

How to delete iTunes, completely uninstall iTunes from your computer.

This guide explains how to completely uninstall iTunes from your computer, helping users fix errors when reinstalling iTunes because the software wasn't completely removed or related files weren't deleted previously. Alternatively, if you simply no longer want to install iTunes, you can uninstall it from your computer.

When it comes to **iTunes** , every Apple iPhone fan knows it; it's a tool provided by Apple. Through iTunes , users can easily copy music, photos, videos, and even restore their device directly from their computer. So, as mentioned in the introduction, how **do you completely remove iTunes from your computer** ? Is it complicated or difficult? Let's find out.

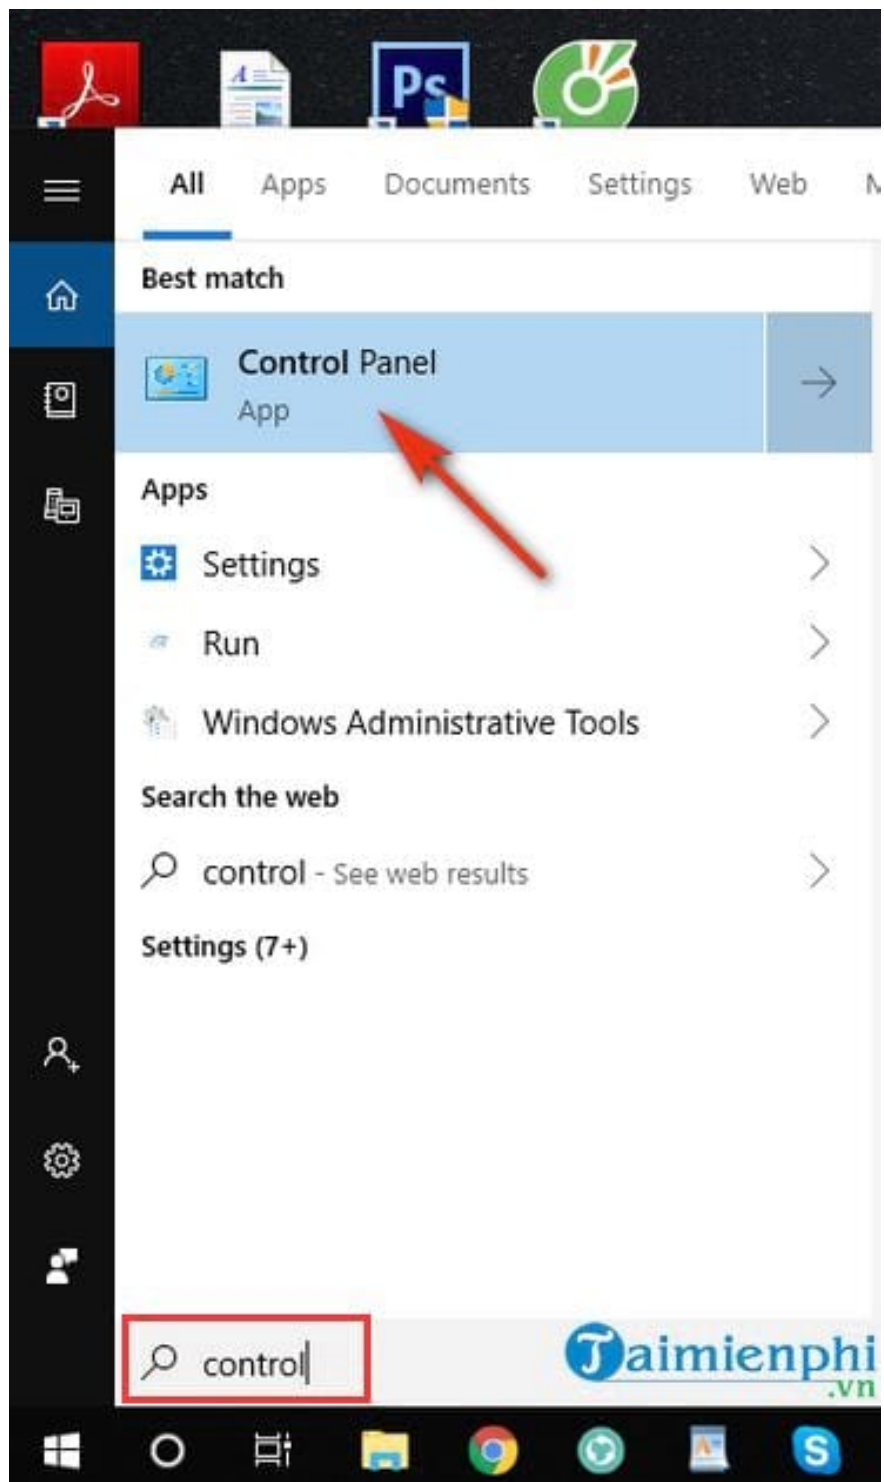

Is it difficult and complicated to completely remove iTunes from a computer?

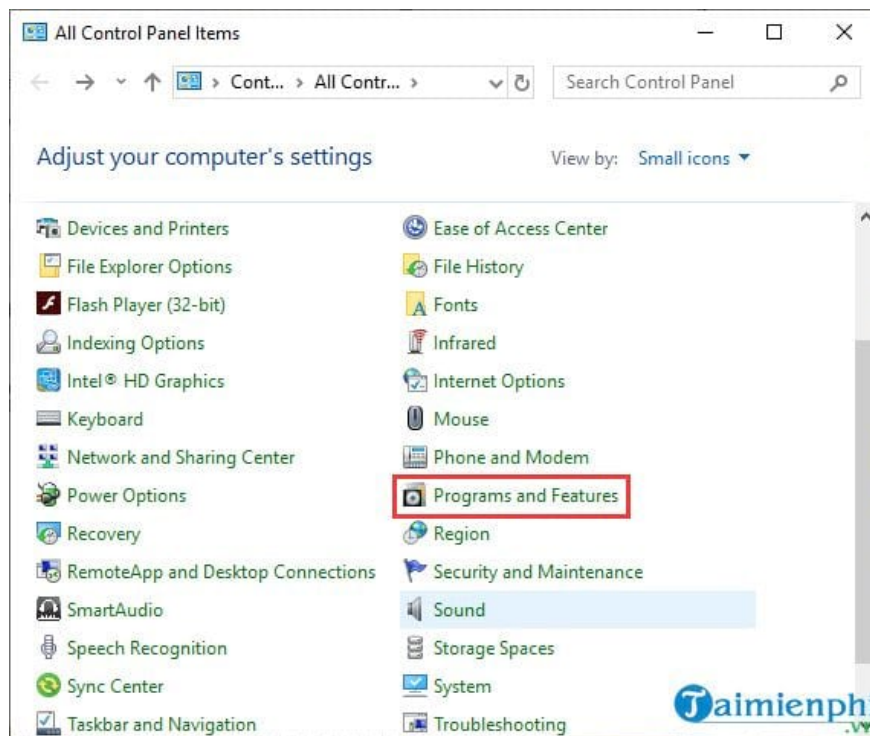

Instructions on how to delete iTunes and completely uninstall it from your computer.

To completely remove iTunes from your computer, follow these steps:

Step 1: In the search bar on your computer, type " **Control Panel** " -> then click on "**Control Panel**" to open it.

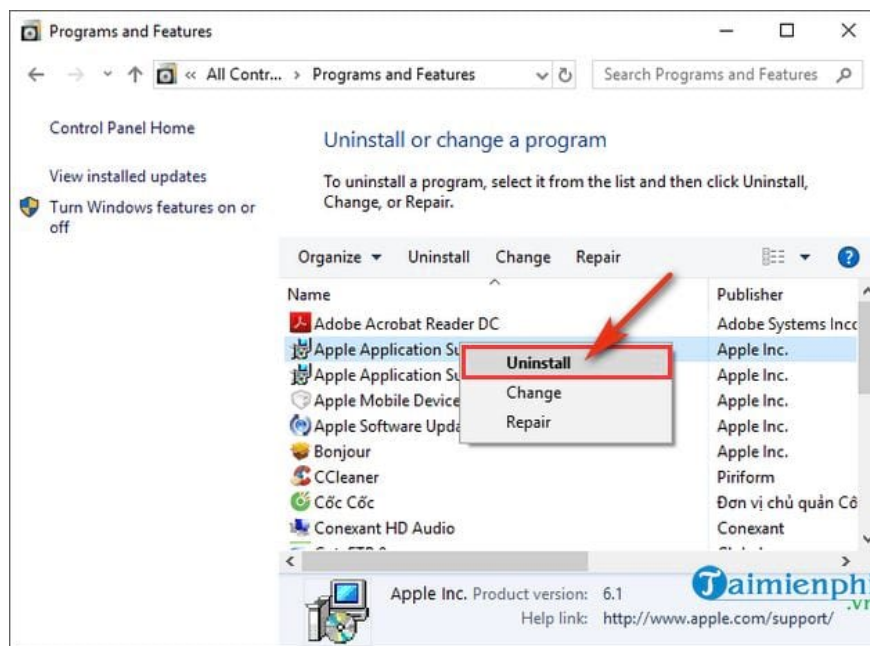

Step 2: Next, click on the **Programs and Features** section .

Step 3: Here, you will remove or delete items related to iTunes as follows:

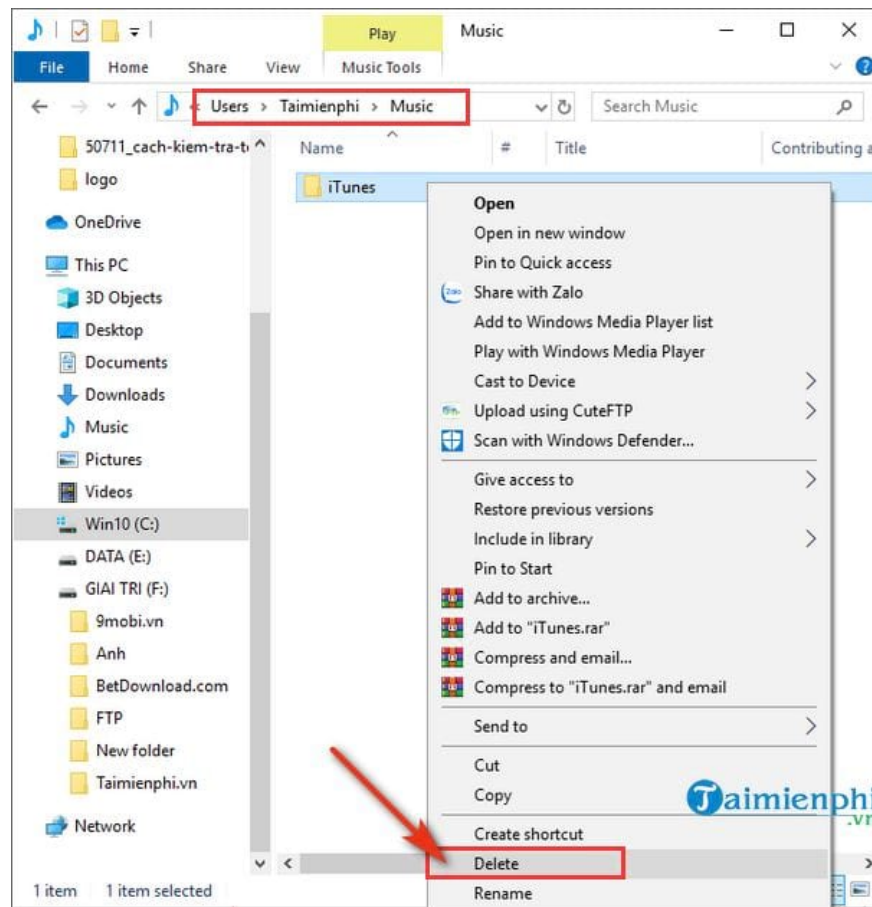

- **Apple Software Update**
- **Bonjour**
- **Apple Mobile Device Support**
- **Apple Application Support.**

Click on each item above -> then select **Uninstall** to proceed with removing iTunes from your computer.

Step 4: After you have removed the 4 items as described above, access the folder below to **delete the iTunes folder** on your computer.

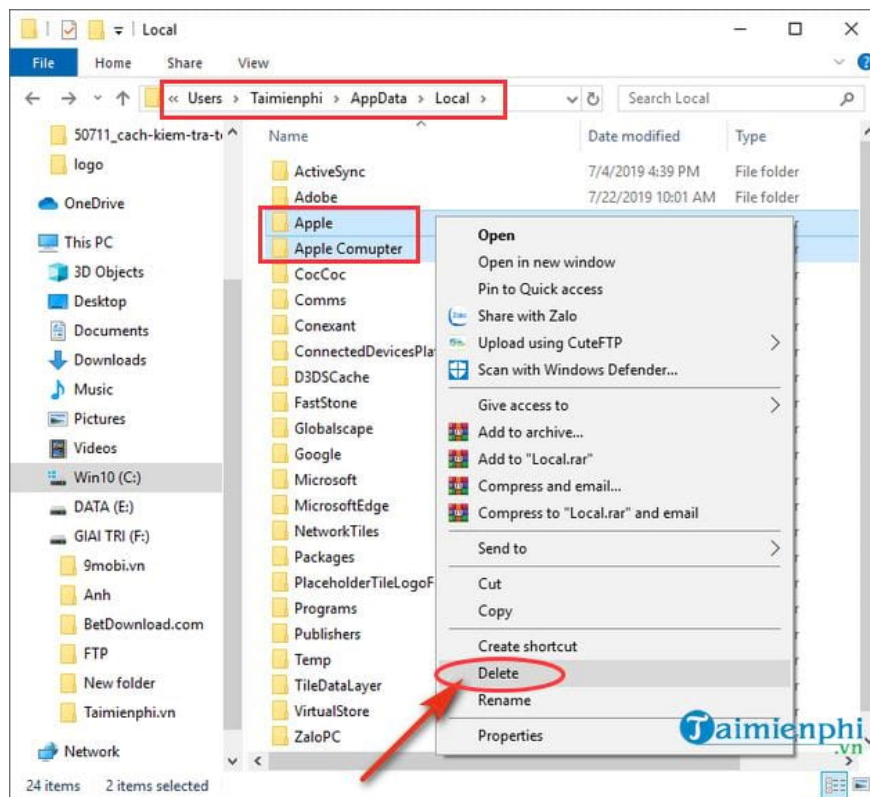

- Access the folder: **C:UsersusernameMusic**

Step 5: On the same C drive as above, access the following folder path:

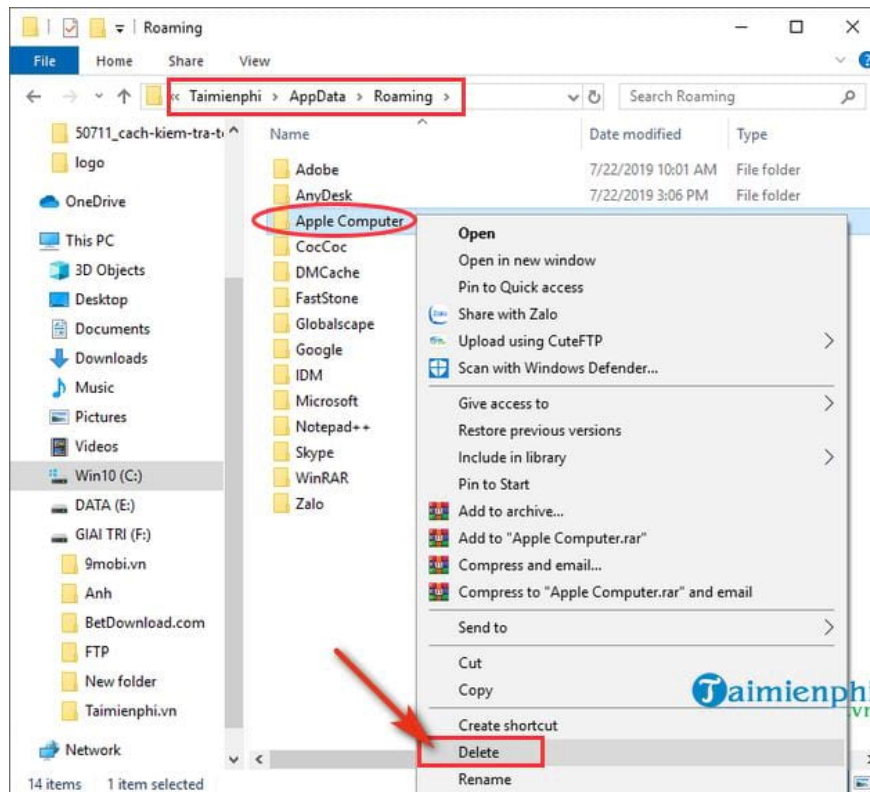

- Access the folder: **C:UserUsernameAppDataLocal**

Next, you should also delete the two folders: **Apple** and **Apple Computer** .

Step 6: Next, access the following link to delete Apple Computer.

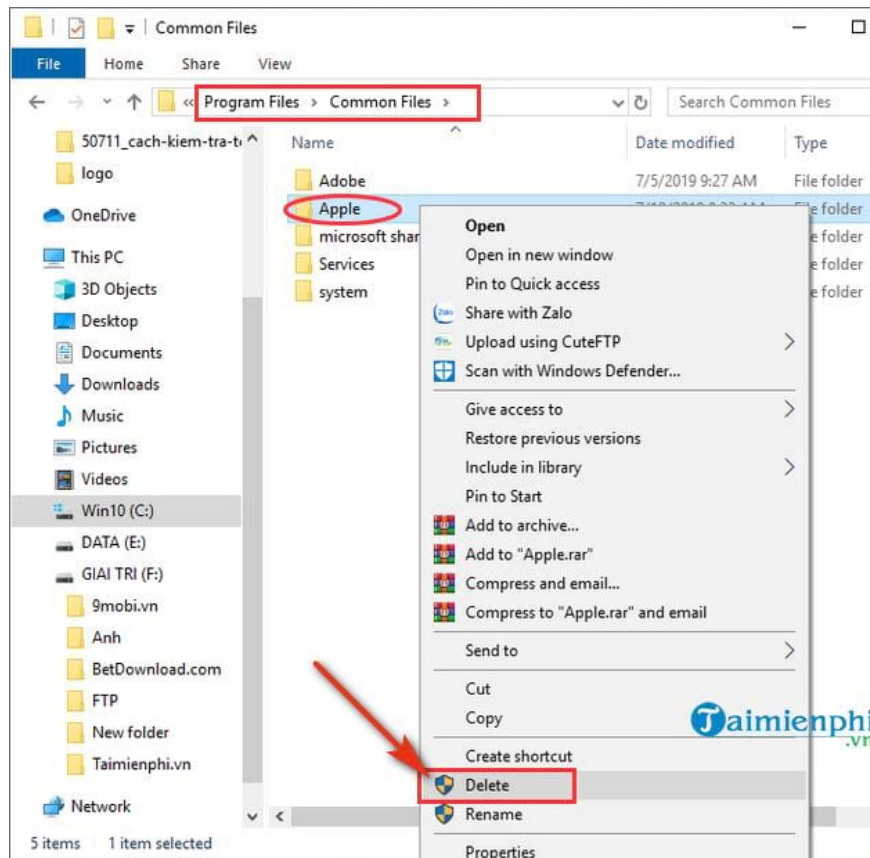

- Access the following path: **C:\UserUsername\AppData\Roaming**

Step 7: Still on drive C, find the following folder:

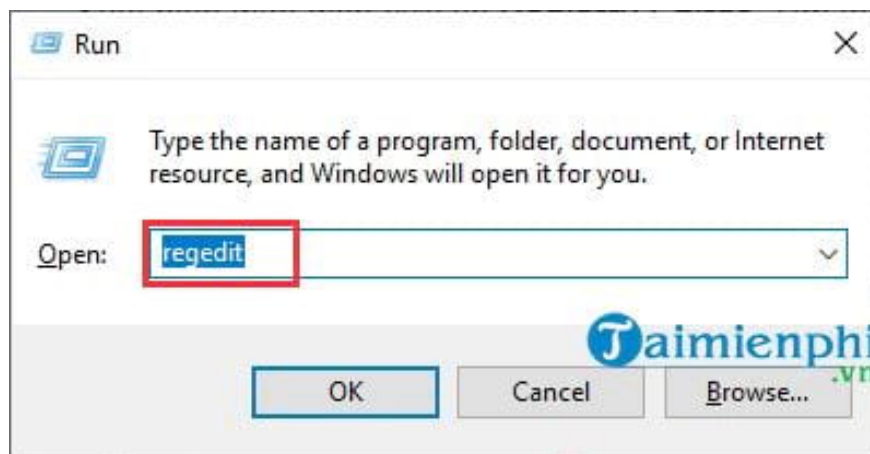

- Access the folder: **C:Program FilesCommon Files**

Next, you will delete the **Apple** folder .

Step 8: This step is quite important to delete all folders and files related to iTunes software, and you will perform the operations in **Registry Editor** .

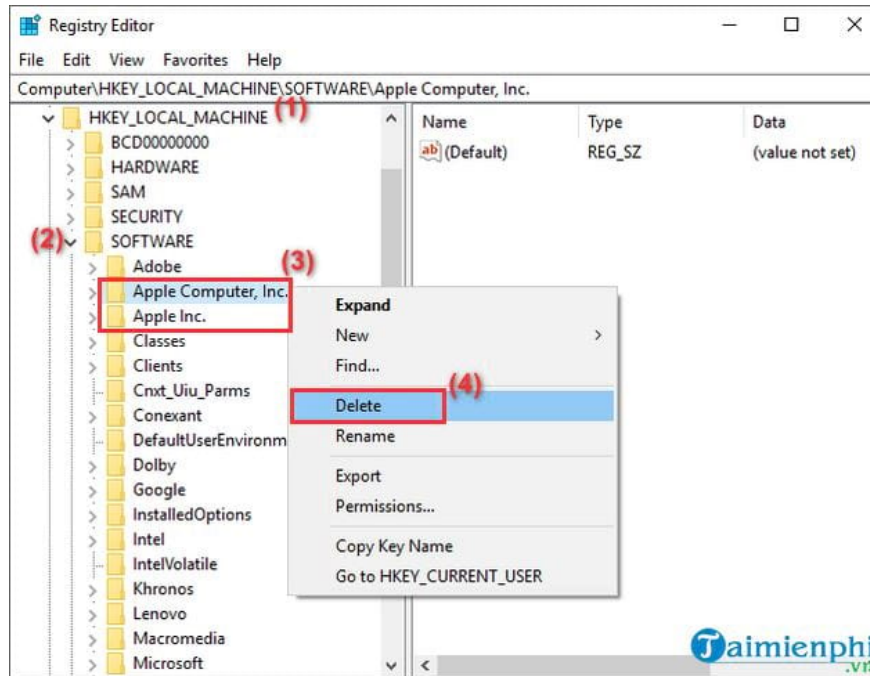

Press the **Windows + R** key combination to open **Run** . Then, type " **regedit** " in the **Open** box and press **OK** .

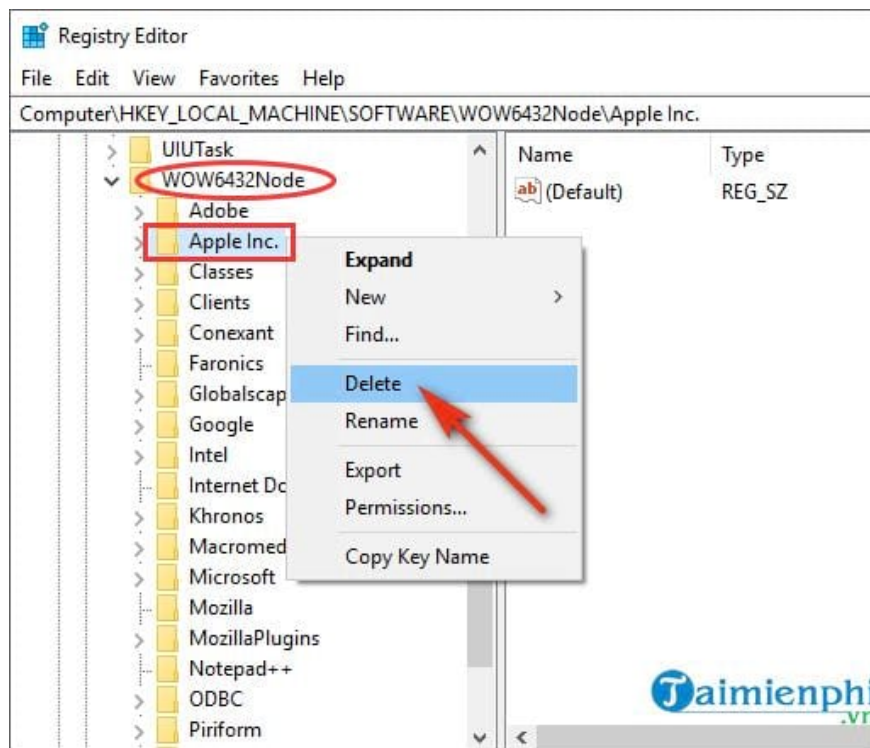

Step 9: In the **Registry Editor** interface, find the folder using the following path:

HKEY_LOCAL_MACHINE SOFTWARE

Here, you can delete **Apple Inc.** and **Apple Computer, Inc.** as shown in the image below:

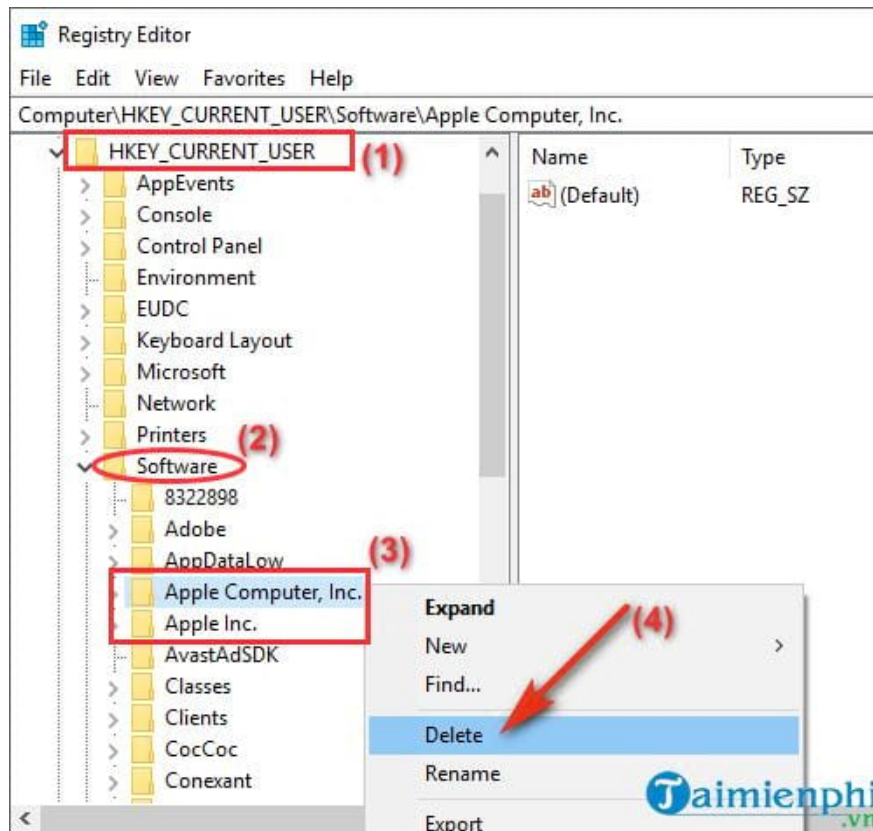

Note: If your computer uses 64-bit Windows, scroll down -> find the **Wow6432Node** folder to delete the two keys **Apple Inc.** and **Apple Computer, Inc.** as described above.

Step 10: Next, still in the **Registry Editor** interface, navigate to the following folder:

HKEY_CURRENT_USER Software

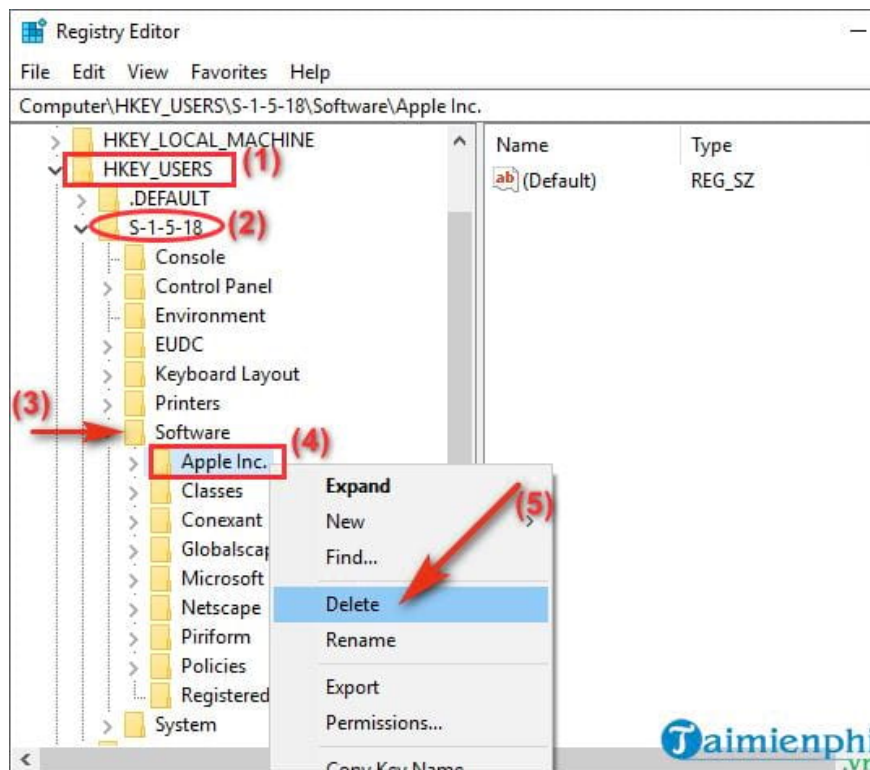

Next, delete the two keys **Apple Inc.** and **Apple Computer, Inc.** located in that folder.

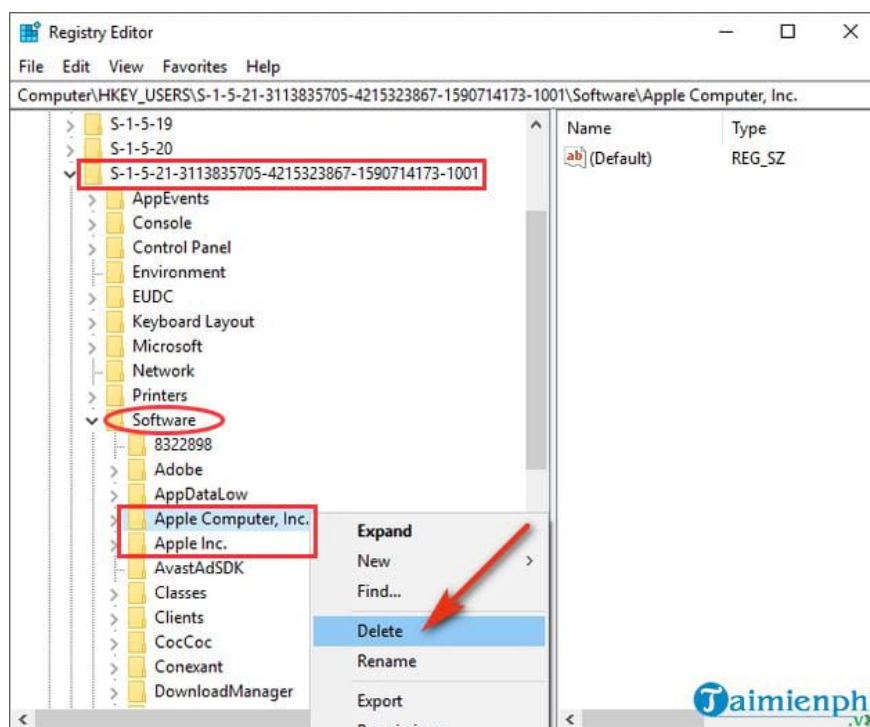

Step 11: Continue to the folder using the following path:

HKEY_USERS S-1-5-18 Software

To remove the **Apple Inc.** lock , click here.

Still at **HKEY_USER** , you will access **S-1-5-21-4195518859-1453404549-3318302731-1001Software** and delete the **Apple Inc.** and **Apple Computer, Inc.** folders.

Continuing in **HKEY_USERS S-1-5-21-4195518859-1453404549-3318302731-1004 Software** , you will delete the **Apple Inc.** key that is currently there.

Step 12: Finally, restart your computer and check again. You will see that iTunes is no longer on your computer, including the files, and it's not in the Registry either -> meaning iTunes has been completely uninstalled and removed from your computer.

After **deleting iTunes and completely uninstalling it from your computer** following the steps above, if you previously reinstalled iTunes and encountered errors, you can now safely reinstall it without fear of experiencing the same problems again.

If you are using a Mac OS computer, please refer to the instructions **for uninstalling iTunes on Mac** here.
