

How to delete text on photos in Photoshop

In Photoshop, it is possible to delete text in images, to help you remove text logos in images.

Inserting text in images or inserting logos in images is a way to stamp image copyright. So what if you want to delete the text in the image, or delete the logo in the image?

To delete the logo in the photo you can use online tools, or use the photo editing software right away. Text deletion can also be done right on Photoshop. Photoshop provides tools for you to delete text in images, with images with simple backgrounds or complex backgrounds. The following article will show you how to delete text in photos in Photoshop.

1. How to insert 3D letters into images
2. Instructions for designing websites in Photoshop
3. Instructions to separate photos from the background in Photoshop

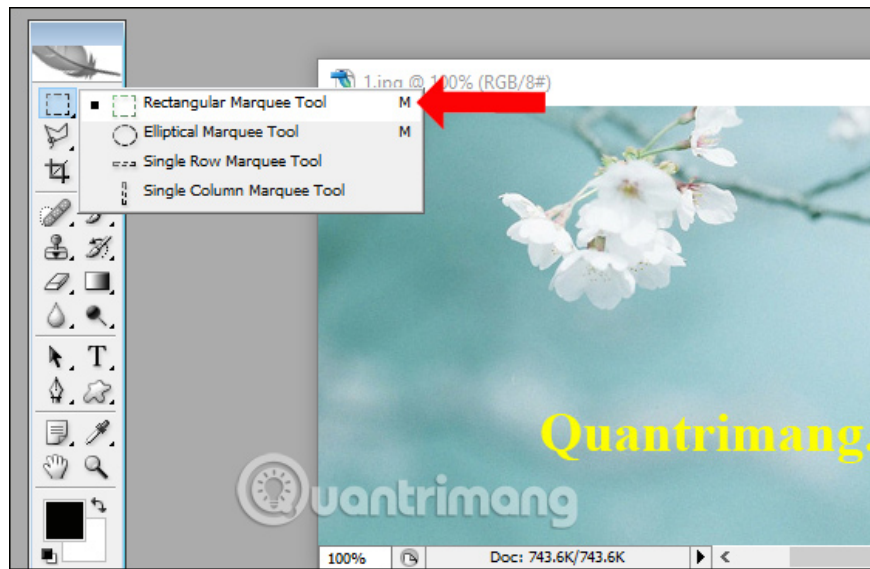

1. Delete text on less detailed images in Photoshop

For example, for example, the image below has a simple background, not much detail and the text is also written on a simple photo background.

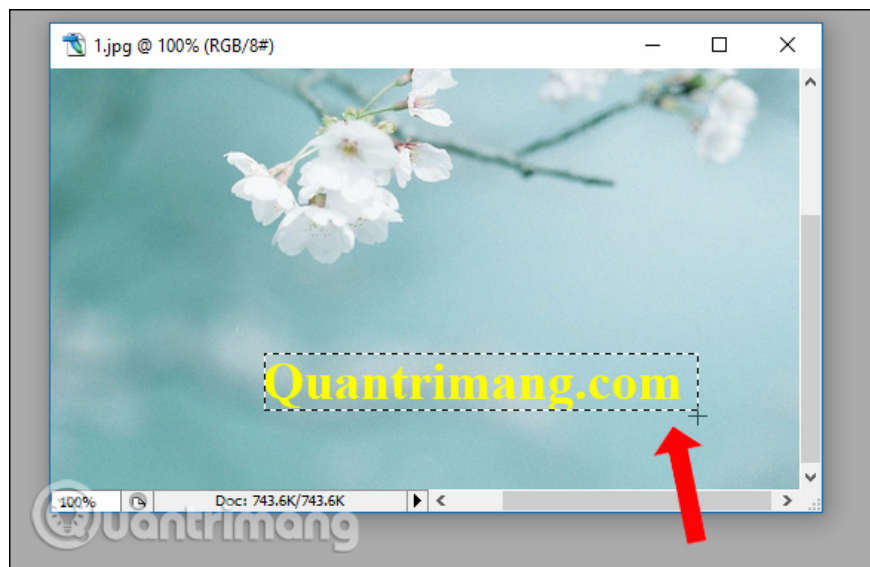

Step 1:

In Photoshop interface, right-click on the dashed square icon and select **Rectangular Marquee Tool** or press M shortcut to open the zoning tool.

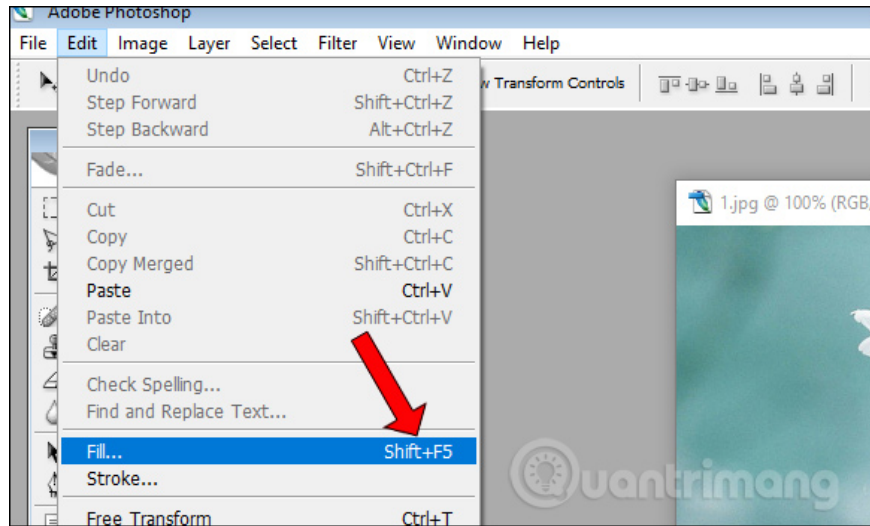

Step 2:

Then click the left mouse button and select **the text area and circle it** on the image.

Step 3:

Click on **the Edit item** above the toolbar and then select **the Fill section**, or you can press the shortcut Shift + F5 to open the Content Aware tool.

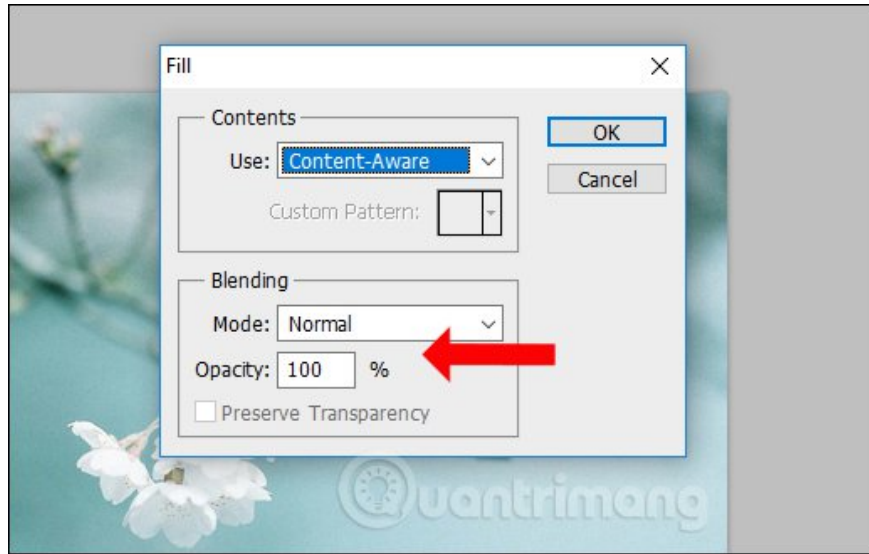

Step 4:

In the new interface, click on **Content-Aware** in the Contents section.

For the Blending part we set the Mode to Normal and Opacity to 100%. Then click OK to proceed with deleting the text in the image.

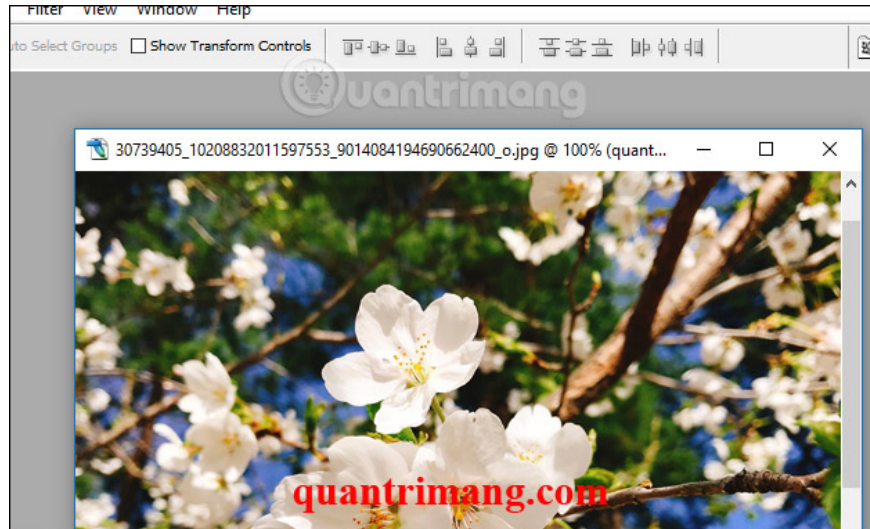

As a result, you will get the image deleted as shown below. Images will not be blurred when deleting text.

2. Delete detailed text background images on Photoshop

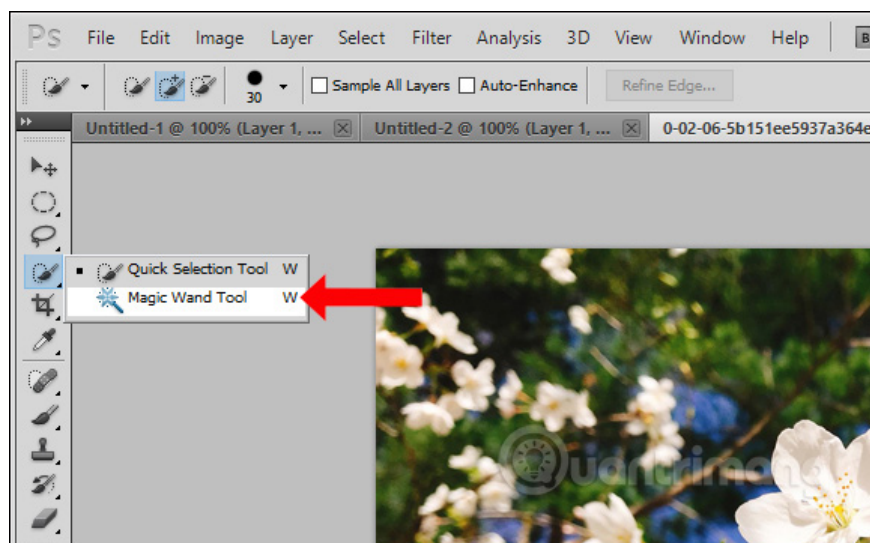

With more detailed images, deleting words will be relatively manual and more manipulative. We will not use simple tools like above. If deleted as above image will be blurry, lost aesthetics and professionalism.

For example, we will delete the insertion image as below.

Step 1:

In the toolbar click **the Magic Wand Tool icon** or use the W shortcut to localize the text in the image.

Step 2:

Users need to **click Shift** and click the tool on **each word in the image** . You need to hold down the Shift key until you select each letter. Note when selecting the word to select enough strokes for the letter.

Step 3:

Then click on **Edit** , choose the **Fill** option and also select **Content-Aware** to delete the text.

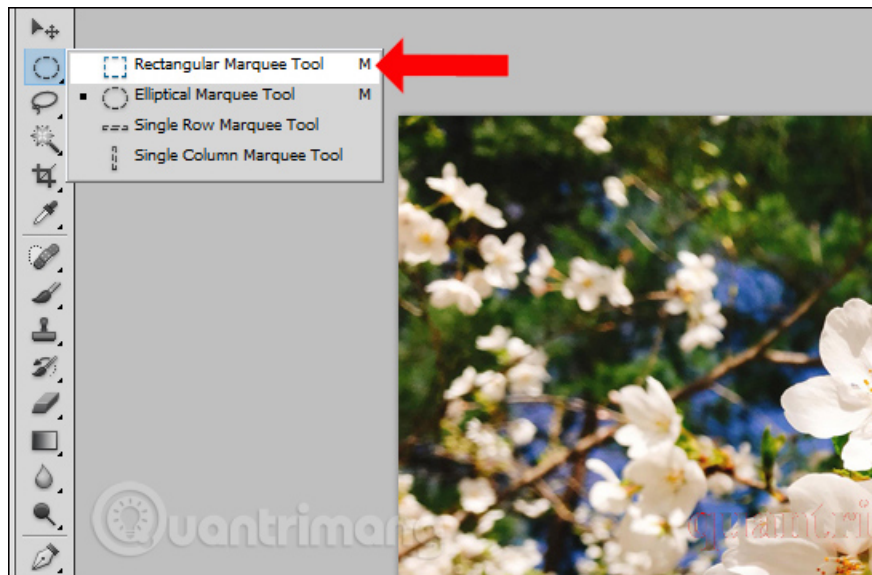

Step 4:

When you click OK, the text will basically be deleted and leave the red blur as shown below.

Continue to click on **the Rectangular Marquee Tool** tool to square the blurred text in the image to delete. Complete the area and click **Edit and** select **Fill** and select **Content-Aware** tool to delete the blurred area.

If you delete a large area that is blurred, you should select a smaller area and delete it gradually, the image will not be blurred.

The image results after deleting the text will be as follows.

To delete text images in Photoshop, we'll basically use Content-Aware tools. However, if the image has a simple background, the background does not have much detail, you can always use this tool. But if the image is more detailed, the user is forced to delineate each letter and then delete it.
