VnEdu education network provides a lot of utilities for users, outstanding among them is to allow teachers to create multiple choice questions, then from the bank itself can set up the structure of exam questions Different multiple choice questions. With this useful feature, teachers will save a lot of time for teaching, exam questions for students in exams. If you just use VnEdu, surely many teachers still face many difficulties, so below we will guide the detailed steps to create a multiple choice exam on VnEdu.

## Instructions for creating multiple choice questions on VnEdu

### 1. Access: VnEdu

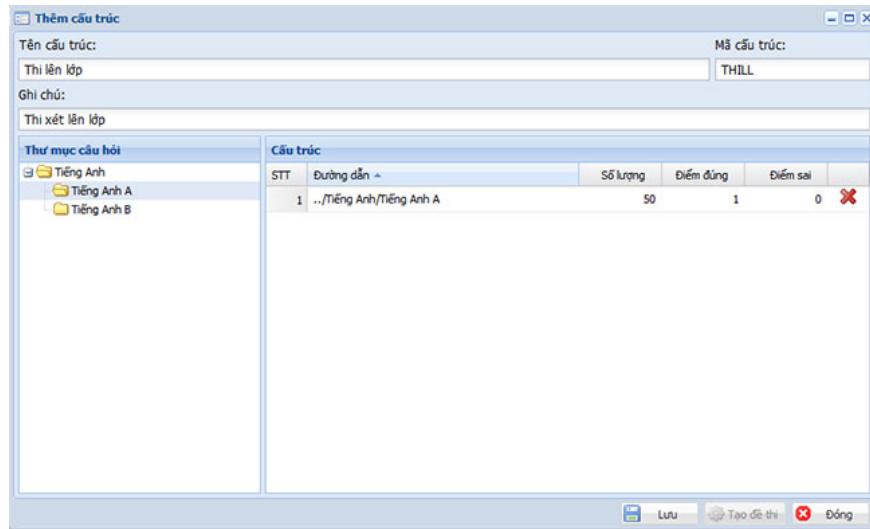

First of all, teachers take turns following the following path: **Go to Start> Tools for mixing exam questions> Create multiple choice questions** . The system will display a new interface that allows us to add exam structure, create and print multiple choice questions.

### 1. Add multiple choice test questions on VnEdu

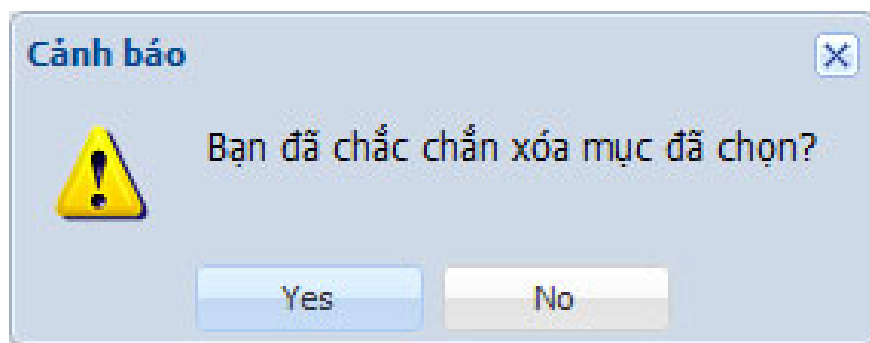

Looking at the **Structure Management** interface, it is easy to see on the left is the exam structure file directory, on the right is a list of the corresponding structure of the selected directory.

1. To update the latest list of exam structure, click the **Refresh** button.
2. To add new exam structure, select the **Add** button.
3. Edit certain exam structure, select a line on the displayed list, then click on the **Edit** button.

When selecting **Add** or **Edit** the system will display the **Add structure** interface, where the teacher proceeds to enter the structure name, structure code, notes. As for the content of the question, pay attention to the following:

1. Structure: Selected on the 'Question folder' on the left, this is the selection of questions for the exam structure.
2. Quantity: Select the number of questions for each exam in the question bank.
3. Correct Score: Score for a correct answer.
4. Wrong point: Score unless the answer is wrong.
5. Enter the complete and correct information, then click the **Save** button.

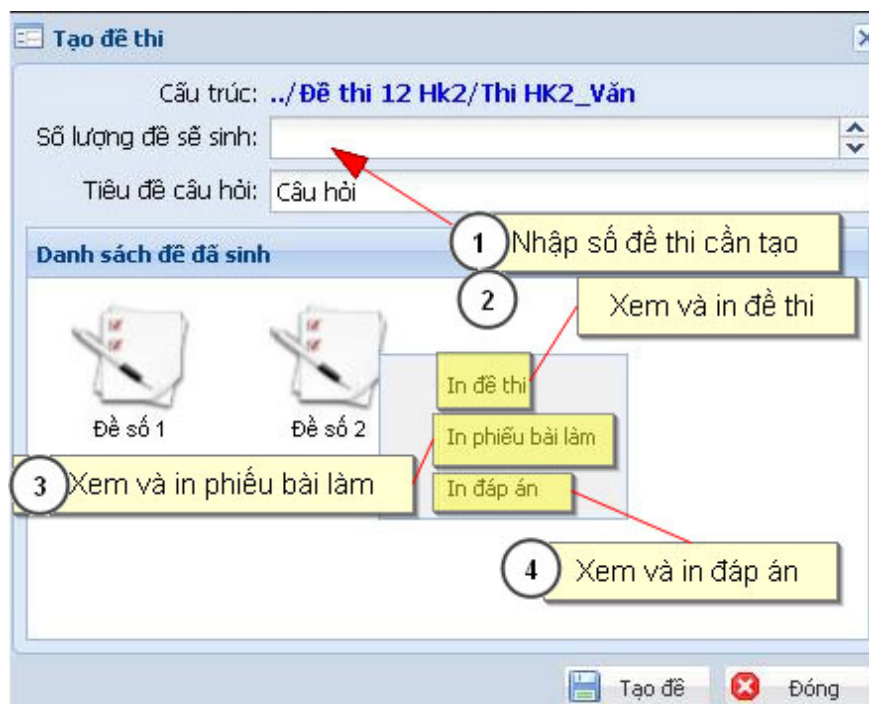

When you want to delete the exam structure, simply select the exam structure and click the **Delete** button. Immediately, the system will ask to confirm this operation, select **Yes** to accept, select **No** to cancel.

## 2. Create and print multiple choice questions on VnEdu

Creating the structure of test questions on VnEdu is completed, teachers can also create different exam questions with randomly changed questions, mixing from the set of questions of each structure to a new exam including multiple choice questions or self-statements from the question banks.

To print exam questions or answers, click the **Create Test** button on the **Exam Structure** page. Then enter the exam number to create, question title, view and print the exam questions.

With this guide, I hope teachers can create multiple choice tests on VnEdu quickly without any problems. Wish teachers successful!
