How to create an animation on Imgflip online

Step 1:

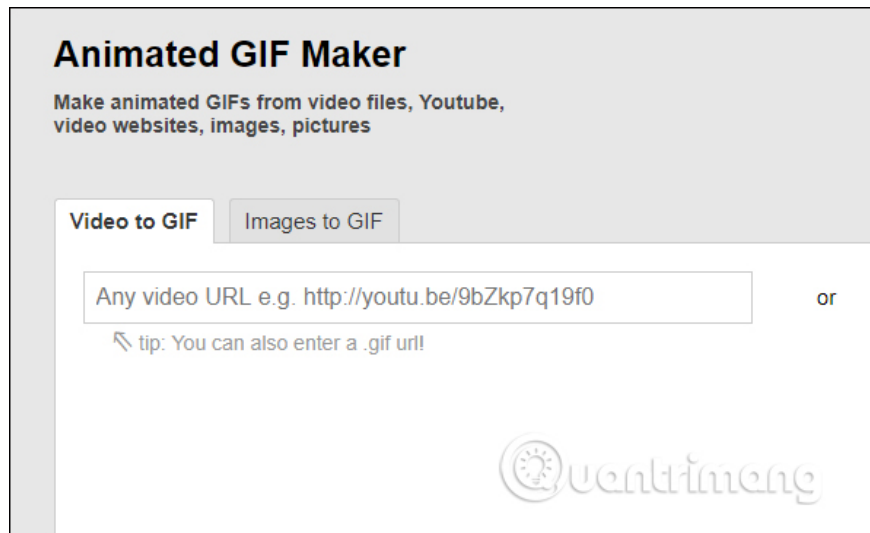

Go to the link below to go to Imgflip's homepage and click on **the Create button** and select **Make a GIF** to create an animation.

1. <https://imgflip.com/>

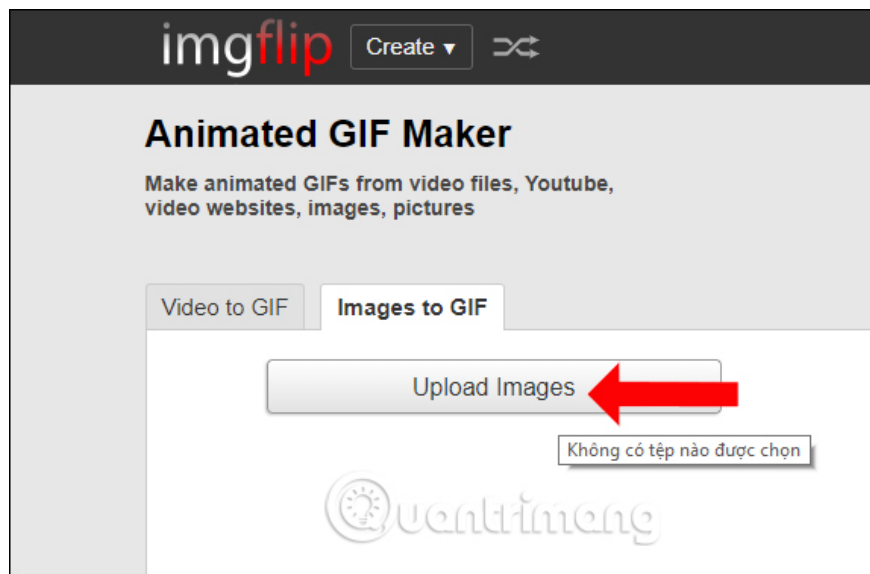

Step 2:

In the file selection interface, the user will choose to make animated images via still images or videos available on the computer, or YouTube videos.

To use a still image as a video, click the **Images to GIF** button and select **Upload Images** to upload the image.

Step 3:

We need to select more than 2 still images to make animations. During the image selection process, you should look for images with the same size and good image quality.

Then will go to the animation editing section. You adjust the landmark buttons left or right. Each photo editing will be applied immediately to the photo frame so users can preview.
