The development of Quotes content is being done by many people today and it is growing strongly. There are many tools to create Quotes, but some specialized software is difficult to use. In this article, Software Tips will guide you how to create Online Quotes fast and extremely beautiful.

1. Create Quotes Online with Quotes Cover

Step 1: You proceed to access the link <https://quotescover.com/>

Step 2: At the main interface of Quotes Cover, select **Start creating for free** to start using.

Step 3: Quotes Cover provides many different types of Quotes for users. Depending on the individual purpose we choose the right category, it will optimize the size and resolution to the best.

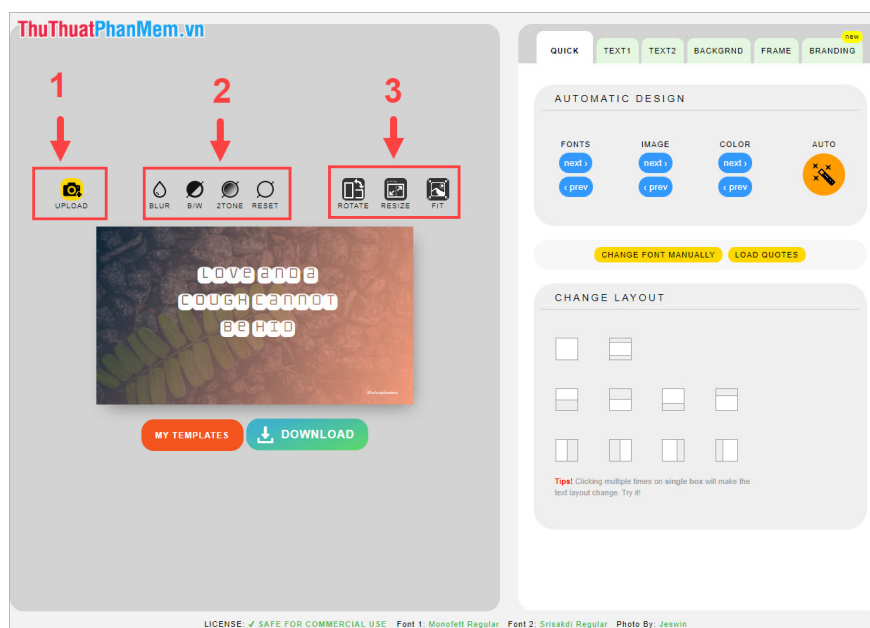

Step 4: Next, you need to enter the content of the Quotes and sign.

1. **Your Quotes:** Quotes Content
2. **Your name or Description:** The name of your

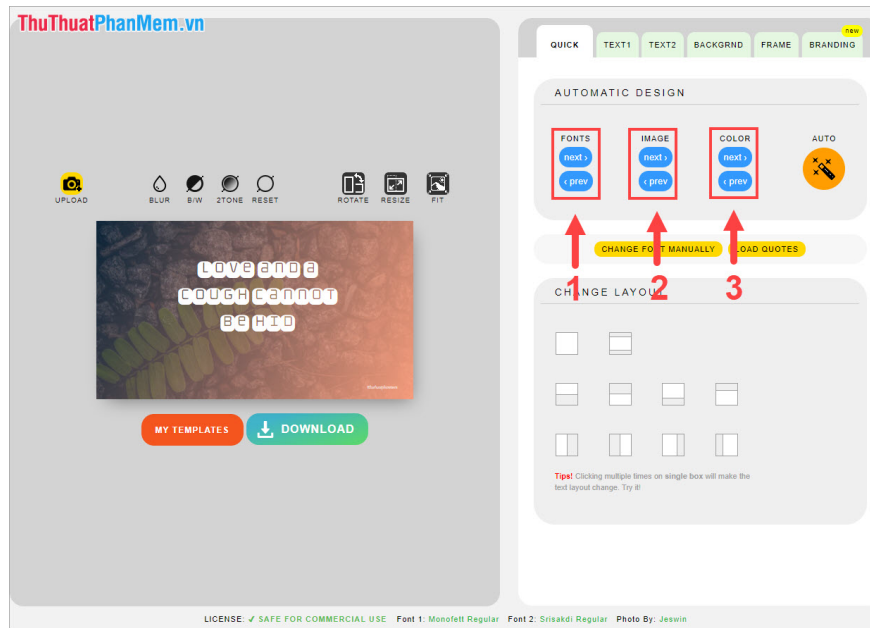

Step 5: After that, you will be moved to the main interface of Quotes Cover. In this section, you can quickly edit the content.

1. **Upload:** Download wallpapers for Quotes from your computer
2. Color filter for background images
3. **Edit size:** Rotate, size, adjust Fit

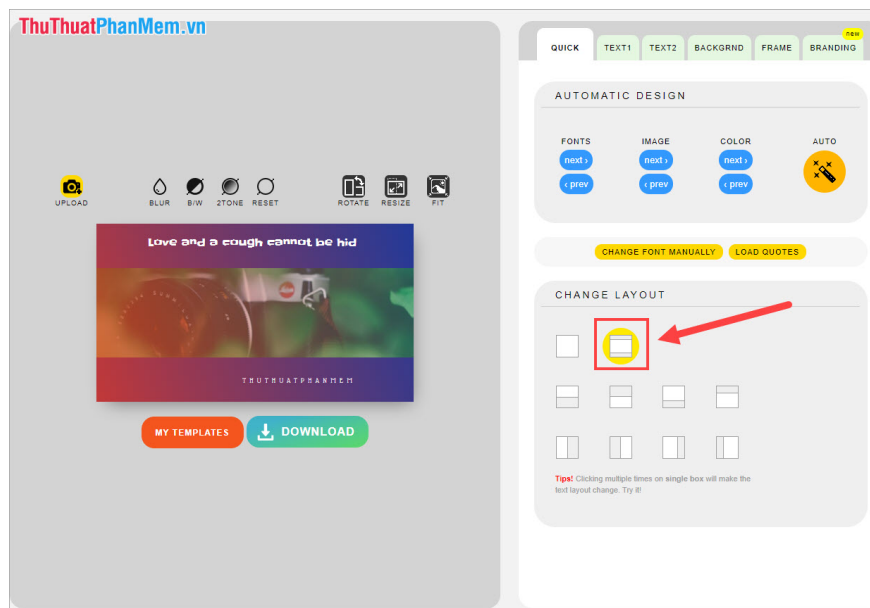

Step 6: Next, we will have the adjustment tools for the Text (text) section:

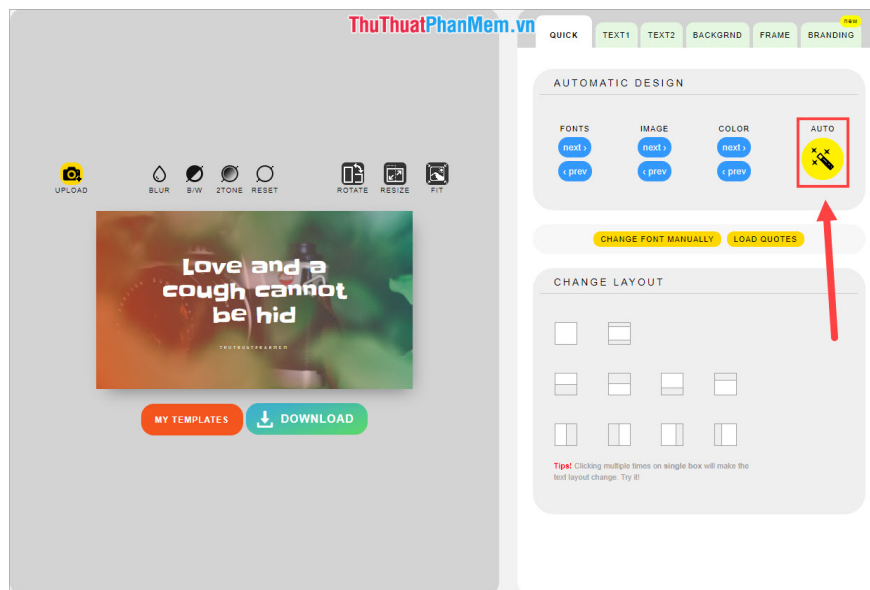

1. **Font:** Change the Font
2. **Background image :** change the background image if you use the background image from the system
3. **Color:** Change the color filter for the background image

Step 7: At the bottom we will have tools to edit the layout of text and content. You can choose to see it.

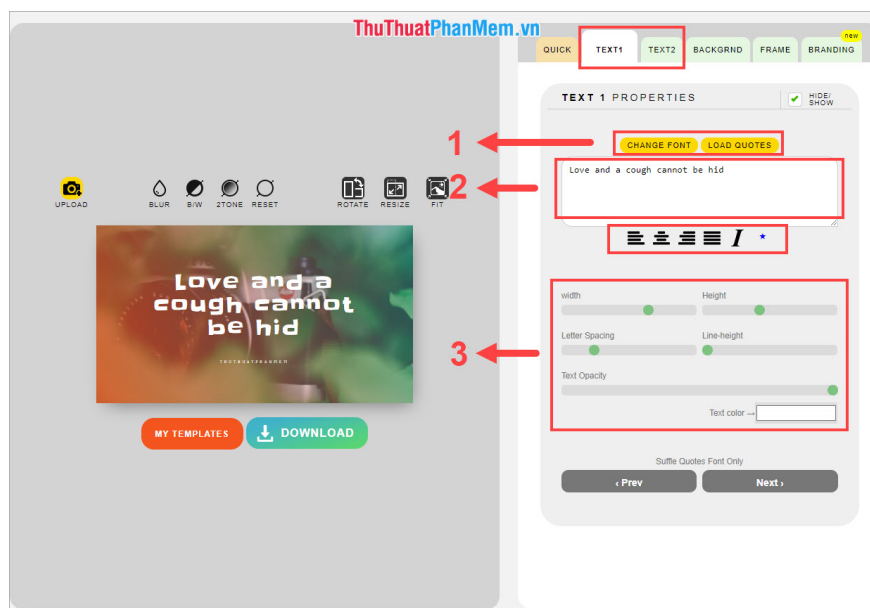

Step 8: If you do not have much time and do not know how to edit then choose **Auto** to cover Quotes decisions for you instead.

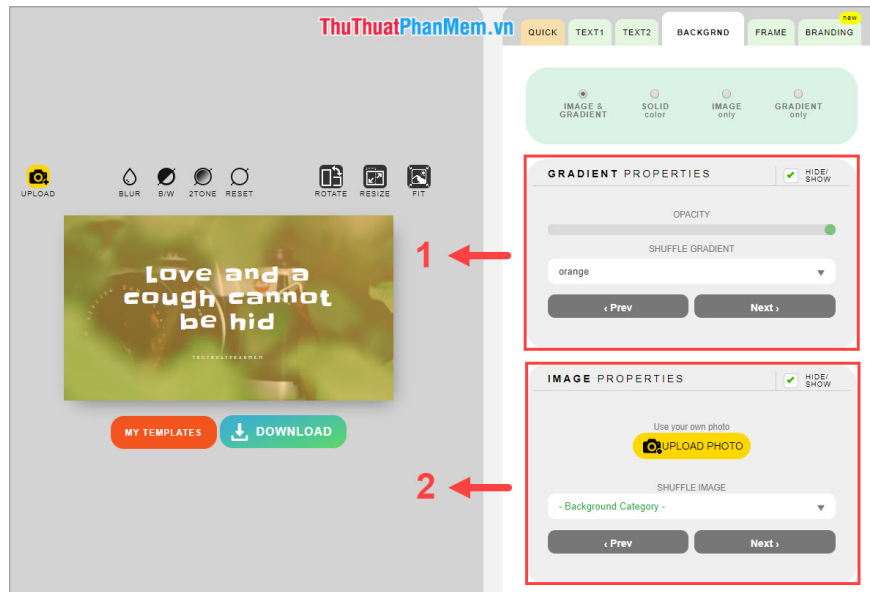

Step 9: After editing the profile is complete, we proceed to edit details. We have 2 Text tags, **Text 1** is the content of Quotes and **Text 2** is the content of the owner (ie the creator of quotes).

1. **Changer Font / Load Quotes:** Change Font / select available Quotes
2. **Content of Quotes:** Text display content
3. **Edit:** Change the color, size of the text

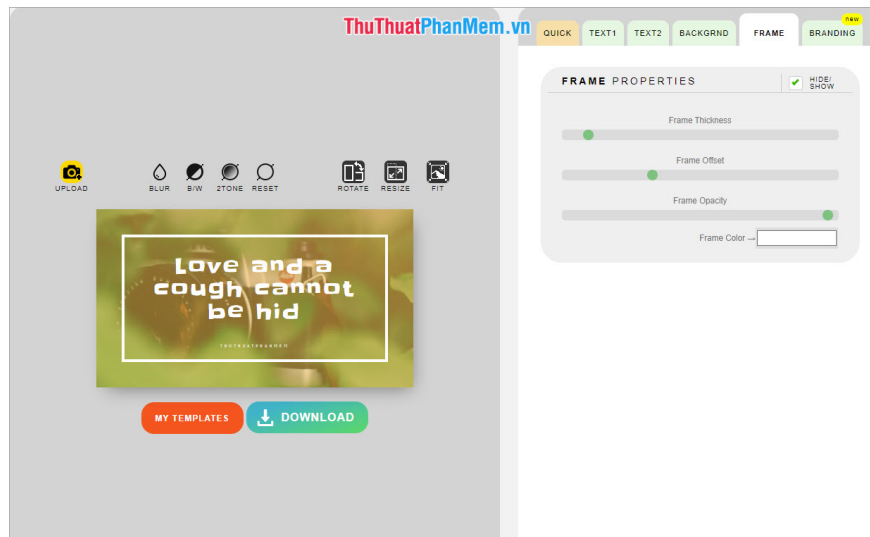

Step 10: Next, we switch to the **background** image card to choose more.

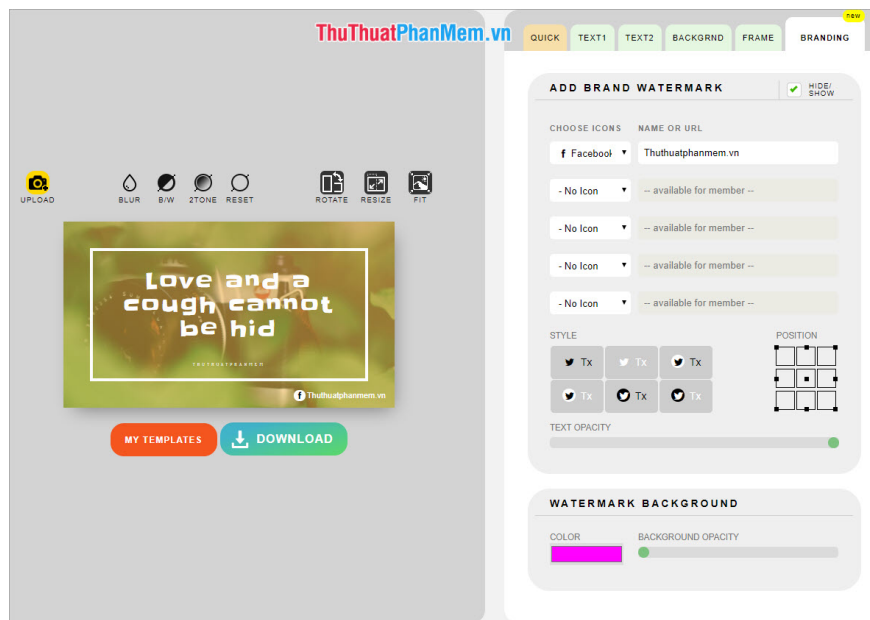

1. **Gradient Properties:** Change the mode / color of the overlay filter on the background image
2. **Image Properties:** Select a background image, upload a background image

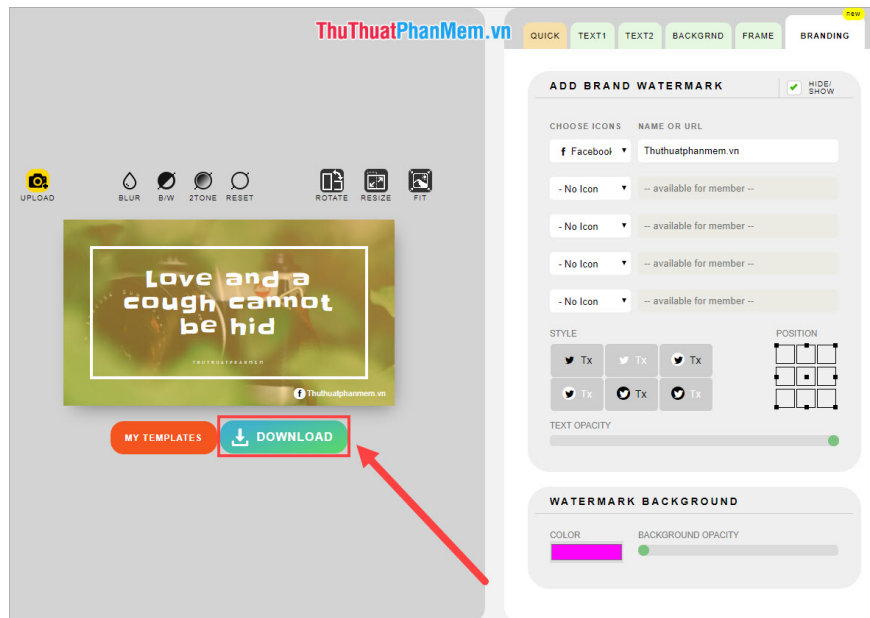

Step 11: After we have the **Frame** tab, you can create more frames for the image to be more scientific.

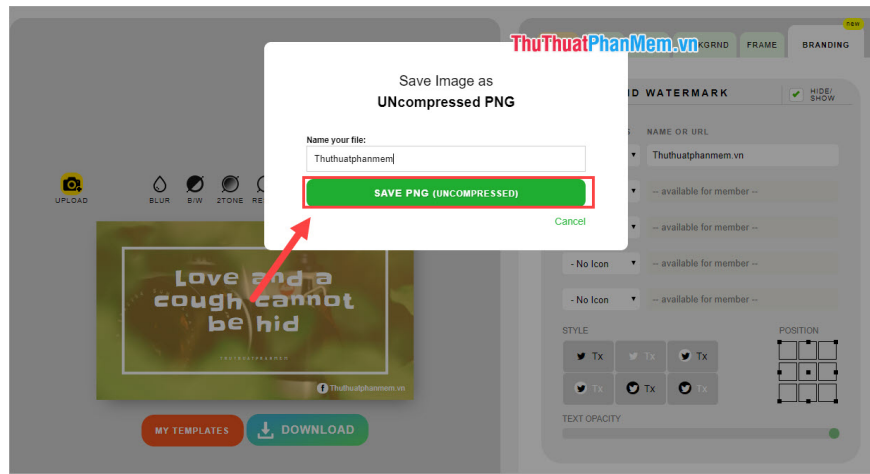

Step 12: Finally, the **Brand** (Commercial) card, if you want to close Watermark to prevent others from using it, please enter it here. You can enter the names of social networking sites such as Facebook, Instagram, .

Step 13: Once completed, then select **Download** to download the computer.

Step 14: You name the image and click **Save PNG** to save the image.

Step 15: This is our final result after creating Quotes.

2. Some other Online Quotes creation tools
