

# How to create heart beat effect text on Photoshop

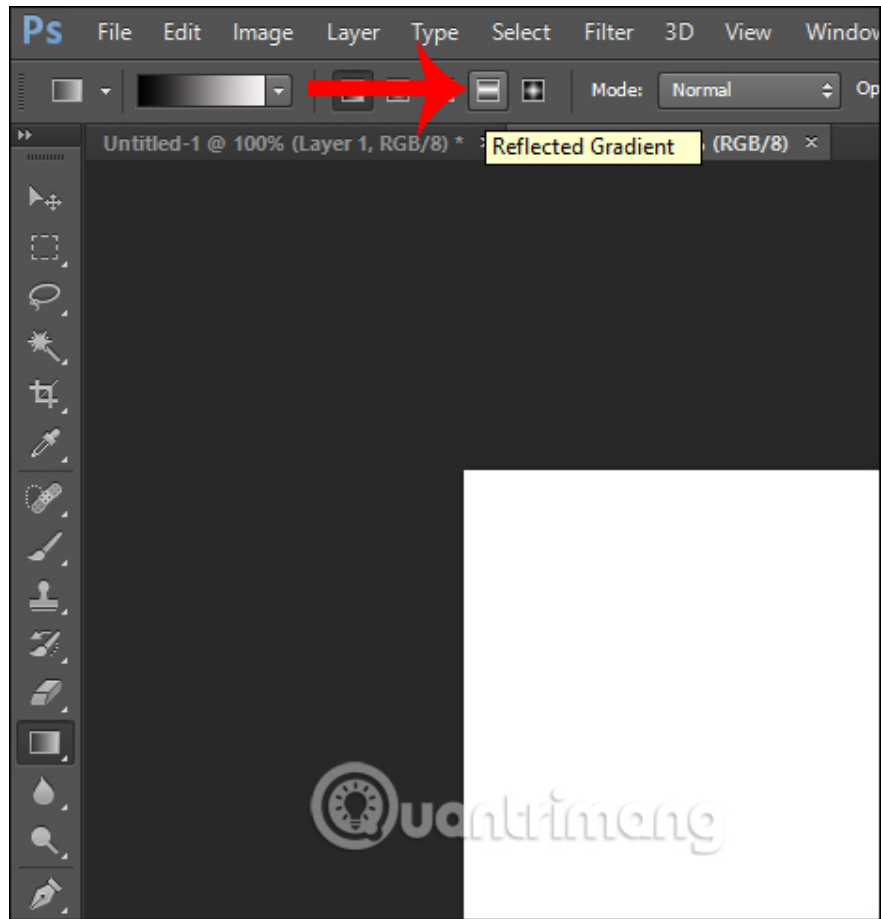

The heart beat text effect on Photoshop creates a unique artistic font that you can use to make your Facebook cover photo.

With Photoshop image editing software, users have a lot of tools to change images to be more artistic or create many new typefaces that are accompanied by interesting text effects. The heart beat text effect in Photoshop is one of the ways to refresh the text line, besides the basic operations such as changing the font color, choosing the font, . Especially after creating the heart beat font style on Photoshop we can use as a Facebook cover photo or a pretty Zalo cover photo. The following article will guide you how to create a heart beat effect text on Photoshop.

## How to create Photoshop heart beat text

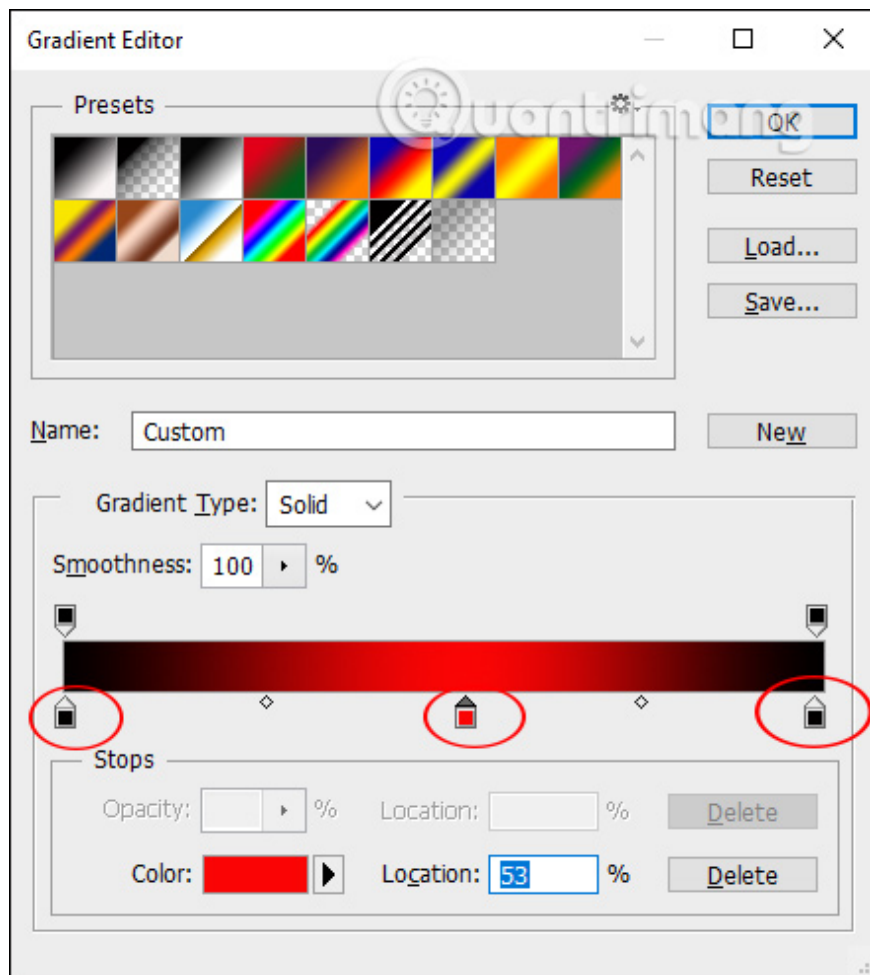

### Step 1:

First, you **create a new frame** to enter text lines depending on the length of the text. Continue to click on **the Gradient tool** and choose **the 4th color type** as shown below.

**Step 2:**

Next, **click on the color bar** next to select the color you want to use. At the color bar you will **adjust 3** different **color landmarks** .

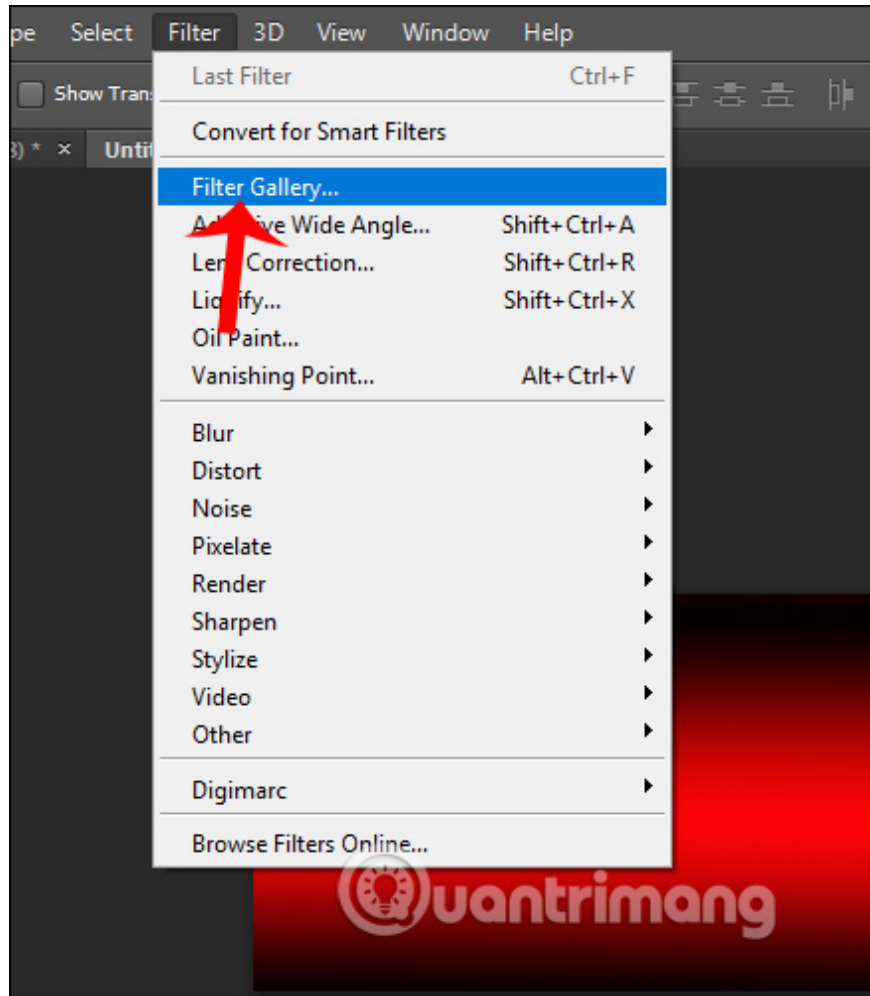

Once you've chosen the red color of your choice, **click on the text box**, then **drag a straight line down** . The result of the text box is colored as below.

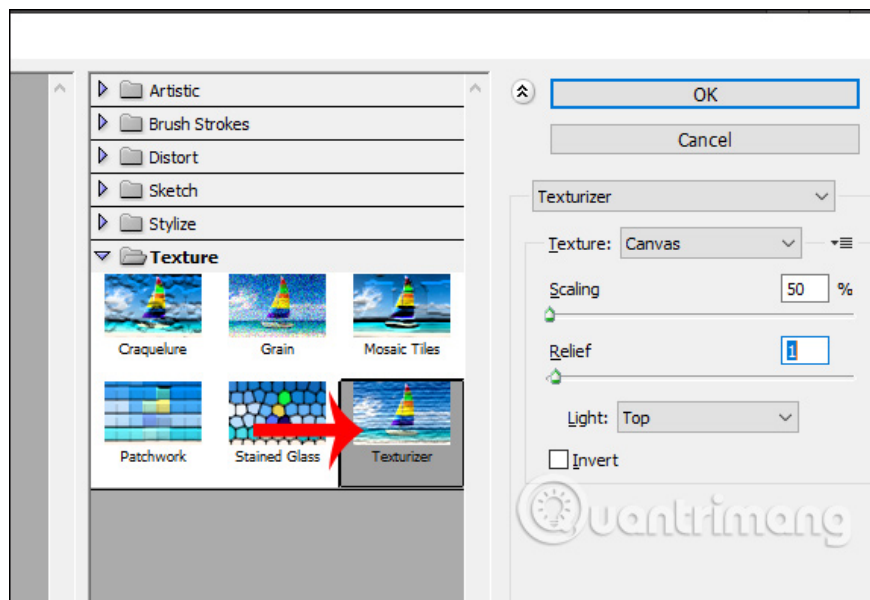

**Step 3:**

Click on **Filter** and select **Filter Gallery** .

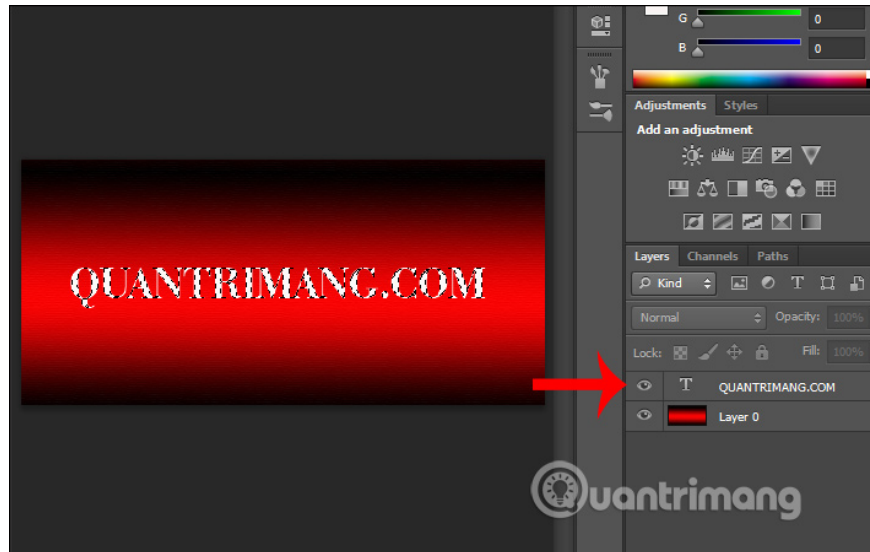

Display the new interface, click on **Texture**> **Texturizer** and enter parameters as shown below.

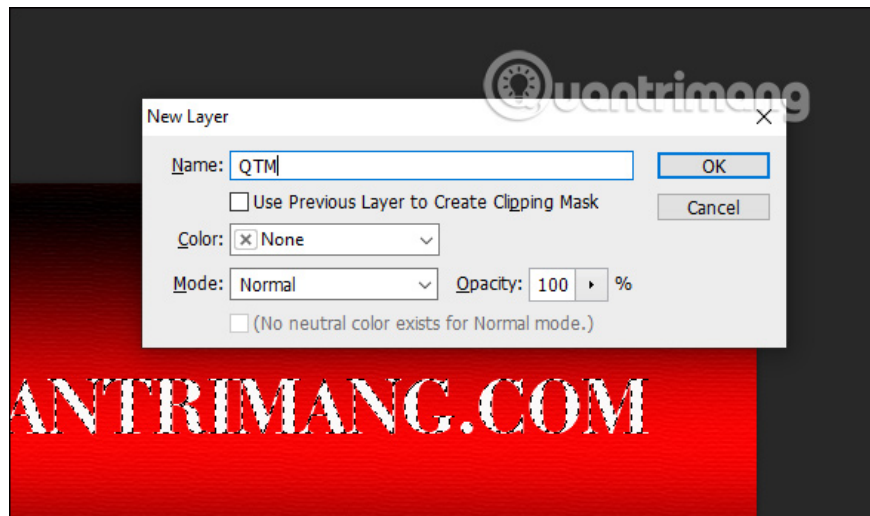

#### Step 4:

Click on the **letter T** and write the text you want in the red frame, the text will use white. After that, **hold Ctrl** and **double-click the text layer** to highlight it.

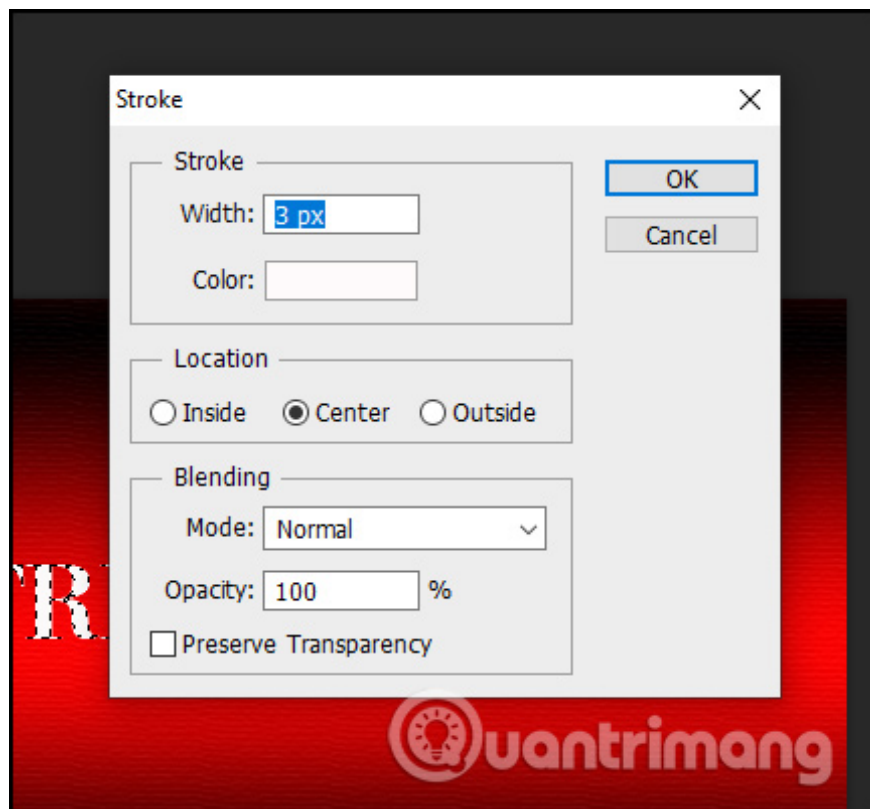

Press **Ctrl + Shift + N** to create a new text layer, name the layer.

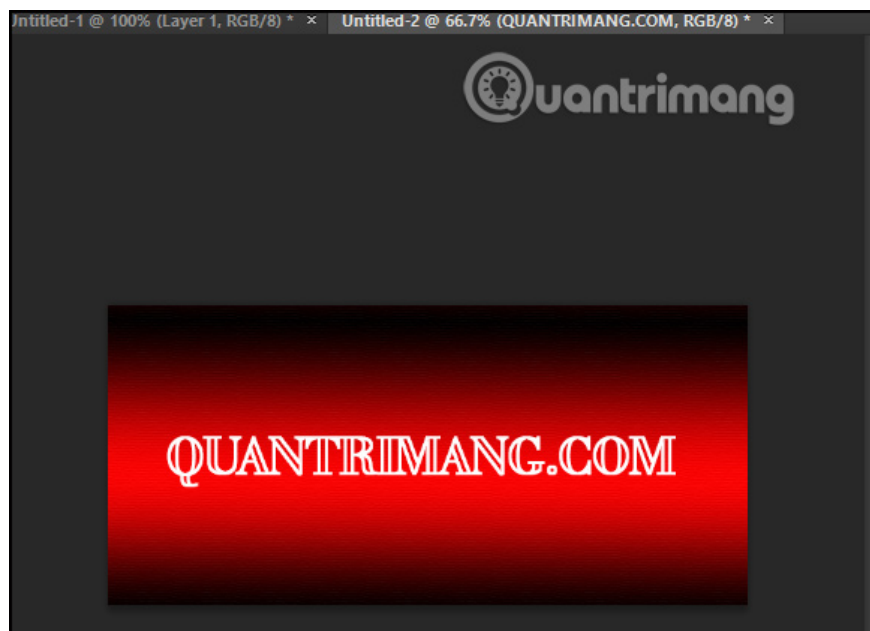

#### Step 5:

Click **Edit** and then select **Stroke**, adjust **Width to 3 px** with **white**.

Then click **the eye icon at the old text layer** to hide them. Next press **Ctrl + D** to remove all selections. At this time, the word appears as shown below.

**Step 6:**

Click **the Marquee Tool** and select **Single Row** to **draw a line below** the text as shown.

Continue to **create the Stroke** by clicking **Edit**, select **Stroke** , and select **Width with 3px** as in step 5. Press **Ctrl + D** to remove the operation.

### Step 7:

Use the **Eraser Tool** to erase some strokes of the text to create typography. Note you will delete at the bottom of the word. **This operation is relatively time consuming and careful** . Finally, **click the Line Tool** to draw zigzag lines like the image below.
