How to write Skype status line flashing

Step 1:

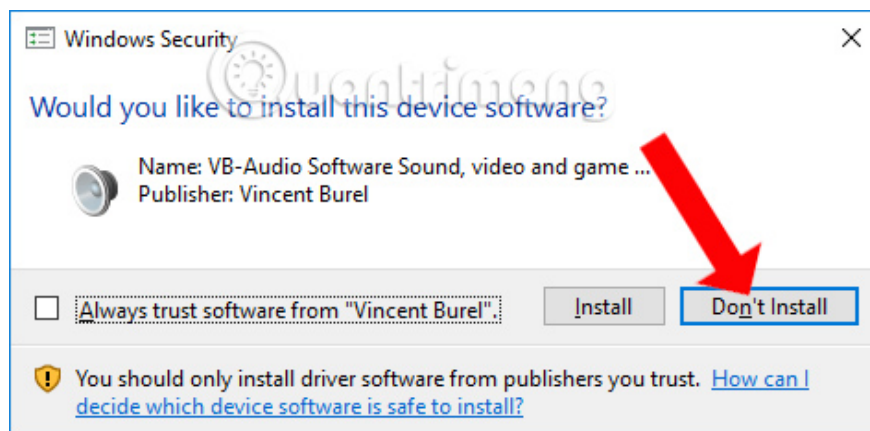

First of all we will visit the link below to download the software Pamela for Skype containing the Rich Mood Editor tool to write status flashing.

1. <http://www.pamela.biz/en/>

After downloading you proceed to install the software. The installation of the software is also very simple, we need to agree to the terms from the manufacturer.

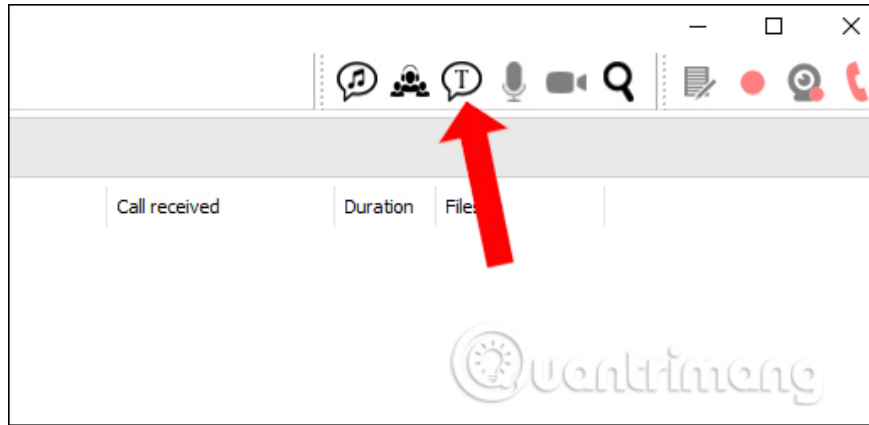

During the installation process you will be prompted to install additional software, please click **Don't Install** to not install.

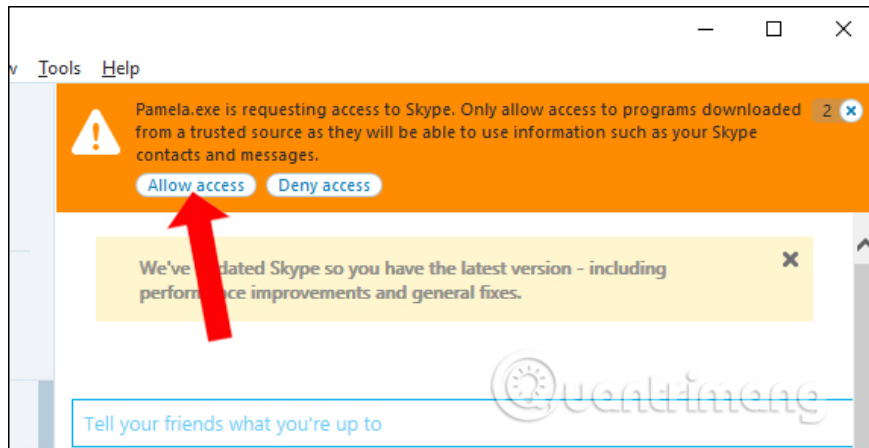

Step 2:

After installation is complete, access Pamela's main interface for Skype. Here, click on **the T icon** to open the Rich Mood Editor tool.

Step 3:

Upon opening the software on Skype's interface, Pamela for Skype will be allowed to connect to the Skype software, click **Allow access** to agree.

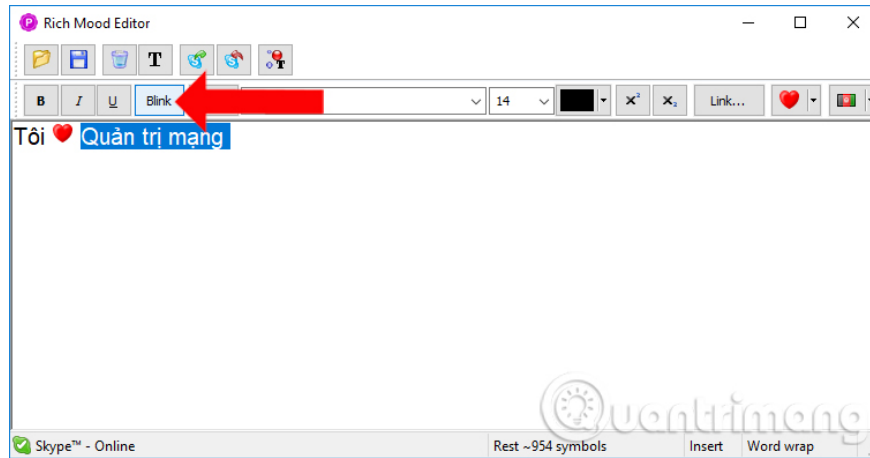

Step 4:

Back to the Rich Mood Editor tool interface below, you will see a notification of Skype online account. Here we will have some tools to customize the text content for Skype.

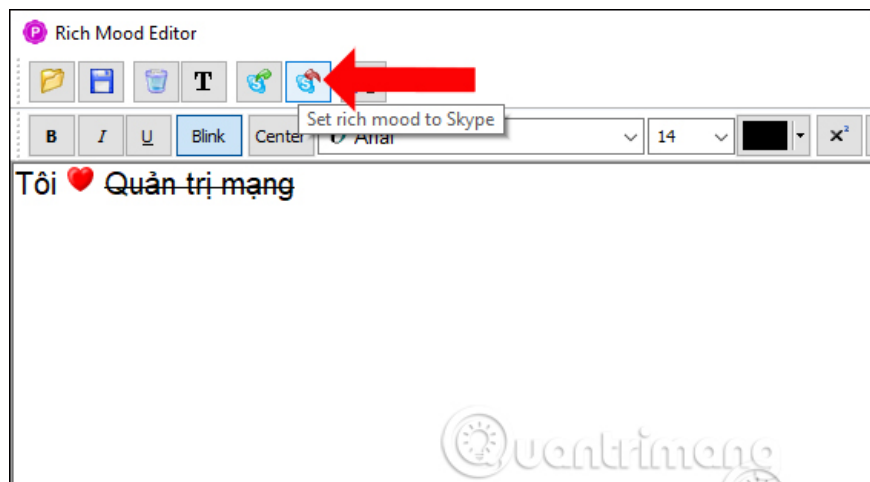

First, write the status line you want for Skype, you can add icons when you click on the heart shape, or the flag icon on the right end of the interface. Then **highlight the text you** want to create a blinking effect, then click the **word Blink** above to create the effect.

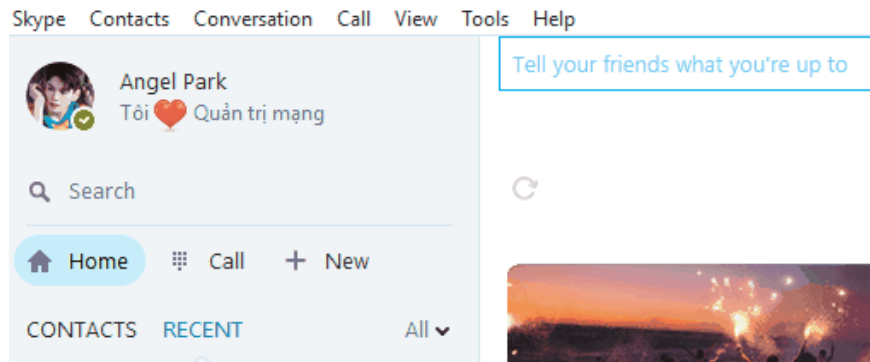

Step 5:

When the text changes to **a dash** like the image means the flashing effect has been applied to status. In the process of writing content you do not need to customize the font or font size, because when going to Skype will be converted to 1 type, 1 font size.

Click on **the Set rich mood to Skype icon** above to apply the new status to Skype.

When we return to the Skype interface, we will see the updated status line and the flashing effect also appear as the animation below.

A simple trick but will help you change the Skype interface more nicely and more interesting. The Rich Mood Editor tool will help you create flashing status lines, including the emoticons that the tool provides.
