

How to display full date and time on Windows 11 Taskbar

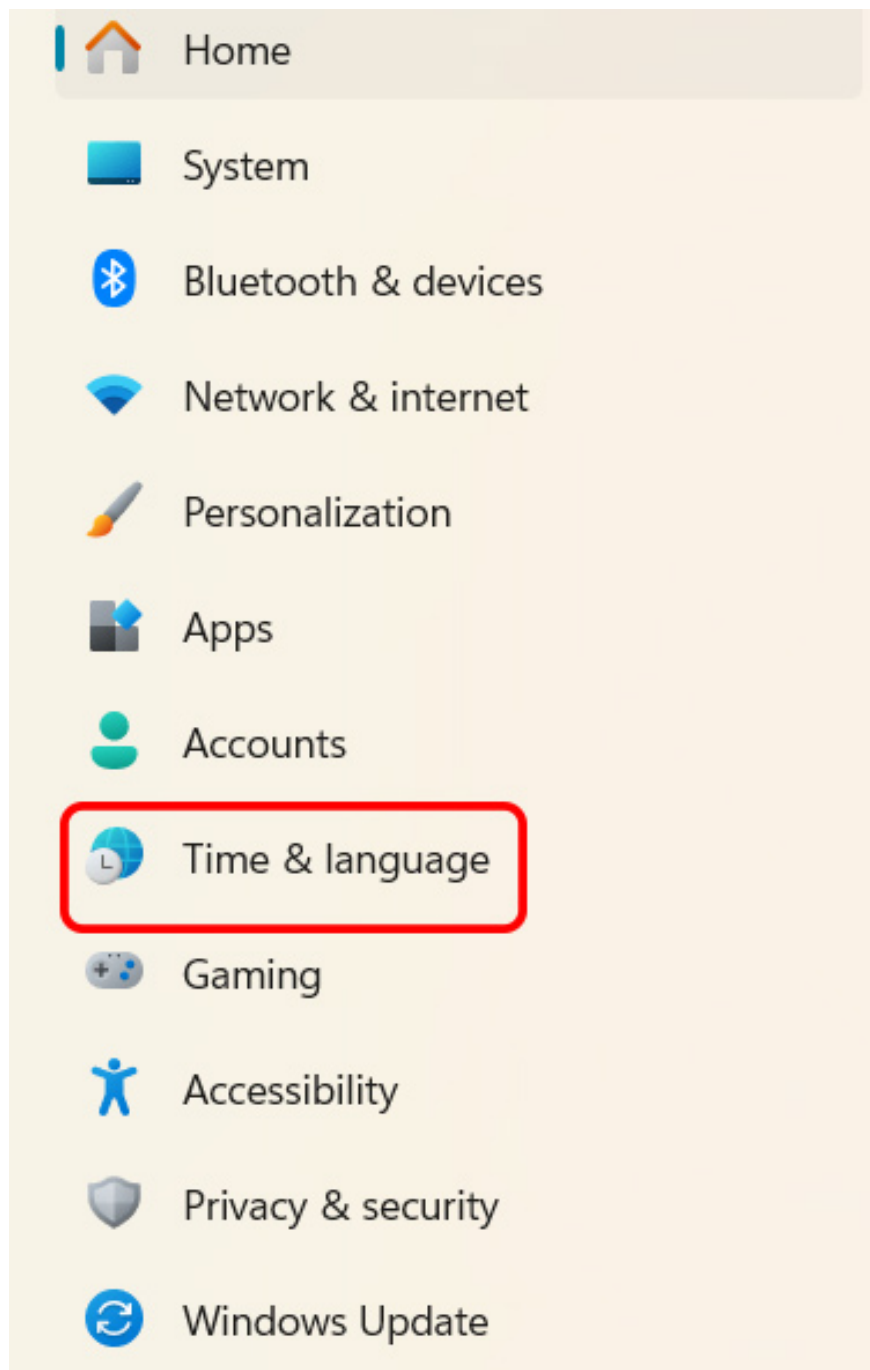

Recent Windows updates have changed the way the condensed date and time is displayed. If your computer is experiencing this, follow the article below to display the full date and time on the Windows 11 Taskbar.

A recent Windows update has changed the way the date and time are displayed on the Windows 11 taskbar. The date and time are now displayed in a shortened format so you don't see the year and the time is only displayed in 24-hour format. If your computer is experiencing this, you can follow the article below to display the full date and time on the Windows 11 Taskbar

Instructions to display full date and time on Windows 11 Taskbar

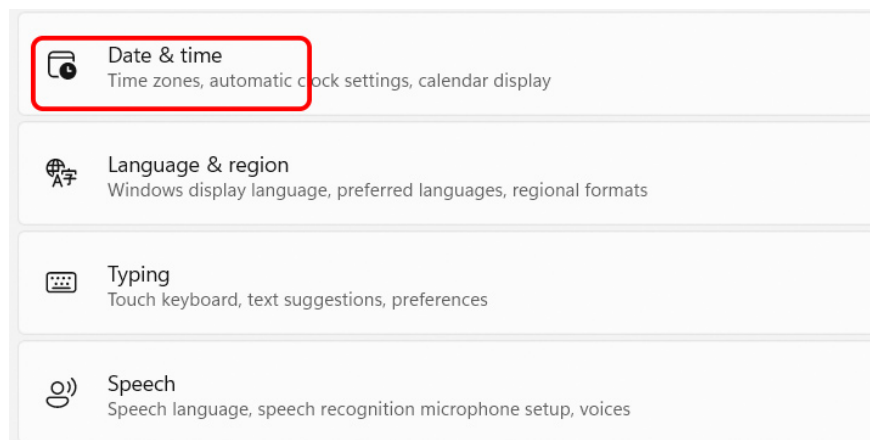

Step 1:

Press the **Windows + I** key combination to open the Settings interface on your computer. Next, click on **Time and Language** in the list on the left of the interface.

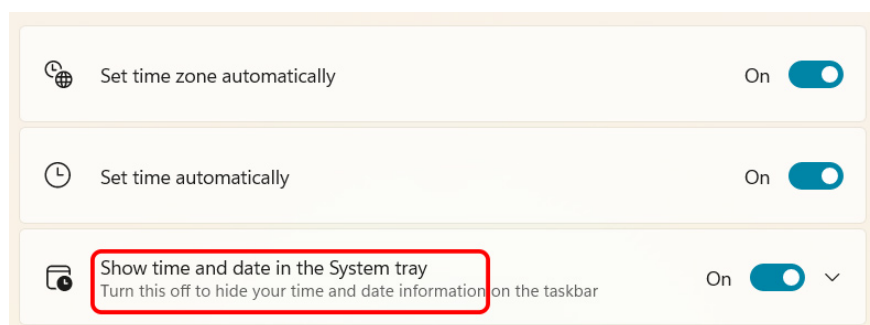

Step 2:

Look at the content next to it and click on **Date and Time** to manage the time on your Windows 11 computer.

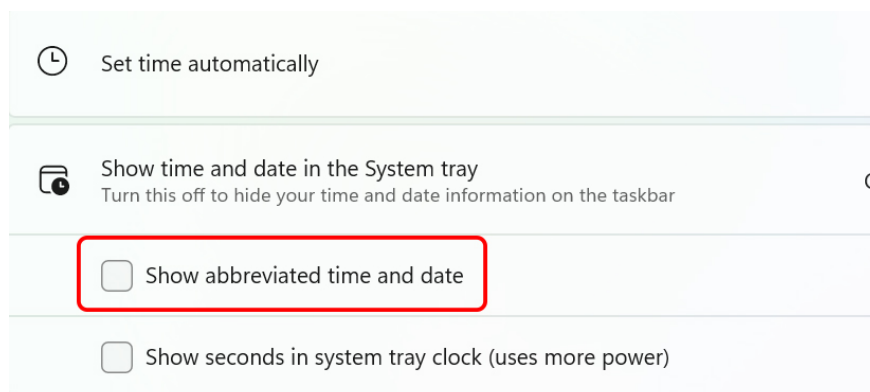

Step 3:

Switch to the new interface, users **click on Show data and time in the system tray** to expand the date and time display settings on the Windows 11 Taskbar.

Step 4:

We **uncheck the Show Abbreviated Time and Date setting** as shown to fully display the date and time on the Windows 11 Taskbar.

In addition to changing the date format, you can choose to display seconds on the clock on the Windows Taskbar. However, enabling this feature will cause your computer to consume more power.
