Creating shadow effects is an interesting ability that you can do with Photoshop. Applying this technique will make the photo more natural and beautiful. In this article, ThuTh ThuatPhucSoft.vn will guide you **how to create beautiful shadow effects in Photoshop** , please refer!

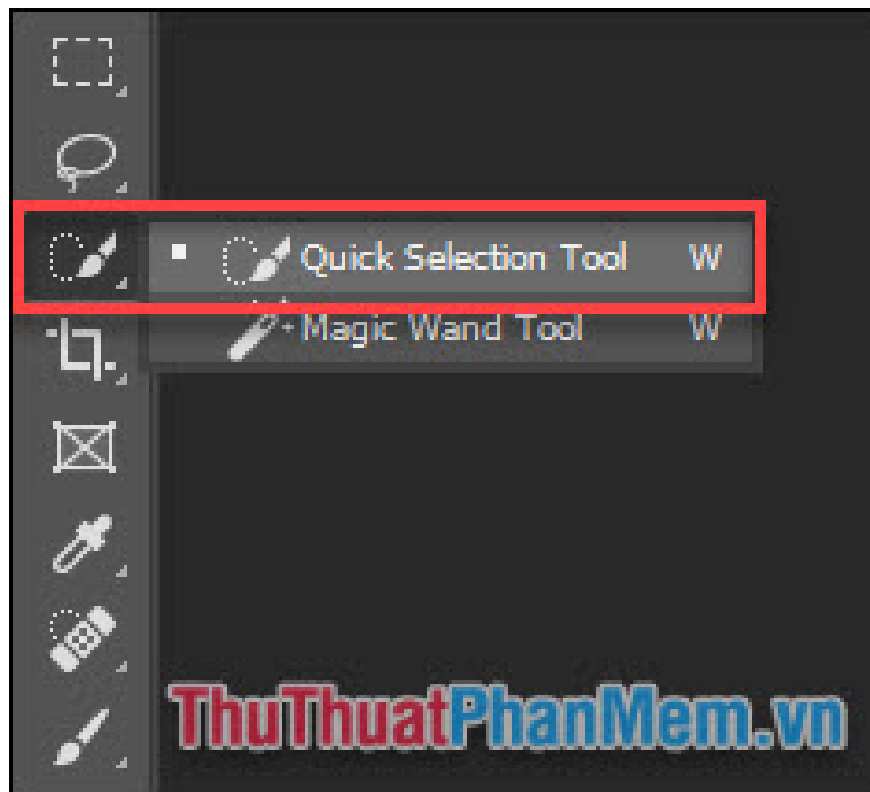

How to create beautiful shadow effects in Photoshop

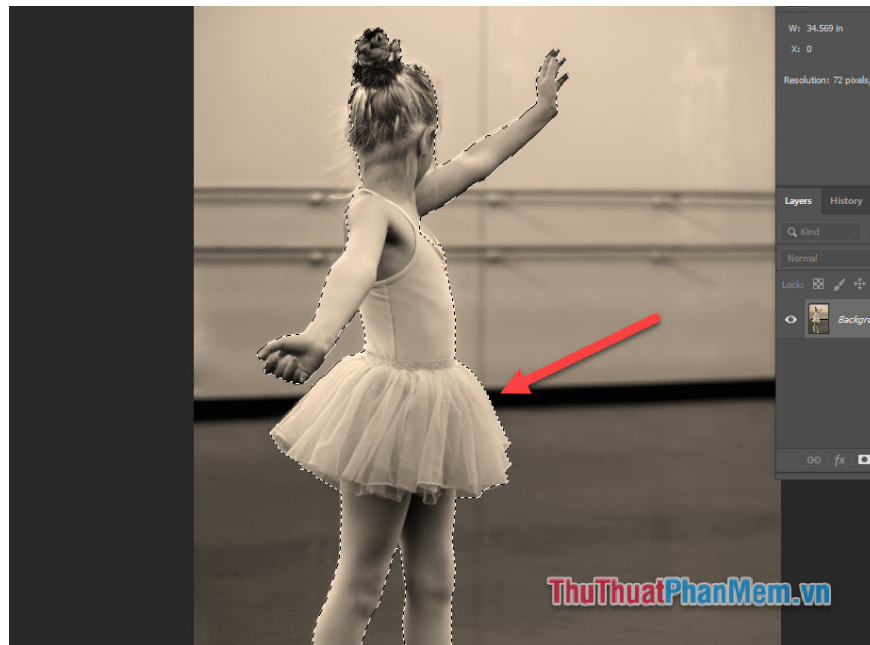

Step 1: Open the photo you need to handle in Photoshop by pressing **Ctrl + O** .

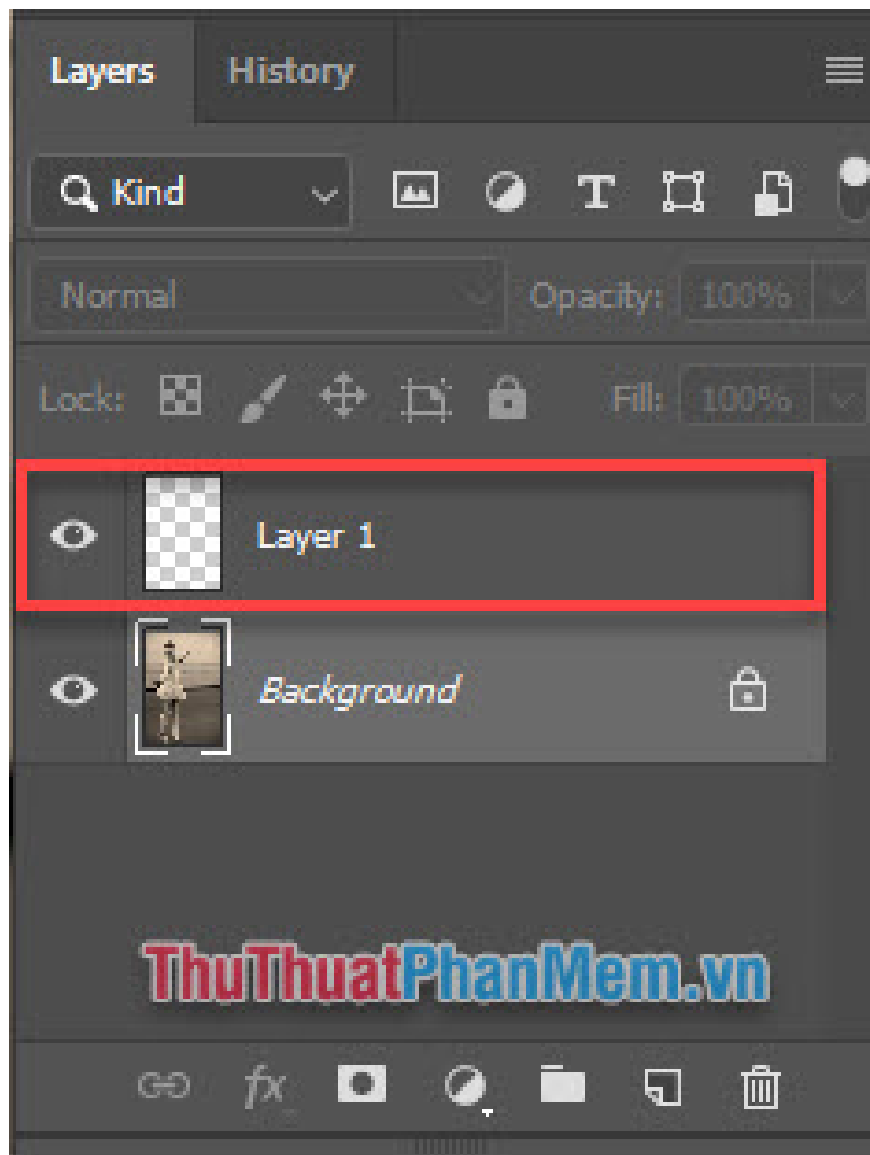

Step 2: Use the **Quick Selection Tool** to create a separate border of the object.

Select the object area and it will be surrounded by broken lines as follows:

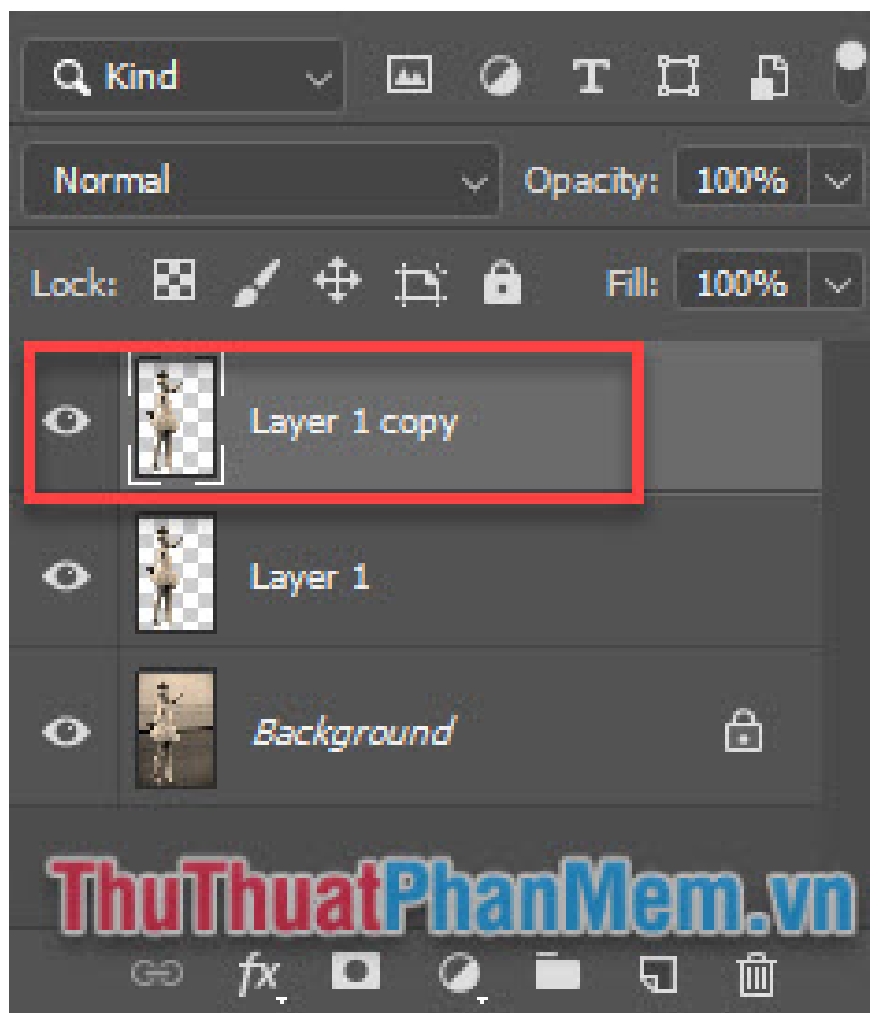

Step 3: Create Layer new combination by pressing **Ctrl + Shift + N** .

Step 4: Press **Ctrl + C** to copy the surrounding object, paste (**Ctrl + V**) over **Layer 1** , you will get the following:

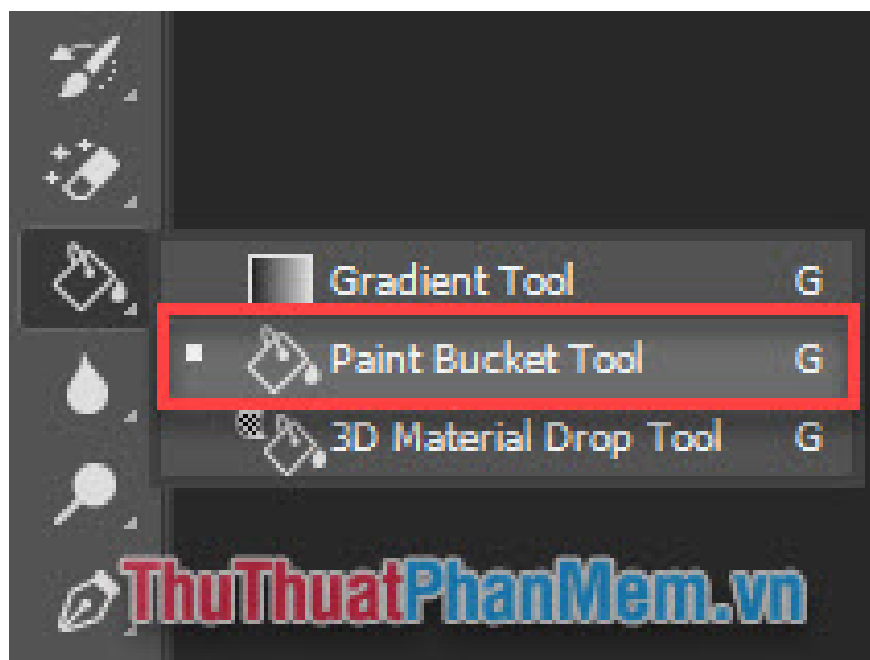

Step 5: In Layer 1, press **Ctrl + J** to duplicate layer, you will create **Layer 1 copy** .

Step 6: Hold **Ctrl** and click on the thumbnail of **Layer 1** , the object in **Layer 1 copy** will be surrounded:

Step 7: Use the **Paint Bucket Tool** to fill the object with black.

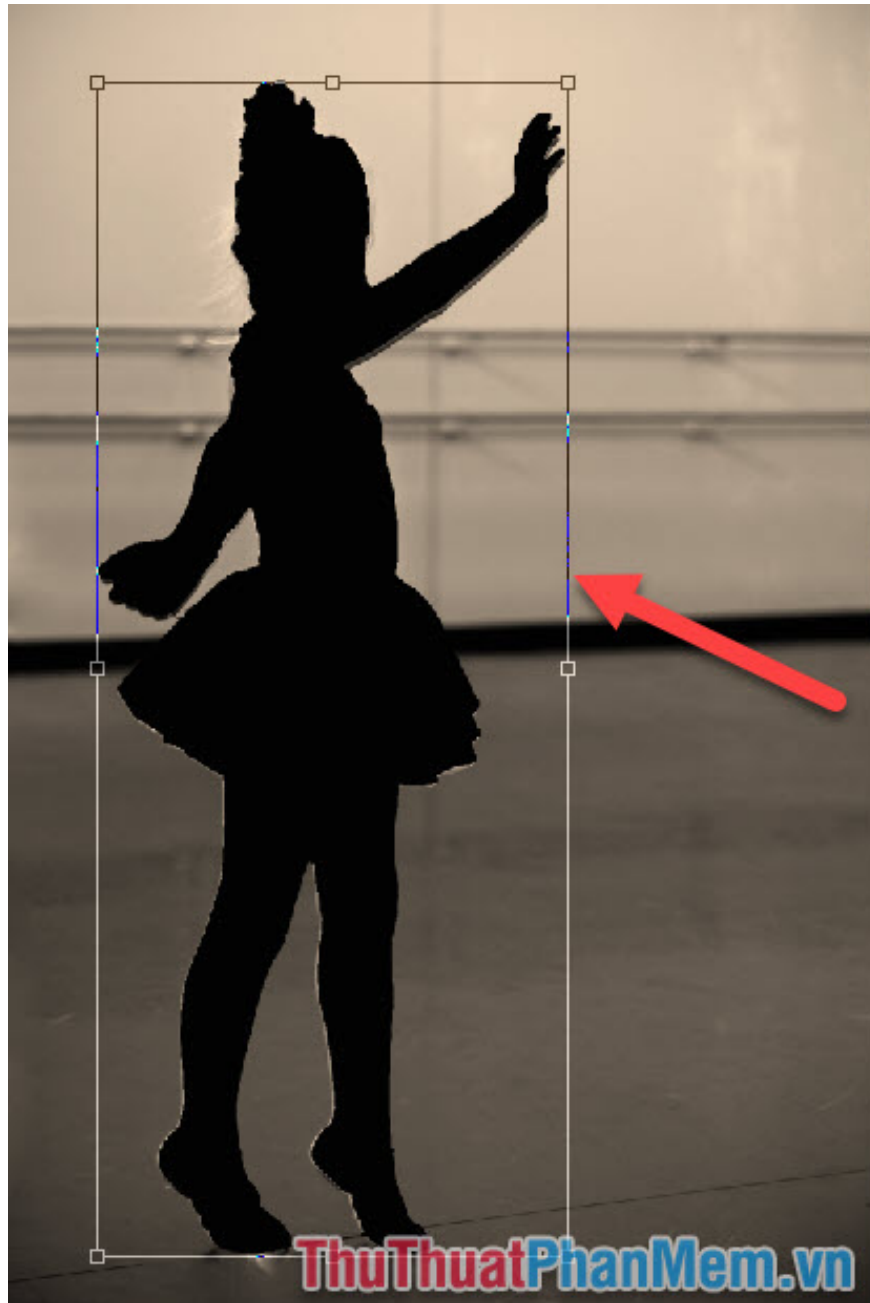

When you're done, you get the following:

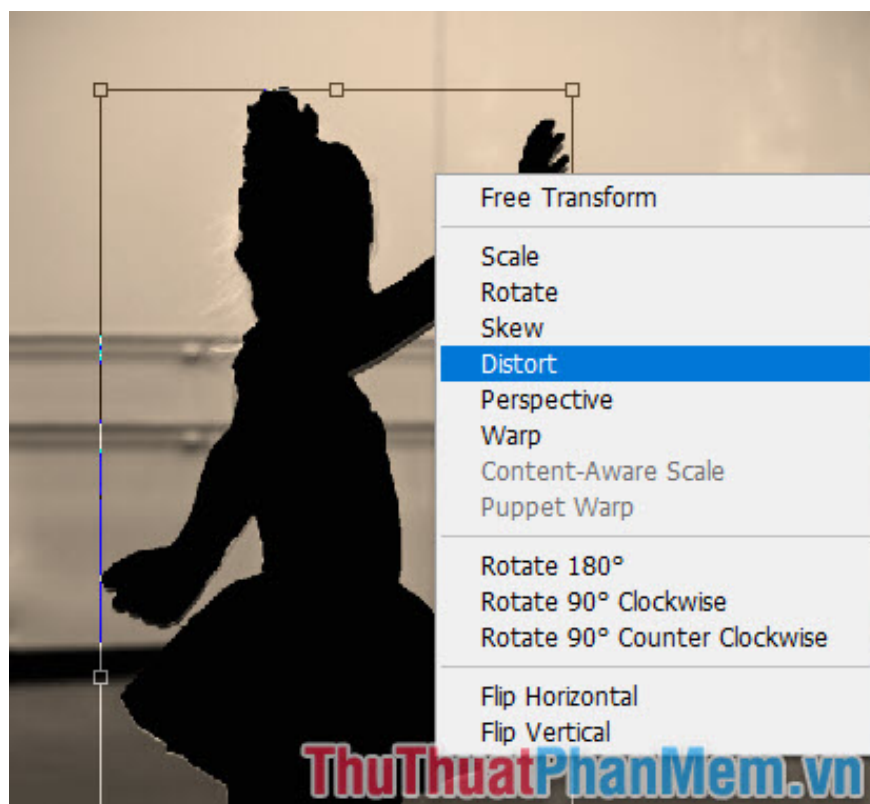

Press **Ctrl + D** to remove dashed border.

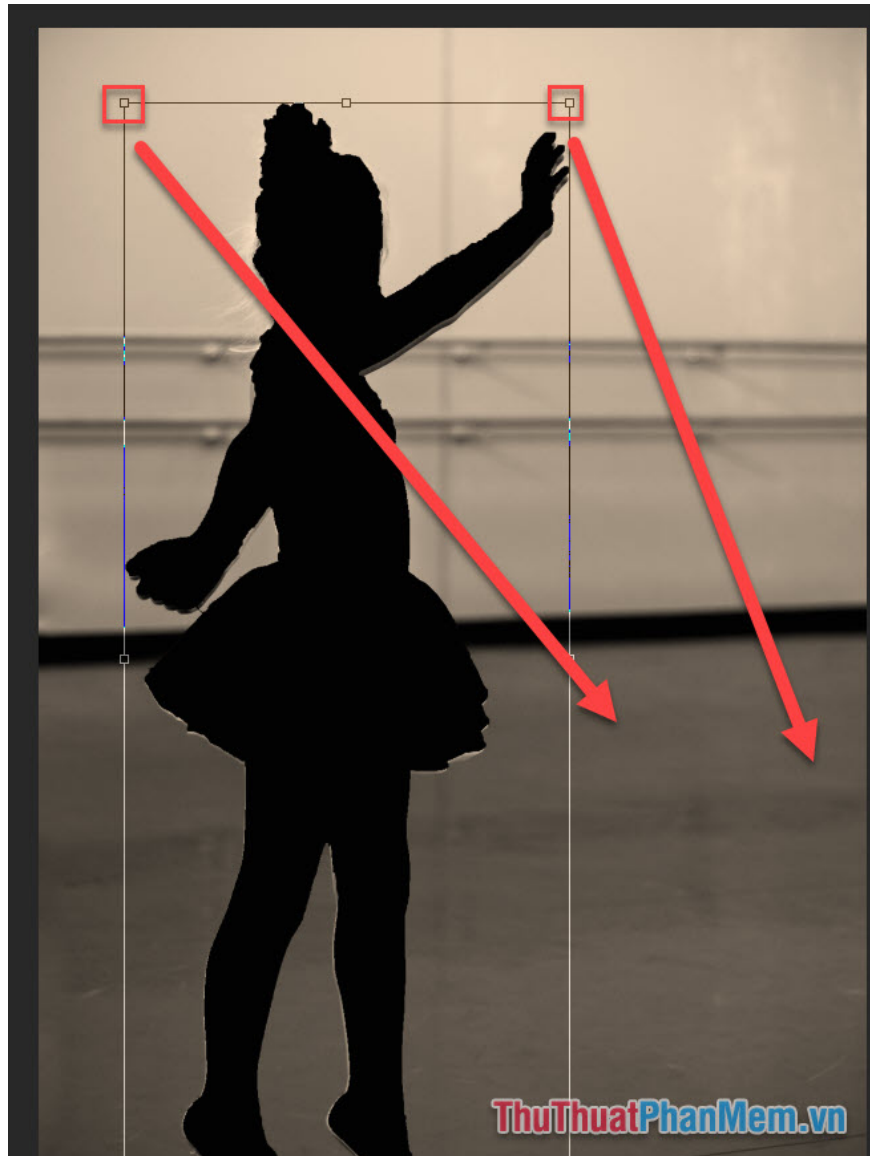

Step 8: Using the **Free Transform** tool (**Ctrl + T**), you will see there are squares surrounding the object:

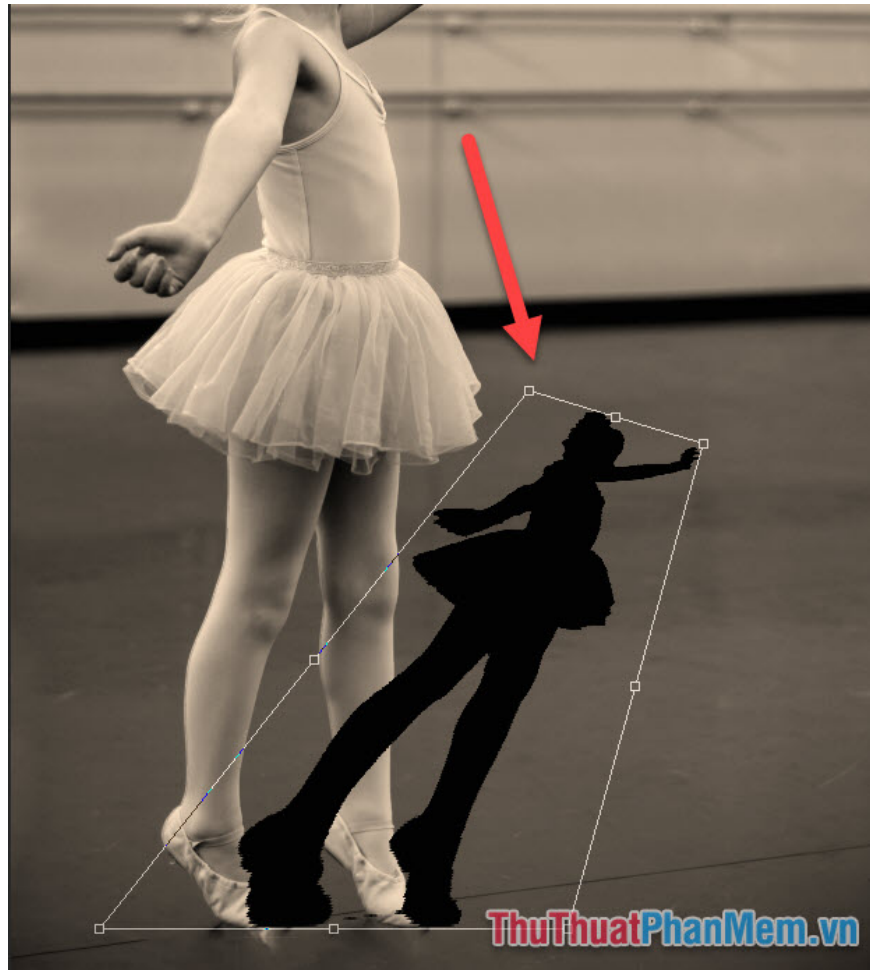

Right click and check box, select **Distort** .

Step 9: Drag 2 upper corners of the ball to the background.

You will get a desired ball position, press **Enter** to apply:

Step 10: To prevent the shadow from overlapping on the object, drag **Layer 1 copy** below **Layer 1** :

Step 11: Adjust the **Opacity** of the shadow down to natural, normally you should leave at about **20% to 25%** .

Thus, you have successfully implemented the manipulation to create beautiful shadow effects in Photoshop. Wish you get beautiful photos with this technique!
