

How to delete the taskbar on the taskbar in Windows 10

Windows includes a special desktop toolbar called the taskbar, which displays at the bottom of the display by default. This guide will show you how to delete the toolbar from the taskbar on Windows 10.

Windows includes a special desktop toolbar called the taskbar, which displays at the bottom of the display by default. The taskbar allows you to find, view, open and switch between your applications. You can also see the date and time, system icons and items running in the background on the notification area.

You can make the taskbar look the way you want it, manage your calendar, pin your favorite apps to it, resize, change the position on the screen, and specify how the taskbar buttons together when you open multiple windows.

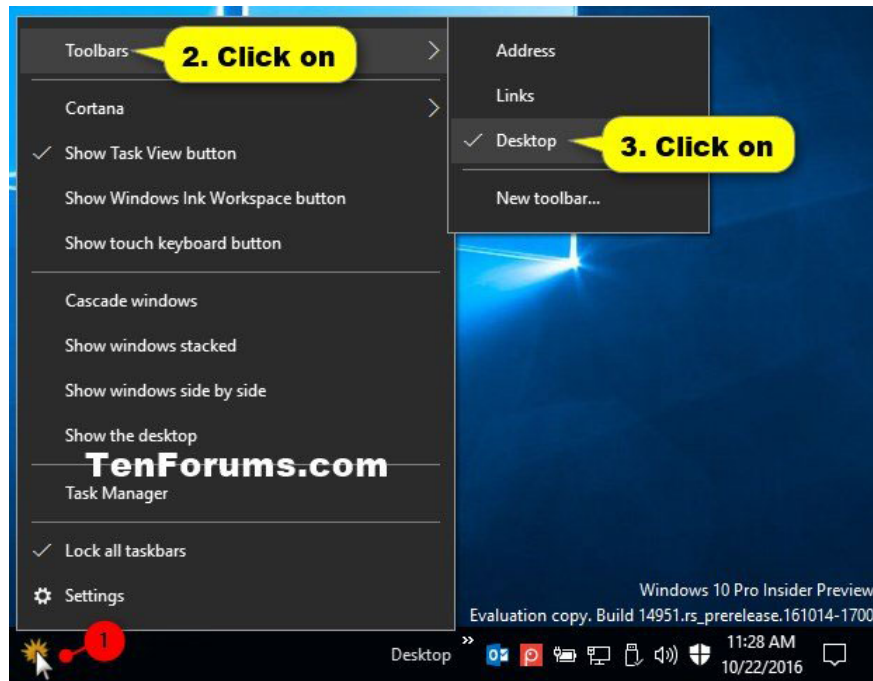

You can also add toolbars to the taskbar. The default toolbars include **Address** ([link](#)), **Links** ([link](#)), **Desktop** and any new (customized) toolbars added by the user or application.

If you have multiple monitors connected to your PC, the toolbar will only display on the taskbar on the home screen by default.

This guide will show you how to delete the toolbar from the taskbar on Windows 10.

Remove the toolbar from the taskbar using the taskbar context menu

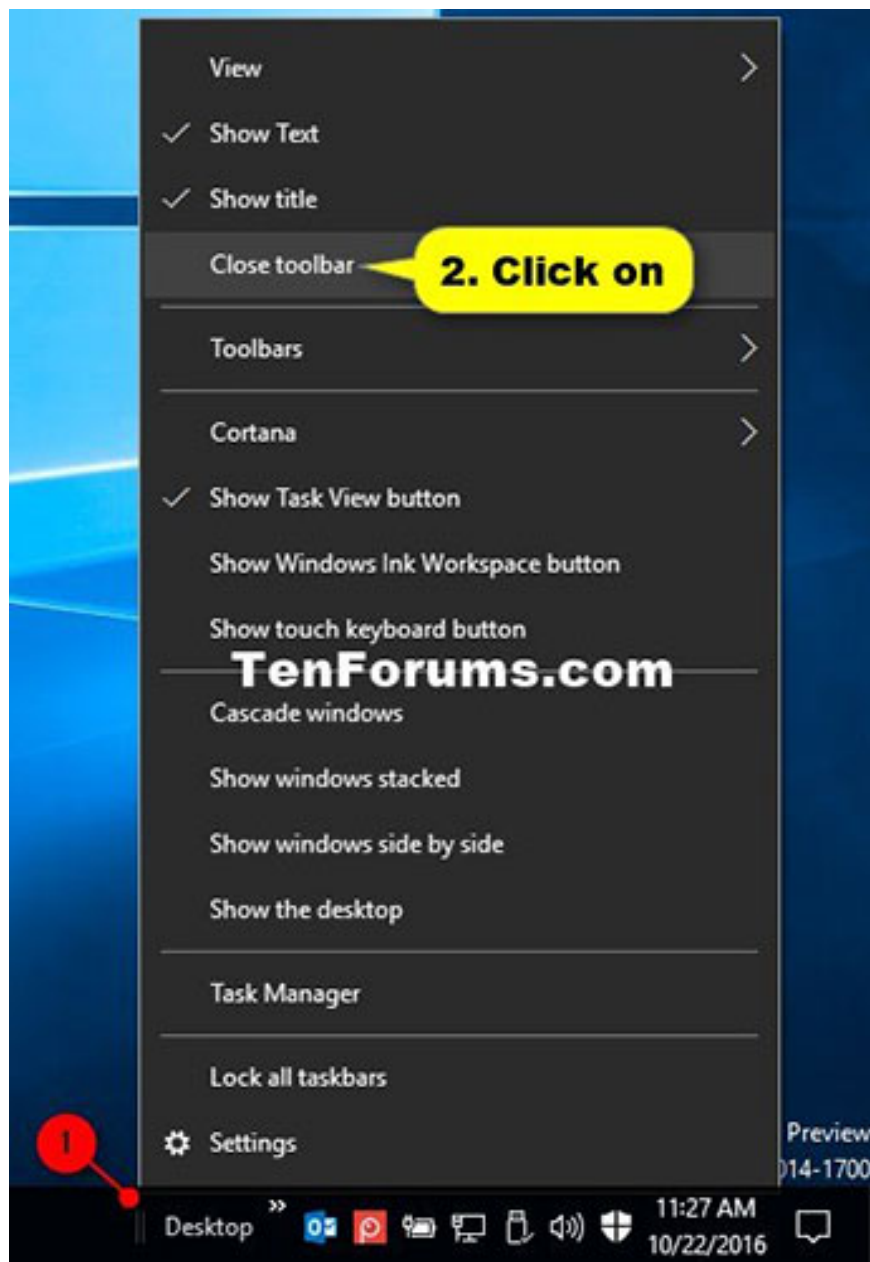

Right-click or hold and hold on the taskbar, click **Toolbars** , and then click the selected toolbar (for example, **Desktop**) you want to delete.

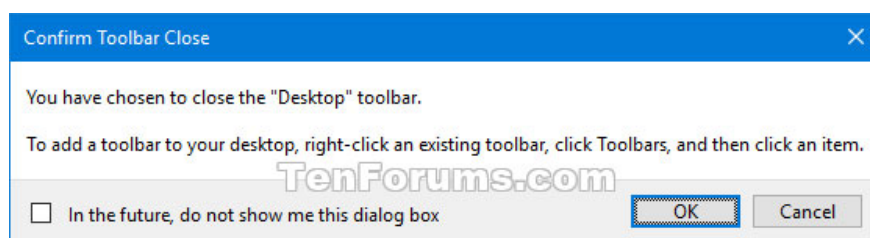

Remove the toolbar from the taskbar using the taskbar context menu

Remove the toolbar from the taskbar using the toolbar's separator context menu

1. Unlock the taskbar if not already done.
2. Right-click or click and hold the separator on the taskbar just to the left of the toolbar (eg **Desktop**) you want to delete and click the **Close toolbar** .

Click the Close toolbar
3. Click **OK** to confirm.

Click OK to confirm
