

How to delete duplicate contacts on iPhone with 3uTools

3uTools is a tool to support users to manage and transfer data, jailbreak their iOS devices from a computer. 3uTools owns the features of iTunes and iTools, but this tool has much more outstanding features.

For those who use iOS devices, certainly can not lack two tools iTunes and iTools. However, everyone admits that sometimes using iTunes is a bit confusing, while iTools is gradually commercializing copyright. Therefore, it is something that you should consider when choosing an alternative tool.

3uTools is a completely new tool, combining the features of iTunes and iTools, including device management, data copying, ringtone creation, data recovery, jailbreak iPhone. However, 3uTools possesses some of the more advanced features compared to the above two tools. In this article, Network Administrator will show you how to delete duplicate contacts on iPhone with 3uTools.

Delete duplicate iPhone contacts with 3uTools

First of all, we will download the 3uTools tool according to the link below:

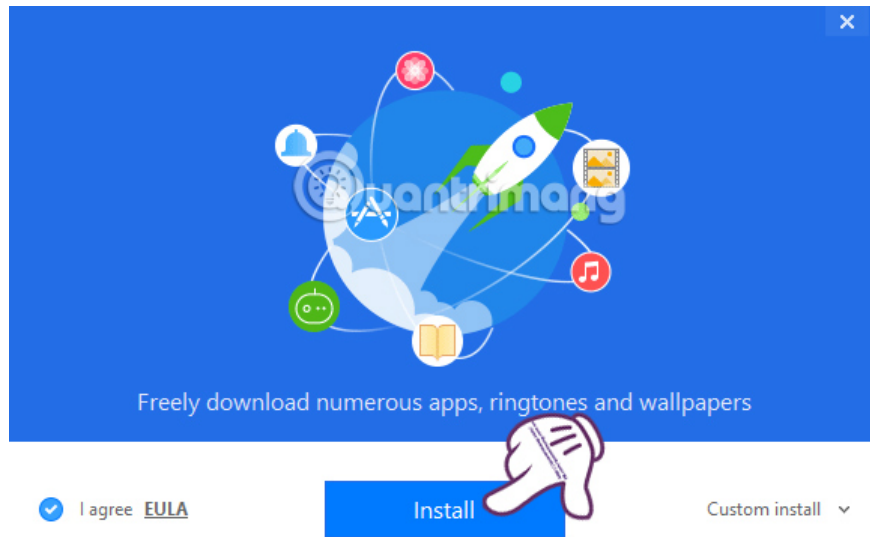

1. Download the free 3uTools tool

Step 1:

Before installing 3uTools, you should install iTunes on your computer.

1. Download the free iTunes software

We launch the 3uTools file on the computer. At the main interface, we will click **Install** to proceed to install the program.

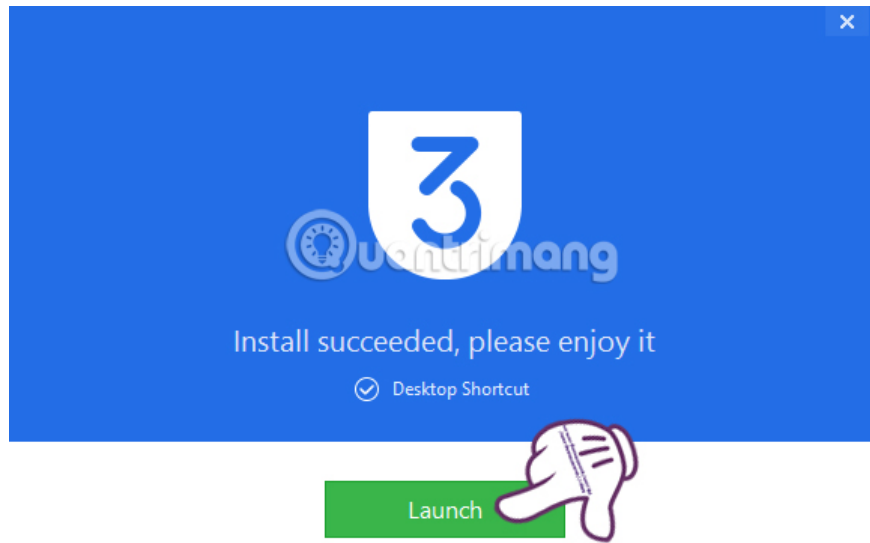

Step 2:

We wait for the installation of 3uTools on the machine.

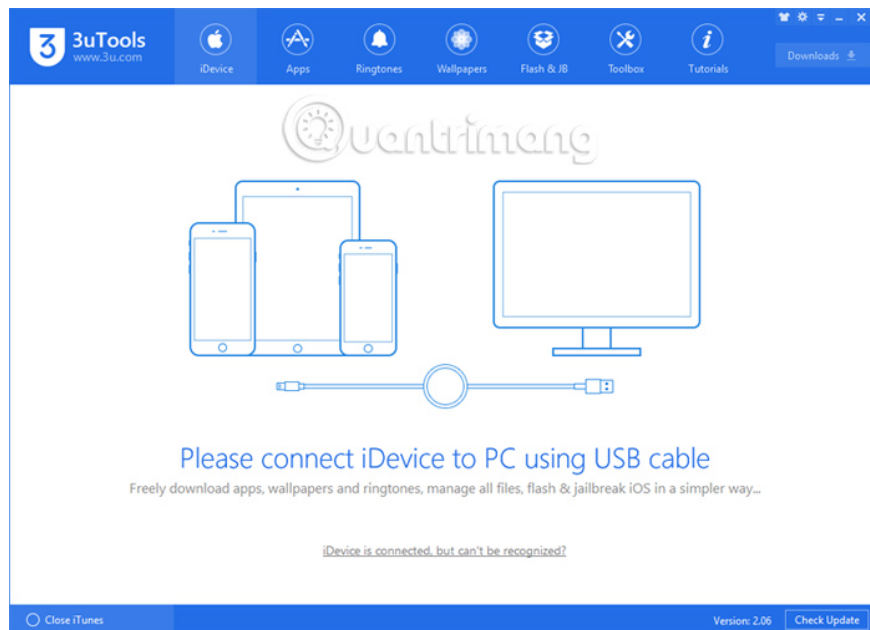

Since your computer has iTunes pre-installed, the interface will appear as shown below. Click on **Launch** to use 3uTools software.

Step 3:

Below is the interface to start using the program. You will **connect your iPhone to the computer** so that 3uTools can identify the device.

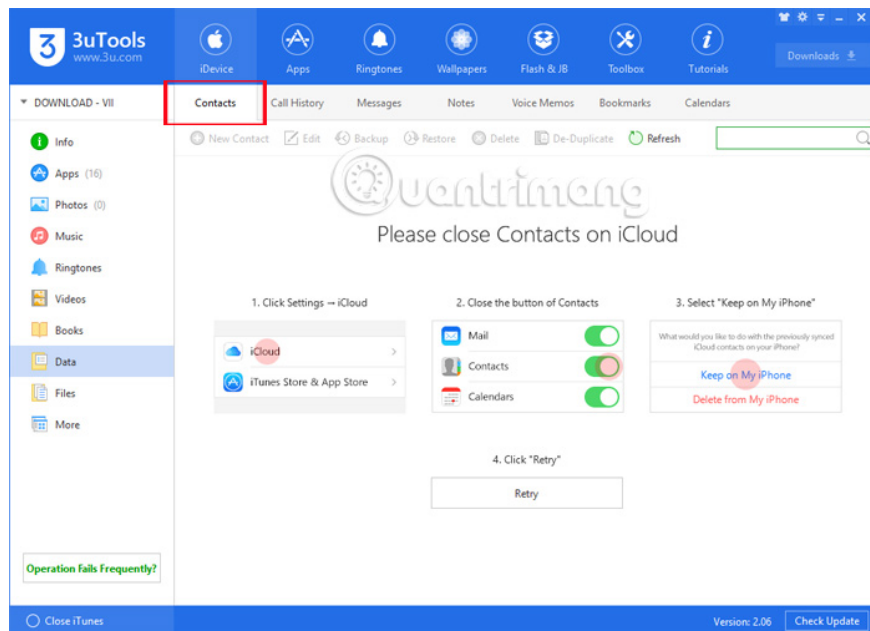

When we connect the device successfully, the new interface of 3uTools will provide all the information of the device as shown below. Next, click on the **iDevice** item and select **Data** .

Step 4:

Next we will click on **Contacts** . In this interface, you will see 3uTools guide us on the steps to take on the device.

First of all, on the iPhone you access **the iCloud section** , then **turn off the Contacts item** on the device when you push the horizontal bar to the left. Soon a small window appears, click **Keep on My iPhone** to save contacts on iPhone.
