

How to display 50 emoji is often used on iPhone

To collapse the emoji list into 50 commonly used icons on iPhone, you can install MoreFrequentlyUsedEmojis tweak.

Emoticons or stickers are often used when you chat on Messenger, Zalo or send messages. On iPhone the manufacturer Apple has added many new emoticons to Apple's default percussion to add options when searching.

However for many people, the list of new emoji on iPhone is quite inconvenient to use because the amount of emoji increased significantly. If the iPhone has been jailbroken, you can install MoreFrequentlyUsedEmojis tweak, which helps to reduce the default emoji list and replace it with the usual 50 emoji. Refine settings from iOS 9 and above.

How to install MoreFrequentlyUsedEmojis iPhone tweak

Step 1:

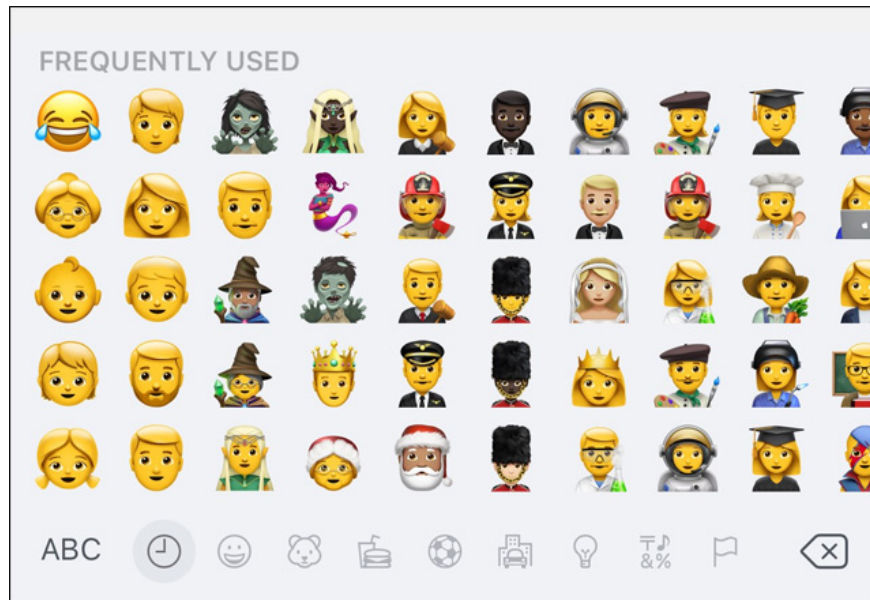

MoreFrequentlyUsedEmojis tweaks are downloaded for free on Cydia's BigBoss repository. You can search in Cydia or click directly on the link below.

<http://apt.thebigboss.org/onepackage.php?bundleid=com.ahrabie.morefrequentlyusedemojis>

Step 2:

After installing the tweak, you do not need to change or reset the options of the settings in Settings. Changes will automatically be applied on the device.

The default set of emoticons added by Apple to the percussion on the iPhone will be completely disabled. Instead, tweak and combine the 50 most frequently used emoji.

So with MoreFrequentlyUsedEmojis tweaking, users will easily select emoji on iPhone, the search process will be reduced time. The use of the iPhone keyboard to enter drafting content is also more convenient.
