

How to create Instagram Stories from your voice and photos

Voicestory application creates Instagram Stories from personal photos and text transferred from your voice.

Instagram Stories is a place for users to share every moment, images with effects, or even create questions on Instagram Stories. And to refresh the content when posting on Stories, we can use the Voicestory application. This application allows to convert voice recording into text and use your personal image to upload to Stories. Voicestory supports posting videos directly to your personal Instagram account. The following article will guide you how to use Voicestory to record videos on Instagram Stories.

4. How to post photos to Instagram from a computer

Guide to creating Instagram Stories videos

Step 1:

Users download Voicestory application - Voice Into Video on iOS device according to the link below.

1. Download Voicestory - Voice Into Video iOS

Step 2:

Next open the application and the user will be asked **to allow the use of the microphone** on the device to record the voice. Click **the red circle microphone icon** to record the voice within 15 seconds.

Step 4:

Wait Voicestory application process to analyze your voice. We then see Voicestory requesting **permission to access the Photo Album** on the device. Currently the application only recognizes English voice well. As a result you will see the voice being converted to the script as shown below.

In case you want to change the recording content, click on **the x icon** and **select Discard** to remove the content and record it from the beginning.

Tiếp

With the Voicestory app, the content on Instagram Stories has changed more interesting with images or text from your own voice. Hopefully in the next update the manufacturer supports more languages.

I wish you all success!
