Tutorial to create light for text on Photoshop

Step 1:

Users create image files with a resolution of 600 x 250 or more depending on you.

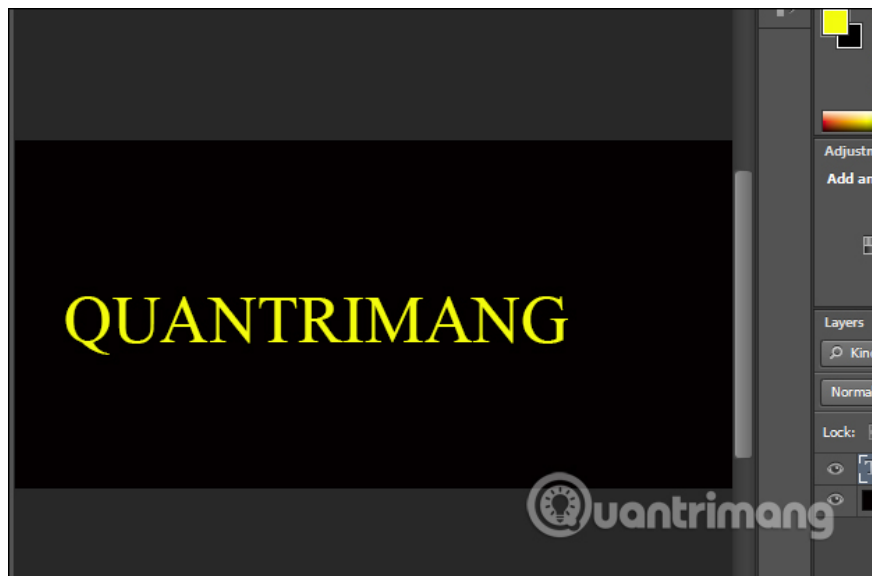

We will let the background be black or gray, but choose a dark color so that the text effect is more prominent after the text effect has been created.

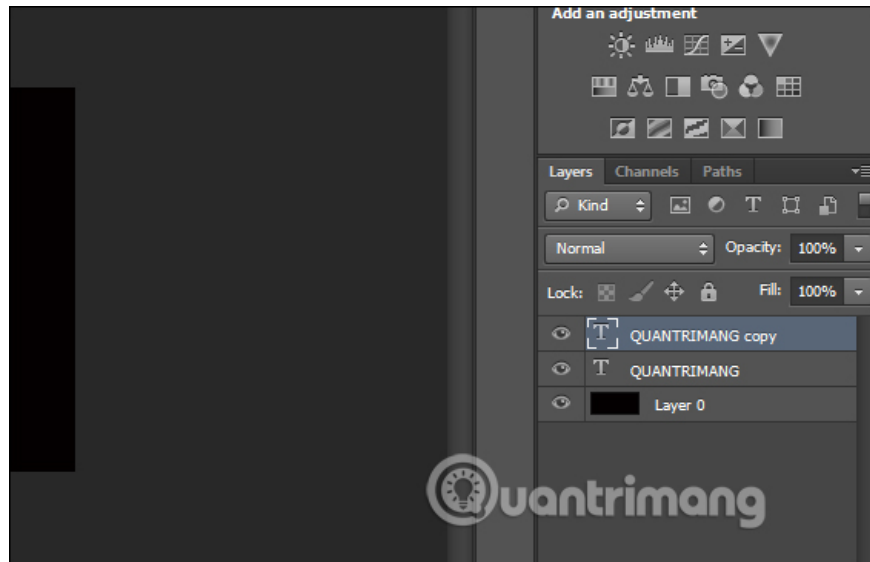

Step 2:

Click **the T icon** in the toolbar on the left of the screen and select the font color as yellow and enter the text. Use the font color code # F4FC0E. Can adjust font format if needed.

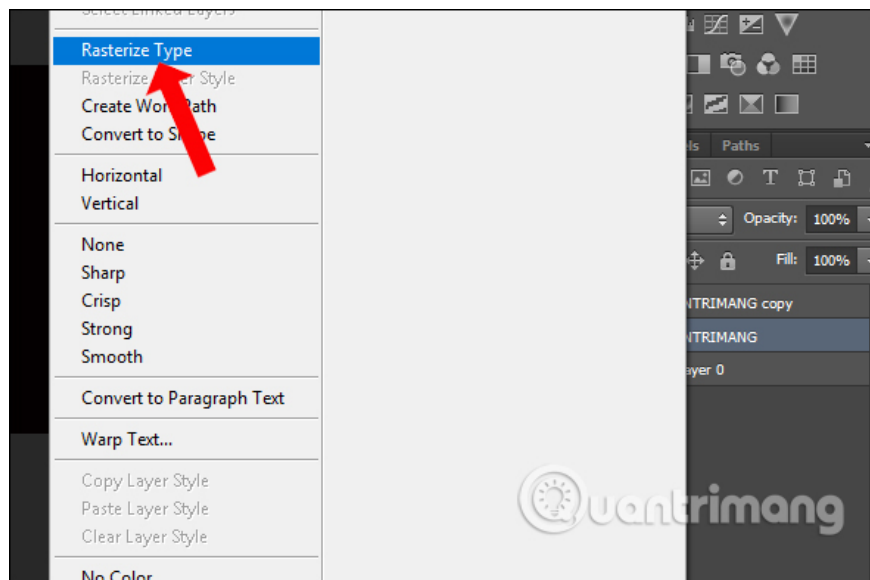

Step 3:

Next click on the **text layer to** the right of the interface and press **Ctrl + J** to duplicate this text layer. The new text layer will have more copy letters as shown below.

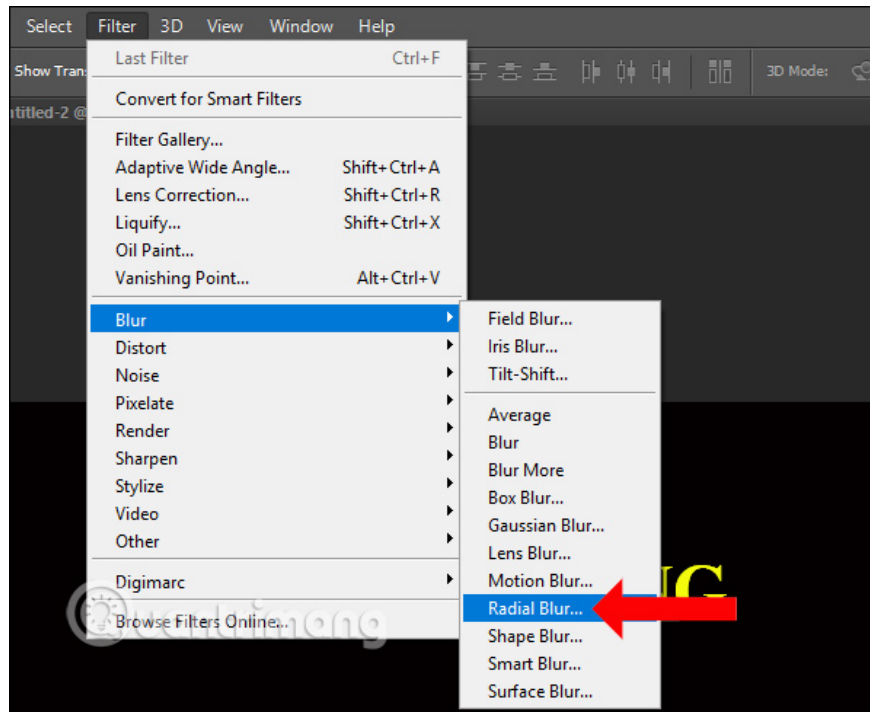

Step 4:

In the original text layer, right-click on the layer and select **Rasterize Type** to lose this text layer and switch to another format.

Step 5:

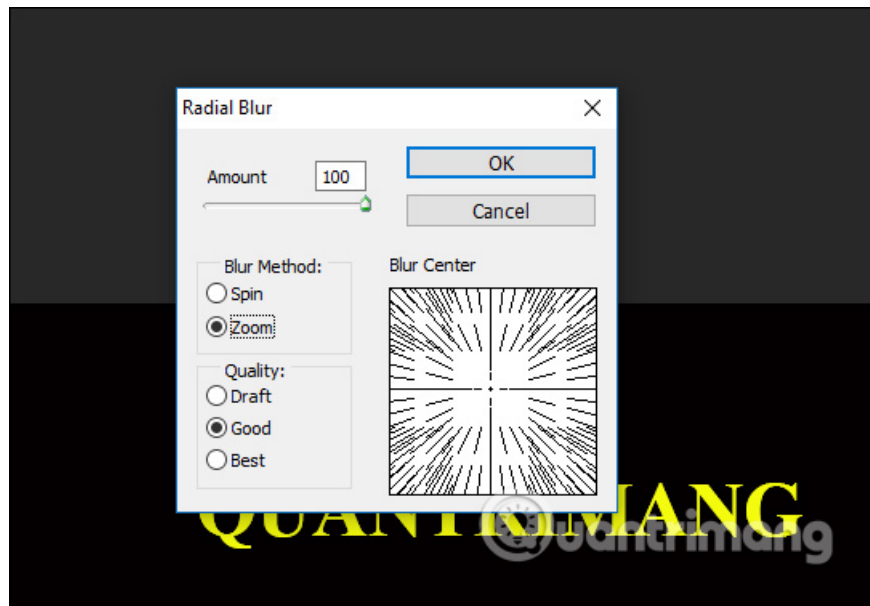

Users click on **the Filter filter** above the toolbar and select **Blur** . Display the list next to the **Radial Blur** entry .

Step 6:

Display the tool panel to customize the effect. Here the user adjusts the items according to the list below and press Ok to create the effect.

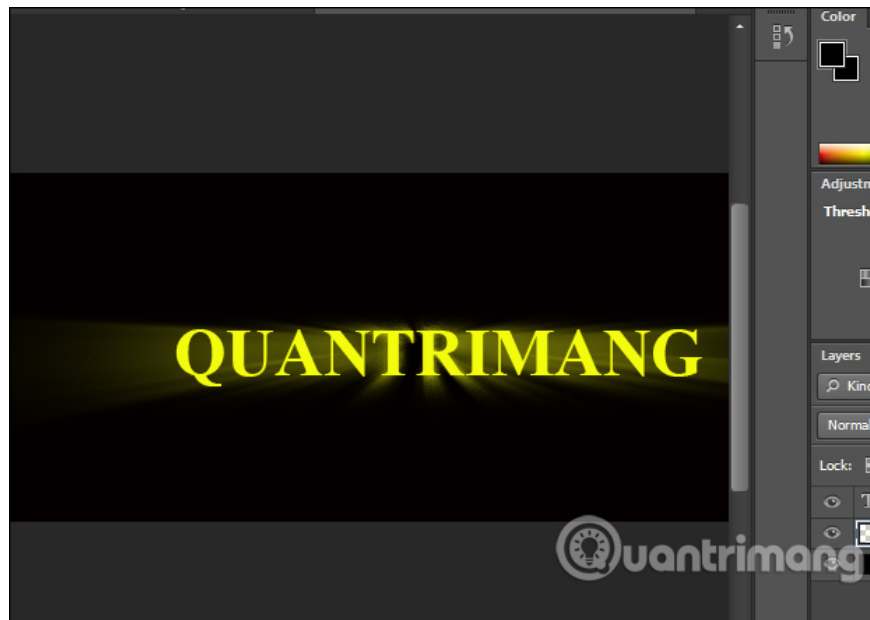

1. Amount: select 100.
2. Blur Method: select Zoom.
3. Quality: choose Good.

The resulting text is created with a light ray effect as shown below.

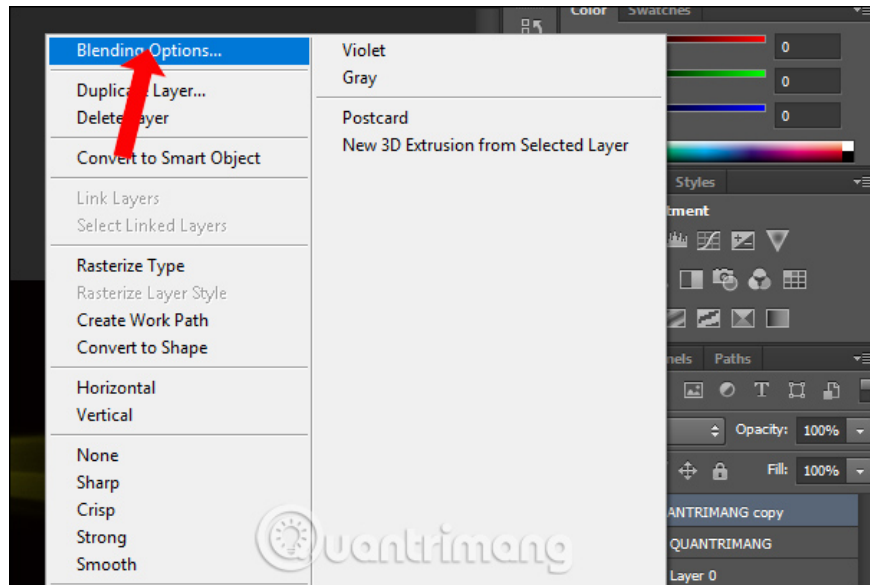

In case we want the light rays to expand further, increase the area of the light ray, just do the filter correction again as above until the effect is optional.

Step 7:

Go back to the layer layer and double click on the copy text layer, or right-click and choose **Blending Options** .

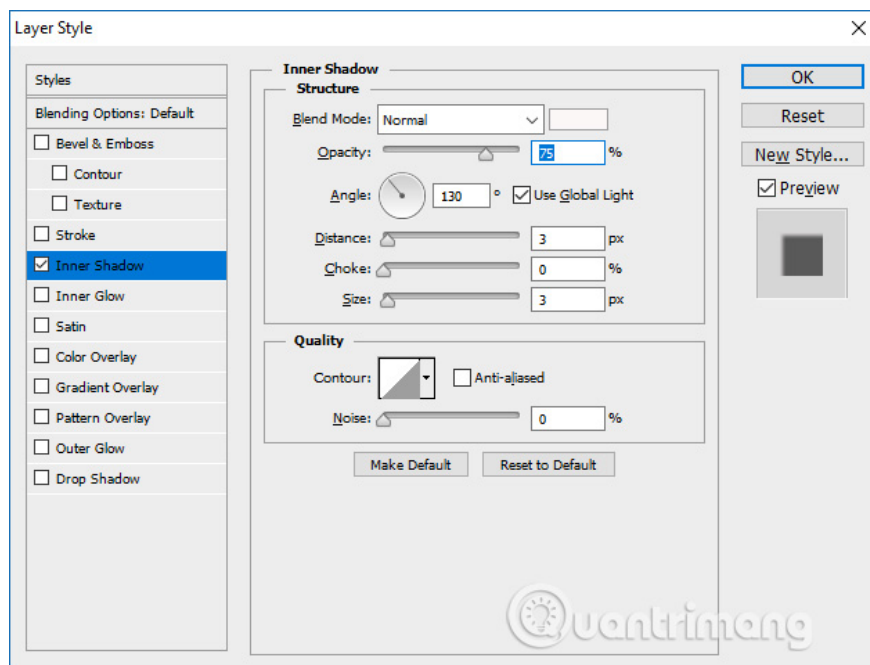

Step 8:

In the new interface, click on **Inner Shadow** and change the parameters as shown below.

1. Blend mode: select Normal and leave white.
2. Opacity: adjusted down to 75%.
3. Angle: use 130 degree angle and select to use Global Light.
4. Distance: adjust to 3 px.
5. Choke: set to 0%.
6. Size: adjust to 3 px.

Finally click OK to save.

Immediately the text effect will be created as shown below. The text will have a white border to highlight the light ray effect.

So how to create light effects for text on Photoshop is very simple. We proceed to create a light ray effect when using the Filter filter and add a white border to make the text more famous. You can also change the text background to a different color depending on the need for text making in Photoshop.
