

How to create the RSS Feed logo with CSS3

The RSS Feed logo is one of the most commonly used logos in web design. You have seen many tutorials on drawing logo RSS Feed with graphic software like Photoshop, but how to draw it completely with CSS3?

The RSS Feed logo is one of the most commonly used logos in web design. You have seen many tutorials on drawing logo RSS Feed with graphic software like Photoshop, but how to draw it completely with CSS3?

In this article, **TipsMake.com** will show you an easy way to create a standard RSS Feed logo using only CSS3!

Step 1:

Create an HTML file, insert the following code into the file if it is completely blank.

```
My First CSS3 RSS Feed Logo - Insert Your HTML Here -
```

Step 2:

Insert the following code into the HTML file to create the feed box.

HTML for the feed box

CSS for the feed box

```
span.feed-box{ display:block; width:200px; height:200px; margin:0 auto; background-color:orange; border-radius:15px; border:1px solid #ccc; box-shadow:2px 2px 0px #ccc; }
```

Here are the results you will achieve:

Create a feed box

Step 3:

We'll draw another box inside the first feed box, so put the HTML code below into the HTML code of the first feed box. You will also add borders here.

HTML for smaller feed boxes

CSS for the smaller feed box

```
span.feed-box .feed-box-in{ border: 4px solid #FFC563; width: 184px; height: 184px;
```

Here are the results you will achieve:

Draw another box inside the first feed box

Step 4:

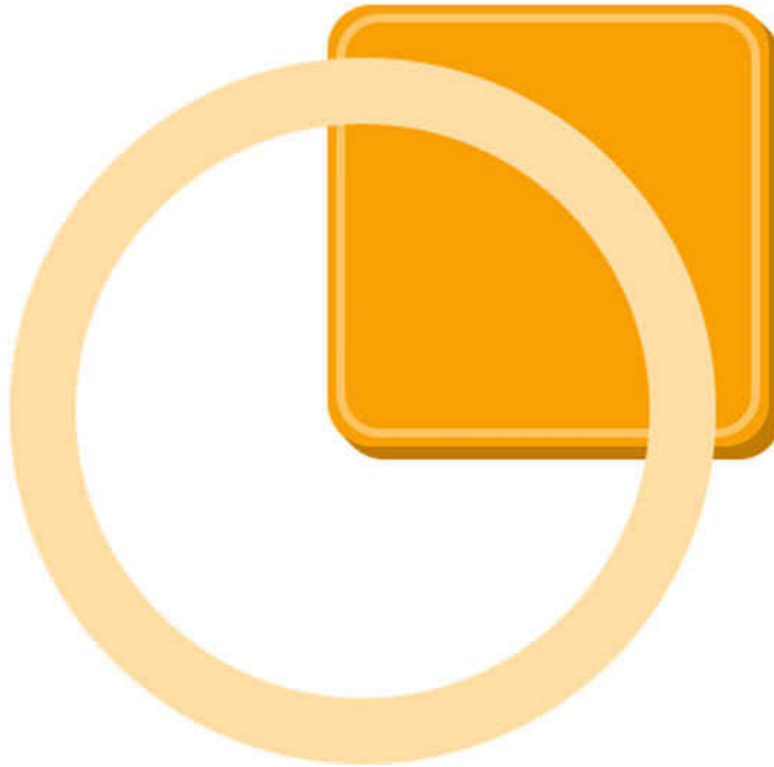

In this step we will create 1/4 large circle. Place the HTML code of 1/4 large circle in the HTML code of the smaller feed box as follows:

HTML for 1/4 large circle

CSS for 1/4 large circle

```
span.feed-box .feed-box-in .feed-quarter-circle-big{ margin: 16px 16px 0 0; width:
```

Here are the results you will achieve:

Create 1/4 large circle

Step 5:

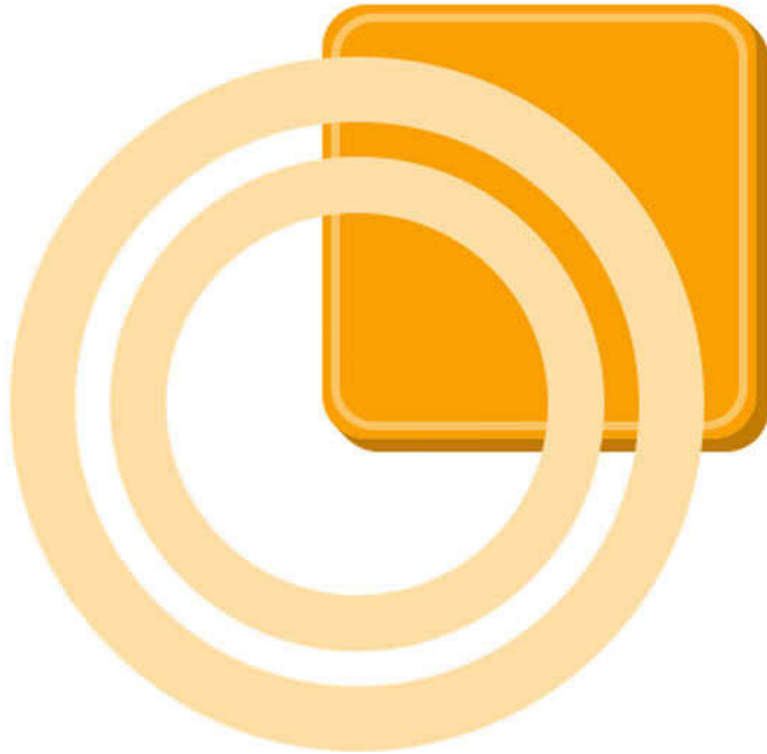

Now we will create 1/4 small circle, put the HTML code below into the HTML code of the big circle.

HTML for 1/4 small circle

CSS for 1/4 small circle

```
span.feed-box .feed-box-in .feed-quarter-circle-big .feed-quarter-circle-small{
```

Here are the results you will achieve:

Create 1/4 small circle

Step 6:

In step 6, the smallest circle will be created inside the small circle, so put its HTML code into the HTML code of the small circle.

HTML for the smallest circle

CSS for the smallest circle

```
span.feed-box .feed-box-in .feed-quarter-circle-big .feed-quarter-circle-small .:
```

Here are the results you will achieve:

Create the smallest circle

Finally, find the code `/* overflow: hidden; */` then replace it with this code `overflow: hidden;`. You've got the CSS3 RSS Feed logo!
