

How to double-tap to unlock your Android phone screen.

The double-tap to wake screen feature is pre-installed by most Android manufacturers on their devices, allowing users to quickly and conveniently view information on their phones without unlocking the screen or pressing the physical power button as usual.

The double-tap to wake screen feature on Android phones is included by many manufacturers in their products. However, depending on the phone model, users will need to use different methods to activate it.

Double-tap to unlock your Android phone screen.

In this article, Taimienphi will compile and share with you how to double-tap to unlock the screen on most popular Android phone models currently available.

With most current Android phones, users can activate the **double-tap to wake screen** feature by following these steps.

Step 1: First, go to **Settings** from your device's home screen;

Step 2: In the Settings screen that appears, select **Display** ;

The instructions were performed by Taimienphi on a **Redmi Note 4** phone . The process may differ slightly for other Android devices; for more detailed information, please refer to the following content.

Asus phones: Go to **Settings**, select **Zenmotion** , then activate the **Screen On/Off** feature .

Oppo phones: Users go to **Settings** , then select **Gestures & motion** . Continue by tapping **Gestures when screen is off** and set up **Double tap to wake screen** ;

Lenovo phones: To activate the **double-tap to wake screen** feature , you need to go to **Settings** , tap the **Personal** folder , and then select **Double tap to turn screen on/off** .

HTC phones: In the **device's Settings** , select **Display & gestures** . Then turn on **Smart Activation** .

Sony phones: **On the Settings** screen, select the **Display** folder. In the new window that appears, enable **Tap to turn on** ;

Note: For LG phone models specifically, this feature is already enabled by default; users do not need to activate it themselves.

In summary, Taimienphi has guided you through two simple steps to quickly and conveniently activate the **double-tap to unlock feature on** your Android phone. For Android phones that don't support this feature, users can download and install applications from Google Play, which Taimienphi will introduce in a future article. If you use an iPhone, you can refer to how to double-tap to unlock your iPhone here.

I wish you success!
