

How to delete all messages in Gmail on iPhone simply and effectively

You are trying to delete all messages in Gmail on iPhone to make your mailbox neater and more organized but don't know how to do it. The article below will tell you the steps to delete all messages in Gmail on iPhone quickly and effectively.

Deleting all messages in Gmail on iPhone is also quite simple, follow these steps in order.

Step 1: First, open your iPhone and access the Gmail application, then log in to your email.

Step 2: Next, select Inbox and click Edit to continue deleting all messages in Gmail.

Step 3: Here, you can select the emails you want to delete one by one (if your mailbox has few emails) or click Select all (if your mailbox has too many emails) and then select Move.

Step 4: Then, select Trash to move the emails you selected above to the trash, similar to deleting emails.

Step 5: According to the settings, when you delete emails in Gmail, they will be moved to the Trash. Therefore, you need to go to the Trash to permanently delete these emails to ensure that no one can recover them.

The above article has just shown you how to delete all messages in Gmail on your iPhone. Thanks for watching.
