

# How to create GIF Online

Gickr.com is one of many websites that help you create beautiful animations, with Gickr.com you can create animations from images on your computer or you can create animations from videos on Youtube.

Currently, there are many websites that help you create animations, so it is very easy for you to create animated GIFs online.

Gickr.com is one of many websites that help you create beautiful animations, with Gickr.com you can create animations from images on your computer or you can create animations from videos on Youtube.

The following article shows you how to create GIF animations with Gickr.com.

## Create animations from images on your computer.

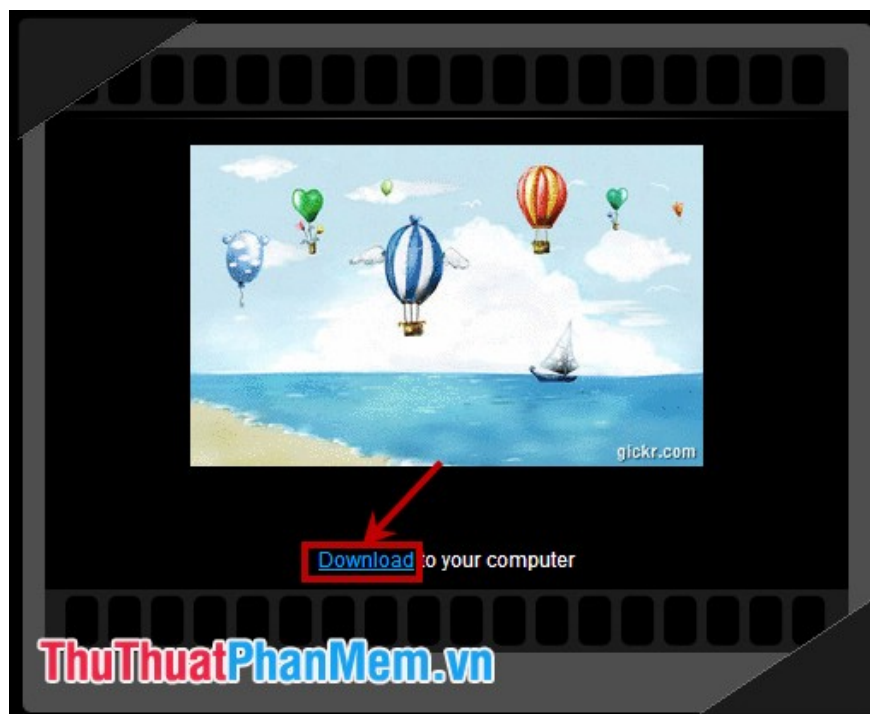

**Step 1:** You access the website <http://gickr.com/>, on the interface of Gickr homepage you perform the following:

- **Select images:** here you click **Choose file** to select the images that appear in your animation one by one. Click Add one more picture to add a photo, you note only selected up to 10 photos.
- **Size:** choose the size for animation here.
- **Speed:** choose the speed of conversion between images (Fast - fast, Normal - normal, Slow - slow), you can also directly set the speed when selecting **Custom** .

After creating, click **continue** to see animation.

**Step 2:** If you see pictures that you like, select **Download** at the bottom of the image to save the image to your computer.

The following animation results from images on a computer:

## Create animations from videos on youtube.

**Step 1:** You access to Gickr, on the homepage you select **convert Youtube video** .

A screenshot of the Gickr website interface. At the top, it says "Create a gif animation from uploaded pictures" with a red arrow pointing to the text. Below this, it says "You can also [use pictures from Flickr](#) or [convert YouTube video!](#)". A note below reads "Note: Maximum 10 files." Under "Select images:", there are three "Chọn tệp" buttons, each followed by the text "Không có tệp nào được chọn" and a "Need Help?" link. Below the buttons is a link "Add one more picture". At the bottom, there are two dropdown menus: "Size:" with "Normal (300px wide)" selected, and "Speed:" with "Normal" selected. The website logo "ThuThuatPhanMem.vn" is at the bottom left, and "continue" is at the bottom right.

**Step 2:** Interface **Create a GIF animation from Youtube videos** appears, you do some of the following:

- **YouTube link:** you enter the youtube video link to create animation.
- **Size:** choose animation size.
- **Number of frames:** the number of frames you want to appear in the animation.

After setting up the animation, select **continue** to view the animation.
