By creating an account, I have read and agreed to the [terms and conditions](#).

Create Account

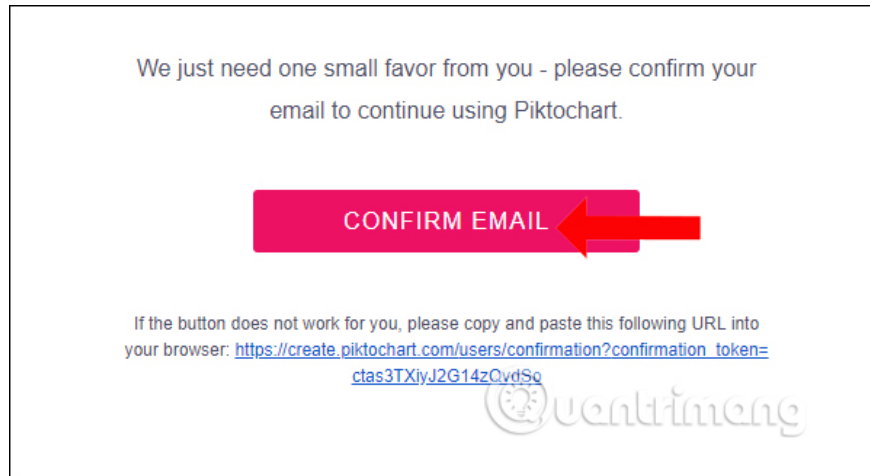

[Already have an account?](#)

Then we will receive a message like the image below that needs to verify the login information via the email address entered.

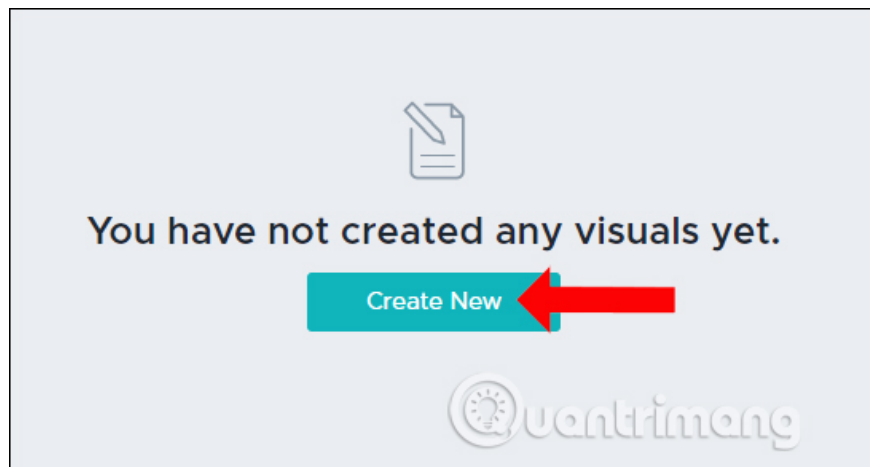

Step 3:

In email Piktochart sent to press the **Confrim Email** button to complete the registration Piktochart. Finally return to Piktochart's main page, log in to your account information.

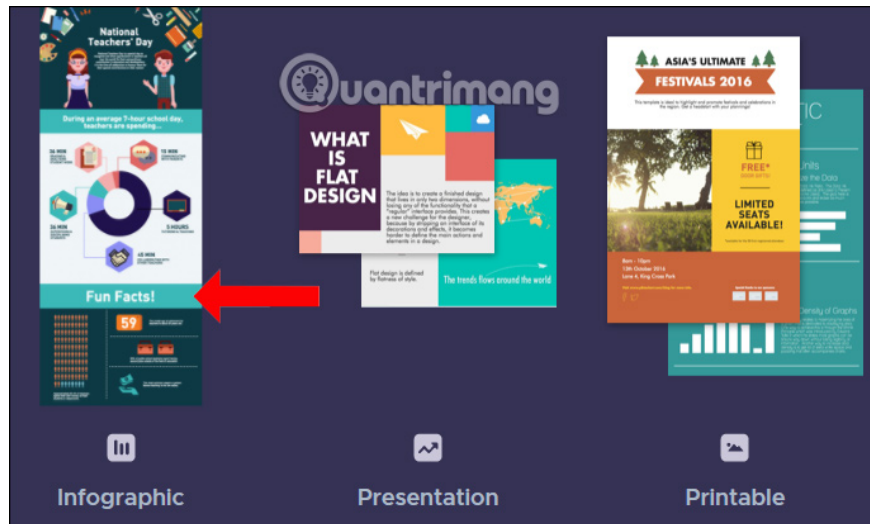

Step 4:

At the main interface of Piktochart, click on **Create New** to proceed to create new graphics.

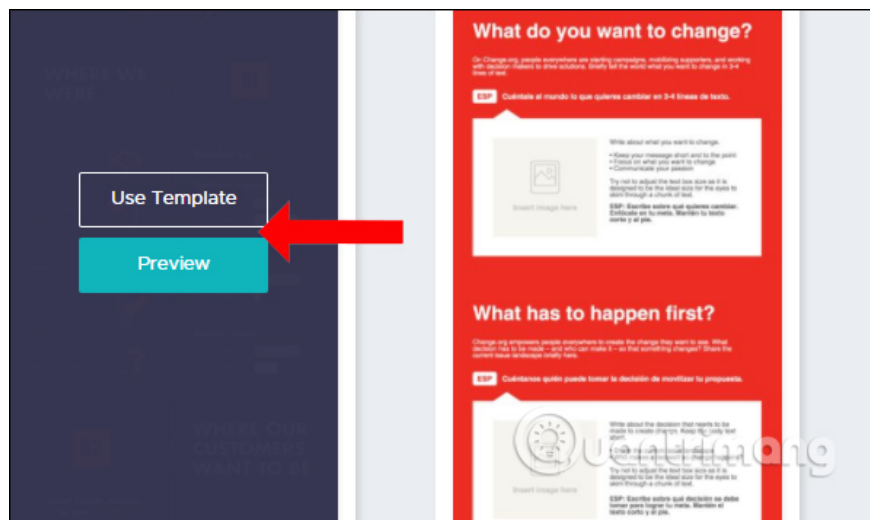

Piktochart will provide users with templates to create Infographic, Presentations, and advertisements. Click on **Infographic** .

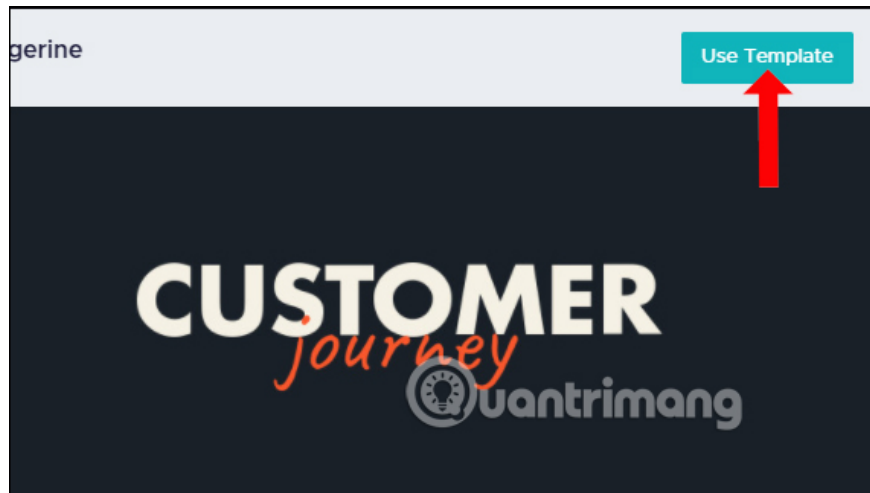

Step 5:

Piktochart provides several templates for you to choose at Infographic. With a free account, the number of samples will be less than a paid Pro account. When hovering over a template you will have the option to Preview or Use Template.

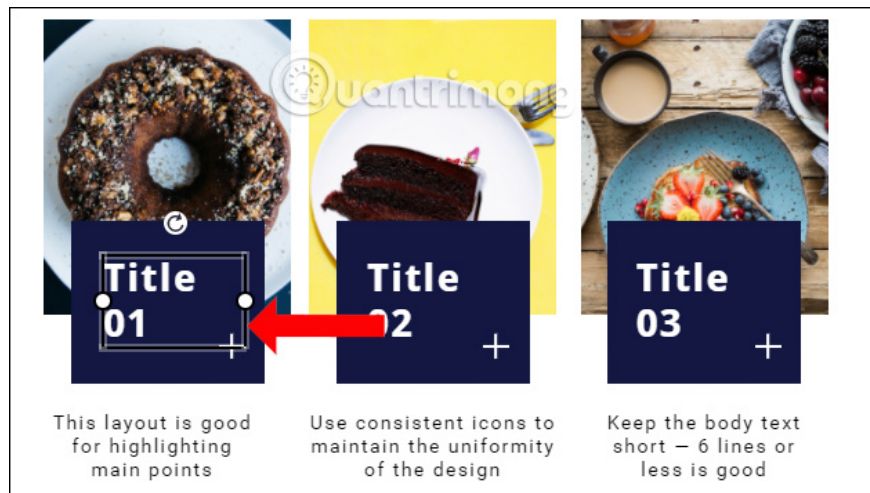

You can click Preview to see how the template is and then click **Use Template** to use this template.

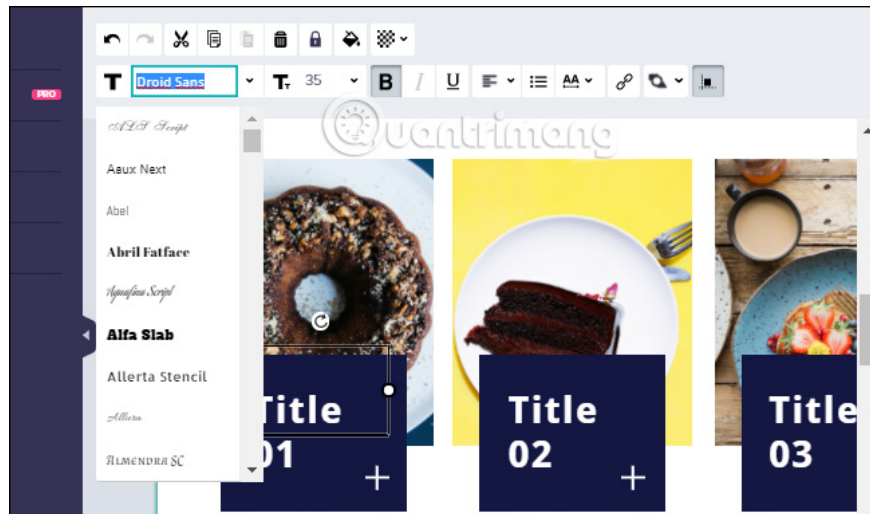

Step 6:

With **the available Infographic template**, users simply enter the content into the Template template. Since Piktochart divides Infographic into different small blocks, you click on each block to edit.

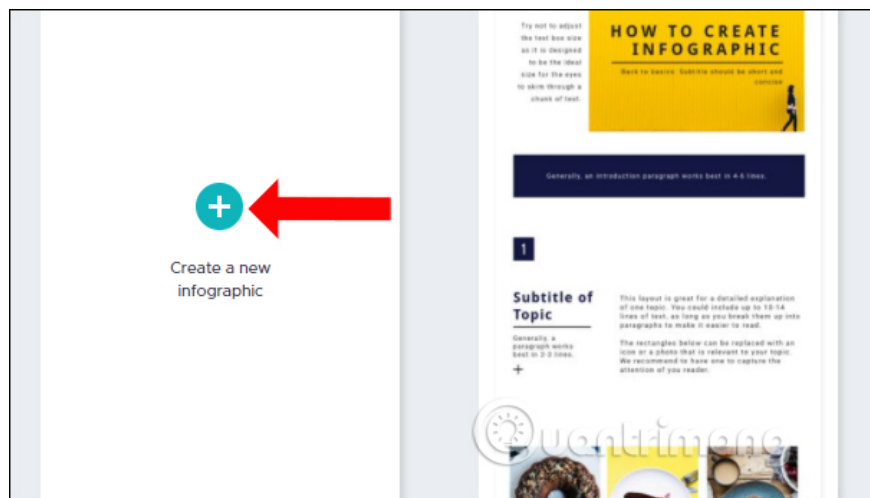

To edit the text, use the toolbar on the top.

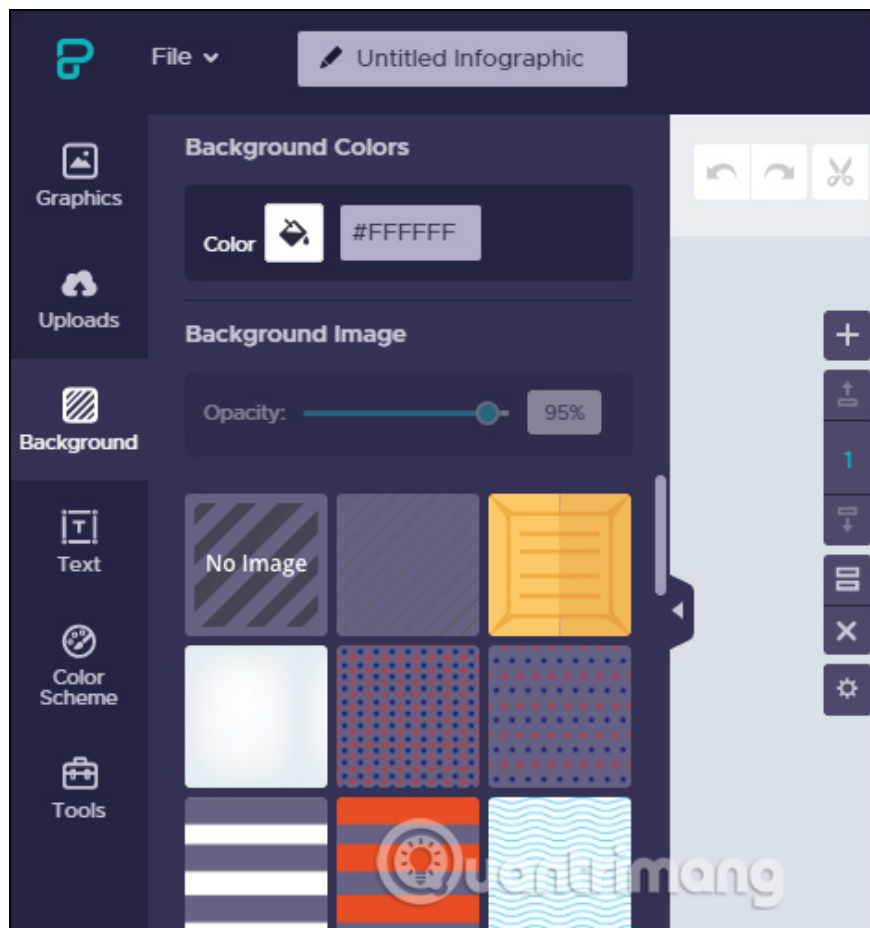

Step 7:

In case the user wants **to create a new Infographic** , click on **Create a new infographic** . We will be moving to a completely new interface to create Infographic.

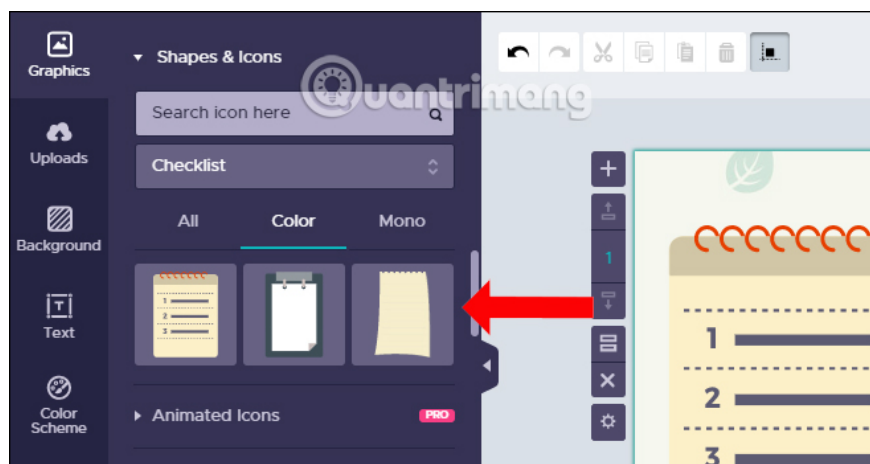

Step 8:

To add content to the Infographic, use the tools on the left side of the screen. For example, to create an Infographic background, click **the Background item** and find the wallpaper you want to use.

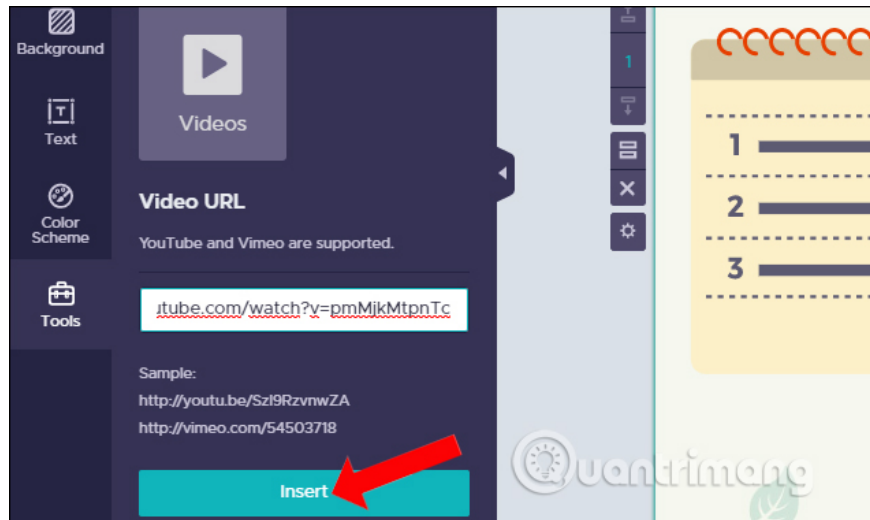

Or add a block or icon to click on **Shapes & Icons** and select the graphics you want to add to your Infographic.

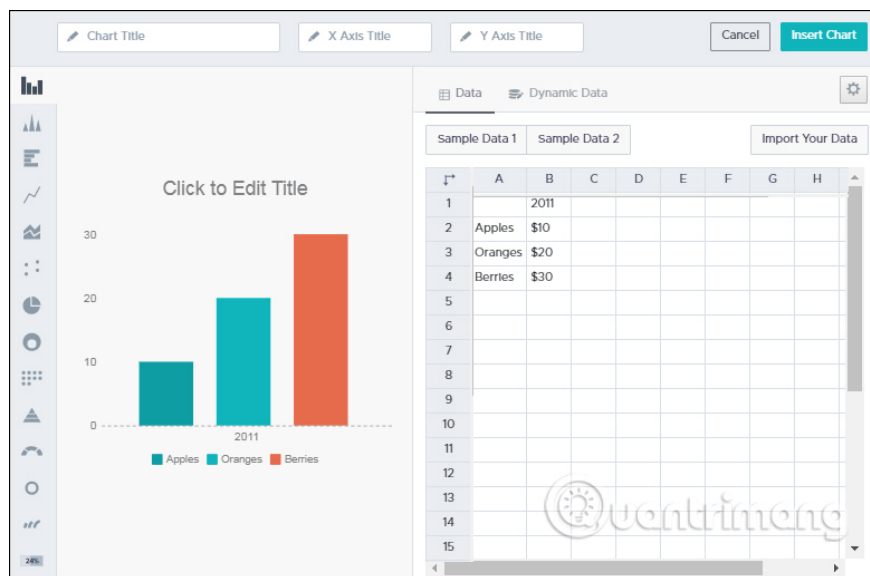

Your infographic may also contain other data such as charts, videos or maps. Click on **Tools** to see the content Piktochart provides.

Piktochart tool supports users to **insert Youtube videos and Vimeo into Infographic** . You just need to enter the video URL and click **Insert** .

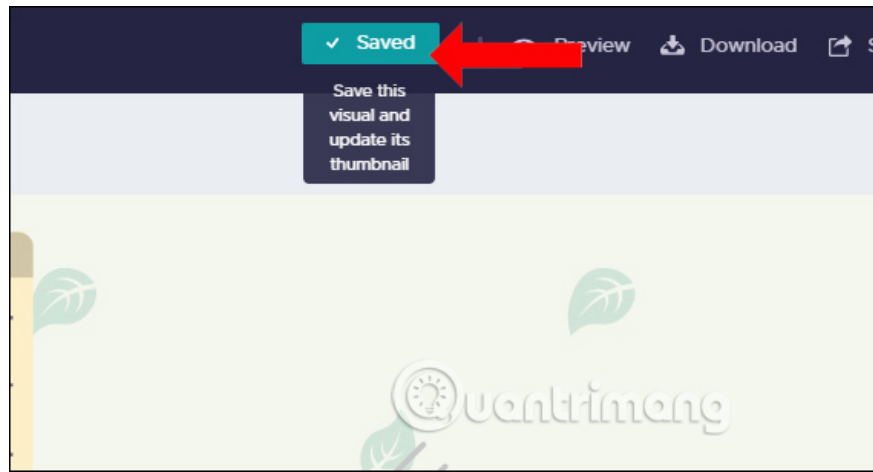

Or to insert a chart into an Infographic, click **the Chart item** and select the type of chart you want to insert. We only need to enter the required content in this interface to display the chart. You do not need to draw the chart yourself.

After entering the information **click Insert Chart** to put the chart into the content.

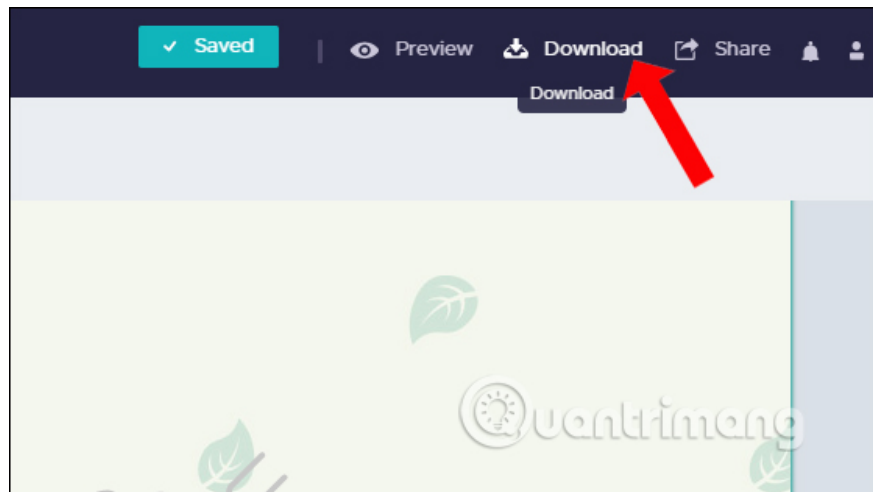

Step 9:

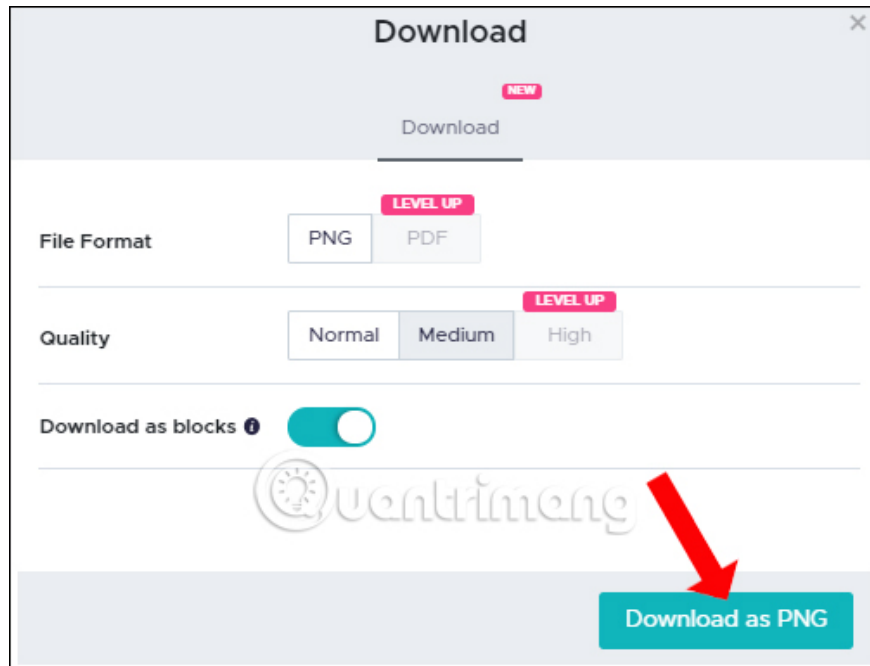

Once you've created Infographic, click on **the Save button** above to save it.

If you want to see the infographic you created, click the Preview button above. Click on **the Download button** above to download Infographic down.

Here, Piktochart will give free account to save Infogrphaic in PNG format with Normal or Medium quality. Finally click the **Download as PNG** button below to download the file to your computer, then proceed to extract the file and finish.

Overall, creating Infographic on Piktochart is very simple. Every tool created or edited appears clearly on the screen, and you only need to choose to use it without having to sit step by step. The file will be saved in PNG format and not stamped so we can use it for our work.
