

How to delete StarMaker posts

This is how you can delete your posts on StarMaker, or if you don't want to delete your posts you can choose how to Private mode.

Not every song that you record on StarMaker makes you feel good. Although you have a choice before posting, if you have already posted, you can delete your recording.

It is similar to deleting your Facebook post, to delete the unwanted recording on StarMaker, follow the instructions below.

Instructions to delete the recording in StarMaker

To delete the post, the recording was posted in StarMaker, go to the **Me** section . Next, choose your uploaded recording and select the three dots.

Next in the share for you select Delete.

In the notice to delete the post, select Delete.

Thus, you have deleted the post / audio recording posted to StarMaker, it's simpler if you do not want to delete that post, you just need to select the Private mode for your post. With this option, you will not need to delete that clip and your followers will not see it.

Similar to StarMaker, you can use the Voix application to record your voice on your phone. How to record a video of karaoke with Voix on iPhone is quite simple and the sharing is similar to that on StarMaker
