Instructions for deleting posts on WordPress

Step 1:

Log in to your personal WordPress account and then click on **My Site** to manage content on WordPress.

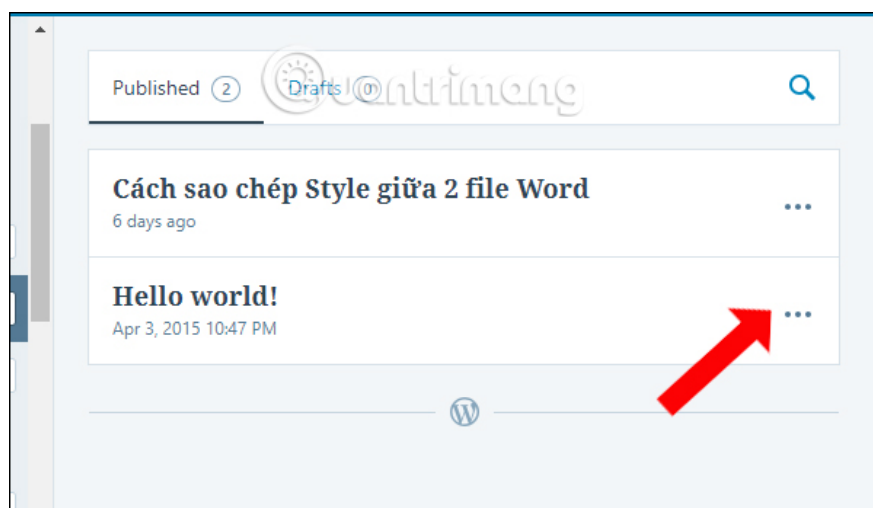

Then on the list interface on the left side of the screen click on the **Blog Posts** section to open all of the posts on WordPress.

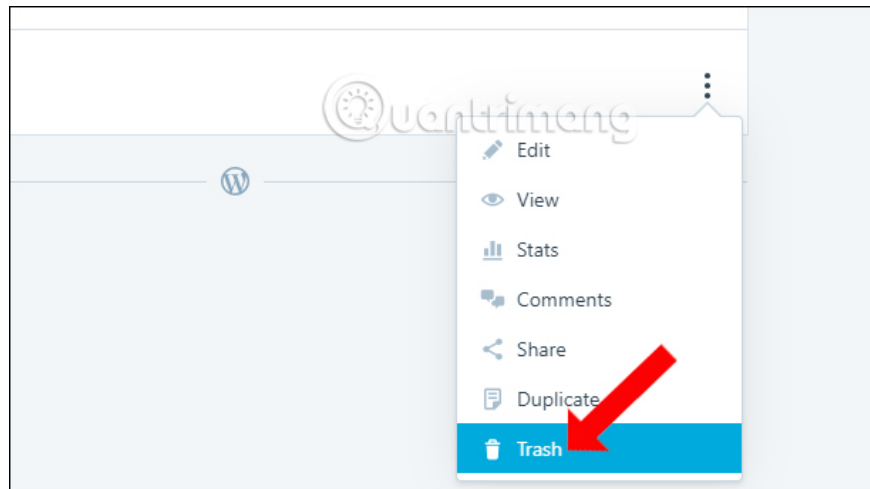

Step 2:

Here we will see all the articles that have been posted publicly on the WordPress site. Click **the 3 dots icon that is the same** as the WordPress post you want to delete. You should check the post content to make sure the correct post is deleted.

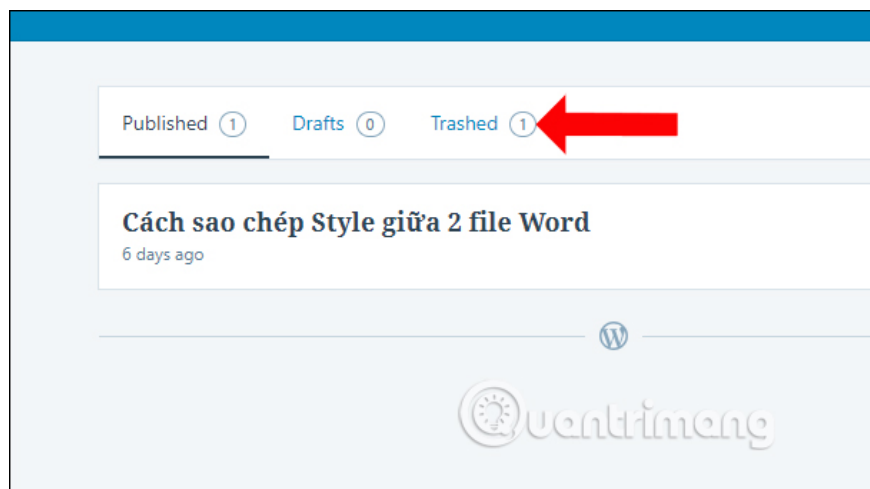

A list of options for the post appears, click on **the Trash item** to delete the post on WordPress.

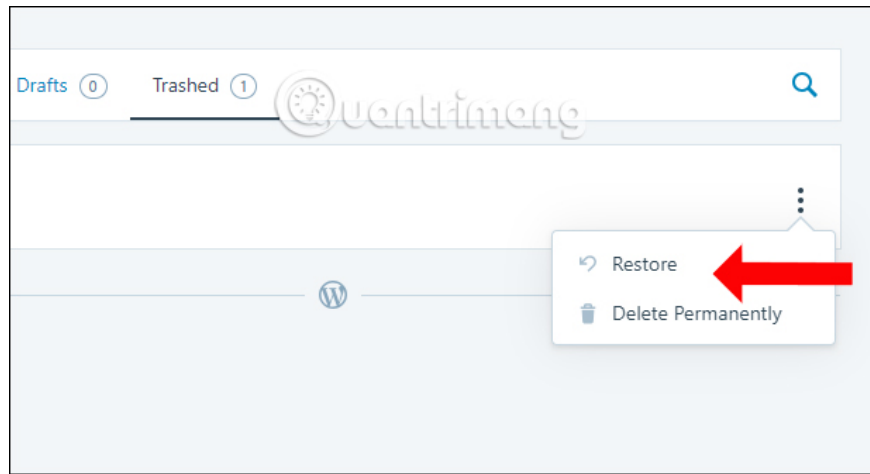

Step 3:

Deleted items will appear in **the Trashed section** just above. Users will also see the number of deleted posts.

Click on the article we will see there are 2 more options are Restore and Delete Permanently. If you want to return the article to the post section, click the Restore button. If you do not want to use the article anymore, click Delete Permanently.

With a few simple actions users have deleted posts on WordPress. Posts after deletion will be added to the separate Trashed section, so we have more options to retrieve the article or delete the article permanently.
