

# How to create iPhone ringtones does not need iTunes, the computer is free of GarageBand

Create iPhone ringtones on your phone, no need for iTunes, free GarageBand computers, you can make iPhone ringtones easily, simpler than ever.

GarageBand is an application that supports iOS devices to be able to create a sound studio right on the iPhone / iPad. By providing users with different types of tools, we can create music pieces that we mix, such as drums, guitar, organ, . Especially GarageBand can help you create music tracks. bell for iPhone or iPad, right on the interface without the need for iTunes software, iTools or extension cord as usual. In the article below, we will show you how to create ringtones using the free GarageBand app on iOS.

To create an iPhone ringtone on your phone, follow the steps below:

## Step 1: Download the GarageBand app (if not already)

First of all, download the GarageBand app for your device according to the link below.

1. Download the GarageBand iOS app

**Note to users** , GarageBand will only install on devices with iOS 10.2 or higher. The capacity of the application is quite heavy so you should connect to WiFi to download the application, save 3G.

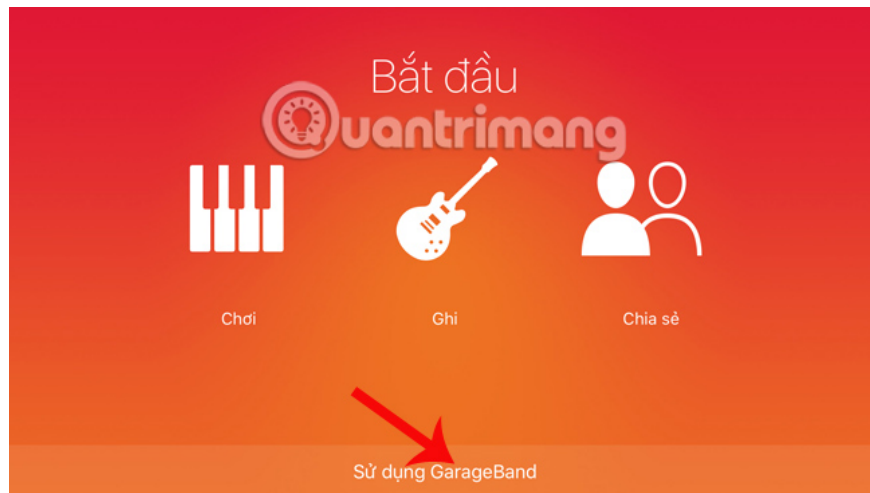

## Step 2: Open GarageBand on the phone

Then we open the GarageBand app on the device. At the first interface, click **Continue** .

### Step 3: Choose Use GarageBand

Switch to the next interface, click on **Use GarageBand** to start using the app.

### Step 4: Select an audio creation tool

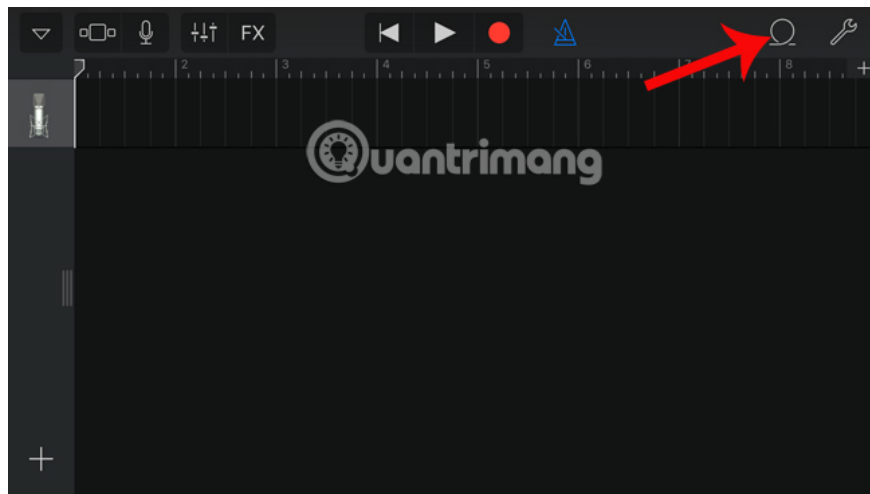

We will see the audio recording support tools that GarageBand brings to users. You swipe the screen to the right or left to find any sound creation tool, for example I select the Audio receiver section and then click the Voice section.

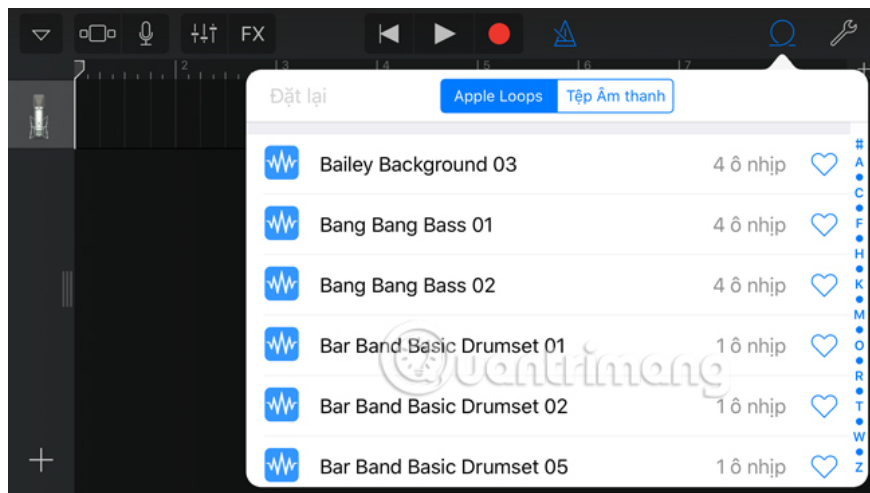

### Step 5: Click on the View icon in the Loop Browser as shown below.

**Step 6: Click on the circular Music icon to select a song as a ringtone on the iPhone.**

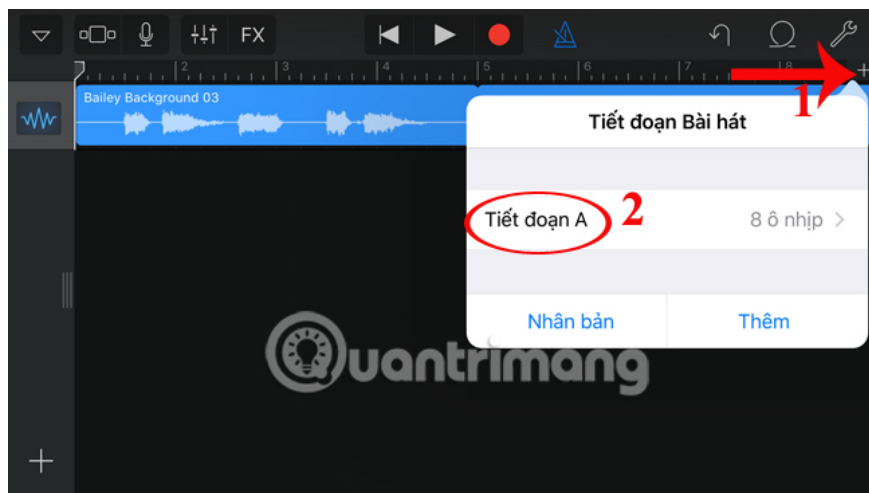

Here, users can choose the song available in **Apple Loops** or click **Audio File** to select another song.

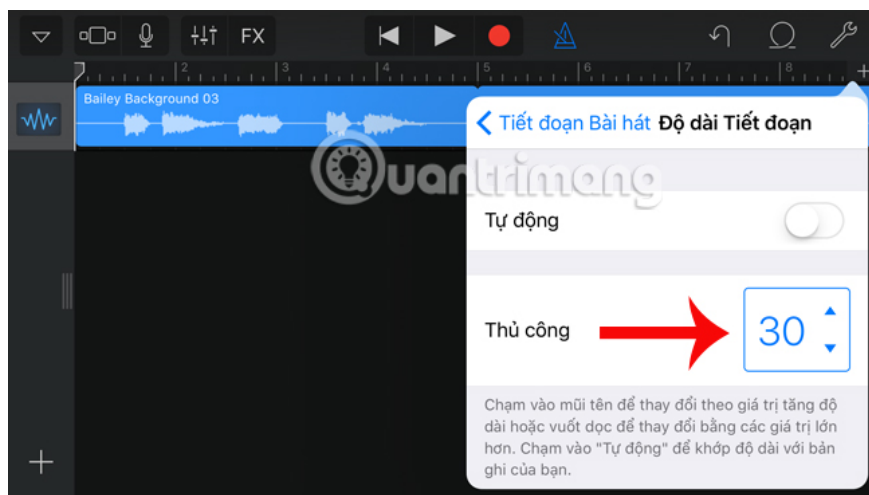

**Step 7: Click the + sign icon > select Paragraph A**

After you've found the song you want to set as a ringtone, press and move the song to the current interface on GarageBand. To increase the length of the song, click **the plus symbol** above, then click on **Stage A**.

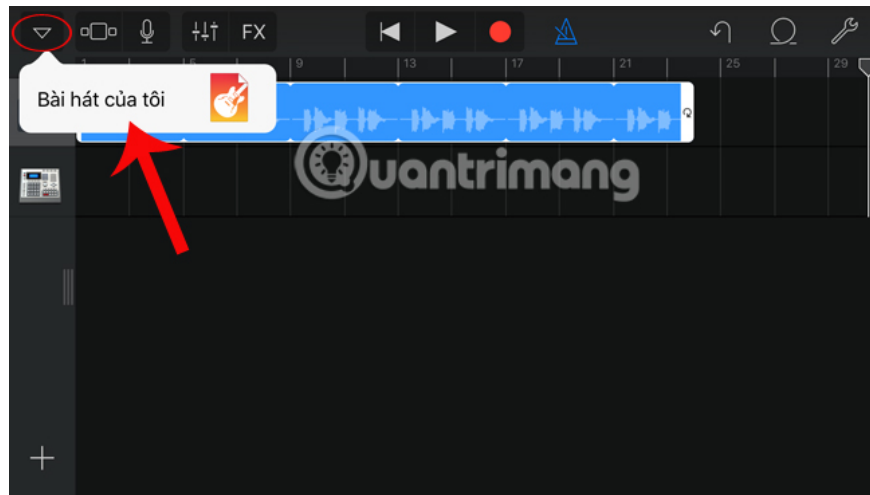

You press continuously on the arrow pointing up at Manual to move to level 30 for example.

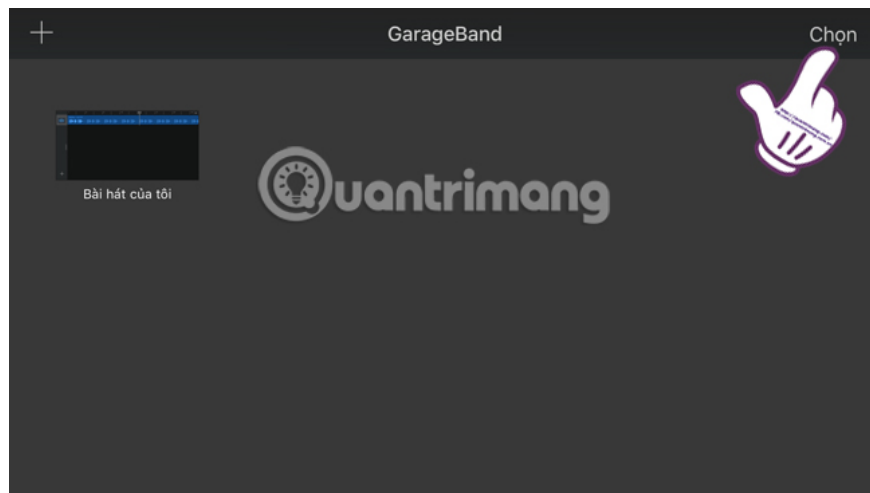

### Step 8: Go to My songs

Go back to the custom ringtone interface on GarageBand. We will click on **the drop down triangle icon** and select **My song**.

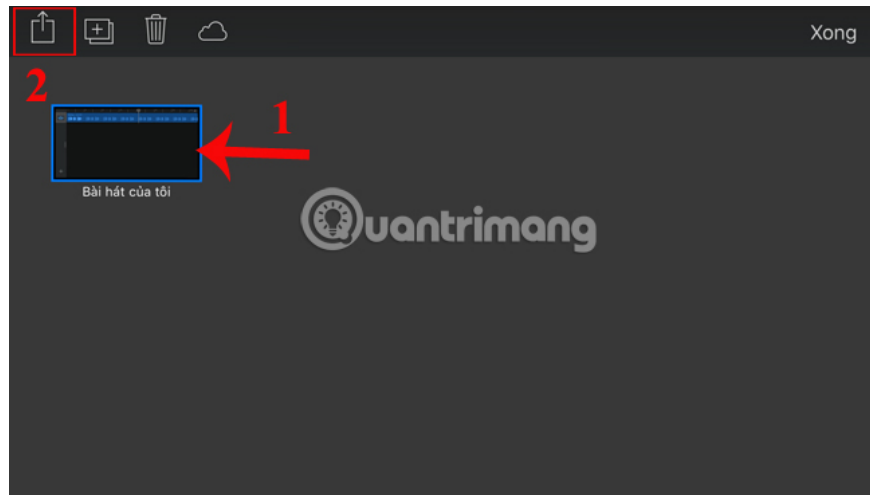

### Step 9: Select the iPhone ringtone you just created

Users will see the music created on GarageBand. Then, click the **Select** button in the top right corner of the interface.

Next, users **click on the song just created** in GarageBand interface. You will immediately see some options for the song that appear on the same GarageBand interface. To use this song for iPhone ringtones, we click **the Share icon** as shown.

### Step 10: Transfer iPhone ringtone to the Ringtones folder

The last thing is that you just need to click the **Ringtone** to set the song as the ringtone for iPhone and then finish.

So we've created our own iPhone ringtones with the GarageBand app, no need for iTunes support or cables. In addition to using the songs provided by GarageBand, try using the songs included in the album on the device.
