

How to create file sharing links on Dropp.me

Dropp.me will create a shared link for any file downloaded from your computer with a file duration of 30 minutes and automatically cancel

File sharing is now a lot simpler, as users have a lot of different options, especially websites that support automatic file sharing, with high security. Dropp.me is a Chrome browser utility that provides users with a quick way to share files. Users just need to drag the file to share into the interface of Dropp.me to get the download link is finished.

The maximum file when uploading to Dropp.me is 50MB. Users do not need to register an account that can download and share immediately. The file is limited to 30 minutes and automatically deleted from the server. The following article will guide you how to create file sharing links on Dropp.me.

2. 7 file sharing sites self-destruct
3. Ways to download and share data to Dropbox without an account
4. How to use SafeNote to share files, self-destruct messages

Instructions for sharing files via Dropp.me

Step 1:

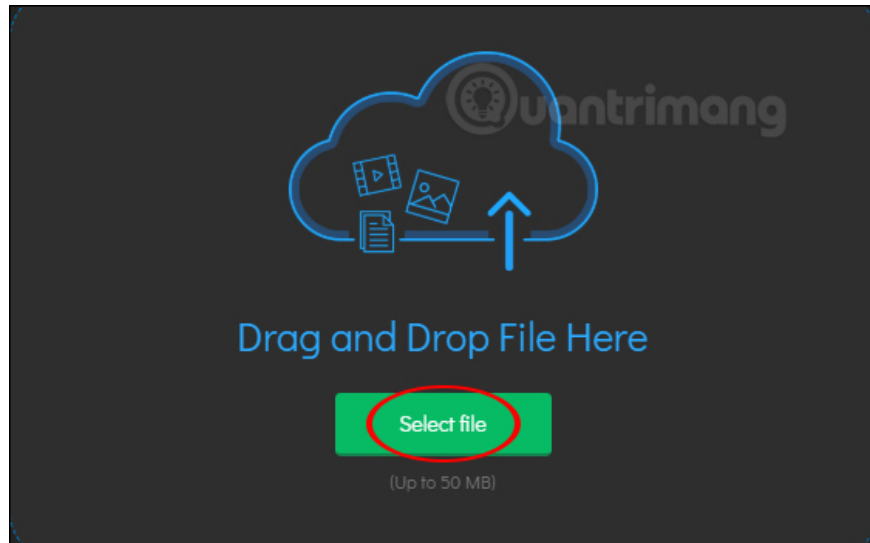

We download and install the Dropp.me extension by following the link below on Chrome browser.

1. Download the Dropp.me Chrome extension

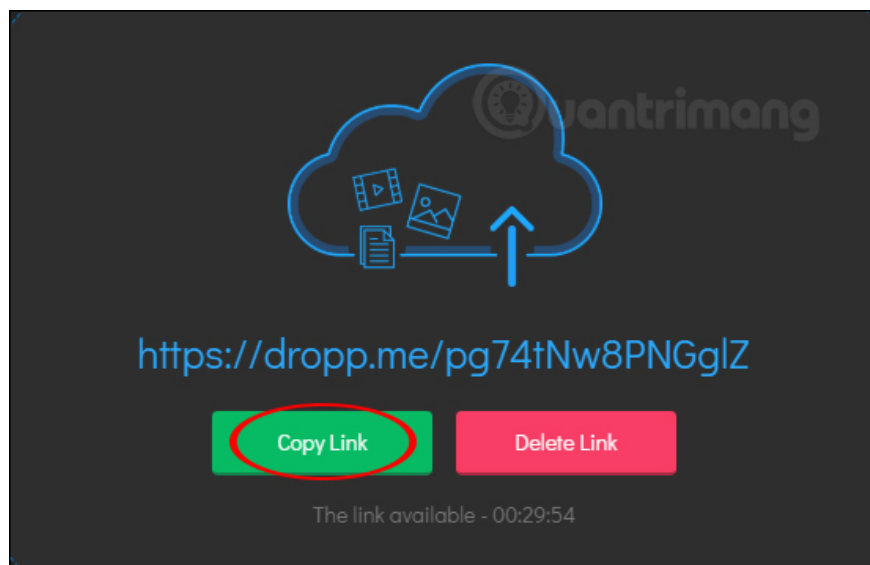

Step 2:

After downloading, you can access any website to open the utility by clicking on the utility icon in the browser address bar. When displaying the file download interface as shown below, click **Select file** to upload the file.

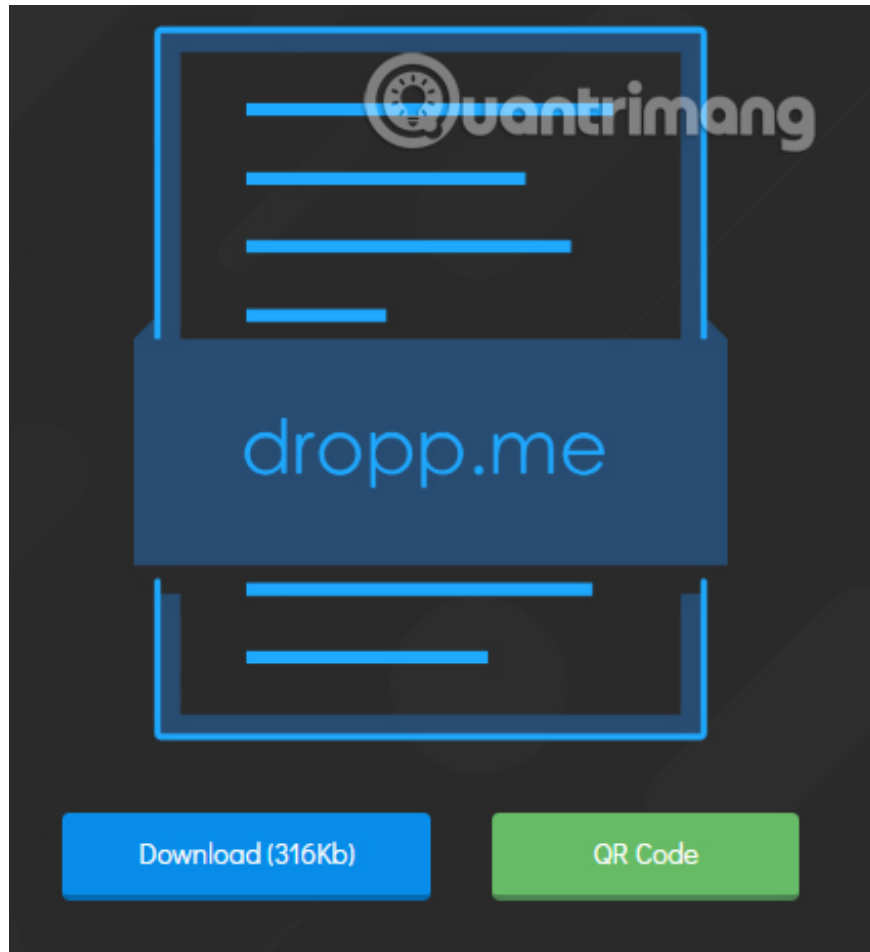

Step 3:

When any file is uploaded you will see the file sharing link is created. Users press **Copy link** to copy and need to do this within 30 minutes before the download link expires. Share the copied link to the person who wants to receive the file

Step 4:

We send this link to others so they can download the file. For files such as video, images, and audio, the recipient has the option to view directly on the file download page. The recipient will know the size of the file and the remaining download time. Click **Download** to download the computer.

Add a method that makes it easy for users to share files with others regardless of file format with Dropp me. All operations are very quick and simple, the file is automatically destroyed within 30 minutes or we can delete the file before it expires.

I wish you successful implementation!
