

How to customize the Facebook interface with SC World

To refresh the Facebook interface, add color to Facebook, we can install the SC World utility.

Instead of using the default Facebook interface for white background, there are now many tools to customize the Facebook interface. There are many types of Facebook changes like adding colors, using flat interface on Facebook, . or simply shrinking the content displayed on Facebook.

With the SC World utility, we will add new themes to Facebook, different color themes for each element on the interface such as borders, top letters, etc. Besides, users can also customize Message sounds, notifications on Facebook. The following article will guide you how to use the SC World utility to change the Facebook interface.

2. Do you know how to create avatar frames and effects on Facebook yet?
3. How to install Material Design interface into Firefox

Instructions for adjusting Facebook interface

Step 1:

Users download the SC World utility on Chrome according to the link below.

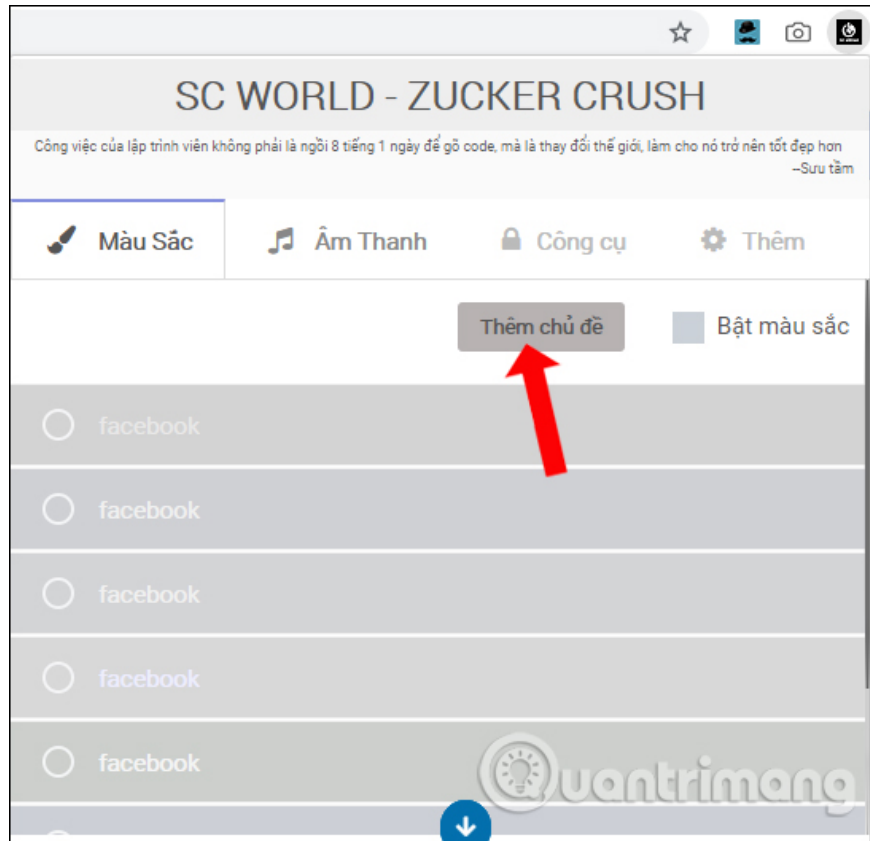

1. Download SC World Chrome utility

Step 2:

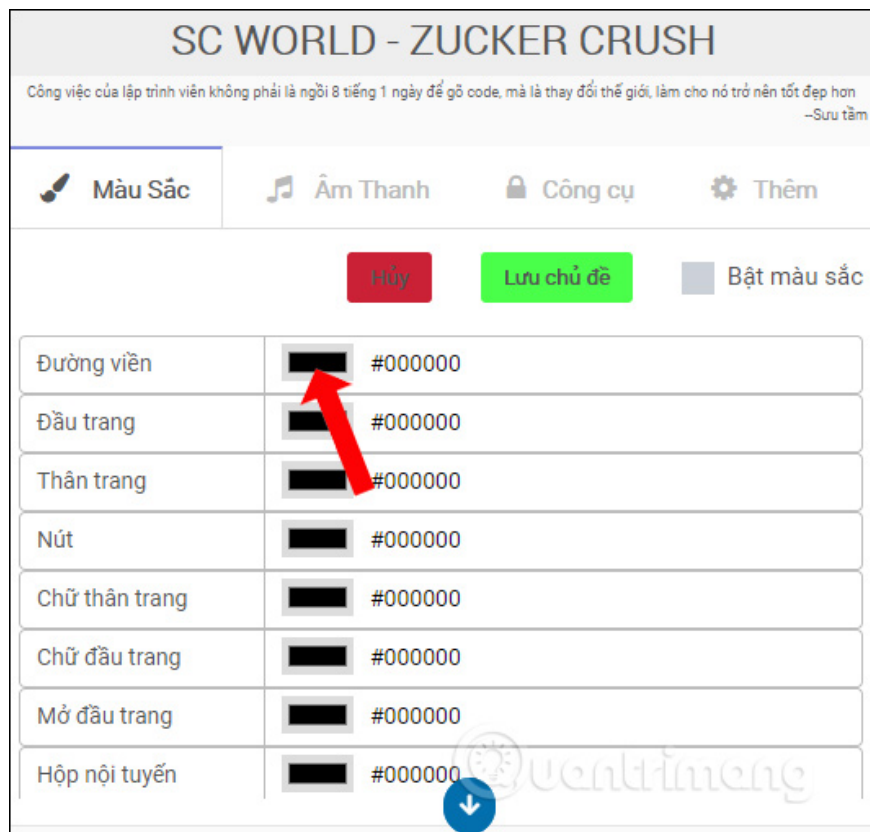

After installation is complete, click **the utility icon** at the end of the browser address bar. The utility interface appears with custom sections for Facebook including Colors, Audio, Tools or Add.

In **the Colors section** click **the Add topic button** . **Note to users** , in case the SC World utility does not work when clicking on the icon, please restart the browser.

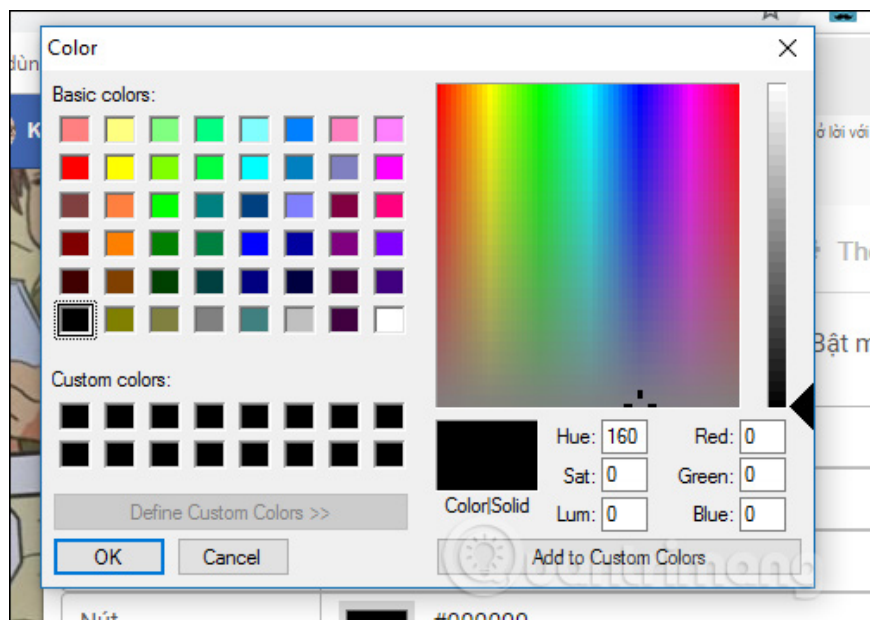

Step 3:

In the new interface will display the items to choose colors. By default, all parts are black. Click on the color box to **select the color you** want to change.

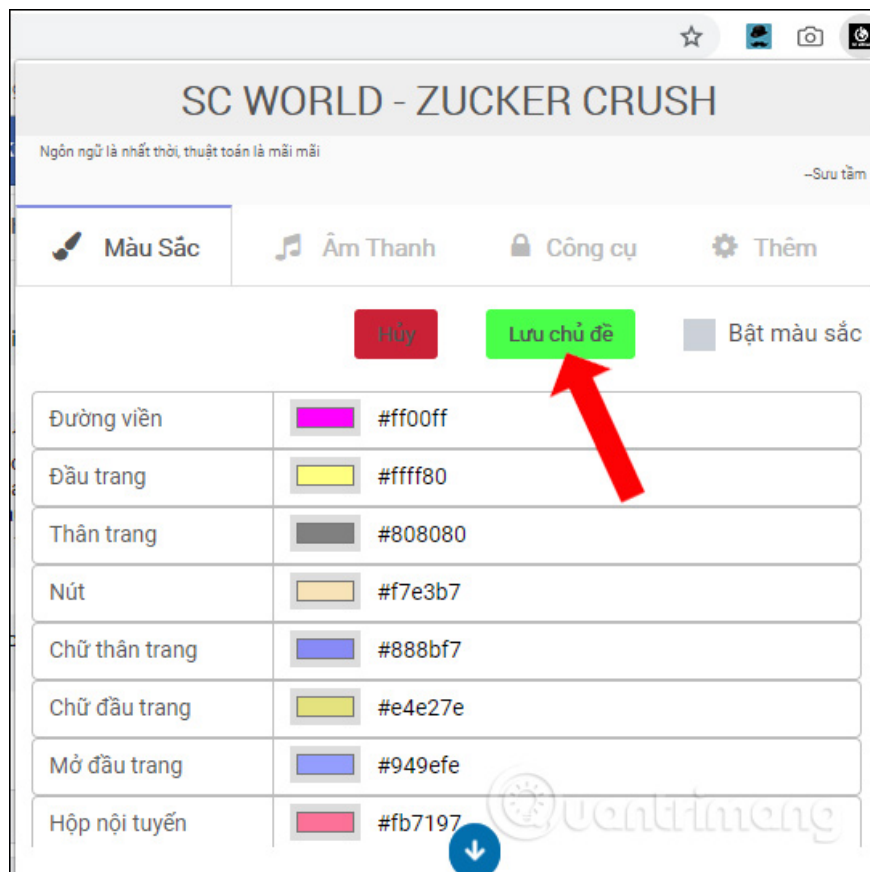

We can choose more colors at the color code frame next to it.

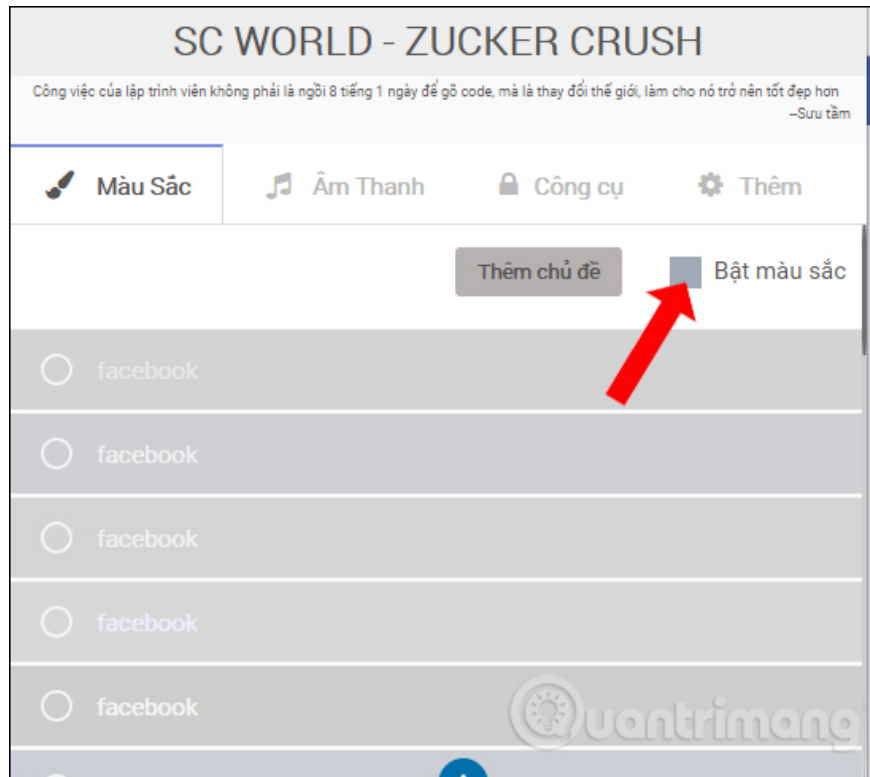

Step 4:

Continue with the remaining components on Facebook. Once you've selected the color, click **the Save theme button** to add a new topic to the topic list on SC World.

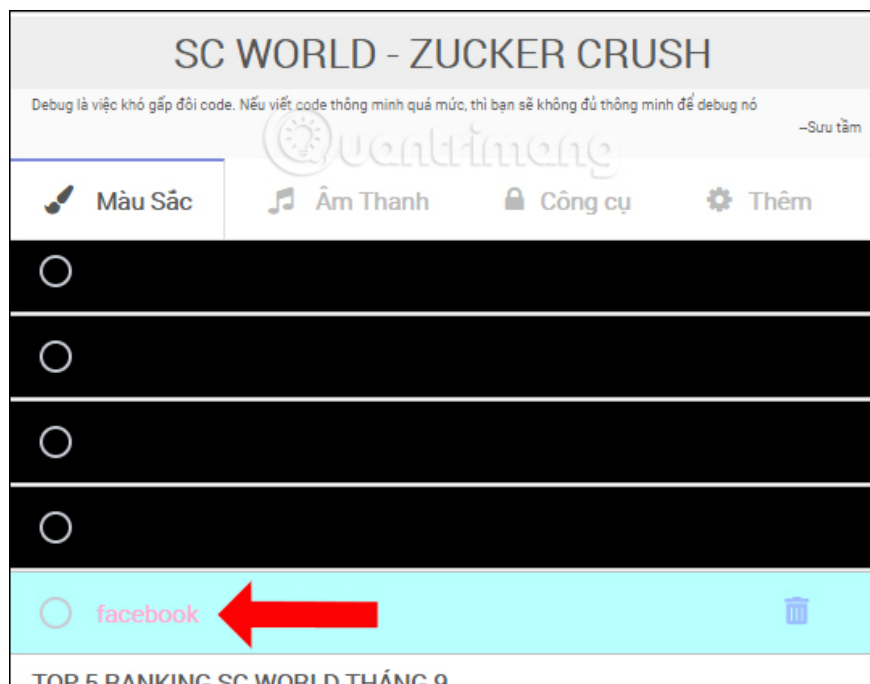

Step 5:

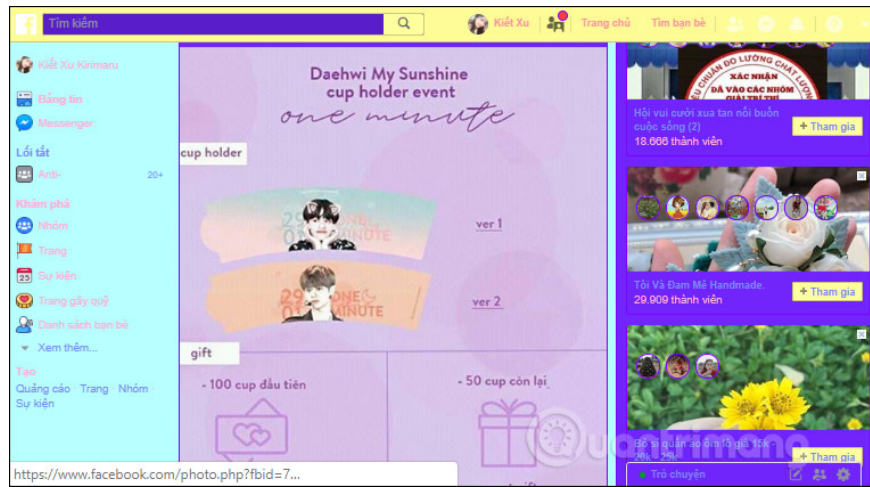

Go back to the Color selection area in **the Enable color box** .

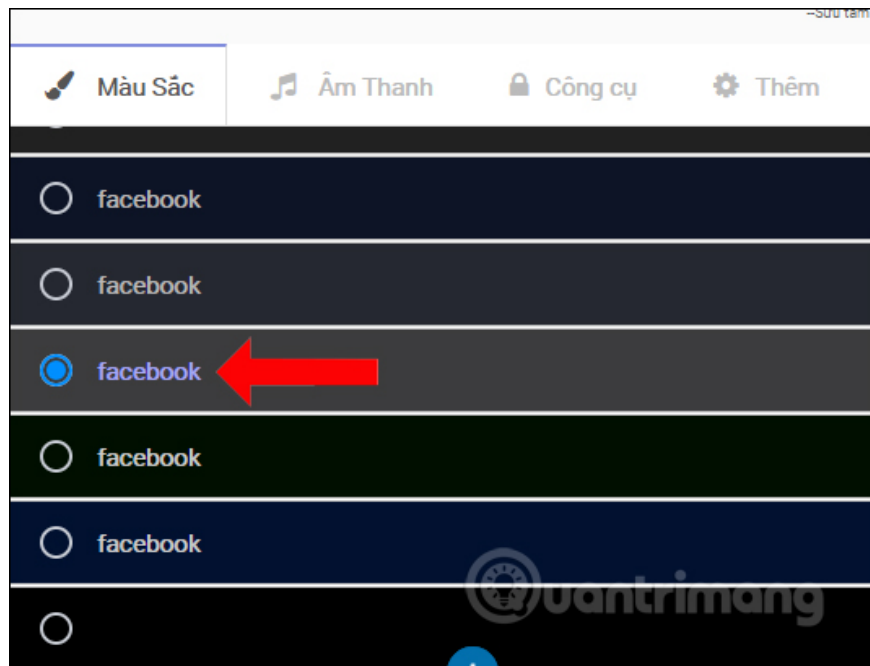

Scroll down below to see the new Facebook theme you just created, **tick the new topic** to use. Then reload the Facebook interface to see the new theme applied.

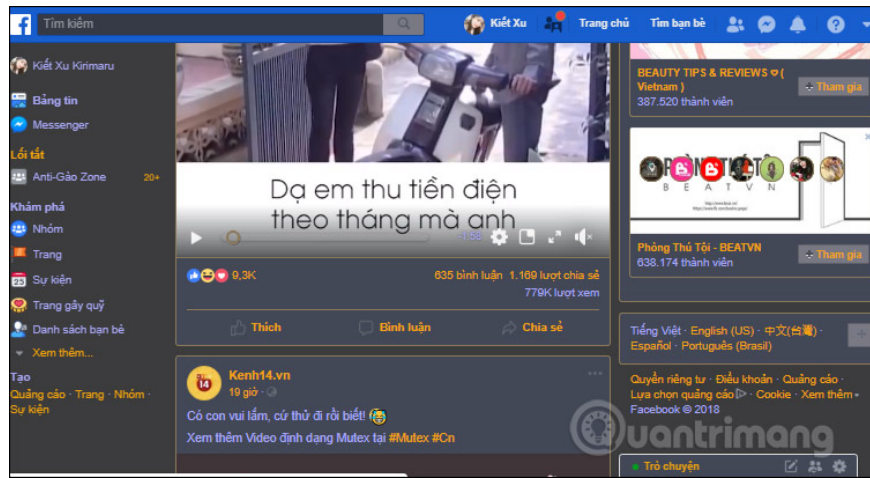

The new Facebook interface will look like the image below. Each part will apply the color you selected. In case you want to return to the old interface, the user will leave the field at Turn on color, or click on the trash can icon to completely delete the designed interface.

In addition to the type of user-designed interface, some **of the theme designs** available in the utility can be applied.

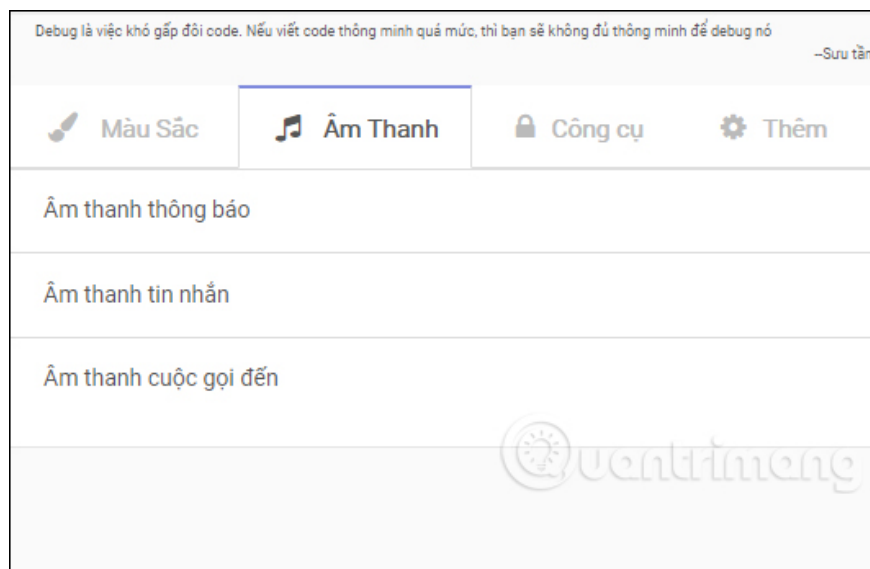

However, these designs stop at the basic level and only use 1 or 2 colors in the interface.

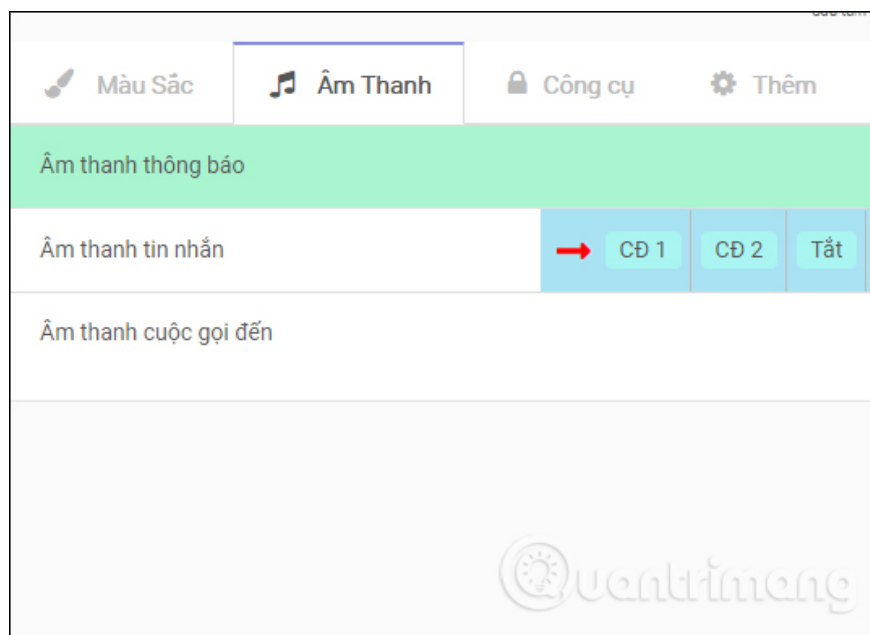

Step 6:

Continue clicking on **Audio** to change notification sounds, message tones and video call tones on Facebook.

You choose the Facebook audio you want to change. Currently the utility does not allow audio previews to be selected for use.

Step 7:

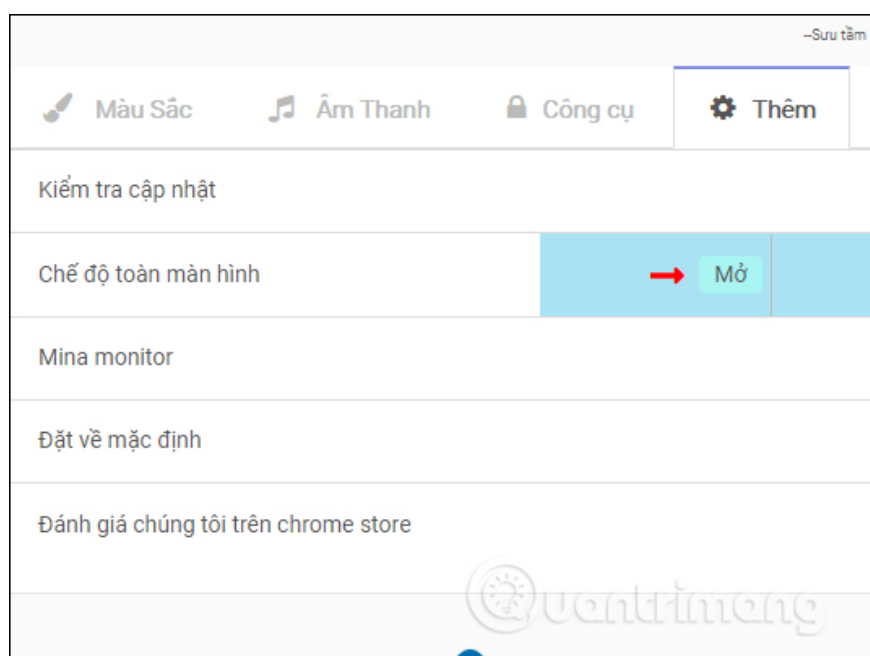

In addition, **the Tools section** will support you some tools to check Facebook, such as Facebook message statistics, Facebook security check, .

We will be redirected to the SC World operation page.

The last **Add item** will be options when using the SC World utility on the browser.

SC World utility not only changes the new interface for Facebook, but also has other useful tools. Users can choose the color in the color code table to apply to the Facebook interface.
