

How to crop an image into a circle in Photoshop

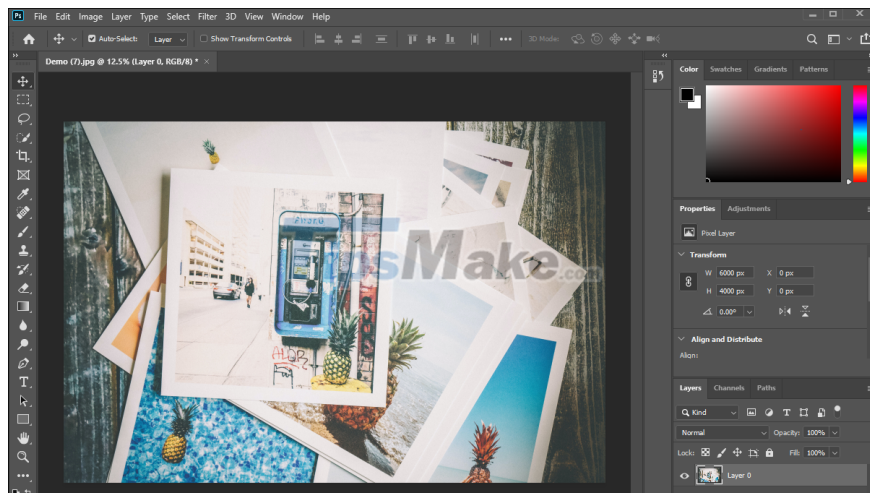

Cropping images into circles in Photoshop will help you get interesting, unique and disruptive images instead of simple squares and rectangles like before.

In this article, TipsMake will show you how to cut images into shapes in Photoshop simply and quickly.

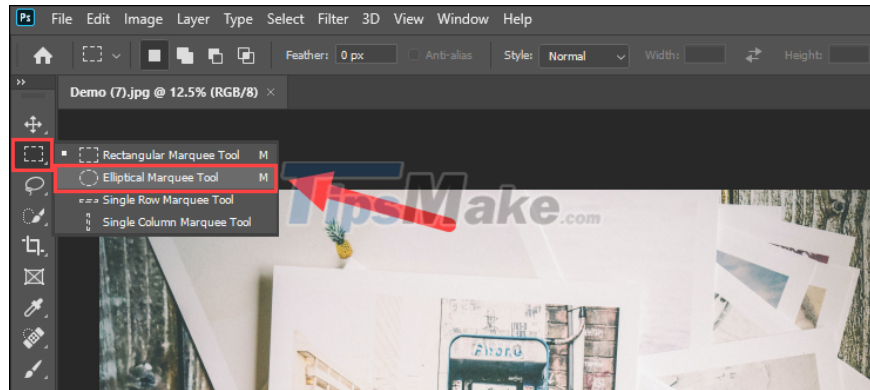

Step 1: Open the Photoshop application and add the image to the system for processing. In the case of cropping the image to a square, we will be working on the original image, so select the **Lock** icon to unlock the image.

Once the image has been unlocked, the **Background Layer** will be changed to **Layer 0**, thus completing the unlocking of editing.

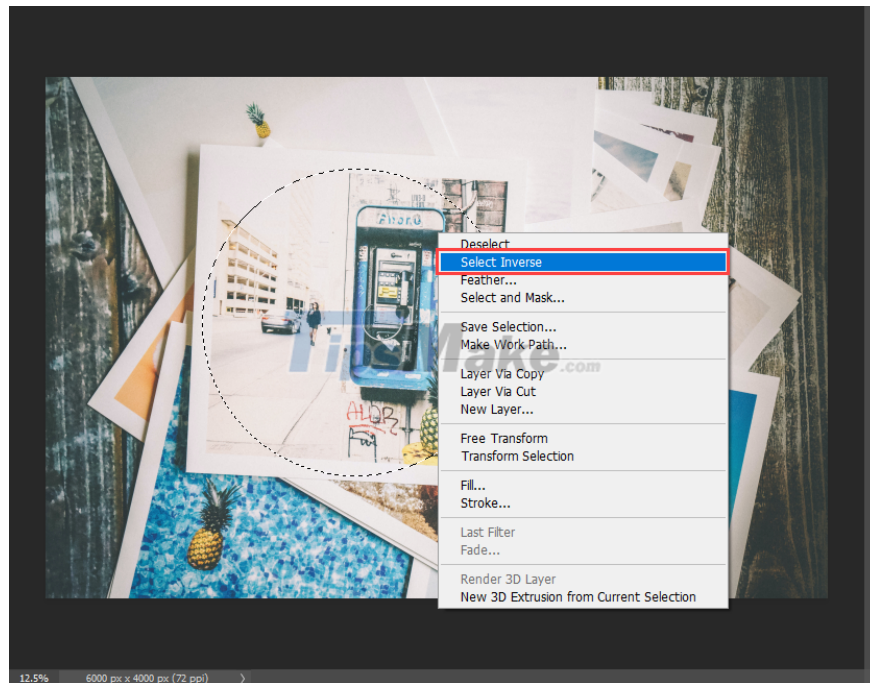

Step 2: Then, select the **Marquee Tool** item and select the **Elliptical Marquee Tool** item .

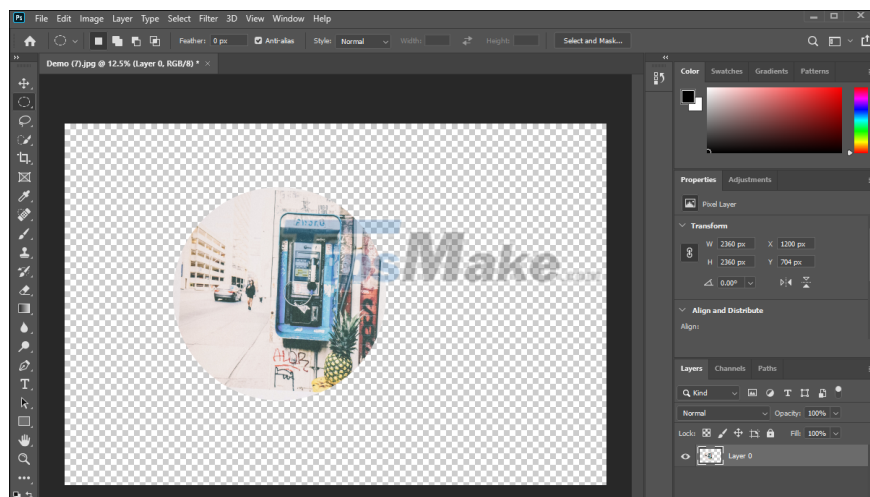

Step 3: By default, the Elliptical Marquee Tool will create an elliptical selection, if you want to create a circular selection, you will have to **hold the Shift key** .

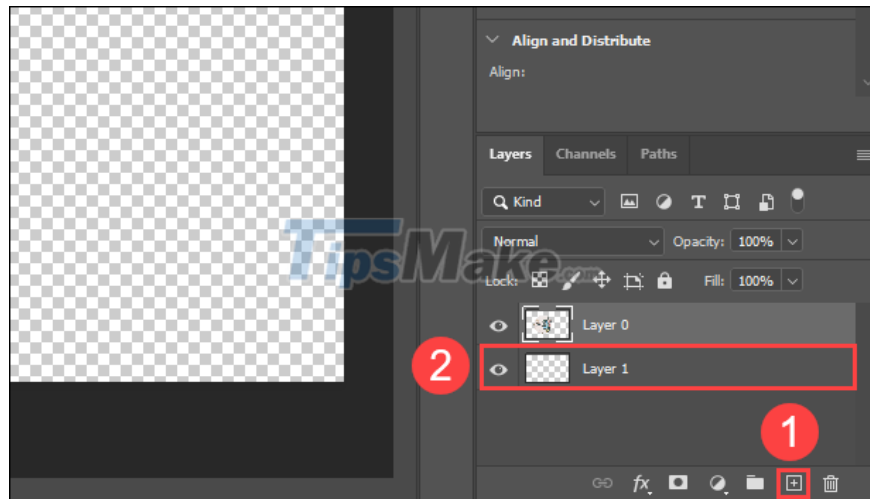

Step 4: When creating a circle on the image, **right-click** and select **Select Inverse** to invert the selection outside the circle.

Step 5: Now you just need to press the **Delete** or **Backspace** key to proceed to delete the selection outside the selection. The image will instantly be cropped to a circle and without a (transparent) background.

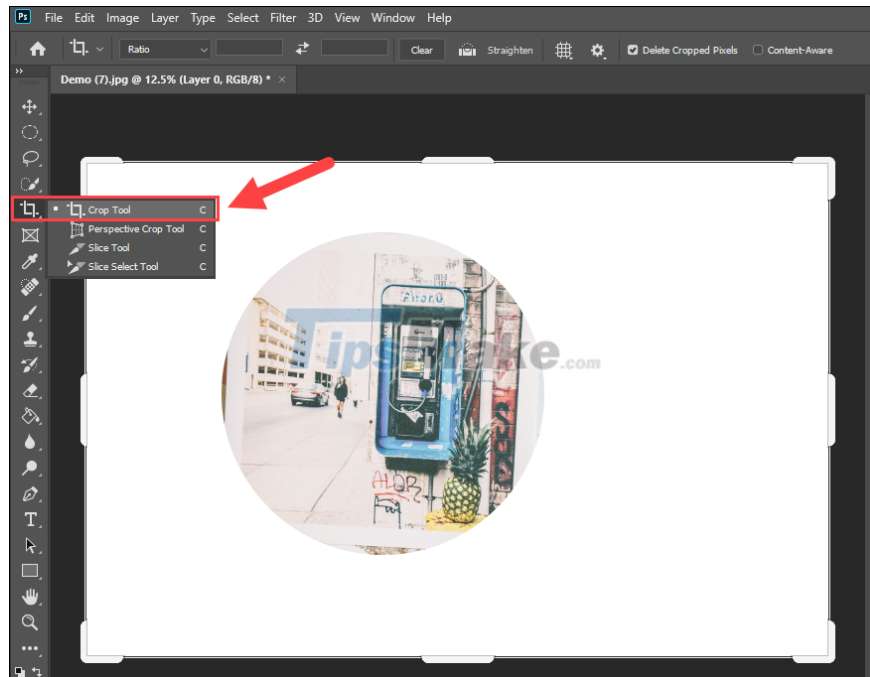

Step 6: If you want to create a background for the image, create a **new Layer (1)** and move them **down (2)** to make the background.

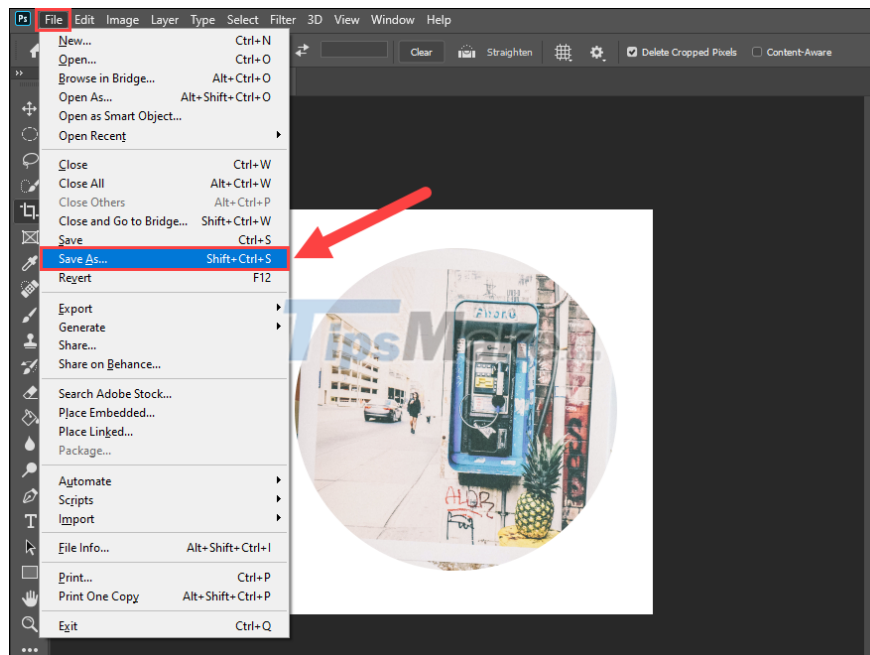

Step 7: Next, open the color tool and find the **Paint Bucket Tool** to fill the background. The background color palette you can choose from in the color selection section in Photoshop.

Step 8: Once the images have been backgrounded, you can also use the **Crop Tool** to cut them into a square and nicer shape.

Step 9: Finally, you just need to choose **File => Save As...** to save the image on your computer.

So you have finished creating images into circles on Photoshop software with just a few basic operations.

In this article, Tipsmake showed you how to create circular images in Photoshop software. Have a nice day!
