How to create fake calls on iPhone to help you get out of awkward situations

Download Fake Call for iOS

Step 1: Download and start the Fake Call application for iOS above, in Fake Call's main interface you will see options such as setting the call time, naming the caller, changing the incoming call ringtone, Select the recording to replace the default voice call, select the background for the call.

Start Call

Step 2: You start your fake call on iPhone by selecting the call time, the maximum time to set up the call is 1 hour after placing, depending on the time you want to leave the date, meet but please set the time.

Next is to change the caller's name, you can write the caller's name like in the contact list or write a certain phone number in this section. But most convenient is to leave the caller's name, then you can add a representative picture above.

Quite simply, you can make a fake call to your phone using Fake Call, you can preset custom parameters and then just press **Start Call** to make a call. Only one drawback is that the application does not allow you to lock the screen or return to the main screen, this is probably the only inconvenience in Fake Call that users do not like.
