

How to create unlimited virtual emails with LastMX

LastMX creates unlimited virtual email addresses, helping you avoid account spam.

In order to serve many different needs, you can have many email addresses, but you have to face email spam. If you do not use email for work, exchange partners, friends, but only to register for an account or use to confirm, then you should use virtual email created by some virtual email creation tools such as LastMX.

LastMX does not limit the number of virtual emails users create. Virtual emails can be sent to and delivered to your primary email address. Then we have the option of canceling this virtual email address again when it is finished. The following article will guide you how to use LastMX to create a virtual email address.

1. How to create virtual email with Temp Mail on your phone
2. How to use AltMails to create unlimited virtual emails
3. Instructions to create email under your own domain name on Google
4. How to use Mailspre to send anonymous emails

Instructions for using LastMX to create a virtual email

Step 1:

Users visit the homepage of LastMX by following the link below.

<https://lastmx.com/>

In this interface, we **enter the main email address** in the box your@email.com and **click Submit** to confirm the original email address.

privacy with simple and secure mail aliases

Enter your email address below to generate a @lastmx.com address pointing to it.

your@email.com SUBMIT

Keep me updated about LastMX news (optional)

Step 2:

LastMX will then create a **virtual email address of the form abc@lastmx.com**.a direct link to the original email address that the user has entered. This is a virtual address that you can use to register your account or receive email from others. Click **the Copy button** to use this email.

here is your private email address:

xnhja@lastmx.com COPY

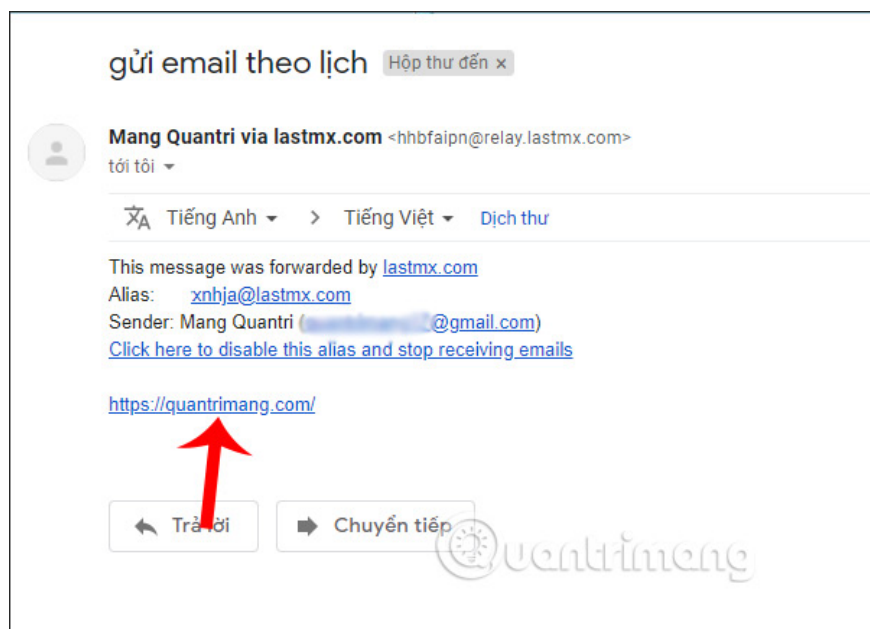

This address will redirect to [redacted]@gmail.com.
Cancel it any time by clicking on the link in forwarded emails.

Create a new address

Step 3:

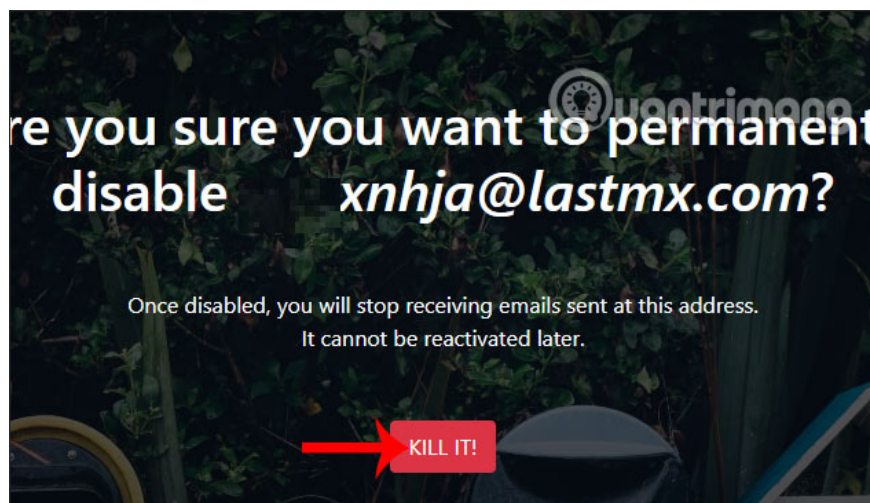

When an email arrives, it will automatically forward the mail to the original email address they entered. In the content you will see the virtual email address you are using, the email address you send to and the content of the mail.

If you **do not want to use this virtual email address** anymore, click **Click here to disable this alias and stop receiving email** .

Step 4:

Switch to the interface on LastMX. Here, users click on **Kill it** to stop using virtual email addresses.

Using LastMX or other virtual email creation tools helps you to limit the disclosure of personal email information, to avoid account spam. All incoming mail is transferred to the original email, so make sure the email and the content of the email.

I wish you successful implementation!
