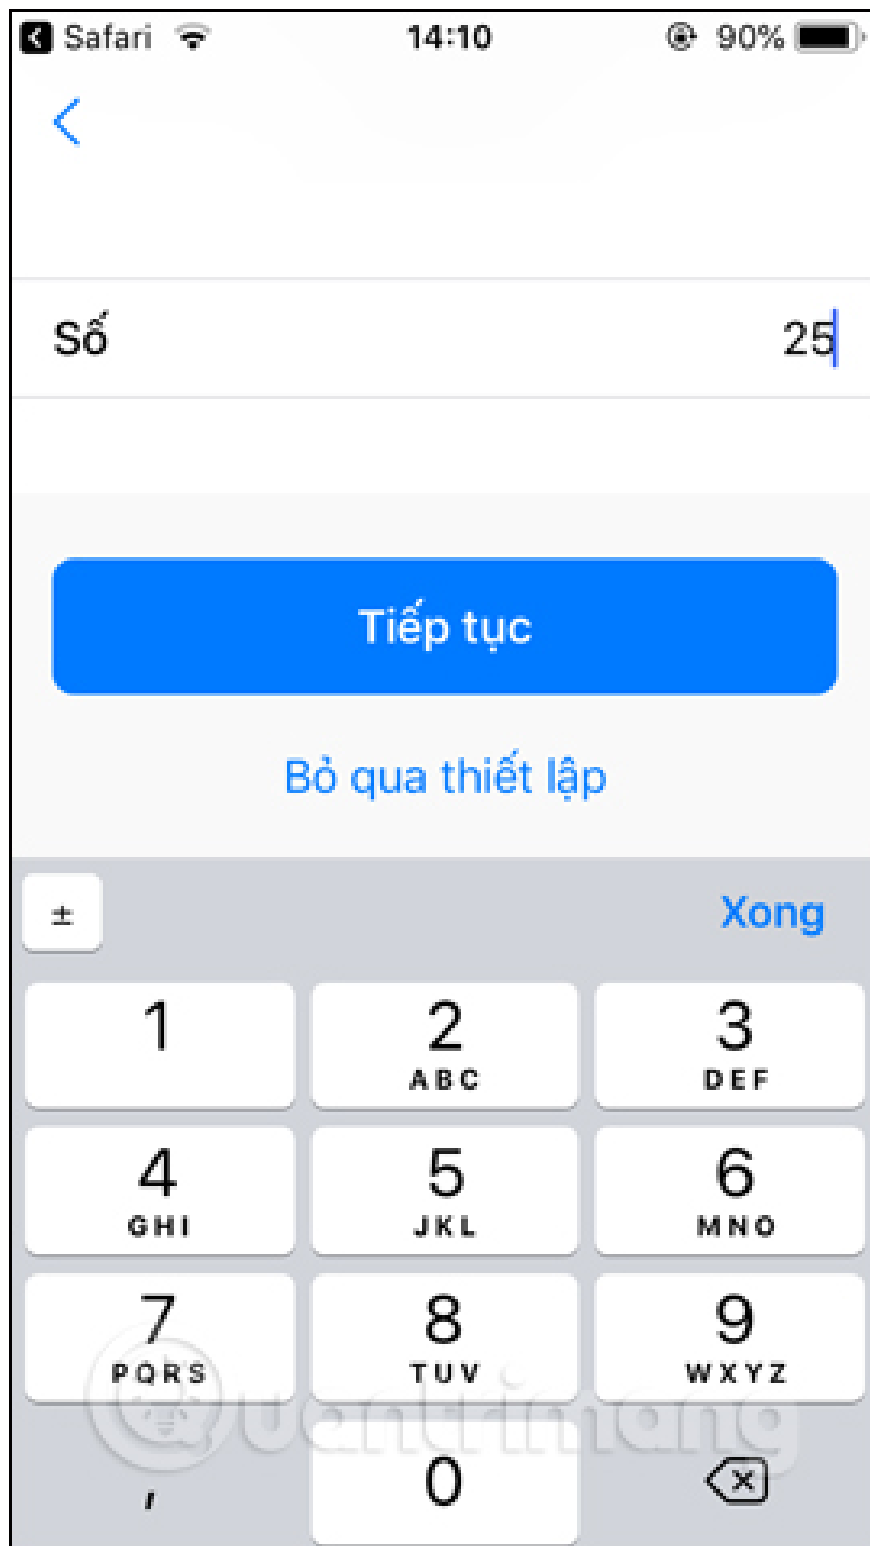

Số

25

Bỏ qua thiết lập

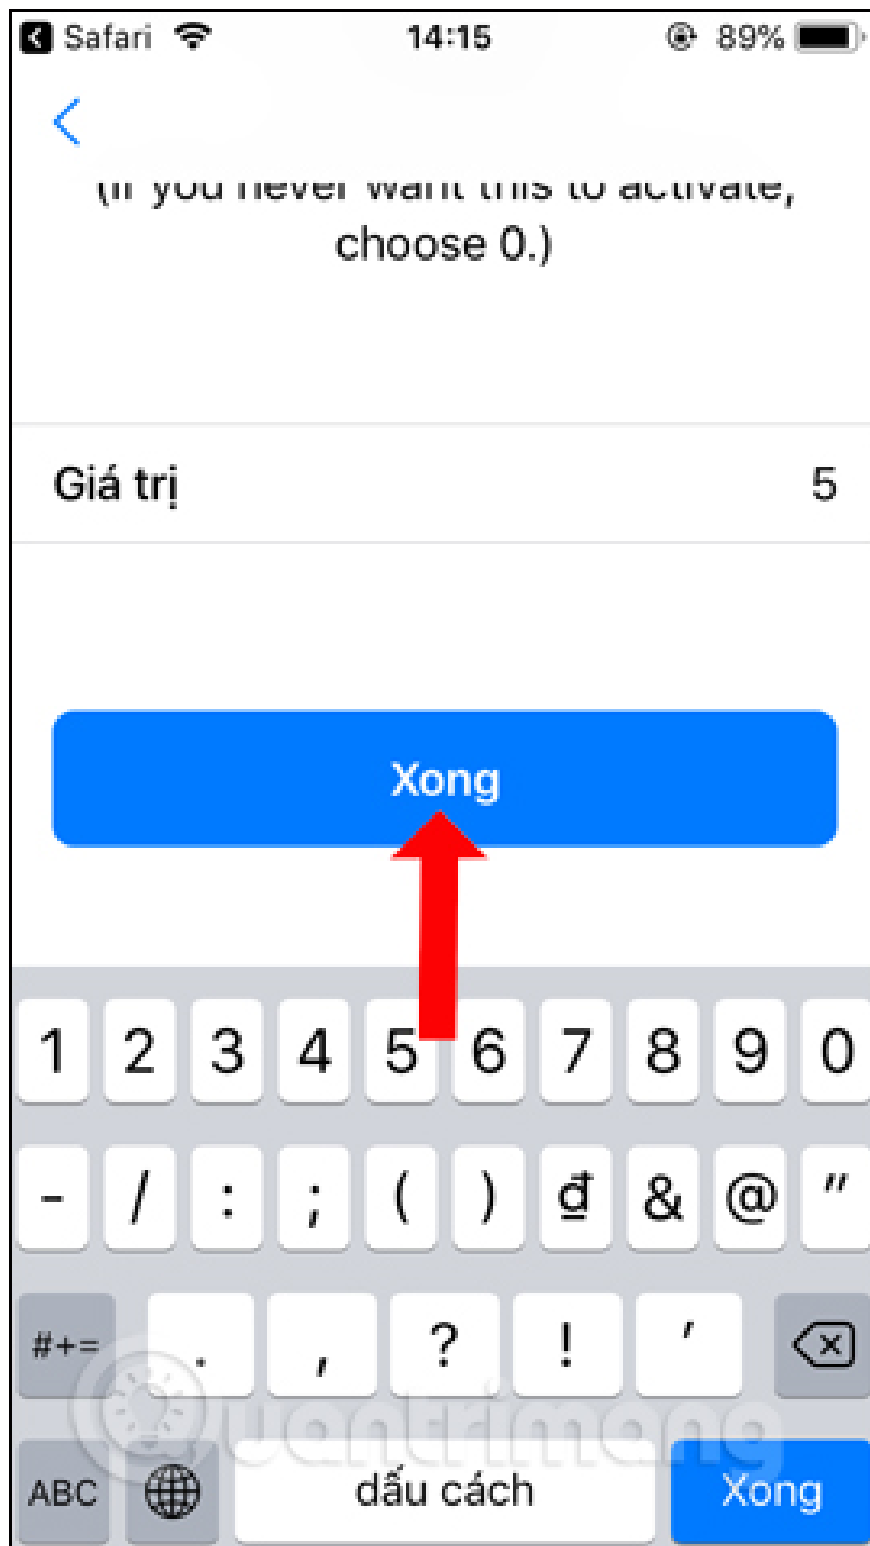

### Step 3:

In this new interface, users will **set the battery capacity percentage** to enable super battery saving **mode Ultra Low Power Mode** . Connections on iPhone / iPad will be canceled, and users will only be able to make phone calls.

By default the percentage value will be 10%. Click on Value to change capacity. If you do not want to activate this mode press 0. Finally **press Done** to save.

#### Step 4:

Back to Library section on Siri Shortcuts will see the shortcut Intelligent Power appear. Clicking on **the 3 dot icon** will display the configuration interface for the shortcut.

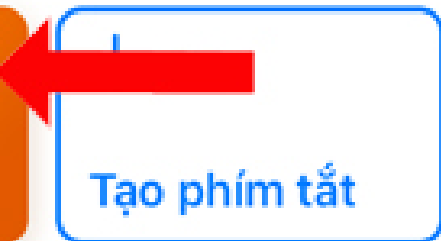

Users can press **the top right configuration icon** to change the name and icon for the shortcut to Intelligent Power.

Go back to the widget interface and activate Intelligent Power if the battery is below 25% to run Low Power Mode. If there is less than 5%, run this shortcut to turn off all connections.

Thus, the shortcut Intelligent Power will help control the amount of battery on the iPhone and iPad. And to the percentage of battery that we have set, battery saving mode will be activated to turn off all connections on the device.
