

# How to create text wallpaper in Word

Dumping Word text with different styles will make the text more prominent, attracting readers. You can use different colors, or use your photos as text backgrounds.

One of the ways to decorate a Word document is to create an attraction for the viewer to insert the background for the text content. Instead of leaving a white background in black text, we can change to a lot of different background colors or we can use the computer-based image as a wallpaper for Word documents.

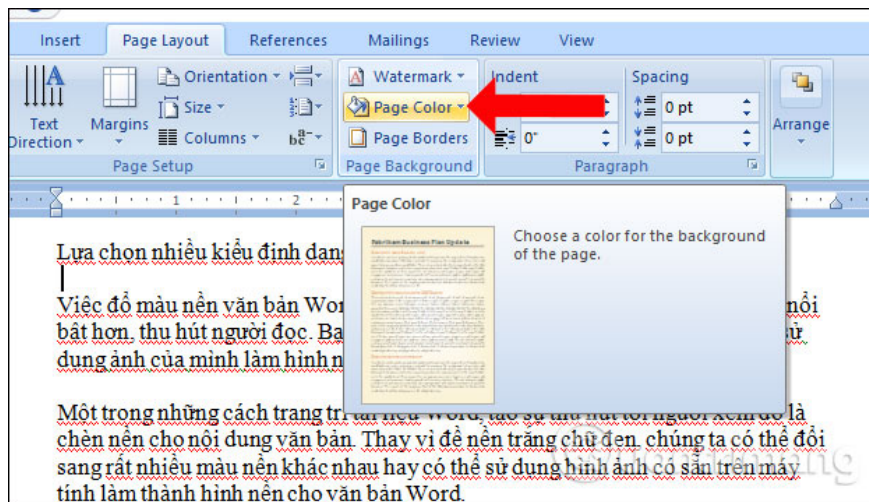

There are many different ways for you to change the background for Word documents, such as basic background colors, background colors, and background colors. However, according to the need to use, we can choose different types of background colors. The following article will guide you how to insert Word text background colors.

1. Word 2013 Complete Guide (Part 16): Image format
2. Instructions on how to create frames in Word 2007, 2010, 2013, 2016
3. How to adjust the size of Word table cells equally

## 1. Insert background color for Word text

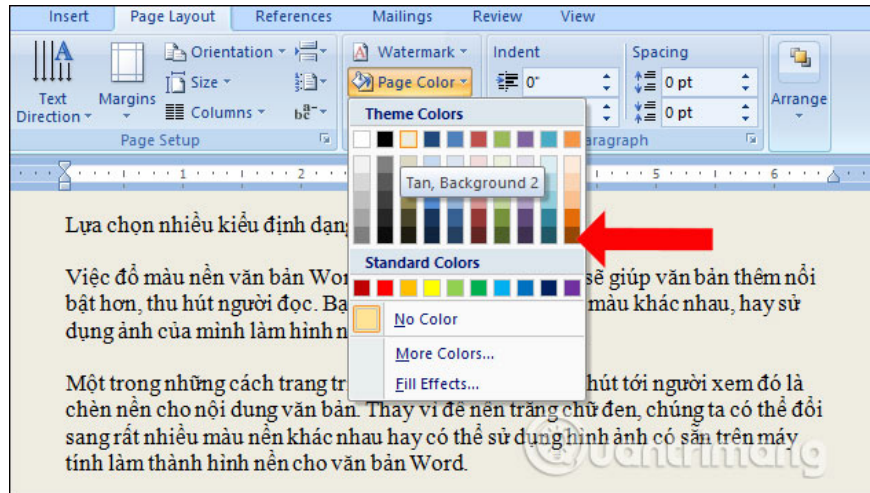

### Step 1:

In the text you want to insert the background color, click on the **Page Layout** tab and then click on **Page Color** . Some other versions of Word click on the Design tab and then click on Page Color.

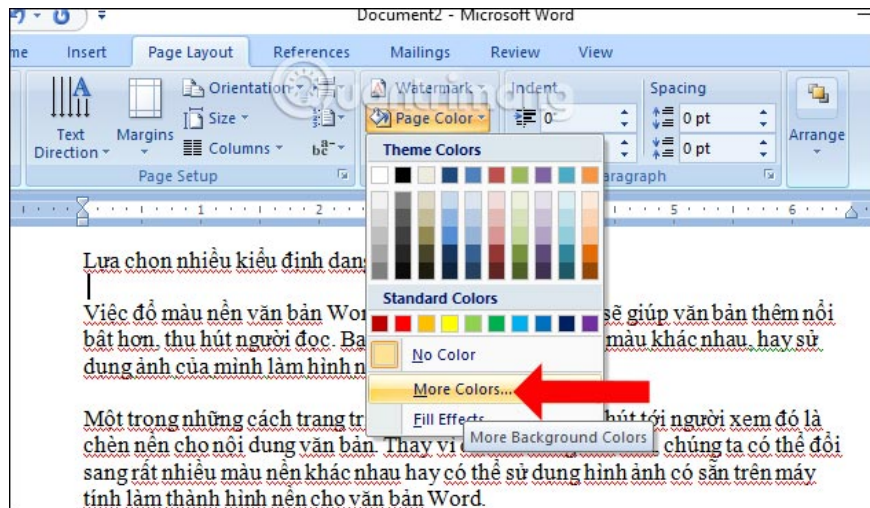

### Step 2:

A color palette will appear, click on the color to use for the text background color.

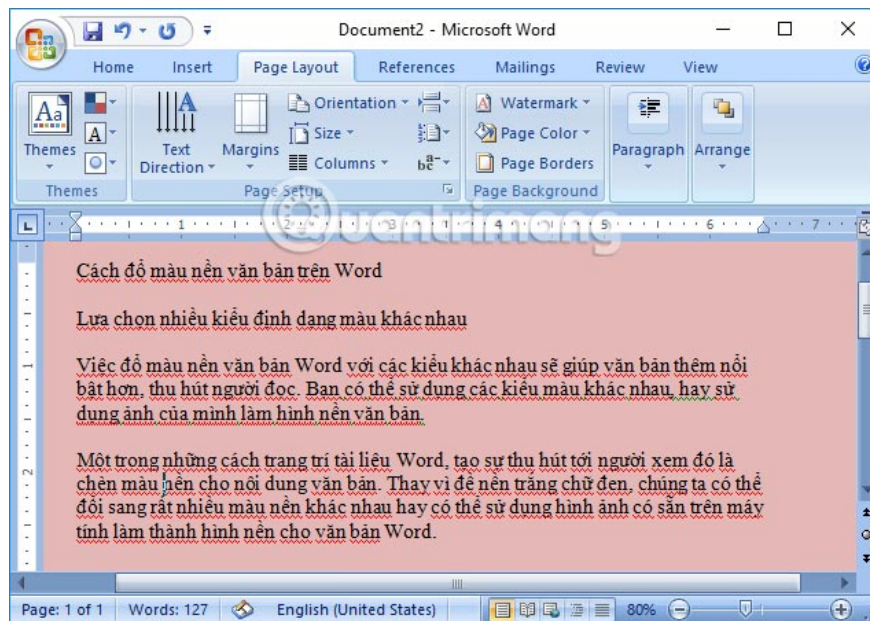

In case the user wants to choose more colors, click on **More Colors** .

A color palette appears to allow users to choose the color they want to use.

As a result, we will have the Word document fill the background color as shown below.

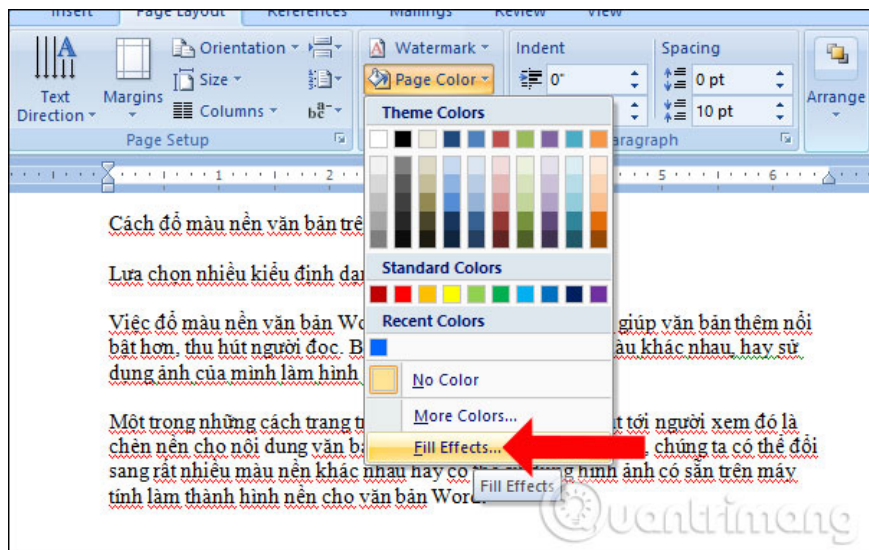

## 2. Insert effect background color

In addition to inserting the basic background color as above, users can also change to different background colors or add effects to the background color.

## 1. Insert Word color background with effects

### Step 1:

We also click on the **Page Color** item and then click on **Fill Effects** .

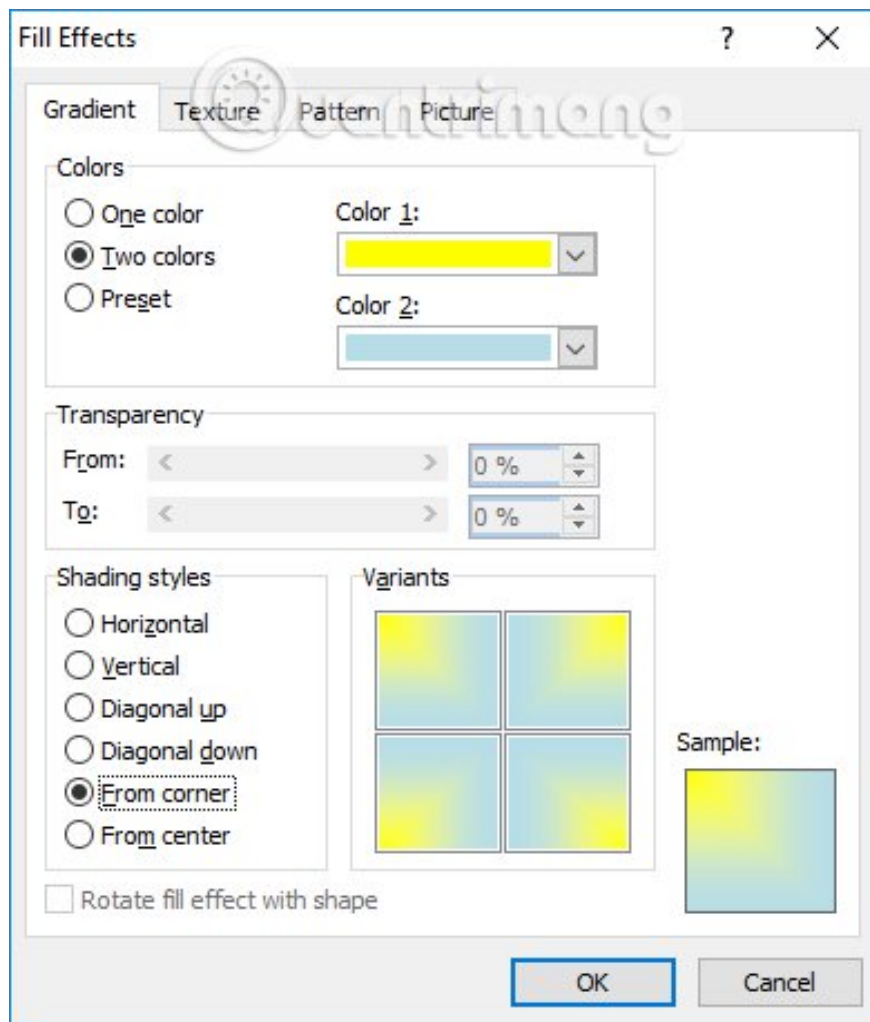

### Step 2:

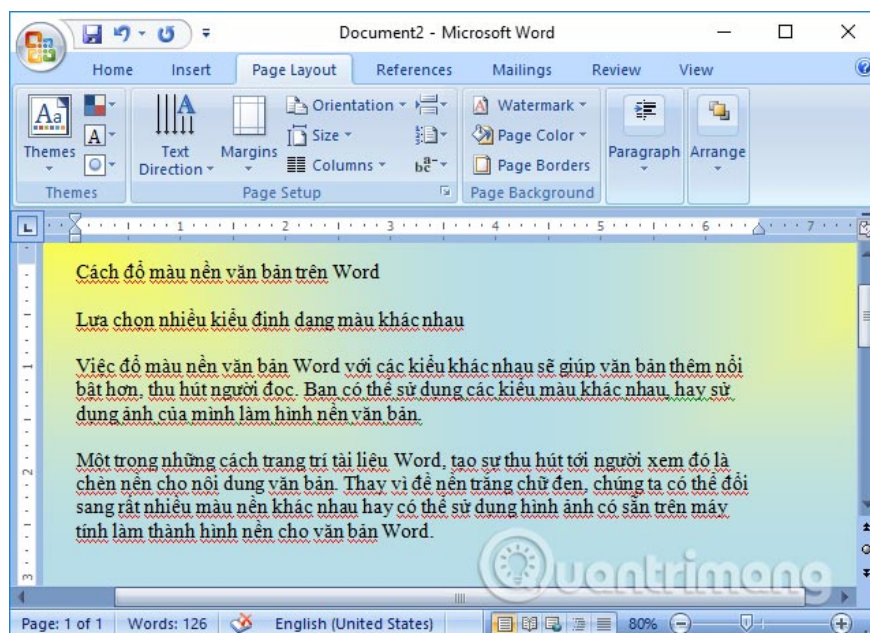

The Fill Effects dialog box includes the following options:

1. Colors: Select the number of colors and colors for text pages.
2. Transparency: Select the brightness for the page.
3. Shading styles: Select the effect of color for the page.

We click on the color type that has the effect of using such as the image below and **click OK** to save.

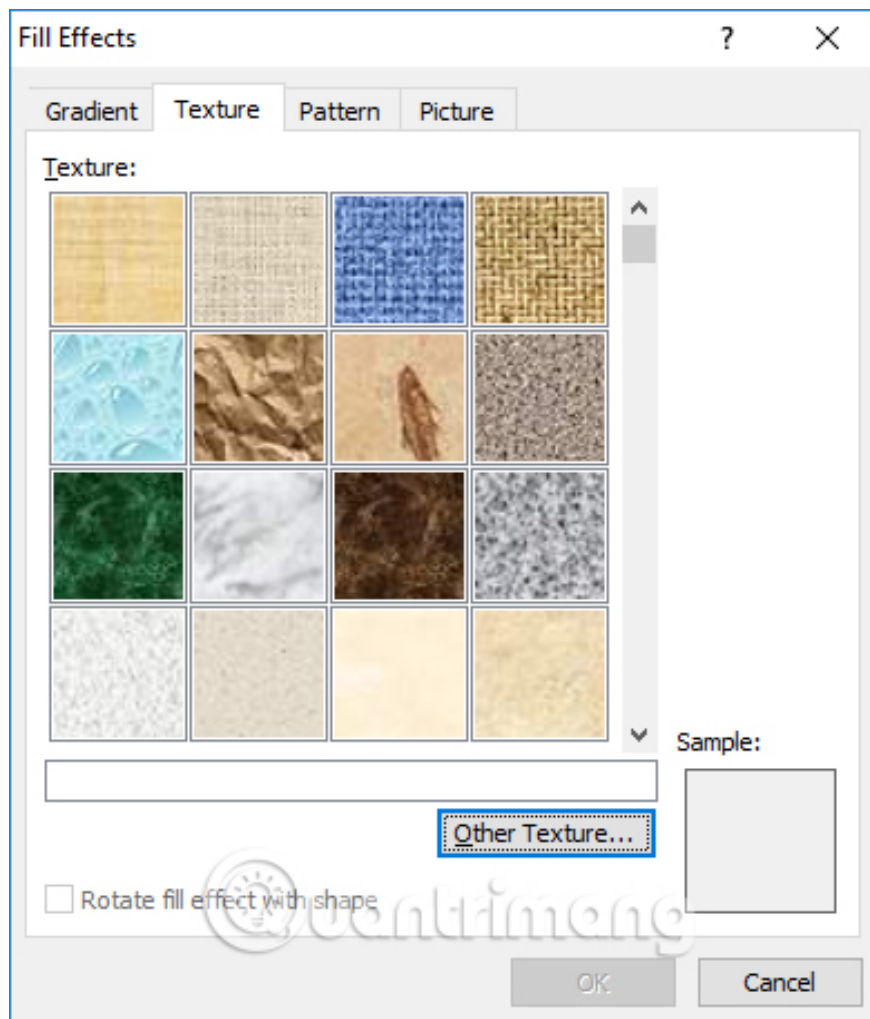

The results will be as shown below.

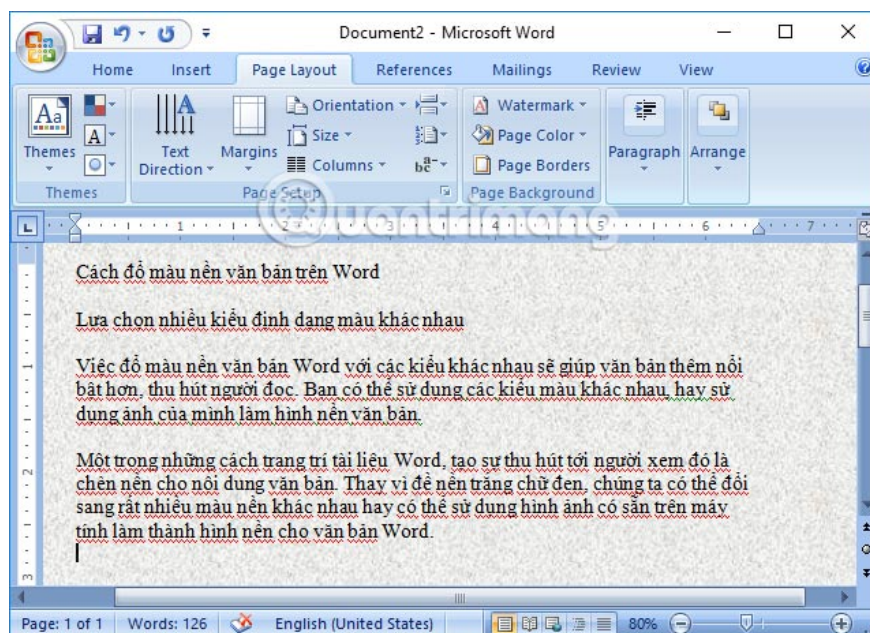

## 2. Create text background with a pattern effect

Also in the Fill Effects dialog box, click on the **Texture** tab and then select the background effect you want to use.

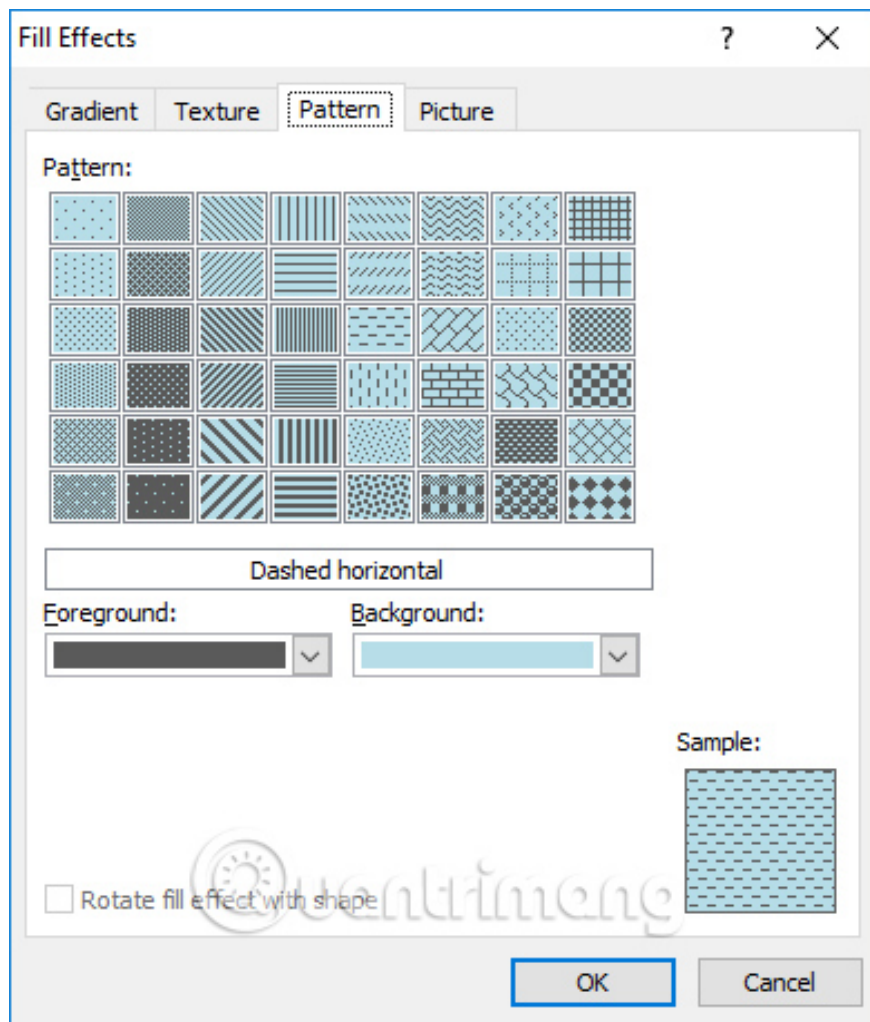

The result after the user clicks on one of the effects will be the text image as below.

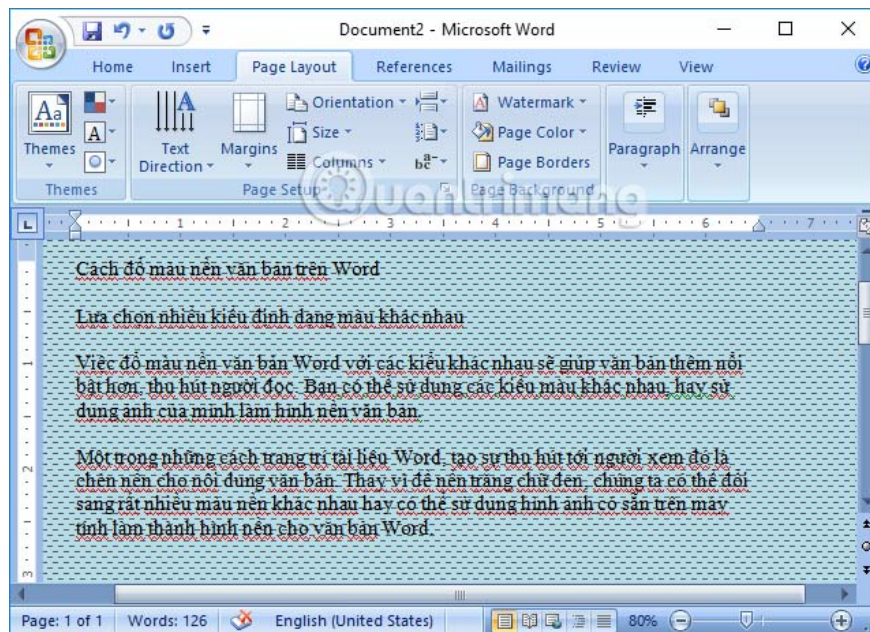

### 3. Create text background according to model effect

We clicked on **the Pattern tab** to create a pattern of background patterns to choose from, can adjust the texture and adjust the background color. Click **OK** to use.

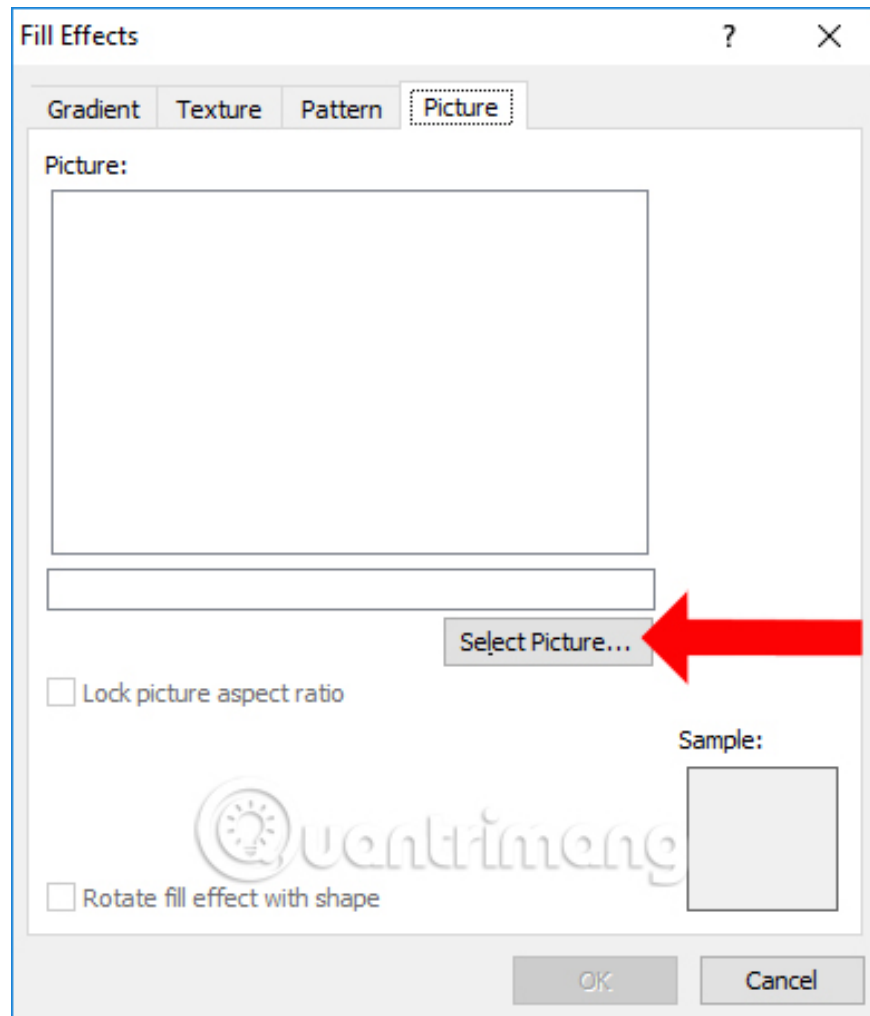

Text background with model effect will look like below.

## 4. Create a background for the text page with images

### Step 1:

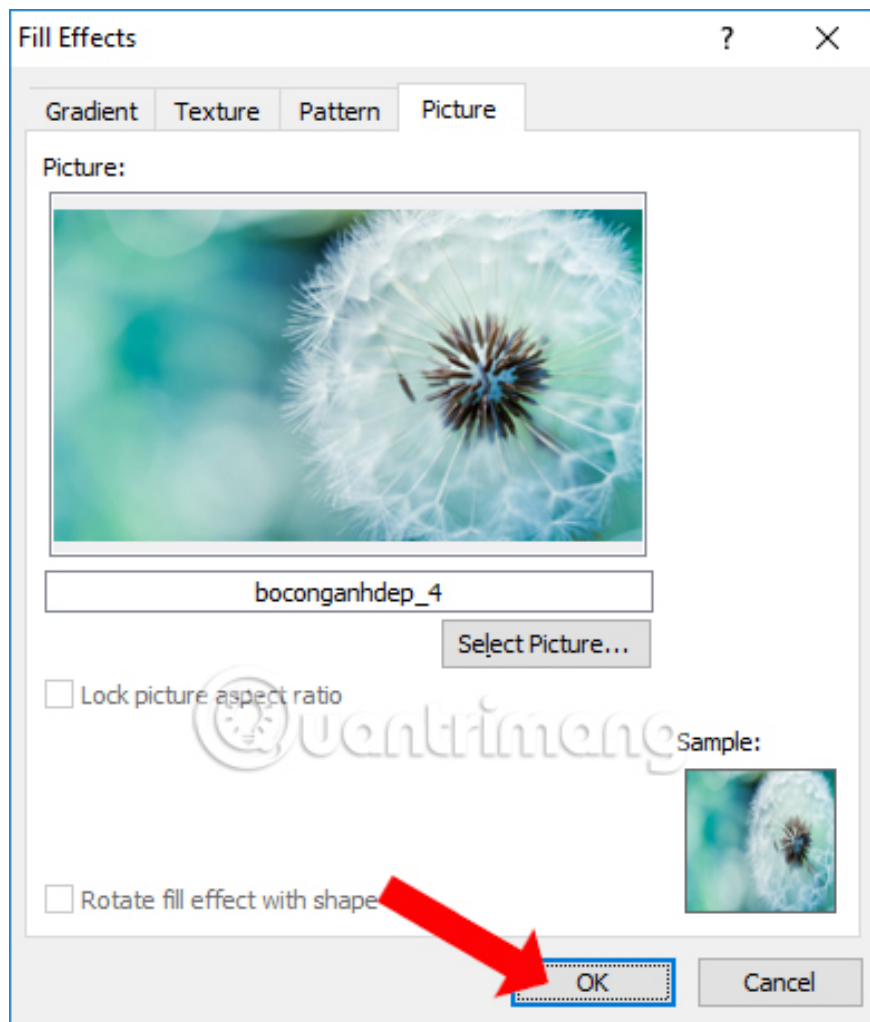

In the interface of the Click Effects dialog box click on the **Picture** tab and then click **the Select Picture button** to select the image to set as the wallpaper.

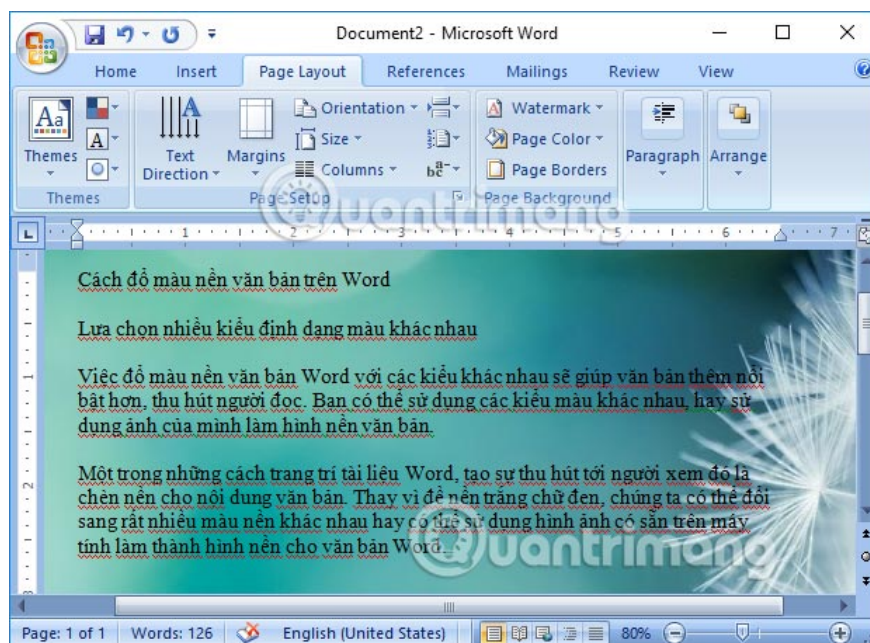

### Step 2:

A folder is available on the computer for users to select images on the computer as a wallpaper for the text. Click on the wallpaper you want to use for the text.

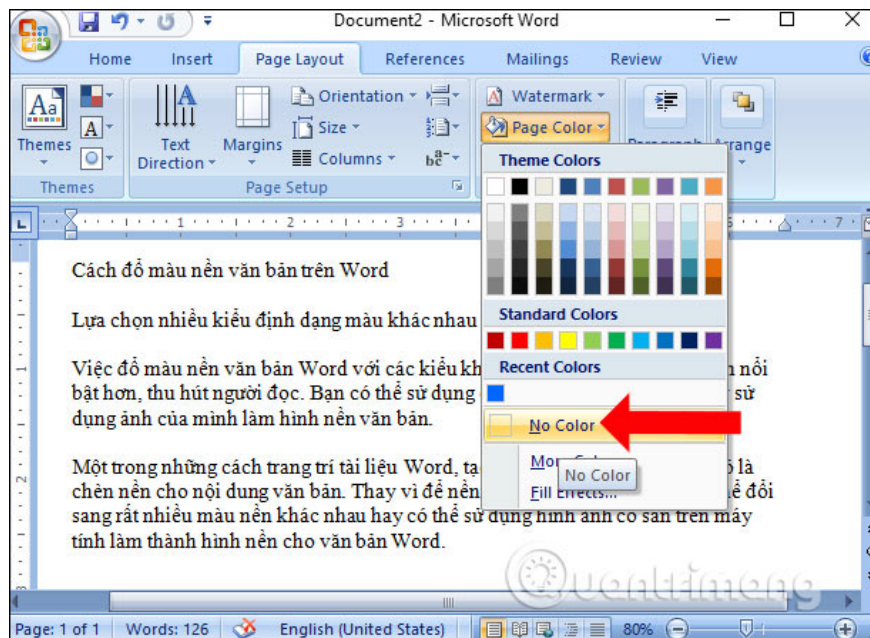

Click **OK** to use this image.

As a result we will get the text background image as shown below.

In case you want to **delete the inserted wallpaper** on Word, click on **No Color** .

So with the above article, users can choose different options to insert wallpaper for Word documents. This wallpaper will only be displayed when you view it on your computer or slide show, while printing will not have a background color.
