3. How to create online animations using Gickr

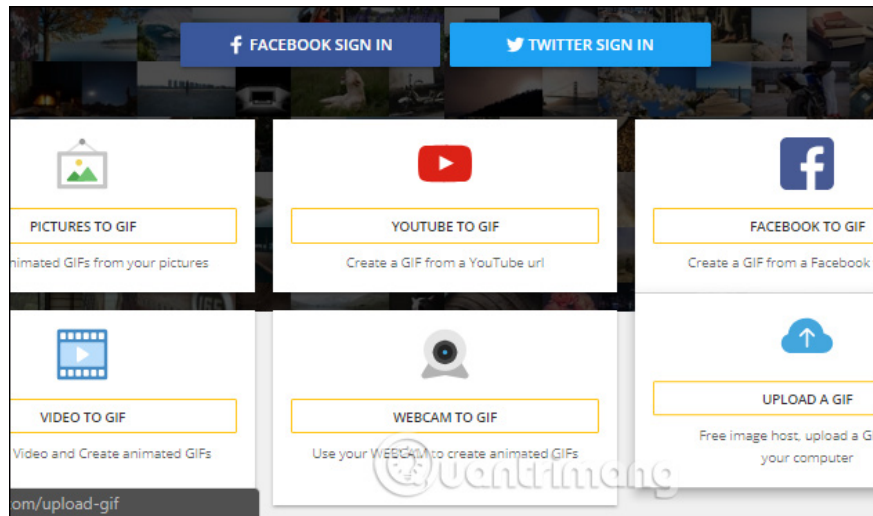

## Instructions for creating animations on Makeagif

### Step 1:

First, users access the link below to open the homepage of the service. In this interface we will see options for creating animations. There will be 6 animation options.

1. <https://makeagif.com/>

In addition, if you log in with your Facebook or Twitter account, you will have the option to immediately share your photos on social networks.

### Step 2:

To create an animation from a still image click on **Pictures to Gif** . In this new interface, users can drag and drop photos into the interface, or click **Upload Images** to upload photos.

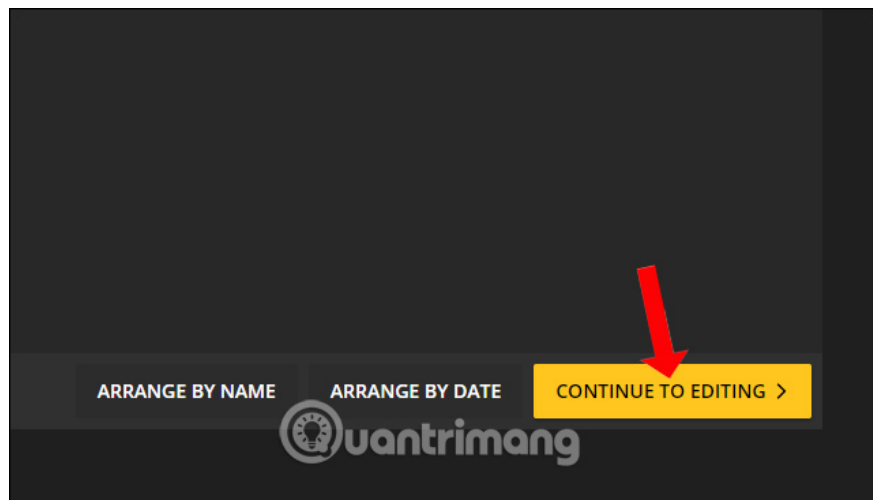

### Step 3:

In the new interface we will see the uploaded image with the option to delete the image if desired, or rotate the image to the angle you want to use. If you want to add images, click the Add Images button below. Users can also change the location of images by moving.

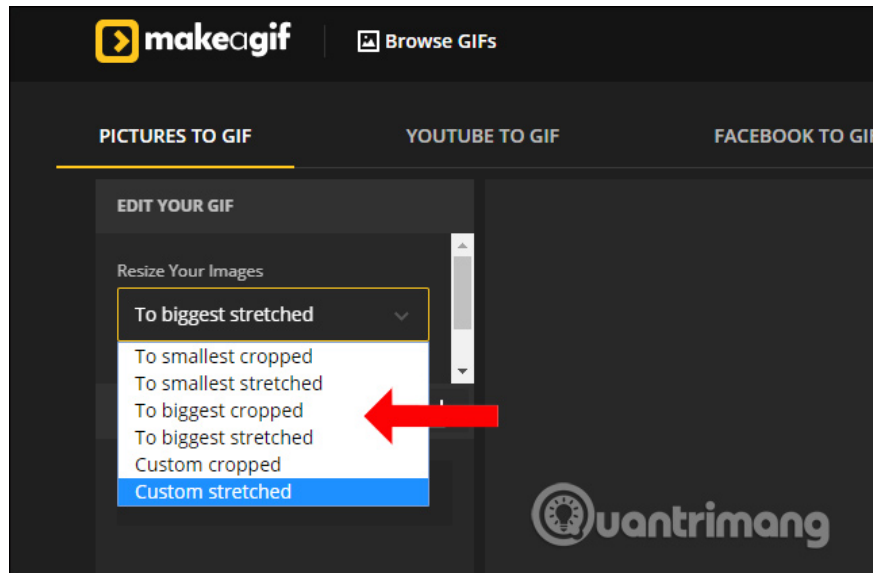

#### Step 4:

The website also provides automatic sorting of images when creating animations by clicking Arrange by date or Arrange by Name. Click **Continue to Editing** to edit the animation.

#### Step 5:

Appeared animation editing interface. The **Resize your images section** can select other size changes for images. You can apply the available option or click **Custom** to manually enter the size for the image.

### Step 6:

Continuing below can add animation content at **Captions** or **Stickers** to insert more images into the animation. Animations are relatively few images and you must have an upgrade account to use more images.

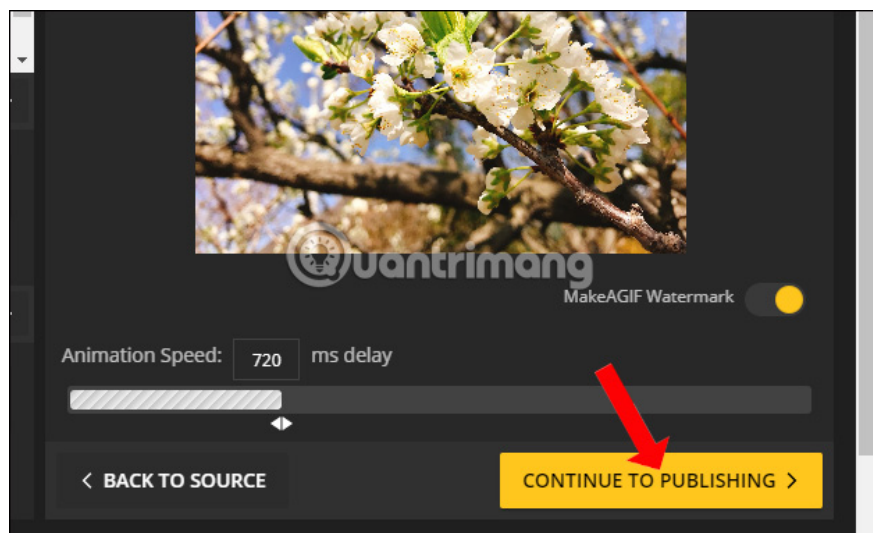

The writing part can choose font and font color. Text content will be displayed immediately on the animation so that we can move to the appropriate location, resize, rotate text or delete text if you do not want to use it.

### Step 7:

In the **Animation Speed** section, adjust the movement speed of the animation with the horizontal bar below. The smaller the number of selections, the faster the movement speed. Then, if you want to go back to selecting the image, click **Back to source**. If not click **Continue to Publishing** .

### Step 8:

In the Gif Settings interface, enter a name for the animation at **Give your GIF an awesome title** . Choose a category for animation in **Where does your GIF belong** . Tag your **GIF for better visibility!** You can tag images if you want.

**18+ Only** - Contains nudity  
and it is Not Safe For Work

Anir

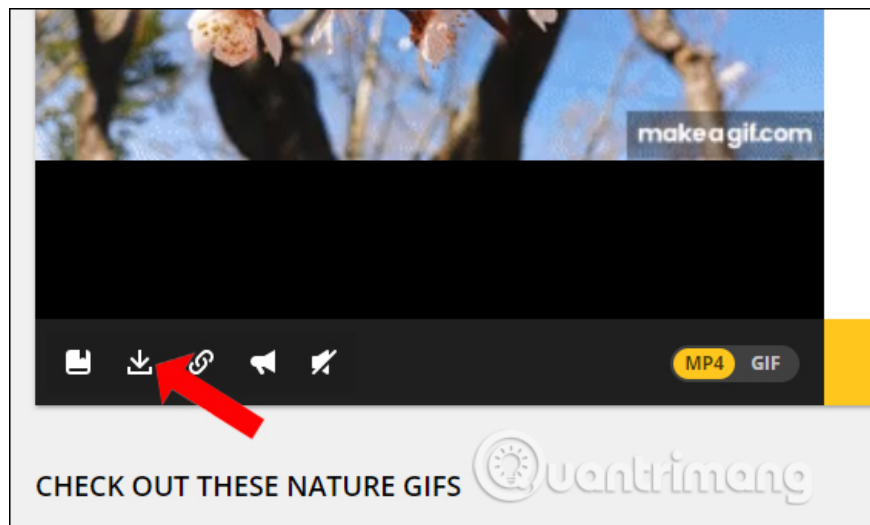

Then click **Create your gif** to create an animation on the Makeagif page.

### Step 9:

When the animation process is completed press **the download icon** to download the animation to the computer. If you want to download photos in mp4 video format, then turn to MP4 mode to create video site.

Thus users have created animations on Makeagif. In addition to choosing still images to create animations, we can choose from a variety of video sources. Note to users that if you take videos from a computer, the capacity must be less than 25 MB to create an animation.
