

How to create GIF animations with PowerPoint

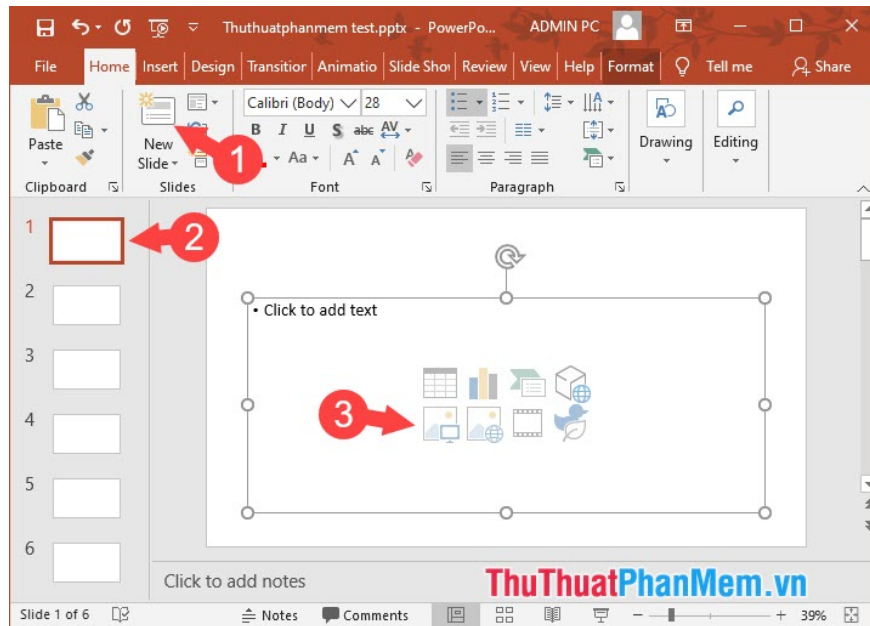

To create gif images in PowerPoint, you need to have PowerPoint 2013 or higher. For PowerPoint 2010 and earlier, you can only create videos but cannot create gif images directly with PowerPoint.

We often know PowerPoint software as a professional presentation content creation software, but few people discover the unique features of PowerPoint. In the article below, TipsMake.com introduces readers to how to create GIF animations in PowerPoint extremely convenient and simple.

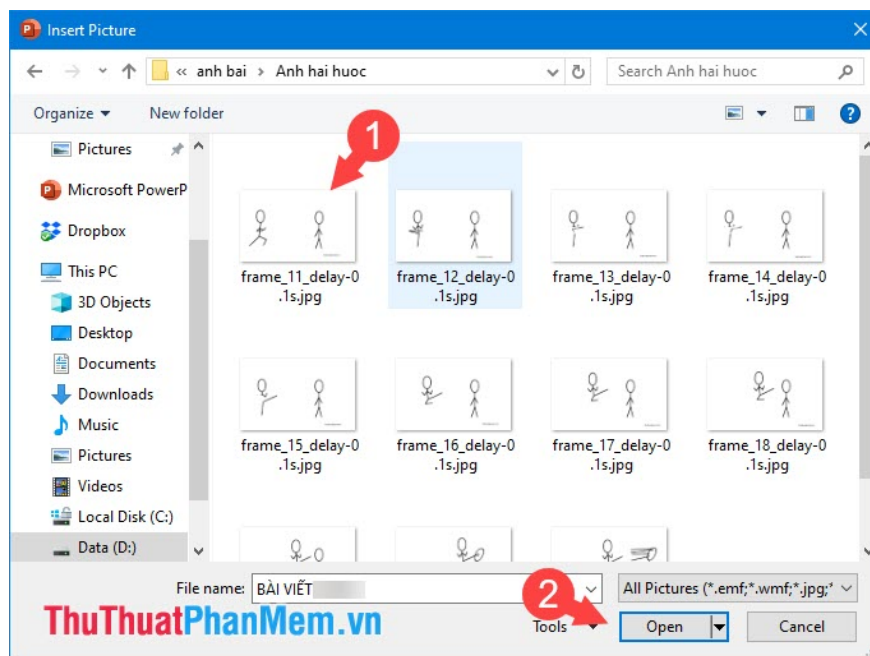

To create gif images in PowerPoint, you need to have PowerPoint 2013 or higher. For PowerPoint 2010 and earlier, you can only create videos but cannot create gif images directly with PowerPoint.

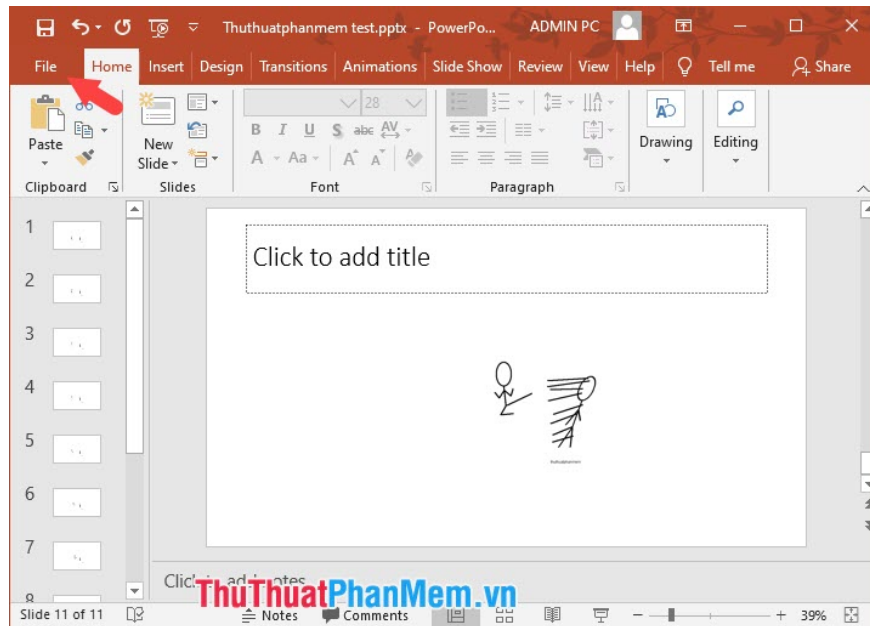

Step 1: You create a Slide to insert pictures with **New Slide (1)** . Next, click **Slide (2)** => **Insert Photo (3)** .

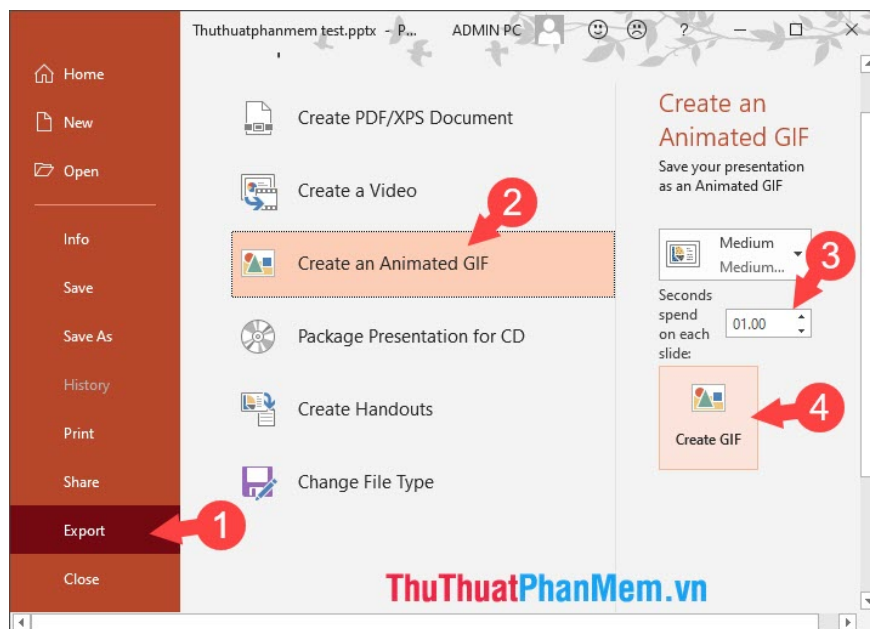

Step 2: You proceed to insert images by selecting images (1) => **Open** (2) . You continue to insert all images into the slides with each Slide / one image.

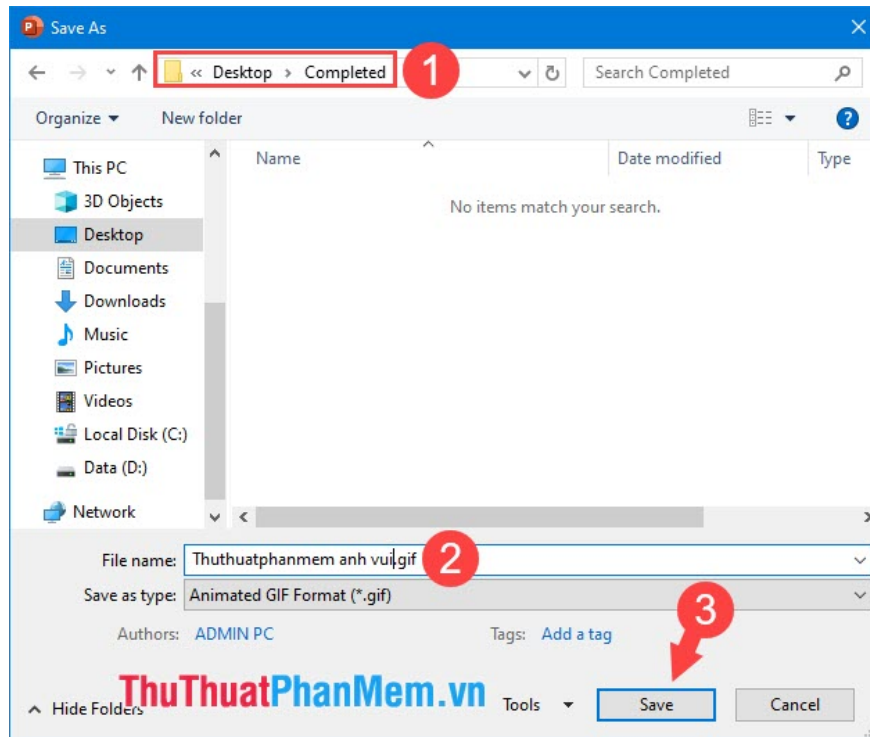

Step 3: Once you've inserted the images into the desired Slide, we start creating **gif** images with Powerpoint. First, you need to click on the **File** menu .

Next, select **Export (1)** => **Create an Animated GIF (2)** . You set the time for the Slide transition fast or slow in the **Seconds spend on each slide (3)** and finally you click on **Create GIF (4)** to create GIF images.

Step 4: Choose a location to save the file (1) , name the gif image file (2) and save with **Save (3)** .

With the tutorial, you have learned an interesting way to create GIF animations right on the Microsoft PowerPoint tool. If you have any difficulties or questions about the article, please leave a comment for TipsMake.com in the comment section below!
