

How to delete trash automatically on Mac

Since macOS 10.12 Sierra, Apple has added the ability to automatically delete trash after 30 days, helping to free up disk space and minimize errors caused by storing too many junk files in the machine. Here is the fastest way to enable this feature.

The trash in your Mac is always cluttered with old files, you always forget to delete files in the trash and annoying, these old files occupy a small amount of space. Don't worry, with just a few basic steps, Apple will automatically empty the trash for your Mac.

Since macOS 10.12 Sierra, Apple has added the ability to automatically delete trash after 30 days, helping to free up disk space and minimize errors caused by storing too many junk files in the machine. This feature will be turned on quite easily, but finding where it is hidden is a bit cumbersome processing phase. Here's the quickest way to turn on the automatic trash removal feature on Mac.

First, click **Finder** on Mac. In the menu bar at the top of the screen, click the **Finder** menu and select **Preferences** .

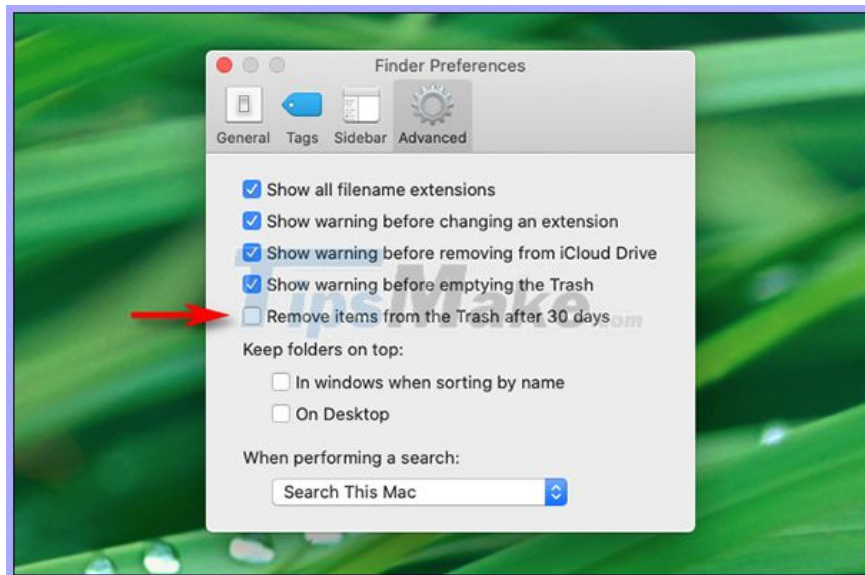

Finder> Preferences

When the **Finder Preferences** window pops up, click the **Advanced** button .

In Finder Preferences select Advanced

In the **Advanced** options , look for ' **Remove items from the Trash after 30 days** ' and check the box next to it.

Check the Remove items option

When the installation is completed, macOS will automatically delete all your files every 30 days. If you want to turn this off, go to **Finder** and **Preferences** again, uncheck the ' **Remove items from the Trash after 30 days** ' option.

If you want to have more options to free up space on your Mac, try deleting files that repeatedly delete cache files or using utility apps from outside.

Good luck!
