

How to delete search history on Google Play Store

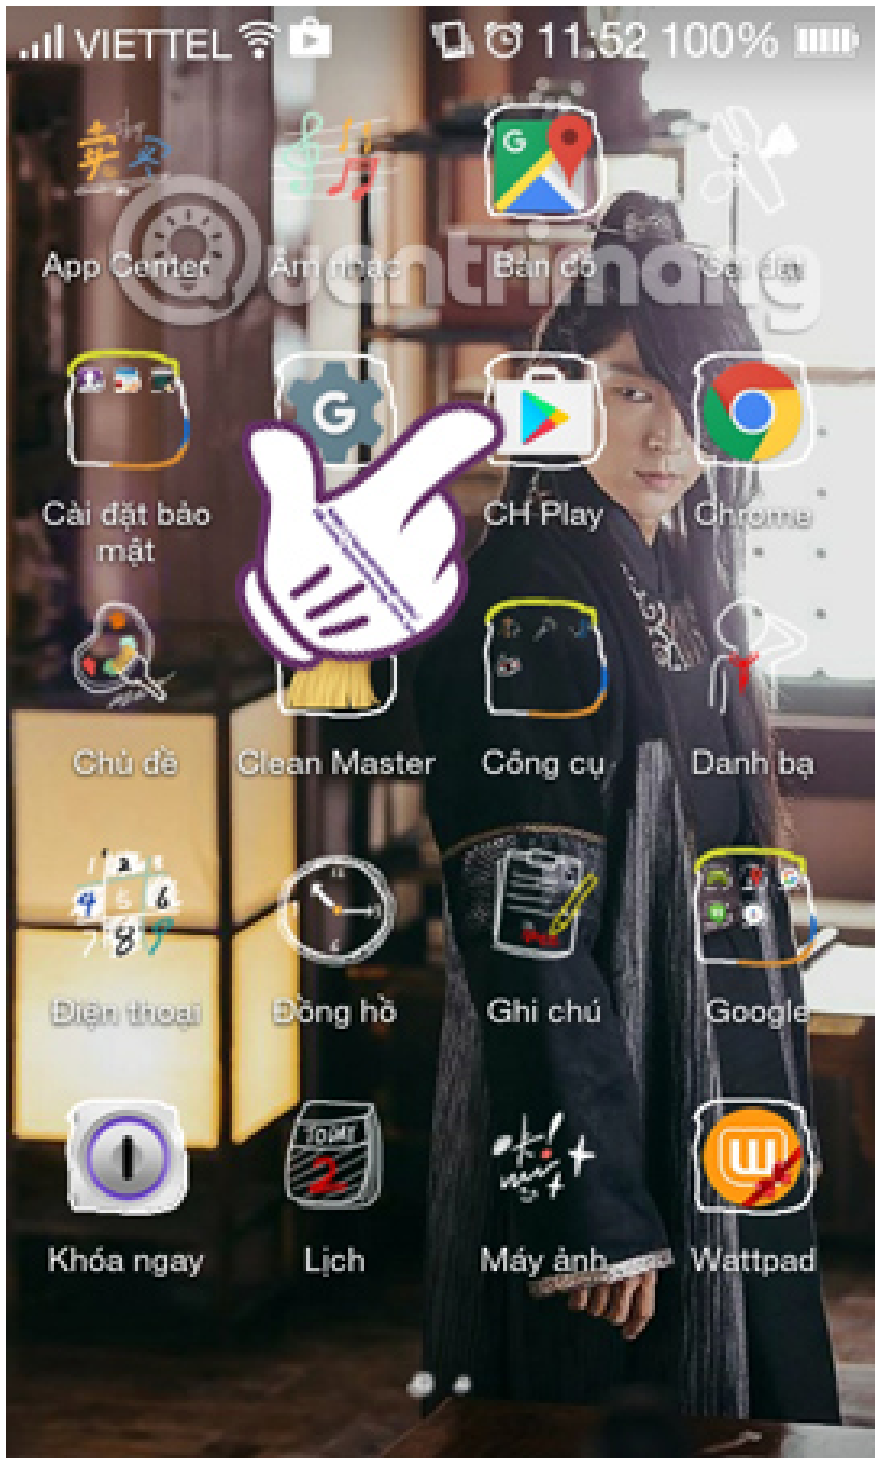

When you search for any application, game, video on Play Store will be recorded search history. And sometimes we want to delete the entire search history on Play Store.

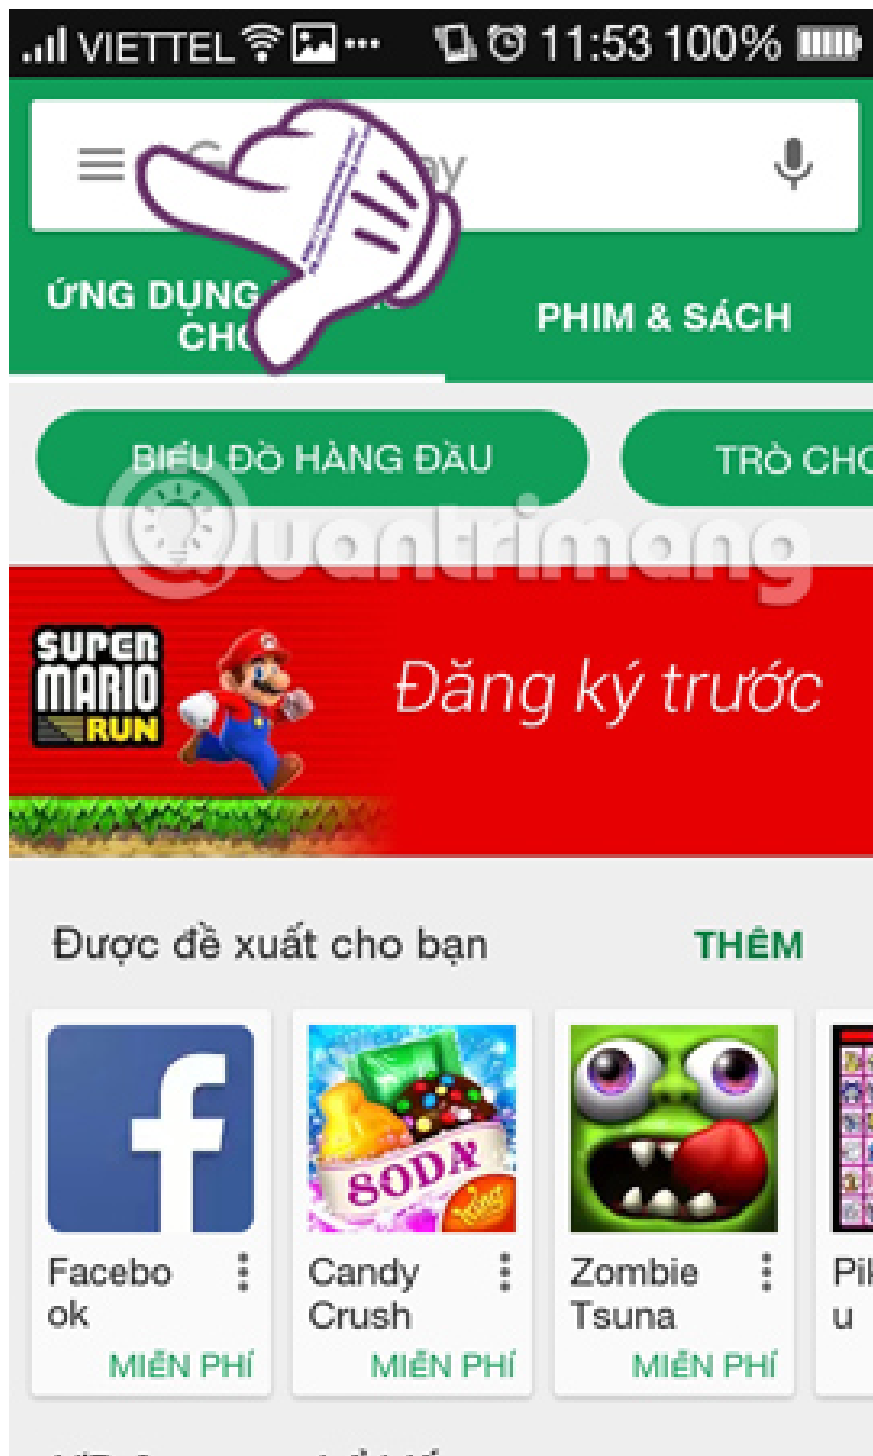

By default on Android devices, when we search for any video, application, game, . on Play Store will be saved search history. This will make it easier for users to search for applications later, or later search results will be based on previous search history.

However, the default feature that saves the search history on the Play Store sometimes causes users trouble. For example, you switch to a new phone and do not want to save any information you used before. Or simply want to delete search results to protect personal information only. So how can I delete the entire search history on Play Store?

Step 1:

First of all, you access the Play Store on the device. At the main interface, we click on **the 3 dashes icon** as shown below.

Step 2:

The user account dialog box appears with different options. Here you scroll down and select **Settings** (Settings). Next in the Settings interface, go to and click on **Delete** local search history (Clear local search history).
