Step 3: Menu Happy Holidays will allow you to select the available greeting card templates, however, you must purchase a 3-month package to choose these available cards. But here I do not buy so I will choose the card is the Christmas wallpaper on the phone in the album section. Next, select the text item in the list of photo editing tools.

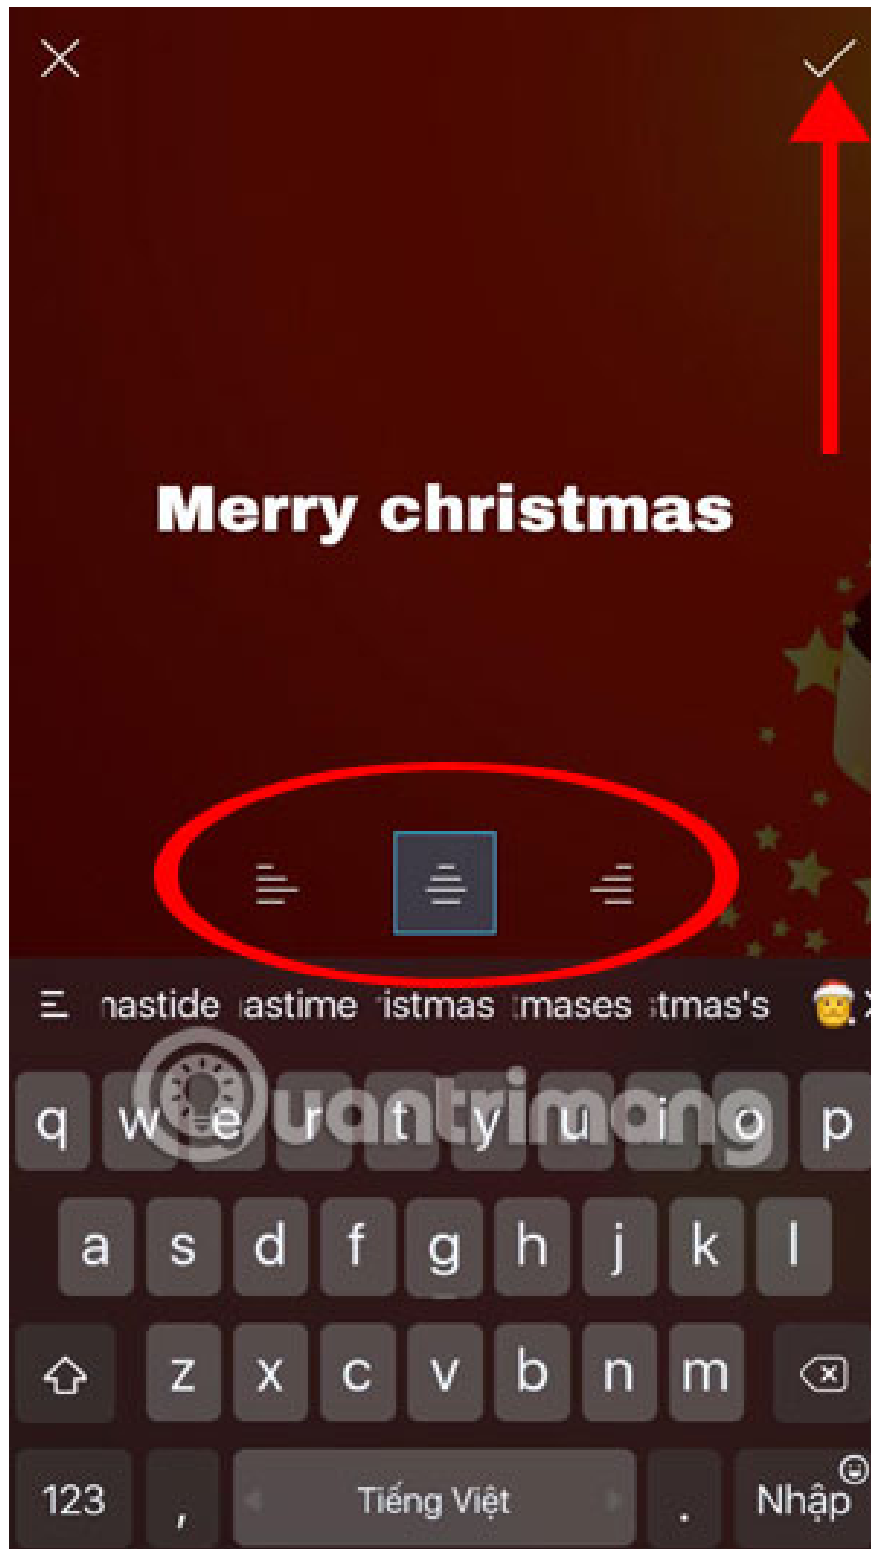

Christmas

Step 4: Write the text you want to place on the image, which can be a blessing, then can be aligned on either side or with three icons as shown below. Next, select the V in the upper left corner to save the added content.

Then go out and select the font for the newly added content. You should write your greetings in English because in Vietnamese, there may be errors in the content because some fonts do not match **Vietnamese** . The edit icons around the content will help you rotate, enlarge content.

Step 5: Next is to select the text color, although the optional color palette is not provided but PicsArt also provides the user with full color tones from light to dark.

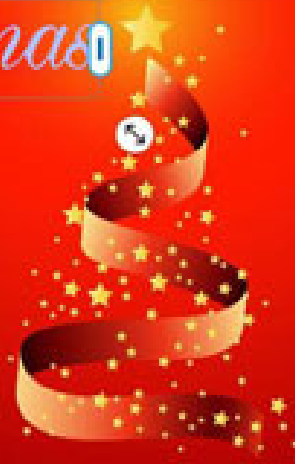

And **the Dark Zone** option will help the content on the image be shaded with tools like shadow placement, drop colors, opacity .
