

How to create stickers from photos on Samsung

On some Samsung Galaxy phones, there is an option to create stickers from photos in the album, allowing users to freely create stickers to use in messages.

This feature is basically very similar to the sticker creation feature in iPhone messages, removing the image background to switch to stickers. Below are very simple instructions for creating stickers from photos on Samsung.

Instructions for creating stickers from photos on Samsung

Step 1:

First, open the album on your phone and select any image. Next, click on **the pen icon** to edit the image on your Samsung phone.
