

How to Create Curly Brackets on an AZERTY Keyboard (Mac)

If you are used to a QWERTY keyboard and have now switched to an AZERTY keyboard, you might have difficulty finding the keys for curly brackets ({ }) for a simple reason: They aren't there. All is not lost, though, because you can still...

Method 1 of 2:

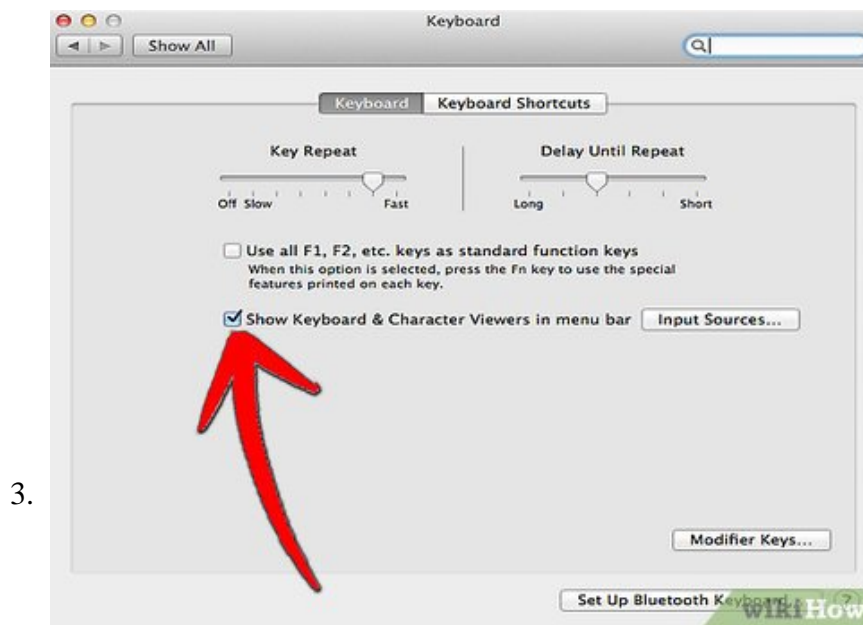

Using the Character Viewer

Go to **System Preferences**. You can search for it in **Spotlight** or go through the **Apple logo** in the top left corner, then select **System Preferences**.

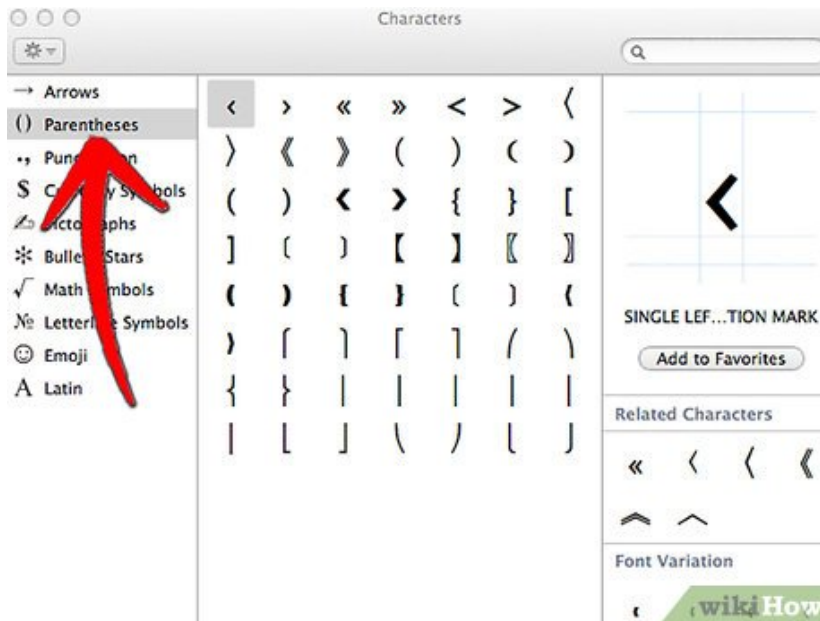

Go to **Keyboard**.

Check **Show Keyboard & Character Viewer in menu bar**.

1. A little box should now appear in the menu bar at the top right.

4.

Click the box, and select **Show Character Viewer**. In the Character Viewer you can select numerous characters.

1. Select **Parentheses** on the left side, and you will be able to access the curly brackets.

Method 2 of 2:

Using a Key Combination

1. Combine the **Alt** key with the normal parentheses (). Hit the keys at the same time and you will get a curly bracket.
 1. Select **Alt**+**{** to make "{".
 2. Select **Alt**+**}** to make "}".

3. And that's all there is to it!

Enjoy knowing your way a bit more across an AZERTY keyboard.
