

# How to create shortcuts to quickly open iPhone apps

Instead of having to click directly on the application icon on the iPhone, you can create an application quick access shortcut.

In order to help users quickly access the application on the iPhone from the widget screen, some Launcher applications will add shortcuts to quickly open frequently used applications. However, if you are using iOS 12, you can install the Siri Shortcut application, quickly use the application via shortcut at widget.

This application will create shortcuts with many different features. You can turn off WiFi iPhone right from the widget, reduce the size of iPhone photos at the same time, download YouTube videos on iPhone, etc. The following article will show you how to create quick shortcuts to applications with Siri Shortcuts.

1. How to download files on iPhone with Siri Shortcuts
2. 5 security settings to do right on iOS 12
3. Errors after upgrading iOS 12 and how to fix it

## Instructions for creating shortcuts to open iPhone apps
