

How to design profile photos on Profile Pic Maker for free

Website Profile Pic Maker will design profiles for the website, create online logos for social networks, help you get more choice of website logos, profile photos more personal.

We can select profile photos or any image on Profile Pic Maker, and the website can also split the online background to create dozens of different photo templates. The website also provides more options for us to design our own logo image such as color or shadow effect. The following article will guide you how to create a profile picture on Profile Pic Maker.

How to create a logo on Profile Pic Maker

Step 1: We access the link [here](#) to visit the Profile Pic Maker website. At the interface of the page you click on the **plus icon** to upload images.

Step 2: Then the website proceeds to upload the image and split the background for the image. We will see different logo designs to choose from. The background image will be changed automatically and you just need to find the right logo style you want. To **download any profile picture**, you just need to click on the **blue arrow**

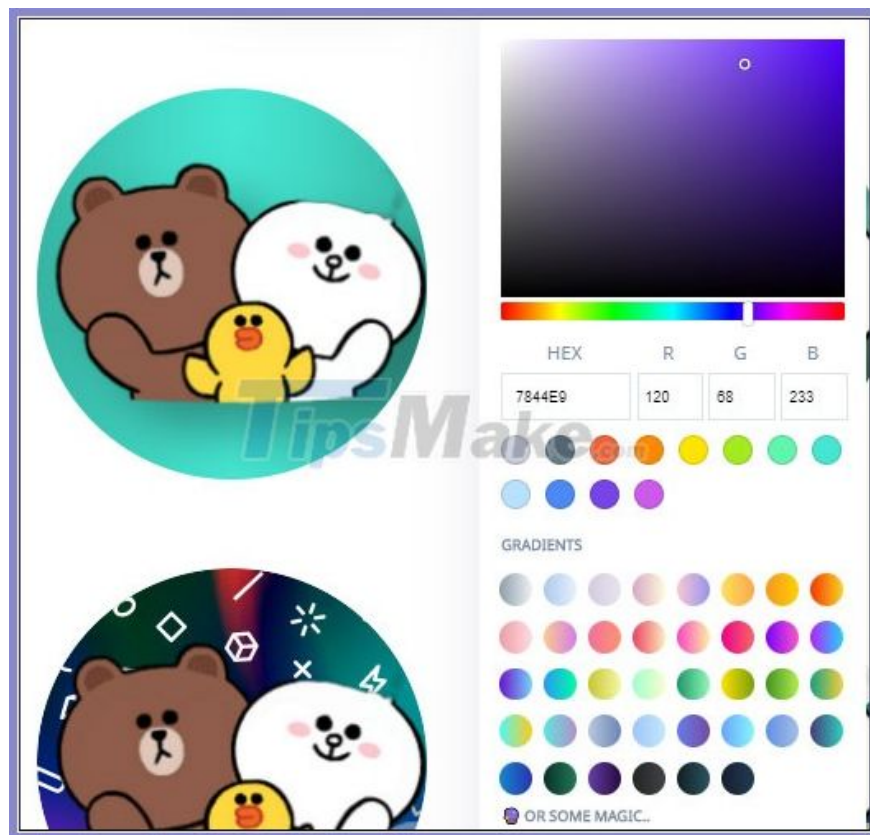

icon . The image is downloaded in PNG format.

The eye icon will help you see how your logo looks on platforms.

Step 3: In case you want to **design the logo yourself** , click **Adjust photo** to zoom, rotate the uploaded photo. Then choose **Colors** to change the color of the logo and if you want to add shadows to the logo press **Shadows** .

Immediately the logo will also be changed according to the design you have chosen.
