

How to Disable Game Bar on Windows 10

Game Bar is a new feature from Microsoft, appearing from the Windows 10 Creators Update. However, not everyone needs to use it. If you do not need it, taimienphi will guide you how to turn it off quickly.

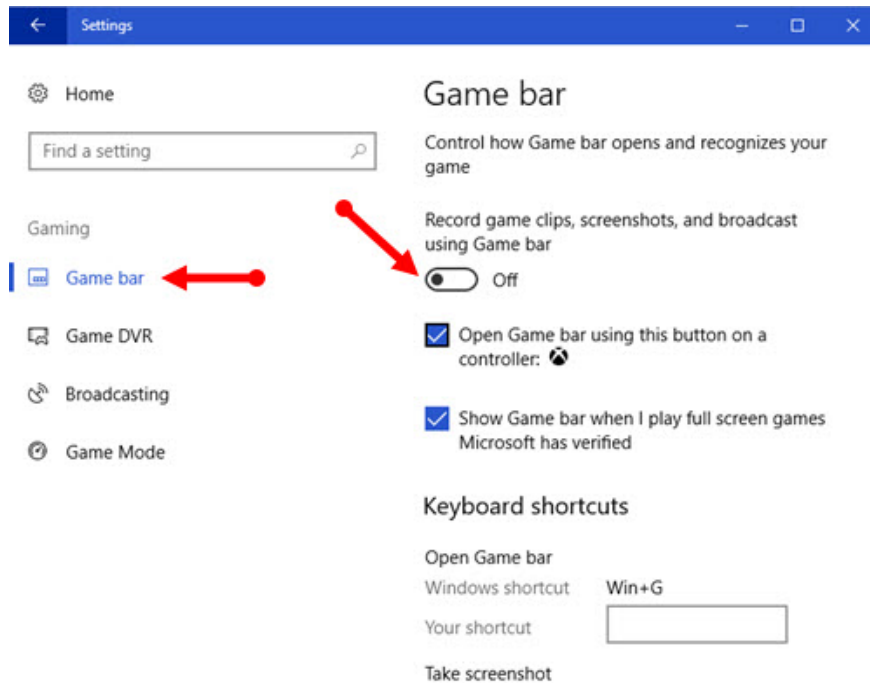

Game Bar can be annoying when it appears automatically with some software, so disabling it will help your computer run smoother.

Disable Game Bar on Windows 10 Creators Update

Step 1 : Press **Windows + I** to open **Settings** , then select **Gaming** .

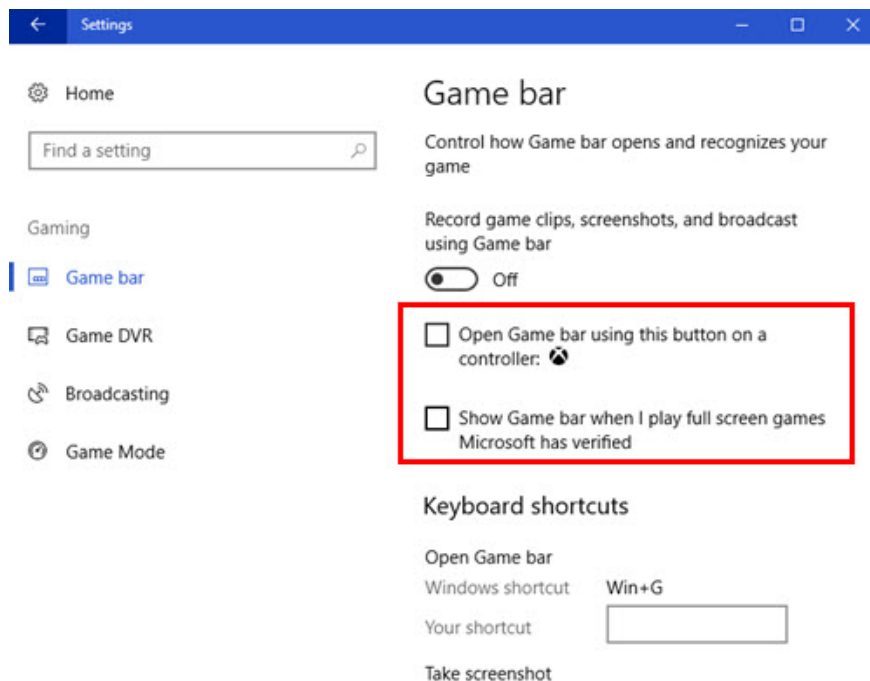

Step 2 : In the **Record game clips, screenshots, and broadcast using Game bar** section ,
Change the state from **On** to **Off** .

Step 3 : Uncheck two boxes

- Using Game bar using this button on a controller

- Show Game bar when I play full screen games Microsoft has verified

So you have completed disabling Game Bar on Windows 10.

The downside of this method is that when you want to operate the game, you have to turn the disabled features back on.

With the option available from Microsoft, you can easily disable Game Bar on Windows 10 Creators Update. You can also **enable or disable Game Mode** for each game separately for more efficient management.
