

# How to delete iCloud backup on iPhone/Mac

While you can turn off iCloud backups on your Apple devices, deleting old iCloud backups is more suitable to free up iCloud storage.

Backing up your data to iCloud keeps your data safe and secure. However, backup files can build up over time, taking up space in your iCloud storage and interfering with other content. While you can turn off iCloud backups on your Apple devices, deleting old iCloud backups is a better way to free up iCloud storage. Here's how to delete iCloud backups.

## How to Delete iCloud Backup on iPhone

### Step 1:

On the iPhone interface, click on your **Apple ID account** . **Next, on the new interface, the user clicks on iCloud** to access.

### Step 3:

We will see the capacity of the copy as well as the applications. Scroll down and **tap Delete & turn off backup**. Then you will be asked if you are sure you want to delete the iCloud backup on this iPhone, **tap Turn off** to do it.

## Sao lưu Chi tiết bản sao lưu

**Quantrimang**  
Hiện thị tất cả ứng dụng

Thư viện ảnh của bạn không được bao gồm tại đây vì thư viện được sao lưu như một phần của Ảnh iCloud.

**Xóa & tắt bản sao lưu**

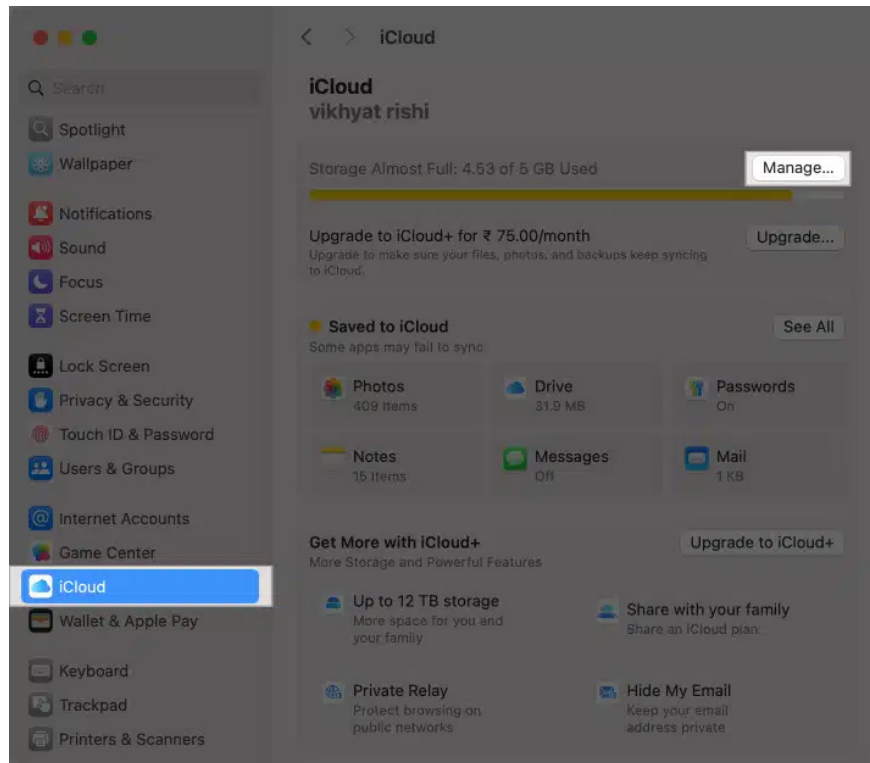

Việc này sẽ xóa tất cả dữ liệu sao lưu của thiết bị này khỏi iCloud.

## How to Delete iCloud Backups on Mac

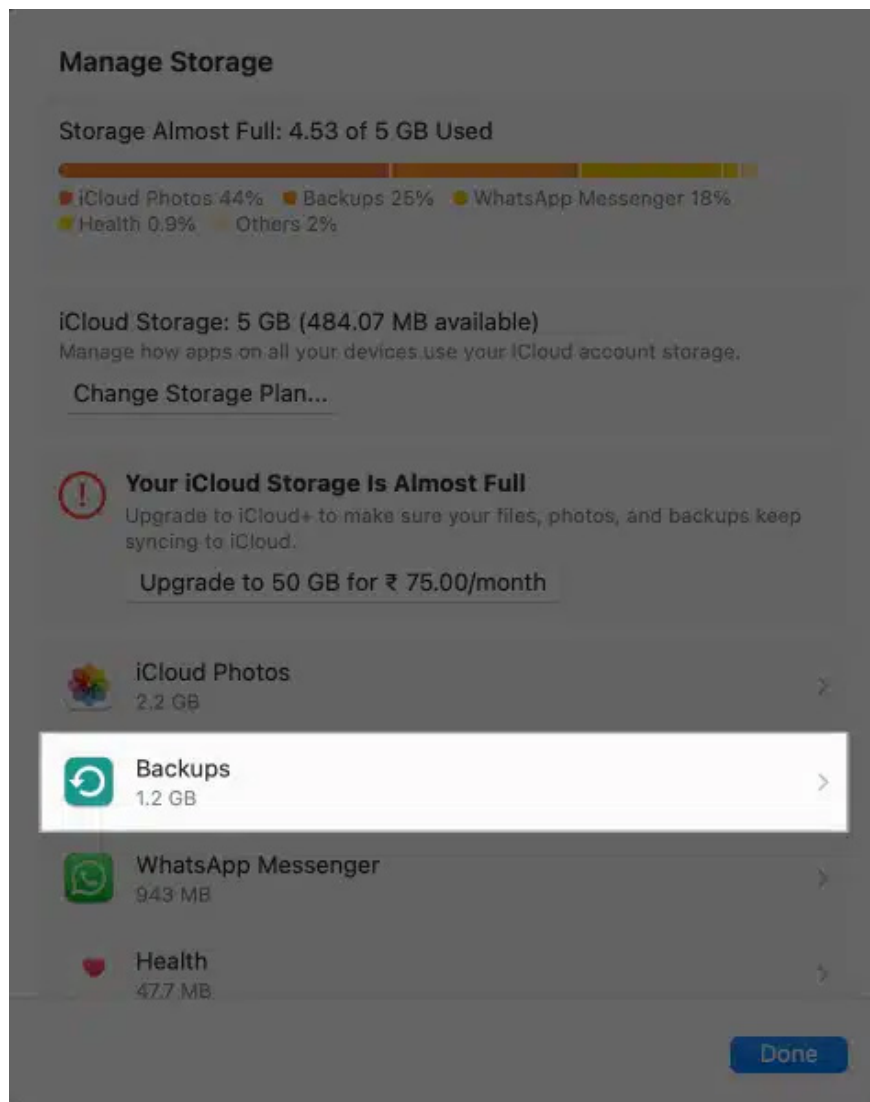

### Step 1:

First, you also click on **Settings** then select **iCloud** on the interface on the left side of the screen. Now the user **clicks on Manage** to manage.

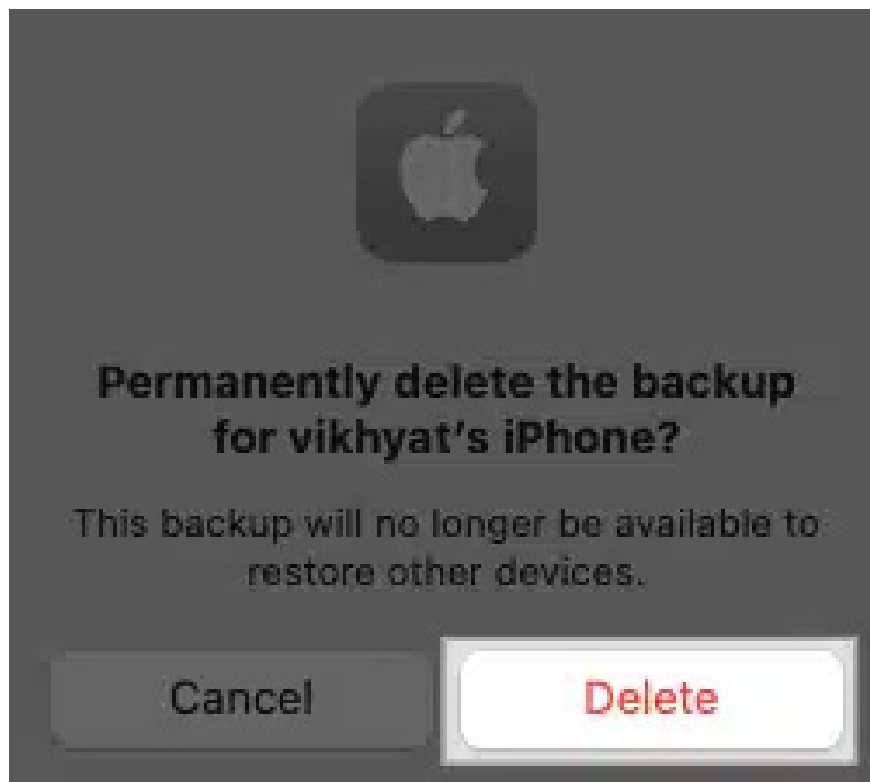

## Step 2:

Now you **select Backup** to see how you backup iCloud data on Mac.

Now you also **click on the iCloud backup that you want to delete** , then click **Delete** to do it.

## What happens when you delete an iCloud backup?

There are a few things you need to know when deleting an iCloud backup.

1. **Permanently Delete** : When you press the delete button, the backup will be permanently deleted. There is no way to get it back and restore your device using that backup.
2. **Data is deleted from iCloud, not your device** : Deleting an iCloud backup doesn't affect data stored on your device. All of your device data, such as photos, videos, files, and more, remains unless you manually delete them.
3. **No impact on sync** : Any data stored in your iCloud storage will still be available on other devices signed in through an Apple account, except iCloud backups will not be available on any devices after they've been erased.
