## How to use DLC Boot to create multi-purpose USB boot

### Step 1:

You download DLC Boot software according to the link below. Then extract the rar file with WinRAR, or Zip included in the computer. In the DLC Boot folder, locate the **DLC file. Boot** right-click and select **Run as administrator** .

1. <https://docs.google.com/uc?id=0BxTOYa030FZmSmFpT2JxTDFTcGc&export=download>

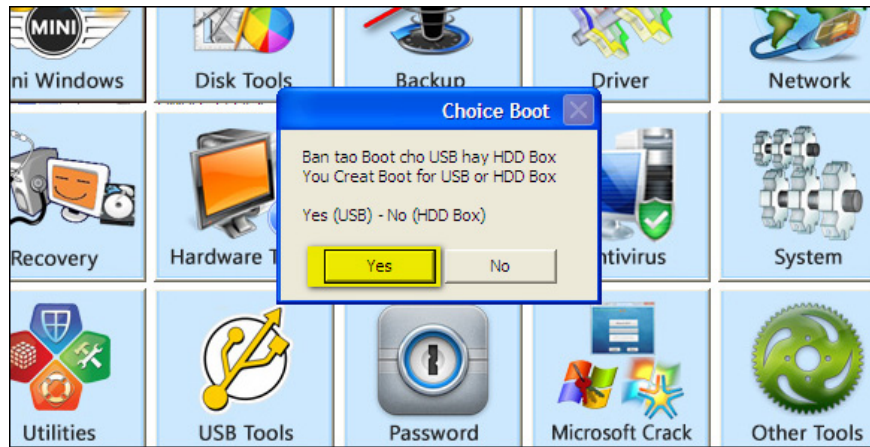

## Step 2:

Plug the USB into the computer. If there is data in the USB, please transfer all the data. USB here must be at least 2GB. Next, in the DLC Boot main interface, click on **the USB icon** at the top of the interface.

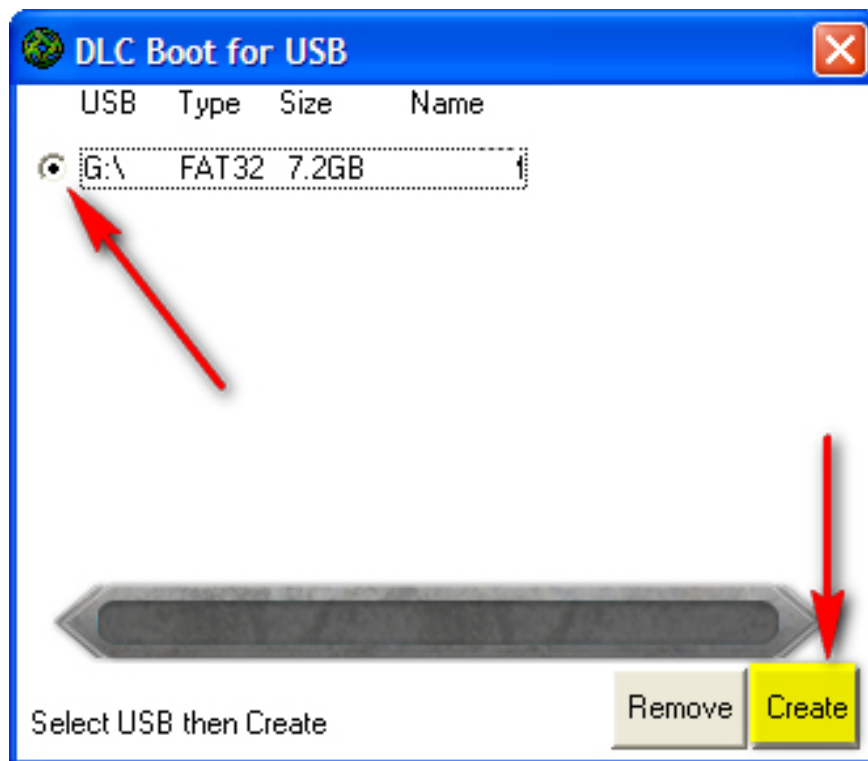

A small dialog box appears to select **Yes** to proceed to create a USB boot.

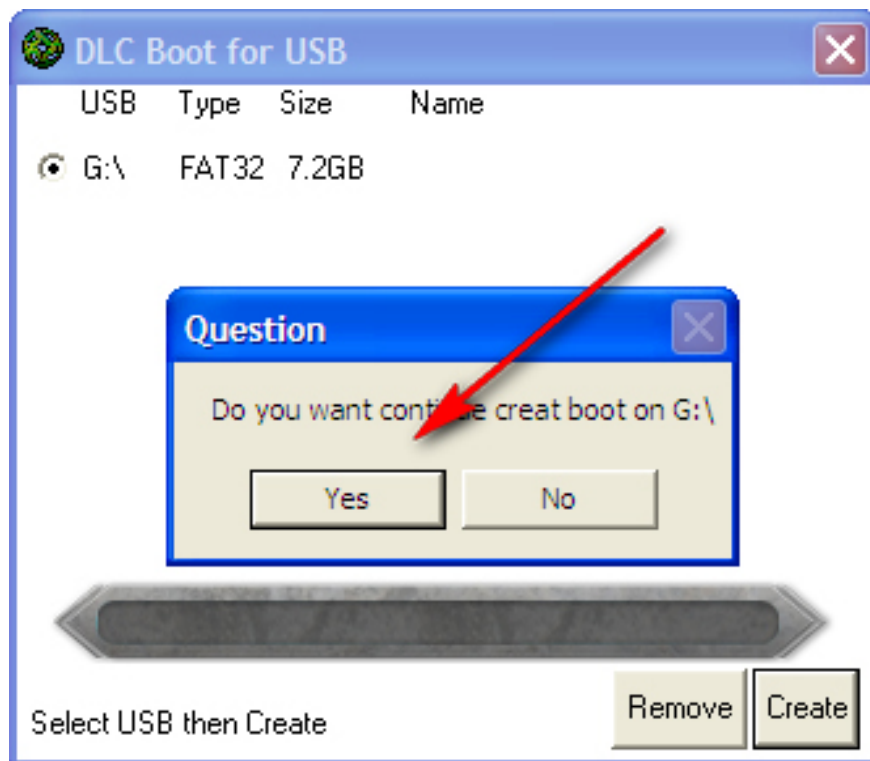

### Step 3:

The software will now detect the USB device connected to the computer. Select the USB drive on the bad computer **press Create** to proceed to create USB boot multipurpose by DLC Boot.

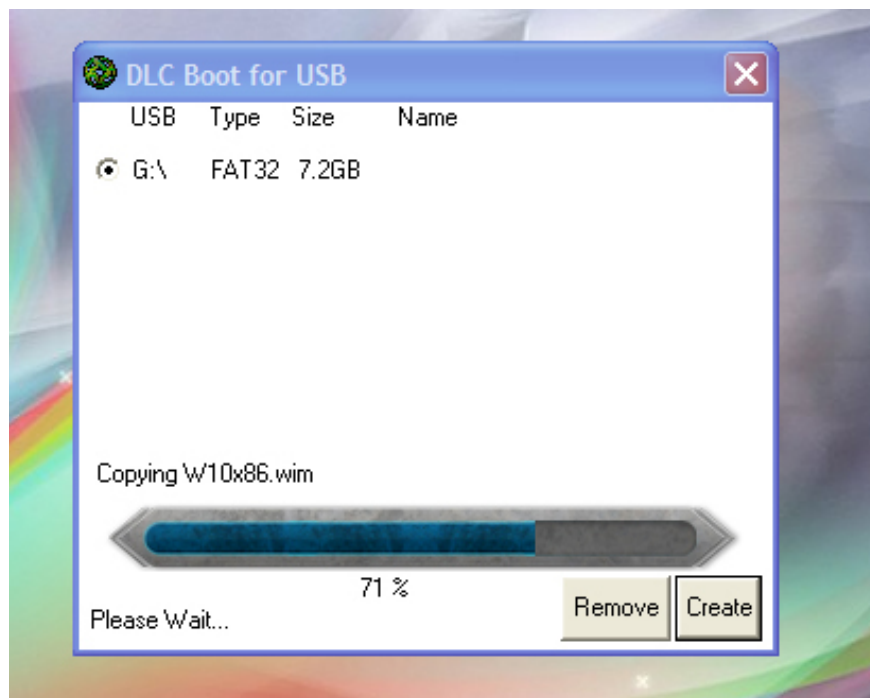

Next, confirm the creation of the multi-purpose USB and delete all data in the USB, click **Yes** to agree.

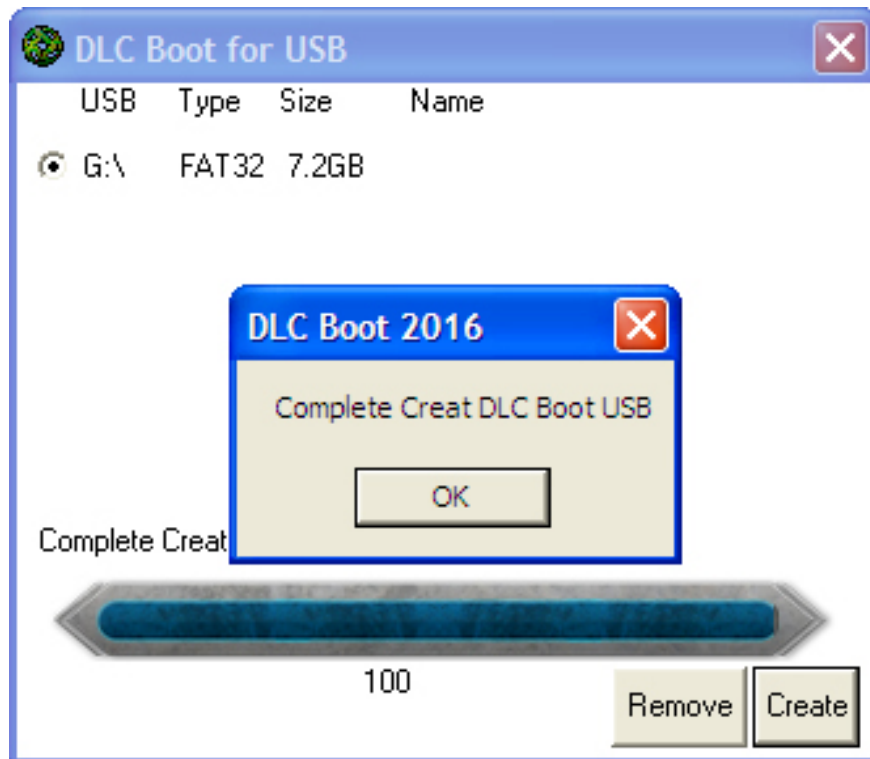

#### Step 4:

Immediately after that, the process of creating USB boot with DLC Boot appeared. This process can take more than 10 minutes so please wait patiently.

When you see the process **running to 100%** and a message appears as shown below, it means the multi-function USB creation process is complete.

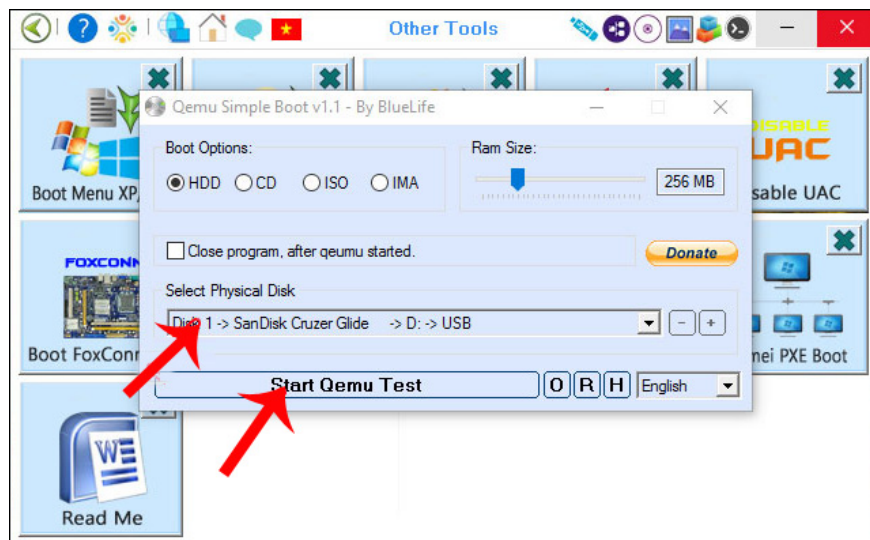

**Step 5:**

To check the performance of the newly created USB boot, go back to the main interface of the tool and select **Other Tools** .

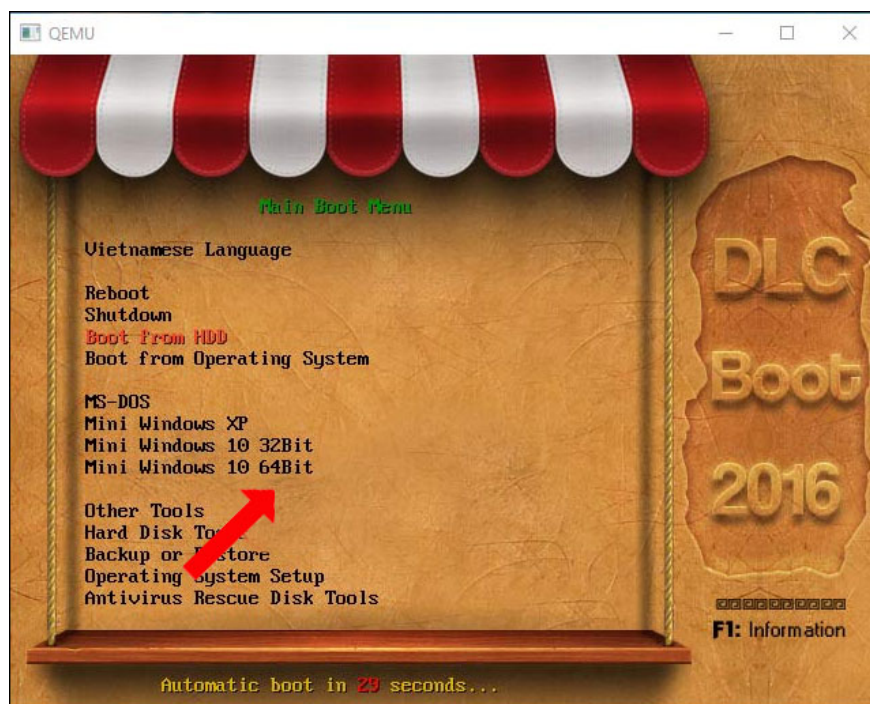

**Step 6:**

Select the USB name then click on **Start Qemu Test** to conduct the test.

If the picture appears below, it means that USB boot can be used and operated effectively.

So we have completed the creation of multi-function USB boot with DLC Boot tool. Users need to pay attention to boot on UEFI system, USB must be FAT32 format. In the process of use, if the antivirus program sends a notice, because it detects that there are programs that interfere with the system, you can still use it safely.
