

# How to dial the Android phone screen using DU Recorder

You just need a few easy steps to get back to your Android phone screen with DU Recorder.

Returning to the phone screen on two popular mobile platforms is different between Android and iOS. On iOS devices, you already have a recording tool in Action Center and just turn it on to record.

While Android does not have a tool to record the screen, but in CH Play there are many tools to help you get back to your screen easily. DU Recorder is one of the most easy-to-use and many options for returning to Android screen. Here's how to return to the Android screen using DU Recorder.

1. Guide to recording Android screen videos with AZ Screen Recorder
2. How to turn off the red notification turns the iPhone screen
3. Instructions for rotating screen, video game using Bandicam software

## Instructions for recording Android screen using DU Recorder

**Step 1:** Download and start the DU Recorder, you will see an orange circle icon with a camcorder, which is a tool to help you get back to the phone screen.

To go back, click on the orange icon, then click on the red dot icon.
